FOR ALL TEXTURE TYPES

how to: **PRESS AGENT**

STEP 1:

apply shampoo

1. Emulsify Shampoo in hands
2. Massage into wet hair and lather
3. Rinse thoroughly - repeat if necessary

♥ Amount varies based on density & hair length

Lightweight but lathers

STEP 2:

apply conditioner

1. After shampooing with **Press Agent Thermal Smoothing Shampoo**, pour a generous amount into hand
2. Massage from midshaft to ends with open fingers to detangle
3. Wait 3-5 minutes
4. Rinse thoroughly

STEP 3:

cocktail styling cream & serum

1. Dispense two parts **Press Agent Raincoat Styling Cream** to one part **Press Agent Raincoat Styling Serum** in hands & emulsify
2. Apply to damp or wet hair, starting at the ends & working your way up to the root
3. Reapply as necessary based on density of hair
4. Adjust amounts based on straightening needs & texture type

♥ Lower Texture Types:
2 parts cream: 1 part serum

♥ Higher Texture Types:
1 part cream: 1 part serum

STEP 4:

blowdry

1. Stretch and dry using a comb attachment

STEP 5:

press with flat iron

♥ Style with any additional heat tools, depending on the style

stylist
testimonials

”

Press Agent Raincoat Styling Cream is the best blow-drying cream on the market, it's super light weight and doesn't leave a coating on the hair.

Jamal Edmonds

”

The **Press Agent Conditioner's** new spread and melt technology save you and your clients time and money.

Al Campbell

”

With **Press Agent Shampoo** being a lightweight sulfate free system, it's the perfect combo of color care and moisture for color treated texture wanting to achieve a healthy sleek style

Rachel Redd

FAQS

Q: WILL MY COILS, CURLS, AND WAVES RETURN AFTER I USE PRESS AGENT?

A: Yes, this is a temporary smoothing product that aids in reducing frizz, protects from heat damage, and maintains moisture.

Q: CAN I USE THIS IF MY HAIR IS CHEMICALLY TREATED WITH KERATIN, RELAXER, OR COLOR?

A: Yes, the Press Agent Shampoo and Conditioner are sulfate-free and moisturizing, so work great for chemically treated hair.

Q: DO I NEED TO USE ALL STEPS OF THIS SERVICE TO SEE A BENEFIT?

A: While we recommend using all steps for maximum benefit, each formula was created to also have their own singular benefits. Feel free to use on their own as you wish!

Q: CAN PRESS AGENT BE USED WITH ANY HEAT REGIMEN?

A: Yes! Because of the 450°F and UV protection benefits, Press Agent is great for any heat tool you are using. It will keep coils, curls, and waves moisturized and protected.

Q: CAN PRESS AGENT BE USED ON ALL TEXTURE TYPES?

A: Yes! Because of the customizable approach to using the cream and the serum, you can dial up the cream for tighter textures, and add more serum at the end. The Shampoo and Conditioner are also incredibly light weight, but effective at controlling frizz, so any texture type will love it.

Q: HOW DOES A SILK PRESS DIFFER FROM A BLOWOUT SERVICE?

A: In many ways it doesn't! With a blowout, you're styling with only a blowdryer. With a Silk Press, the hair is blown out, and then "pressed" with a flat iron. Higher texture types usually need the added step of the flat iron for longevity and a smoother, more silkier finish.

Q: DOES PRESS AGENT REPLACE THERMASMOOTH OR HEAT SCREEN?

A: Yes, Press Agent will replace the Thermasmooth system, while Heat Screen remains as a strong, stand-alone heat protectant for ALL thermal needs.
