Valeurs biologiques limites	Aucune limite d'exposition biologique observée pour les ingrédients.
Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).
Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques
Protection respiratoire	Pour usage industriel seulement. Si les niveaux admissibles sont dépassés, utiliser un filtre mécanique / une cartouche contre les vapeurs organiques NIOSH ou un respirateur à adduction d'air.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Forme	Aérosol
Couleur	Non disponible.
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	Non disponible.
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 35 °C (> 95 °F) (liquide)
Point d'éclair	13.0 °C (55.4 °F) Coupelle fermée (liquide)
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.

Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Chaleur de combustion (NFPA 30B)	16.12 kJ/g
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Éviter les températures supérieures au point d'éclair. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Maux de tête. Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Toux.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

ÉTHANOL	84 % Résultat: Facilement Biodegradable Durée du test: 20 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

ÉTHANOL	-0.31
HYDROFLUOROCARBON 152A	0.75

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l’élimination

Instructions pour l'élimination	Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d’élimination des déchets autorisé. Contenu sous pression. Ne pas perforer, incinérer ou écraser. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.
Règlements locaux d’élimination	Détruire conformément àtoutes les réglementations applicables.
Code des déchets dangereux	Ce produit est inflammable (D001), utilisez le RCRA matières dangereuses lors de l’élimination.
Déchets des résidus / produits non utilisés	Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).
Emballages contaminés	Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l’étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage. Ne pas réutiliser les récipients vides.

Informations générales Éviter le transport avec des véhicules où l'espace de chargement n'est pas séparé du poste de conduite. S'assurer que le chauffeur du véhicule connaît les risques potentiels liés à la cargaison et sait ce qu'il doit faire en cas d'accident ou d'urgence. Avant de transporter des contenants du produit : S'assurer que les contenants sont solidement fixés. S'assurer que le robinet de la bouteille est fermé et ne fuit pas. S'assurer que l'écrou du bouchon de vidange du robinet ou le capuchon protecteur (s'il y a lieu) est correctement installé. S'assurer que le dispositif de protection du robinet (s'il y a lieu) est correctement installé. S'assurer une ventilation adéquate. S'assurer la conformité avec la réglementation applicable.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

ÉTHANOL (CAS 64-17-5) Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

ÉTHANOL (CAS 64-17-5) Faible priorité

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	17-Novembre-2020
Version n°	01
Classements NFPA	Santé: 2 Inflammabilité: 4 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT ZURICH FLEXIBLE HOLD HAIRSPRAY

鉴别的其他方法

SDS编号 21-91-0000152

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险	易燃气溶胶	类别 1
	加压气体	液化气体
健康危害	严重眼睛损伤/眼睛刺激性	类别 2A

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 极易燃气溶胶。 内装高压气体；遇热可能爆炸。 造成严重眼刺激。

防范说明

预防措施 远离热源/火花/明火/热表面。- 禁止吸烟。 切勿喷洒在明火或其他点火源上。 压力容器：切勿穿孔或焚烧，即使不再使用。 作业后彻底清洗。 戴防护眼罩/防护面具。

事故响应 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如仍觉眼刺激：求医/就诊。

安全储存 防日晒。存放在通风良好的地方。 不可暴露在超过50° C/122° F的温度下。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
乙醇		64-17-5	51.92
HYDROFLUOROCARBON 152A		75-37-6	35

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入	移至空气新鲜处。 如果症状持续或恶化，联络医生。
皮肤接触	用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。
眼睛接触	立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如仍觉眼刺激：求医/就诊。
经口	由于产品形状的缘故，不大可能。 若吞噬困难，联络医生或是毒物控制中心。 漱口。
最重要的症状/影响，急性和延迟性	头痛。 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 咳嗽。
指明任何需要立即就医或特殊治疗的情况	提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。
一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 抗醇型泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	内容物受压。 压力罐若接触热量或火焰，可能会爆炸。 燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	消防员必须使用标准的防护设备，包括防火外套、带面罩的头盔、手套、橡胶靴及在密闭的空间中、SCBA。
消防设备/使用说明	火灾时：如能保证安全，设法堵塞泄漏。 若货物已受热，禁止移动货物或车辆。 在不会发生危险的情况下将容器撤离火灾现场。 应使用冷水冷却容器，以防止蒸汽压力增强。 如果货物区发生大火，应尽可能使用无人操作的固定喷水管或监控喷嘴来灭火。如果没有这些灭火设备，应撤离现场，使火烧尽。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。 在不会发生危险的情况下将容器撤离火灾现场。 一旦发生火灾和/或爆炸，不得吸入烟气。
一般火灾危险	极易燃气溶胶。 内容物受压。 压力罐若接触热量或火焰，可能会爆炸。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 远离低洼区域。 许多气体比空气重，可能在低洼或狭小空间中（下水道、地下室、储罐）在地面蔓延。 清洁时，戴合适防护设备和衣物。 应急人员需要自给式呼吸设备。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 进入封闭空间前先通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	参考所附的安全技术说明和/或使用说明。 在不会发生危险的情况下阻止泄漏。 如果泄漏不能回收，将容器移至安全和开放区域。 隔离区域，直至气体散尽。 使可燃物（木材、纸张、油等）远离泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	压力容器：切勿穿孔或焚烧，即使不再使用。 若缺少喷雾按钮或是损坏则不可使用。 不要喷洒在明火或任何其它炽热的材料上。 在使用时或是在被喷表面完全干燥之前不可吸烟。 禁止切割、焊接、焊缝、钻、磨容器，或将其与热、火焰、火花或其他燃烧源接触。 在操作处置产品时，使用的所有设备必须接地。 每次使用后和放空时关闭阀门。 保护容器免受物理损坏；不要拖，拉，滚，或降落。 当移动容器时，即使是短距离，也要使用专门运输容器的拖车（推车，手推车等）。 水会吸进入容器必须被阻止。 不允许反向进入容器。 系统引入气体前净化空气。 只能使用适合该产品供压和温度的正确指定的设备。如有疑问请联系您的气体供应商。 禁止重复使用倒空的容器。 避免接触到眼睛。 避免长期暴露。 只能在通风良好的场所使用。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	类别1 悬浮颗粒。 高压储气罐。防止阳光并且不要暴露在高于50摄氏度 / 122华氏度的温度中。 不可刺，焚化或挤压。 禁止在明火、热源或其他燃烧源边操作或储存。 本材料会积聚静电，从而导致火花并且演变为点火源。 储存在密闭的容器中。 存放在通风良好的地方。 储存容器应定期检查一般情况和泄漏。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
乙醇 (CAS 64-17-5)	PEL-常期暴露极限	1900 mg/m3
		1000 ppm

美国ACGIH阈限值

组分	类型	标准值
乙醇 (CAS 64-17-5)	短期暴露极限（STEL）	1000 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
乙醇 (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

美国工作场所环境暴露水平（WEEL）指南

组分	类型	标准值
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。

呼吸系统防护 仅用於工业环境。 如果程度超过允许值，用NIOSH 机械过滤/有机蒸气筒或可提供空气的呼吸器。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 使用时严禁吸烟。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状 液体。

形状 气溶胶

颜色 无资料。

气味 特征的。

气味阈值 无资料。

pH 值 无资料。

熔点/凝固点 无资料。

初始沸点和沸程 > 35 ° C (> 95 ° F) (液体)

闪点 13.0 ° C (55.4 ° F) 闭杯闪点测定法 (液体)

蒸发速率 无资料。

易燃性（固体，气体） 不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%） 无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%） 无资料。

蒸气压 无资料。

蒸气密度 无资料。

相对密度 无资料。

溶解性

溶解性（水） 无资料。

分配系数（辛醇/水） 无资料。

自燃温度 无资料。

分解温度 无资料。

黏度 无资料。

其他信息

爆炸特性 不具有爆炸性。

燃烧热（NFPA 30B） 16.12 kJ/g

氧化特性 没有氧化性。

10. 稳定性和反应性

反应性 产品在正常的使用、储存和运输条件下是稳定的和非活性的。

化学稳定性 正常条件下物料稳定。

可能的危险反应 正常使用的条件下未见有危险反应。

避免接触的条件 远离热，热表面，火花，明火和其他点火源。 避免温度超過閃火點温度。 接触禁配物。

禁配物 强氧化剂。

危险的分解产物 没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入 持续的吸入可能是有害的。

皮肤接触 预计没有因皮肤接触导致的任何有害影响。

眼睛接触 造成严重眼刺激。

经口 预计较低的食入危害。

与物理,化学和毒物学特性有关的症状 头痛。 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 咳嗽。

毒理学效应信息

急性毒性 未知。

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

HYDROFLUOROCARBON 152A	结果: 体外和体内试验均未见致突变作用。
乙醇	结果: 体外和体内试验均未见致突变作用。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 是可能的生殖系统危害物。

发育效应

乙醇	> 20000 ppm OECD 414, 对发展没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠

生殖能力

乙醇	20700 mg/kg bw/d OECD 416, 对生育力没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
HYDROFLUOROCARBON 152A	25000 ppm 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

乙醇	1730 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
HYDROFLUOROCARBON 152A	25000 ppm OECD 453, 吸入 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 104 wk

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
HYDROFLUOROCARBON 152A (CAS 75-37-6)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	146.695 mg/l QSAR
藻类	EC50	藻类	47.755 mg/l QSAR
鱼	LC50	鱼	295.783 mg/l QSAR
乙醇 (CAS 64-17-5)			
水生的			
急性的			
其它的, 其它	IC50	以国内污水为主的活性污泥	> 1000 mg/l, 3 h
甲壳纲动物	EC50	网纹水蚤	5012 mg/l, 48 h
藻类	EC50	近头状伪蹄形藻	22200 mg/l, 96 h
鱼	LC50	呆鲦鱼	15300 mg/l, 96 h
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	9.6 mg/l, 9 D
鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	250 mg/l, 120 h OECD 212

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

乙醇	84 % 结果: 易生物降解 测试时间: 20 D

潜在的生物累积性

辛醇/水分配系数 log Kow

HYDROFLUOROCARBON 152A	0.75
乙醇	-0.31

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 内容物受压。 不可刺，焚化或挤压。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

有害废物代码 本产品在处置时是可燃的（D001）RCRA危险废物.

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。 禁止重复使用倒空的容器。

一般信息 避免使用装载室与驾驶室未分离的车辆进行运输。 确保车辆司机了解装载货物的潜在危险并知道发生事故或紧急情况时怎么做。 运输前产品容器: 确保容器摆放平稳。 确保气瓶阀紧闭不泄漏。 确保阀门出口螺帽或活塞（如有）已正确安装。 确保阀门保护装置（若有）已正确安装。 确保充分的通风。 确保符合适用的法规。

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

乙醇 (CAS 64-17-5) 适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

HYDROFLUOROCARBON 152A (CAS 75-37-6)

饮用水安全法（SDWA） 未受管制。

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

乙醇 (CAS 64-17-5)	Low priority

16. 其他信息，包括编制日期或最新修订日期

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT LOS ANGELES TOUSLE FINISHING SPRAY**

Other means of identification

SDS number 21-91-0000153

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards	Flammable aerosols	Category 1
	Gases under pressure	Liquefied gas
Health hazards	Serious eye damage/eye irritation	Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Extremely flammable aerosol. Contains gas under pressure; may explode if heated. Causes serious eye irritation.

Precautionary statement

Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use. Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage Protect from sunlight. Store in a well-ventilated place. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
HYDROFLUOROCARBON 152A		75-37-6	45
DIMETHYL ETHER		115-10-6	35
ETHANOL		64-17-5	16.63

Chemical name	Common name and synonyms	CAS number	%
ZEOLITE		1318-02-1	1

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation
Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact
Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion
Not likely, due to the form of the product. In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.

Most important symptoms/effects, acute and delayed
Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Indication of immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media
Water fog. Alcohol resistant foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

Fire fighting equipment/instructions
In case of fire: Stop leak if safe to do so. Do not move cargo or vehicle if cargo has been exposed to heat. Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.

Specific methods
Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.

General fire hazards
Extremely flammable aerosol. Contents under pressure. Pressurized container may explode when exposed to heat or flame.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Wear appropriate protective equipment and clothing during clean-up. Emergency personnel need self-contained breathing equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up
Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Isolate area until gas has dispersed. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.

Environmental precautions
Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Close valve after each use and when empty. Protect containers from physical damage; do not drag, roll, slide, or drop. When moving containers, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport containers. Suck back of water into the container must be prevented. Do not allow backfeed into the container. Purge air from system before introducing gas. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Do not re-use empty containers. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Level 1 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Store in a well-ventilated place. Stored containers should be periodically checked for general condition and leakage. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
ETHANOL (CAS 64-17-5)	PEL	1900 mg/m3 1000 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	STEL	1000 ppm	
ZEOLITE (CAS 1318-02-1)	TWA	1 mg/m3	Respirable fraction.

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3 1000 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	TWA	1880 mg/m3 1000 ppm
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3 1000 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection

Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection

Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing.
Respiratory protection	Applicable for industrial settings only. If permissible levels are exceeded use NIOSH mechanical filter / organic vapor cartridge or an air-supplied respirator.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C) (Liquid)
Flash point	86.0 °F (30.0 °C) Closed Cup (Liquid)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Heat of combustion (NFPA 30B)	16.8 kJ/g
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.

Hazardous decomposition products No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact No adverse effects due to skin contact are expected.

Eye contact Causes serious eye irritation.

Ingestion Expected to be a low ingestion hazard.

Symptoms related to the physical, chemical and toxicological characteristics Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Information on toxicological effects

Acute toxicity Not known.

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit
DIMETHYL ETHER	Result: Contact with liquid form may cause frostbite.
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

ETHANOL	OECD 405 Result: Irritating Species: Rabbit
DIMETHYL ETHER	Result: Contact with liquid form may cause frostbite.
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

DIMETHYL ETHER	Result: In vitro and in vivo tests did not show mutagenic effects.
ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.
HYDROFLUOROCARBON 152A	Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

ZEOLITE (CAS 1318-02-1)	3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Possible reproductive hazard.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat
DIMETHYL ETHER	40000 ppm OECD 414 Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 Result: NOAEC Species: Rat

Reproductivity

DIMETHYL ETHER	2.5 % OECD 452, No effects on fertility Result: NOAEL Species: Rat
ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm OECD 453, Inhalation Result: NOAEC Species: Rat Test Duration: 104 wk
DIMETHYL ETHER	47106 mg/m3 air OECD 452, Inhalation Result: NOAEC Species: Rat Test Duration: 2 yr

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results

HYDROFLUOROCARBON 152A	0.75

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

General information Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers: Ensure that containers are firmly secured. Ensure cylinder valve is closed and not leaking. Ensure valve outlet cap nut or plug (where provided) is correctly fitted. Ensure valve protection device (where provided) is correctly fitted. Ensure adequate ventilation. Ensure compliance with applicable regulations.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

DIMETHYL ETHER (CAS 115-10-6)	Listed.
ETHANOL (CAS 64-17-5)	Listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT LOS ANGELES TOUSLE FINISHING SPRAY
Synonyms	None.
SDS number	21-91-0000153
Product code	1241009 A
Issue date	11-17-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards

Aerosols	Category 1	H222 - Extremely flammable aerosol. H229 - Pressurized container: May burst if heated.

Health hazards

Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.

Hazard summary

Aerosol. CONTENTS UNDER PRESSURE.
Pressurized container may explode when exposed to heat or flame. Causes serious eye irritation. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: DIMETHYL ETHER, HYDROFLUOROCARBON 152A

Hazard pictograms

Signal word Danger

Hazard statements

H222	Extremely flammable aerosol.
H229	Pressurized container: May burst if heated.
H319	Causes serious eye irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P211	Do not spray on an open flame or other ignition source.
P251	Do not pierce or burn, even after use.
P264	Wash thoroughly after handling.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage

P410 + P412	Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 3% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 38% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
HYDROFLUOROCARBON 152A	45	75-37-6 200-866-1	01-2119474440-43	-	
Classification:	Flam. Gas 1;H220, Press. Gas;H280				
DIMETHYL ETHER	35	115-10-6 204-065-8	01-2119472128-37	603-019-00-8	#
Classification:	Flam. Gas 1;H220, Press. Gas;H280				
ETHANOL	16,63	64-17-5 200-578-6	01-2119457610-43	603-002-00-5	
Classification:	Flam. Liq. 2;H225, Eye Irrit. 2;H319				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards Extremely flammable aerosol.

5.1. Extinguishing media

Suitable extinguishing media Alcohol resistant foam. Dry powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

Special fire fighting procedures Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Level 1 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	TWA	1920 mg/m3
		1000 ppm

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1907 mg/m3
		1000 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	VME	1920 mg/m3
Regulatory status: Regulatory indicative (VRI)		
		1000 ppm
Regulatory status: Regulatory indicative (VRI)		
ETHANOL (CAS 64-17-5)	VLE	9500 mg/m3
Regulatory status: Indicative limit (VL)		
		5000 ppm
Regulatory status: Indicative limit (VL)		
	VME	1900 mg/m3
Regulatory status: Indicative limit (VL)		
		1000 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	TWA	1900 mg/m3
		1000 ppm
ETHANOL (CAS 64-17-5)	TWA	380 mg/m3
		200 ppm

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	AGW	1900 mg/m3
		1000 ppm
ETHANOL (CAS 64-17-5)	AGW	380 mg/m3
		200 ppm

Italy. Occupational Exposure Limits

Components	Type	Value	Form
DIMETHYL ETHER (CAS 115-10-6)	TWA	1920 mg/m3	
		1000 ppm	
ETHANOL (CAS 64-17-5)	STEL	1000 ppm	
ZEOLITE (CAS 1318-02-1)	TWA	1 mg/m3	Respirable fraction.

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	TWA	1000 mg/m3
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	TWA	1920 mg/m3
		1000 ppm
ETHANOL (CAS 64-17-5)	STEL	1910 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
		1000 ppm

EU. Indicative Exposure Limit Values in Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	TWA	1920 mg/m3
		1000 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Form Aerosol.

Color Not available.

Odor Characteristic.

Odor threshold Not available.

pH Not available.

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C) (Liquid)

Flash point 86,0 °F (30,0 °C) Closed Cup (Liquid)

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	
Heat of combustion (NFPA 30B)	16,8 kJ/g

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
DIMETHYL ETHER (CAS 115-10-6)		
Acute		
Inhalation		
Gas		
LC50	Rat	164000 ppm, 4 h
ETHANOL (CAS 64-17-5)		
Acute		
Dermal		
LD50	Rabbit	> 20000 mg/kg
Inhalation		
Vapor		
LC50	Rat	124,7 mg/l, 4 h OECD 403
Oral		
LD50	Rat	10470 mg/kg OECD 401

Components	Species	Test Results
HYDROFLUOROCARBON 152A (CAS 75-37-6)		
Acute		
Inhalation		
Gas		
ALC	Rat	> 437500 ppm, 4 h

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit
DIMETHYL ETHER	Result: Contact with liquid form may cause frostbite.
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

ETHANOL	OECD 405 Result: Irritating Species: Rabbit
DIMETHYL ETHER	Result: Contact with liquid form may cause frostbite.
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

DIMETHYL ETHER	Result: In vitro and in vivo tests did not show mutagenic effects.
ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.
HYDROFLUOROCARBON 152A	Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat
DIMETHYL ETHER	40000 ppm OECD 414 Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 Result: NOAEC Species: Rat

Reproductivity

DIMETHYL ETHER	2,5 % OECD 452, No effects on fertility Result: NOAEL Species: Rat
ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm OECD 453, Inhalation Result: NOAEC Species: Rat Test Duration: 104 wk
DIMETHYL ETHER	47106 mg/m3 air OECD 452, Inhalation Result: NOAEC Species: Rat Test Duration: 2 yr

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
DIMETHYL ETHER (CAS 115-10-6)			
Aquatic			
Acute			
Algae	EC50	Green algae	154,917 mg/l, 96 h QSAR
Crustacea	EC50	Daphnia magna	> 4400 mg/l, 48 h
Fish	LC50	Poecilia reticulata	> 4100 mg/l, 96 h
Other	EC10	Pseudomonas putida	> 1600 mg/l
ETHANOL (CAS 64-17-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustacea	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h
Fish	LC50	Pimephales promelas	15300 mg/l, 96 h
Other	IC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h
Chronic			
Crustacea	NOEC	Daphnia magna	9,6 mg/l, 9 d
Fish	NOEC	Danio rerio	250 mg/l, 120 h OECD 212
HYDROFLUOROCARBON 152A (CAS 75-37-6)			
Aquatic			
Acute			
Algae	EC50	Algae	47,755 mg/l QSAR
Crustacea	EC50	Daphnia	146,695 mg/l QSAR
Fish	LC50	Fish	295,783 mg/l QSAR

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

DIMETHYL ETHER	5 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d
ETHANOL	84 % Result: Readily Biodegradable Test Duration: 20 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

DIMETHYL ETHER	0,1
ETHANOL	-0,31
HYDROFLUOROCARBON 152A	0,75

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

Substance Global Warming Potential per (Annex IV), Regulation 517/2014/EU on fluorinated greenhouse gases, as amended

DIMETHYL ETHER (CAS 115-10-6) 1

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

DIMETHYL ETHER (CAS 115-10-6)
ETHANOL (CAS 64-17-5)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H220 Extremely flammable gas. H225 Highly flammable liquid and vapor. H280 Contains gas under pressure; may explode if heated. H319 Causes serious eye irritation.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT LOS ANGELES TOUSLE FINISHING SPRAY**

Otros medios de identificación

Número de FDS 21-91-0000153

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos	Aerosoles inflamables	Categoría 1
	Gases a presión	Gas licuado
Peligros para la salud	Lesiones oculares graves/irritación ocular	Categoría 2A

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Peligro

Declaración de peligro Aerosol extremadamente inflamable. Contiene gas a presión; peligro de explosión en caso de calentamiento. Provoca irritación ocular grave.

Consejos de prudencia

Prevención Mantener alejado de fuentes de calor, chispas, llama abierta o superficies calientes. - No fumar. No pulverizar sobre una llama abierta u otra fuente de ignición. Recipiente a presión: no perforar ni quemar, aun después del uso. Lavarse concienzudamente tras la manipulación. Llevar protección ocular/facial.

Respuesta En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. Si persiste la irritación ocular: Consultar a un médico.

Almacenamiento Proteger de la luz del sol. Almacenar en un lugar bien ventilado. No exponer a temperaturas superiores a 50 °C/122°F.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
HYDROFLUOROCARBON 152A		75-37-6	45
ÉTER METILICO		115-10-6	35
ETANOL		64-17-5	16.63
ZEOLITA		1318-02-1	1

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Si persiste la irritación ocular: Consultar a un médico.

Ingestión Poco probable debido a la forma del producto. En el improbable caso de que hubiera tragado producto, llame a un centro toxicológico o a un médico. Enjuagarse la boca.

Principales síntomas y efectos, agudos y retardados Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa.

Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente Provea las medidas de apoyo generales y de tratamiento sintomático. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.

Información general Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados Neblina de agua. Espuma resistente al alcohol. Polvo químico seco. Dióxido de carbono (CO2).

Medios de extinción no apropiados No utilice chorro de agua, pues extendería el fuego.

Peligros específicos que presenta el producto químico Contenido bajo presión. El envase a presión puede explotar cuando se expone al calor o a la llama. En caso de incendio se pueden formar gases nocivos.

Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios Los bomberos deben utilizar un equipo de protección estándar incluyendo chaqueta ignífuga, casco con careta, guantes, botas de goma, y, en espacios cerrados, equipo de respiración autónomo (SCBA, según sus siglas en inglés).

Equipo/Instrucciones para la extinción de incendios En caso de incendio: Detener la fuga, si no hay peligro en hacerlo. No mueva la carga o el vehículo si la carga ha estado expuesta al calor. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo. Los contenedores deberían refrigerarse con agua para evitar que suba la presión del vapor. Al combatir incendios masivos en el área de carga, utilizar manguera no-tripulada o monitor de boquillas, si es posible. Si no, retirarse y dejar que prosiga el incendio hasta que se apague.

Métodos específicos Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo. En caso de incendio o de explosión, no respire los humos.

Riesgos generales de incendio Aerosol extremadamente inflamable. Contenido bajo presión. El envase a presión puede explotar cuando se expone al calor o a la llama.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Manténgase alejado de las áreas bajas. Muchos gases son más pesados que el aire y se extenderán por el piso y se acumularán en áreas bajas o cerradas (alcantarillas, sótanos, depósitos). Use equipo y ropa de protección apropiados durante la limpieza. El personal de emergencia debe portar equipos autónomos de respiración. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Ventilar los espacios cerrados antes de entrar. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.

Métodos y material de contención y de limpieza

Consultar con las fichas de datos de seguridad adjuntas y/o instrucciones para su uso. Detenga la fuga si puede hacerlo sin riesgo. Lleve el tanque a un área segura y abierta si la fuga es irreparable. Confine el área hasta que se disperse el gas. Mantenga los materiales combustibles (madera, papel, petróleo, etc.) lejos del material derramado. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua .

Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.

Precauciones relativas al medio ambiente

No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura

Recipiente a presión: no perforar ni quemar, aun después del uso. No utilizar si falta el botón pulverizador o está defectuoso. No pulverizar sobre llamas o cualquier otro material incandescente. No fume mientras utilice el producto o hasta que la superficie pulverizada se haya secado bien. No corte, suelde, taladre, esmerile ni exponga los recipientes al calor, llama, chispas ni otras fuentes de ignición. Todo el equipo que se utiliza al manejar el producto debe estar conectado a tierra. Cerrar la válvula tras cada uso y cuando se haya vaciado. Proteger los contenedores de posibles daños físicos; no arrastrarlos, hacerlos rodar, dejarlos resbalar o dejarlos caer. Para trasladar contenedores, aun en distancias cortas, utilizar un carro (carretilla, carrito manual, etc.) diseñado para su transporte. Debe prevenirse la retroaspiración de agua al interior del recipiente. No permitir la retroalimentación al interior del recipiente. Purgar el aire del sistema antes de introducir el gas. Utilizar únicamente equipos con las especificaciones apropiadas, que sean adecuados para este producto así como su temperatura y presión de suministro. En caso de duda, póngase en contacto con su proveedor de gas. No reutilizar los recipientes vacíos. Evítese el contacto con los ojos. Evite la exposición prolongada. Úsese únicamente en lugares bien ventilados. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.

Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades

Aerosol de Nivel 1.

Recipiente a presión. Protéjase de los rayos solares y evítese exponerlo a temperaturas superiores a 50 °C. No punzar, incinerar ni aplastar. No manipule ni guarde cerca del fuego, calor u otras fuentes de ignición. Este material puede acumular cargas estáticas que pueden causar chispas y volverse una fuente de ignición. Almacenar en un recipiente herméticamente cerrado. Almacenar en un lugar bien ventilado. Debe comprobarse periódicamente el estado general y la posible presencia de fugas en los recipientes almacenados. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Límites de exposición profesional

Los constituyentes siguientes son los únicos constituyentes del producto que tienen un PEL, TLV u otro límite de exposición recomendado. En este momento, los demás constituyentes no tienen límites de exposición conocidos.

EEUU. Administración de Seguridad y Salud Ocupacional (OSHA) Tabla Z-1 Límites para los contaminantes del aire (29 CFR 1910.1000)

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	Limite de Exposición Permisible (LEP)	1900 mg/m³
		1000 ppm

EE.UU. ACGIH Valores umbrales límite

Componentes	Tipo	Valor	Forma
ETANOL (CAS 64-17-5)	STEL	1000 ppm	
ZEOLITA (CAS 1318-02-1)	TWA	1 mg/m³	Fracción respirable.

EEUU. Instituto Nacional para la Seguridad y Salud Ocupacional (NIOSH): Guía de bolsillo sobre riesgos químicos

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	TWA	1900 mg/m³
		1000 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Componentes	Tipo	Valor
ÉTER METILICO (CAS 115-10-6)	TWA	1880 mg/m³

US. Workplace Environmental Exposure Level (WEEL) Guides

Componentes	Tipo	Valor
		1000 ppm
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m³
		1000 ppm

Valores límite biológicos No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.

Controles técnicos apropiados Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación para lavado de ojos.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).

Protección de la piel

Protección de las manos De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros De aplicación solamente en entornos industriales. Use ropa adecuada resistente a los productos químicos.

Protección respiratoria De aplicación solamente en entornos industriales. Si se exceden los niveles permisibles, use un filtro mecánico / cartucho para vapores orgánicos de NIOSH o un respirador con suministro de aire.

Peligros térmicos Use ropa protectora térmica adecuada si resulta necesario.

Consideraciones generales de higiene No fumar durante su utilización. Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto

Estado físico Líquido.

Forma Aerosol.

Color No disponible.

Olor Característico.

Umbral olfativo No disponible.

pH No disponible.

Punto de fusión/punto de congelación No disponible.

Punto inicial de ebullición e intervalo de ebullición > 100 °C (> 212 °F) (líquido)

Punto de inflamación 30.0 °C (86.0 °F) Copa Cerrada (líquido)

Tasa de evaporación No disponible.

Inflamabilidad (sólido, gas) No aplicable.

Límites superior/inferior de inflamabilidad o de explosividad

Límite de inflamabilidad - inferior (%) No disponible.

Límite de inflamabilidad - superior (%) No disponible.

Límite de explosividad inferior (%) No disponible.

Límite de explosividad superior (%) No disponible.

Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Calor de combustión (NFPA 30B)	16.8 kJ/g
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Evitar temperaturas por encima del punto de flash. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	La inhalación prolongada puede resultar nociva.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	Provoca irritación ocular grave.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Contenido bajo presión. No punzar, incinerar ni aplastar. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Código de residuo peligroso Este producto es un residuo peligroso inflamable (D001) de acuerdo a RCRA cuando se intenta botar o destruir.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación. No reutilizar los recipientes vacíos.

Información general Evitar el transporte en vehículos en los que el espacio de carga no esté separado del compartimento del conductor. Asegurarse de que el conductor del vehículo sea consciente de los peligros potenciales de la carga y sepa qué hacer en caso de accidente o emergencia. Antes de transportar recipientes de producto: Asegurarse de que los recipientes estén firmemente asegurados. Asegurarse de que la válvula de la botella esté cerrada y no presente fugas. Asegurarse de que el tapón o la tuerca ciega de la salida de la válvula (cuando lleve) esté correctamente colocado/a. Asegurarse de que el dispositivo de protección de la válvula (cuando lleve) esté correctamente instalado. Asegúrese una ventilación apropiada. Asegurar el cumplimiento de las normativas aplicables.

15. Información reglamentaria

	Gaz sous pression	Gaz liquéfié
Dangers pour la santé	Lésions oculaires graves/irritation oculaire	Catégorie 2A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Aérosol extrêmement inflammable. Contient un gaz sous pression; peut exploser sous l'effet de la chaleur. Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Tenir à lécart de la chaleur/des étincelles/des flammes nues/des surfaces chaudes. - Ne pas fumer. Ne pas vaporiser sur une flamme nue ou sur toute autre source d'ignition Récipient sous pression : ne pas perforer ni brûler, même après usage. Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Stockage Protéger du rayonnement solaire. Stocker dans un endroit bien ventilé. Ne pas exposer à une température supérieure à 50 °C/122 °F

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
HYDROFLUOROCARBON 152A		75-37-6	45
ÉTHER MÉTHYLIQUE		115-10-6	35
ÉTHANOL		64-17-5	16.63
ZÉOLITE		1318-02-1	1

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Ingestion Peu probable en raison de la forme du produit. Dans le cas peu probable d'une ingestion, communiquez avec un médecin ou un centre anti-poison. Rincer la bouche.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse antialcool. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme. Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Les pompiers doivent porter un équipement de protection standard, notamment des vêtements ignifuges, un casque à écran facial, des gants, des bottes en caoutchouc et, dans les espaces clos, un appareil respiratoire autonome.

Équipement/directives de lutte contre les incendies En cas d'incendie : Obturer la fuite si cela peut se faire sans danger. Ne pas déplacer la cargaison ou le véhicule si la cargaison a été exposée à la chaleur. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. Les récipients doivent être refroidis à l'eau pour prévenir la création de pression de vapeur. Pour un important incendie dans la zone de cargaison, utiliser un support à tuyau automatique ou des lances à eau autonomes, si possible. Sinon, se retirer et laisser brûler.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. En cas d'incendie et/ou d'explosion, ne pas respirer les fumées.

Risques d'incendie généraux Aérosol extrêmement inflammable. Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Tenir à l'écart des zones basses. De nombreux gaz sont plus que l'air. Ils se répandent au niveau du sol et s'accumulent dans des zones basses ou confinées (égouts, sous-sols, citernes). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Le personnel d'urgence doit posséder un matériel respiratoire autonome. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. Ventiler les espaces clos avant d'y entrer. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Se reporter aux fiches de données de sécurité et/ou aux instructions. Arrêter la fuite si cela peut se faire sans risque. Déplacer la bouteille vers un endroit sûr et ouvert si la fuite est irréparable. Isoler la zone jusqu'à dispersion du gaz. Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Récipient sous pression : ne pas perforer ni brûler, même après usage. Ne pas utiliser si le bouton de vaporisation est manquant ou défectueux. Ne pas pulvériser sur une flamme nue ou toute autre matière incandescente. Ne pas fumer pendant l'utilisation ou jusqu'à ce que la surface vaporisée soit complètement sèche. Ne pas couper, souder, braser, percer, broyer ou exposer les récipients à de la chaleur, à une flamme, à des étincelles ou à d'autres sources d'ignition. Tout matériel utilisé pour la manutention de ce produit doit être mis à la terre. Fermer le détendeur après chaque utilisation et lorsque la bouteille est vide. Protéger les contenants des dommages physiques; ne pas traîner, rouler, glisser ou laisser tomber. Lors du déplacement des réservoirs, même sur de courtes distances, utiliser un chariot (chariot de transport, chariot à main, etc.) conçu pour le transport de réservoirs. L'aspiration inverse de l'eau du récipient doit être évitée. Ne pas permettre le refoulement dans le récipient. Purger l'air du système avant d'introduire un gaz. Utiliser uniquement de l'équipement correctement spécifié qui est approprié pour ce produit, sa pression d'alimentation et sa température. En cas de doute, communiquez avec votre fournisseur de gaz. Ne pas réutiliser les récipients vides. Éviter tout contact avec les yeux. Éviter une exposition prolongée. Utiliser seulement dans les zones bien ventilées. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Aérosol niveau 1.
Récipient sous pression. Protéger du rayonnement solaire et ne pas exposer à une température supérieure à 50 °C/122 °F. Ne pas perforer, incinérer ou écraser. Ne pas manipuler ou stocker à proximité d'une flamme nue, d'une source de chaleur ou d'autres sources d'ignition. Ce produit peut accumuler des charges statiques qui peuvent causer des étincelles et devenir une source d'ignition. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Les contenants stockés doivent être inspectés régulièrement pour leur condition générale et des fuites. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	PEL (limite d'exposition admissible)	1900 mg/m3
		1000 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur	Forme
ÉTHANOL (CAS 64-17-5)	STEL	1000 ppm	
ZÉOLITE (CAS 1318-02-1)	TWA	1 mg/m3	Fraction respirable.

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

États-Unis. Guides WEEL (niveau d'exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
ÉTHER MÉTHYLIQUE (CAS 115-10-6)	TWA	1880 mg/m3

États-Unis. Guides WEEL (niveau d'exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
		1000 ppm
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. Si les niveaux admissibles sont dépassés, utiliser un filtre mécanique / une cartouche contre les vapeurs organiques NIOSH ou un respirateur à adduction d'air.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Aérosol

Couleur Non disponible.

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH Non disponible.

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 100 °C (> 212 °F) (liquide)

Point d'éclair 30.0 °C (86.0 °F) Coupelle fermée (liquide)

Taux d'évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d'inflammabilité ou d'explosibilité

Limites d'inflammabilité - inférieure (%) Non disponible.

Limites d'inflammabilité - supérieure (%) Non disponible.

Limite d'explosibilité - inférieure (%) Non disponible.

Limite d'explosibilité - supérieure (%) Non disponible.

Tension de vapeur Non disponible.

Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Chaleur de combustion (NFPA 30B)	16.8 kJ/g
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Éviter les températures supérieures au point d'éclair. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Corrosion cutanée/irritation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

ÉTHANOL	OCDE 404 Résultat: Non Irritant Espèces: Lapin
ÉTHER MÉTHYLIQUE	Résultat: Le contact avec le produit sous forme de liquide peut causer des gelures.
HYDROFLUOROCARBON 152A	Résultat: Le contact avec le produit sous forme de liquide peut causer des gelures.

Lésions oculaires graves/irritation oculaire Provoque une sévère irritation des yeux.

Irritation- corrosion - Œil

ÉTHANOL	OCDE 405 Résultat: Irritant Espèces: Lapin
ÉTHER MÉTHYLIQUE	Résultat: Le contact avec le produit sous forme de liquide peut causer des gelures.
HYDROFLUOROCARBON 152A	Résultat: Le contact avec le produit sous forme de liquide peut causer des gelures.

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée

ÉTHANOL	OCDE 406 Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

ÉTHANOL	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.
ÉTHER MÉTHYLIQUE	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.
HYDROFLUOROCARBON 152A	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

ZÉOLITE (CAS 1318-02-1)	3 Inclassable quant à sa cancérogénicité pour l'homme.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction Danger possible pour la reproduction.

Effets sur le développement

ÉTHANOL	> 20000 ppm OCDE 414, Pas d'effets sur le développement Résultat: DSENO Espèces: Rat
ÉTHER MÉTHYLIQUE	40000 ppm OCDE 414 Résultat: DSENO Espèces: Rat
HYDROFLUOROCARBON 152A	50000 ppm OCDE 414 Résultat: CSENO Espèces: Rat

Reproductivité

ÉTHER MÉTHYLIQUE	2.5 % OCDE 452, Pas d'effets sur la fertilité Résultat: DSENO Espèces: Rat
ÉTHANOL	20700 mg/kg bw/d OCDE 416, Pas d'effets sur la fertilité Résultat: DSENO Espèces: Rat
HYDROFLUOROCARBON 152A	25000 ppm Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

ÉTHANOL	1730 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat
HYDROFLUOROCARBON 152A	25000 ppm OCDE 453, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 104 wk
ÉTHER MÉTHYLIQUE	47106 mg/m3 air OCDE 452, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 2 yr

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
ÉTHANOL (CAS 64-17-5)			
Aquatique			
Aiguë			
Algues	CE50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Autre	IC50	Boues activées d'eaux usées d'origine principalement domestique	> 1000 mg/l, 3 h
Crustacés	CE50	Ceriodaphnia dubia	5012 mg/l, 48 h
Poisson	CL50	Pimephales promelas	15300 mg/l, 96 h
Chronique			
Crustacés	NOEC (concentration sans effet observé)	Daphnia magna	9.6 mg/l, 9 d
Poisson	NOEC (concentration sans effet observé)	Danio rerio	250 mg/l, 120 h OECD 212

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

ÉTHANOL	84 % Résultat: Facilement Biodegradable Durée du test: 20 d
ÉTHER MÉTHYLIQUE	5 % OECD 301 D Résultat: Difficilement Biodégradable Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

ÉTHANOL	-0.31
ÉTHER MÉTHYLIQUE	0.1
HYDROFLUOROCARBON 152A	0.75

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Contenu sous pression. Ne pas perforer, incinérer ou écraser. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Code des déchets dangereux Ce produit est inflammable (D001), utilisez le RCRA matières dangereuses lors de l'élimination.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage. Ne pas réutiliser les récipients vides.

Informations générales Éviter le transport avec des véhicules où l'espace de chargement n'est pas séparé du poste de conduite. S'assurer que le chauffeur du véhicule connaît les risques potentiels liés à la cargaison et sait ce qu'il doit faire en cas d'accident ou d'urgence. Avant de transporter des contenants du produit : S'assurer que les contenants sont solidement fixés. S'assurer que le robinet de la bouteille est fermé et ne fuit pas. S'assurer que l'écrou du bouchon de vidange du robinet ou le capuchon protecteur (s'il y a lieu) est correctement installé. S'assurer que le dispositif de protection du robinet (s'il y a lieu) est correctement installé. S'assurer une ventilation adéquate. S'assurer la conformité avec la réglementation applicable.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

ÉTHANOL (CAS 64-17-5)	Inscrit.
ÉTHER MÉTHYLIQUE (CAS 115-10-6)	Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

ÉTHER MÉTHYLIQUE (CAS 115-10-6)
HYDROFLUOROCARBON 152A (CAS 75-37-6)

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

ÉTHANOL (CAS 64-17-5)	Faible priorité

Date de publication	17-Novembre-2020
Version n°	01
Classements NFPA	Santé: 2 Inflammabilité: 4 Instabilité: 0

Avis de non-responsabilité À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

物理危险	易燃气溶胶	类别 1
	加压气体	液化气体
健康危害	严重眼睛损伤/眼睛刺激性	类别 2A

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 极易燃气溶胶。 内装高压气体；遇热可能爆炸。 造成严重眼刺激。

防范说明

预防措施 远离热源/火花/明火/热表面。- 禁止吸烟。 切勿喷洒在明火或其他点火源上。 压力容器：切勿穿孔或焚烧，即使不再使用。 作业后彻底清洗。 戴防护眼罩/防护面具。

事故响应 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如仍觉眼刺激：求医/就诊。

安全储存 防日晒。存放在通风良好的地方。 不可暴露在超过50° C/122° F的温度下。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
HYDROFLUOROCARBON 152A		75-37-6	45
二甲醚		115-10-6	35
乙醇		64-17-5	16.63
沸石		1318-02-1	1

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入	移至空气新鲜处。 如果症状持续或恶化，联络医生。
皮肤接触	用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。
眼睛接触	立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如仍觉眼刺激：求医/就诊。
经口	由于产品形状的缘故，不大可能。 若吞噬困难，联络医生或是毒物控制中心。 漱口。
最重要的症状/影响，急性和延迟性	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。
指明任何需要立即就医或特殊治疗的情况	提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。
一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 抗醇型泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	内容物受压。 压力罐若接触热量或火焰，可能会爆炸。 燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	消防员必须使用标准的防护设备，包括防火外套、带面罩的头盔、手套、橡胶靴及在密闭的空间中、SCBA。
消防设备/使用说明	火灾时：如能保证安全，设法堵塞泄漏。 若货物已受热，禁止移动货物或车辆。 在不会发生危险的情况下将容器撤离火灾现场。 应使用冷水冷却容器，以防止蒸汽压力增强。 如果货物区发生大火，应尽可能使用无人操作的固定喷水管或监控喷嘴来灭火。如果没有这些灭火设备，应撤离现场，使火烧尽。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。 在不会发生危险的情况下将容器撤离火灾现场。 一旦发生火灾和/或爆炸，不得吸入烟气。
一般火灾危险	极易燃气溶胶。 内容物受压。 压力罐若接触热量或火焰，可能会爆炸。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 远离低洼区域。 许多气体比空气重，可能在低洼或狭小空间中（下水道、地下室、储罐）在地面蔓延。 清洁时，戴合适防护设备和衣物。 应急人员需要自给式呼吸设备。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 进入封闭空间前先通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	参考所附的安全技术说明和/或使用说明。 在不会发生危险的情况下阻止泄漏。 如果泄漏不能回收，将容器移至安全和开放区域。 隔离区域，直至气体散尽。 使可燃物（木材、纸张、油等）远离泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	压力容器：切勿穿孔或焚烧，即使不再使用。 若缺少喷雾按钮或是损坏则不可使用。 不要喷洒在明火或任何其它炽热的材料上。 在使用时或是在被喷表面完全干燥之前不可吸烟。 禁止切割、焊接、焊缝、钻、磨容器，或将其与热、火焰、火花或其他燃烧源接触。 在操作处置产品时，使用的所有设备必须接地。 每次使用后和放空时关闭阀门。 保护容器免受物理损坏；不要拖，拉，滚，或降落。 当移动容器时，即使是短距离，也要使用专门运输容器的拖车（推车，手推车等）。 水会吸进入容器必须被阻止。 不允许反向进入容器。 系统引入气体前净化空气。 只能使用适合该产品供压和温度的正确指定的设备。如有疑问请联系您的气体供应商。 禁止重复使用倒空的容器。 避免接触到眼睛。 避免长期暴露。 只能在通风良好的场所使用。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	类别1 悬浮颗粒。 高压储气罐。防止阳光并且不要暴露在高于50摄氏度 / 122华氏度的温度中。 不可刺，焚化或挤压。 禁止在明火、热源或其他燃烧源边操作或储存。 本材料会积聚静电，从而导致火花并且演变为点火源。 储存在密闭的容器中。 存放在通风良好的地方。 储存容器应定期检查一般情况和泄漏。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
乙醇 (CAS 64-17-5)	PEL-常期暴露极限	1900 mg/m3
		1000 ppm

美国ACGIH阈限值

组分	类型	标准值	形状
乙醇 (CAS 64-17-5)	短期暴露极限（STEL）	1000 ppm	
沸石 (CAS 1318-02-1)	TWA	1 mg/m3	可呼吸部分。

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
乙醇 (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

美国工作场所环境暴露水平（WEEL）指南

组分	类型	标准值
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm
二甲醚 (CAS 115-10-6)	TWA	1880 mg/m3
		1000 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。

呼吸系统防护 仅用於工业环境。 如果程度超过允许值，用NIOSH 机械过滤/有机蒸气筒或可提供空气的呼吸器。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 使用时严禁吸烟。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状 液体。

形状 气溶胶

颜色 无资料。

气味 特征的。

气味阈值 无资料。

pH 值 无资料。

熔点/凝固点 无资料。

初始沸点和沸程 > 100 ° C (> 212 ° F) (液体)

闪点 30.0 ° C (86.0 ° F) 闭杯闪点测定法 (液体)

蒸发速率 无资料。

易燃性（固体，气体） 不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%） 无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
燃烧热（NFPA 30B）	16.8 kJ/g
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 避免温度超過閃火點温度。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	预计没有因皮肤接触导致的任何有害影响。
眼睛接触	造成严重眼刺激。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。

毒理学效应信息

急性毒性 未知。

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

刺激性腐蚀性 - 皮肤

乙醇	OECD 404 结果: 非刺激性 物种: 兔子
HYDROFLUOROCARBON 152A	结果: 接触其液体形式会被冻伤。
二甲醚	结果: 接触其液体形式会被冻伤。

严重眼睛损伤/眼睛刺激性 造成严重眼刺激。

刺激性腐蚀性 - 眼睛

乙醇	OECD 405 结果: 刺激性的 物种: 兔子
HYDROFLUOROCARBON 152A	结果: 接触其液体形式会被冻伤。
二甲醚	结果: 接触其液体形式会被冻伤。

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物

乙醇	OECD 406 结果: Not Sensitizing 物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

HYDROFLUOROCARBON 152A	结果: 体外和体内试验均未见致突变作用。
乙醇	结果: 体外和体内试验均未见致突变作用。
二甲醚	结果: 体外和体内试验均未见致突变作用。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

沸石 (CAS 1318-02-1)	3 尚不能确定对人有致癌作用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 是可能的生殖系统危害物。

发育效应

乙醇	> 20000 ppm OECD 414, 对发展没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
二甲醚	40000 ppm OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠

生殖能力

二甲醚	2.5 % OECD 452, 对生育力没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
乙醇	20700 mg/kg bw/d OECD 416, 对生育力没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
HYDROFLUOROCARBON 152A	25000 ppm 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

乙醇	1730 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
HYDROFLUOROCARBON 152A	25000 ppm OECD 453, 吸入 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 104 wk
二甲醚	47106 mg/m3 空气 OECD 452, 吸入 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 2 yr

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
HYDROFLUOROCARBON 152A (CAS 75-37-6)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	146.695 mg/l QSAR
藻类	EC50	藻类	47.755 mg/l QSAR
鱼	LC50	鱼	295.783 mg/l QSAR
乙醇 (CAS 64-17-5)			
水生的			
急性的			
其它的, 其它	IC50	以国内污水为主的活性污泥	> 1000 mg/l, 3 h
甲壳纲动物	EC50	网纹水蚤	5012 mg/l, 48 h
藻类	EC50	近头状伪蹄形藻	22200 mg/l, 96 h
鱼	LC50	呆鲦鱼	15300 mg/l, 96 h
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	9.6 mg/l, 9 D
鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	250 mg/l, 120 h OECD 212
二甲醚 (CAS 115-10-6)			
水生的			
急性的			
其它的, 其它	EC10	恶臭假单胞菌	> 1600 mg/l
甲壳纲动物	EC50	水蚤	> 4400 mg/l, 48 h
藻类	EC50	绿藻	154.917 mg/l, 96 h QSAR
鱼	LC50	孔雀鱼	> 4100 mg/l, 96 h

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

乙醇	84 % 结果: 易生物降解 测试时间: 20 D
二甲醚	5 % OECD 301 D 结果: 不容易生物降解 测试时间: 28 D

潜在的生物累积性

辛醇/水分配系数 log Kow

HYDROFLUOROCARBON 152A	0.75
乙醇	-0.31
二甲醚	0.1

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 内容物受压。 不可刺，焚化或挤压。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

有害废物代码 本产品在处置时是可燃的（D001）RCRA危险废物.

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。 禁止重复使用倒空的容器。

14. 运输信息

美国运输部（DOT）

FINISHED GOODS

联合国危险货物编号(UN No.)	UN1950

一般信息 避免使用装载室与驾驶室未分离的车辆进行运输。 确保车辆司机了解装载货物的潜在危险并知道发生事故或紧急情况时怎么做。 运输前产品容器： 确保容器摆放平稳。 确保气瓶阀紧闭不泄漏。 确保阀门出口螺帽或活塞（如有）已正确安装。 确保阀门保护装置（若有）已正确安装。 确保充分的通风。 确保符合适用的法规。

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

乙醇 (CAS 64-17-5) 适用。

二甲醚 (CAS 115-10-6) 适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

HYDROFLUOROCARBON 152A (CAS 75-37-6)

二甲醚 (CAS 115-10-6)

饮用水安全法（SDWA） 未受管制。

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

乙醇 (CAS 64-17-5) Low priority

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT MUNICH HAIR SERUM**

Other means of identification

SDS number 34-19-0000036

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Flammable liquids Category 4

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word Warning

Hazard statement Combustible liquid.

Precautionary statement

Prevention Keep away from flames and hot surfaces-No smoking. Wear protective gloves/eye protection/face protection.

Response In case of fire: Use appropriate media to extinguish.

Storage Store in a well-ventilated place. Keep cool.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
CYCLOPENTASILOXANE		541-02-6	67.05
PHENYL TRIMETHICONE		70131-69-0	6

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed	Not available.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	The product is combustible, and heating may generate vapors which may form explosive vapor/air mixtures. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	Combustible liquid.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Keep combustibles (wood, paper, oil, etc.) away from spilled material. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water. Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Keep away from open flames, hot surfaces and sources of ignition. When using do not smoke. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Keep away from heat, sparks and open flame. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep out of the reach of children. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value
CYCLOPENTASILOXANE (CAS 541-02-6)	TWA	10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	179.6 °F (82.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT MUNICH HAIR SERUM		
Acute		
Dermal		
ATEmix		16670 mg/kg

Components	Species	Test Results

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

CYCLOPENTASILOXANE	OECD 404 Result: Not Irritating Species: Rabbit
PHENYL TRIMETHICONE	OECD 404 Result: Not Irritating Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

CYCLOPENTASILOXANE	OECD 405 Result: Not Irritating Species: Rabbit
PHENYL TRIMETHICONE	OECD 405 Result: Not Irritating Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

CYCLOPENTASILOXANE	Buehler Test Result: Not Sensitizing Species: Guinea pig
PHENYL TRIMETHICONE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

CYCLOPENTASILOXANE	Result: In vitro and in vivo tests did not show mutagenic effects.
PHENYL TRIMETHICONE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

PHENYL TRIMETHICONE	>= 1000 mg/kg bw/d OECD 471 Result: NOAEL Species: Rat

Reproductivity

CYCLOPENTASILOXANE	> 160 ppm EPA OPPTS 870.3800, Vapor Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

CYCLOPENTASILOXANE	> 1600 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat
PHENYL TRIMETHICONE	1000 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
CYCLOPENTASILOXANE	160 ppm OECD 412, Inhalation Result: NOEAC Species: Rat 1600 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
CYCLOPENTASILOXANE (CAS 541-02-6)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 12 µg/l, 96 h OECD 201
Crustacea	EC50	Daphnia magna	> 2.9 µg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	> 16 µg/l, 96 h OECD 204
Chronic			
Crustacea	NOEC	Daphnia magna	> 15 µg/l, 21 d OECD 211
Fish	NOEC	Oncorhynchus mykiss	> 14 µg/l, 90 d OECD 210
Other	EC50	Activated sludge of a predominantly domestic sewage	> 2000 mg/l, 3 h EU C.11
PHENYL TRIMETHICONE (CAS 70131-69-0)			
Aquatic

Fish	NOEC	Oncorhynchus mykiss	>= 0.008 mg/l, 60 d OECD 210

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

CYCLOPENTASILOXANE	0.14 % OECD 310 Result: Not Readily Biodegradable
PHENYL TRIMETHICONE	2.2 % OECD 301 F Result: Not Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

CYCLOPENTASILOXANE	5.2
PHENYL TRIMETHICONE	9, QSAR

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

FINISHED GOODS

Not regulated as dangerous goods.

BULK

UN number	NA1993
UN proper shipping name	COMBUSTIBLE LIQUID, N.O.S. (CYCLOPENTASILOXANE)

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

Not listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Not regulated.

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

16. Other information, including date of preparation or last revision

Issue date	11-18-2020
Version #	01
NFPA ratings	Health: 0 Flammability: 2 Instability: 0
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT MUNICH HAIR SERUM
Synonyms	None.
SDS number	34-19-0000036
Product code	1241015
Issue date	11-18-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

This mixture does not meet the criteria for classification according to Regulation (EC) 1272/2008 as amended.

Hazard summary This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	The mixture does not meet the criteria for classification.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.
Supplemental label information	16,64% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 22,64% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.
2.3. Other hazards	The mixture contains a substance that is assessed to be a PBT or a vPvB.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
CYCLOPENTASILOXANE	67,05	541-02-6 208-764-9	01-2119511367-43	-	PBT vPvB
Classification: -					
PHENYL TRIMETHICONE	6	- 939-487-8	01-2119974594-23	-	
Classification: Acute Tox. 2;H330					

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits	No exposure limits noted for ingredient(s).
Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)

Flash point	179,6 °F (82,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
CYCLOPENTASILOXANE (CAS 541-02-6)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg bw OECD 402
Inhalation		
Aerosol		
LC50	Rat	8,67 mg/L air, 4 h OECD 403
Oral		
LD50	Rat	> 5000 mg/kg bw OECD 401

Components	Species	Test Results
PHENYL TRIMETHICONE		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg OECD 402
Inhalation		
Mist		
LC50	Rat	0,467 mg/l, 4 h OECD 403
Oral		
LD50	Rat	> 5000 mg/kg

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

CYCLOPENTASILOXANE	OECD 404 Result: Not Irritating Species: Rabbit
PHENYL TRIMETHICONE	OECD 404 Result: Not Irritating Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

CYCLOPENTASILOXANE	OECD 405 Result: Not Irritating Species: Rabbit
PHENYL TRIMETHICONE	OECD 405 Result: Not Irritating Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

CYCLOPENTASILOXANE	Buehler Test Result: Not Sensitizing Species: Guinea pig
PHENYL TRIMETHICONE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

CYCLOPENTASILOXANE	Result: In vitro and in vivo tests did not show mutagenic effects.
PHENYL TRIMETHICONE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

PHENYL TRIMETHICONE	>= 1000 mg/kg bw/d OECD 471 Result: NOAEL Species: Rat

Reproductivity

CYCLOPENTASILOXANE	> 160 ppm EPA OPPTS 870,3800, Vapor Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

CYCLOPENTASILOXANE	> 1600 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat

Specific target organ toxicity - repeated exposure

PHENYL TRIMETHICONE	1000 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
CYCLOPENTASILOXANE	160 ppm OECD 412, Inhalation Result: NOEAC Species: Rat 1600 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information This product has no known adverse effect on human health. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
CYCLOPENTASILOXANE (CAS 541-02-6)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 12 µg/l, 96 h OECD 201
Crustacea	EC50	Daphnia magna	> 2,9 µg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	> 16 µg/l, 96 h OECD 204
Chronic			
Crustacea	NOEC	Daphnia magna	> 15 µg/l, 21 d OECD 211
Fish	NOEC	Oncorhynchus mykiss	> 14 µg/l, 90 d OECD 210
Other	EC50	Activated sludge of a predominantly domestic sewage	> 2000 mg/l, 3 h EU C.11
PHENYL TRIMETHICONE			
Aquatic			
Chronic			
Fish	NOEC	Oncorhynchus mykiss	>= 0,008 mg/l, 60 d OECD 210

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

CYCLOPENTASILOXANE	0,14 % OECD 310 Result: Not Readily Biodegradable
PHENYL TRIMETHICONE	2,2 % OECD 301 F Result: Not Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

CYCLOPENTASILOXANE	5,2
PHENYL TRIMETHICONE	9, QSAR

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment The mixture contains a substance that is assessed to be a PBT or a vPvB.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

CYCLOPENTASILOXANE (CAS 541-02-6)

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

CYCLOPENTASILOXANE (CAS 541-02-6)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H330 Fatal if inhaled.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Palabra de advertencia Atención

Declaración de peligro Líquido combustible.

Consejos de prudencia

Prevención Mantener alejado de llamas y de superficies calientes. No fumar. Llevar guantes protectores / protección ocular / protección facial.

Respuesta En caso de incendio: Utilizar medios apropiados para apagarlo.

Almacenamiento Almacenar en un lugar bien ventilado. Mantener en lugar fresco.

Eliminación Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
CICLOPENTASILOXANO		541-02-6	67.05
FENIL TRIMETICONA		70131-69-0	6

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuagar con agua. Busque atención médica si la irritación se desarrolla y persiste.

Ingestión	Enjuagarse la boca. Obtenga atención médica en caso de síntomas.
Principales síntomas y efectos, agudos y retardados	No disponible.
Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Provea las medidas de apoyo generales y de tratamiento sintomático.
Información general	Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	El producto es combustible, y en caso de calentamiento pueden producirse vapores que forman mezclas explosivas de aire/vapor. En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	En caso de incendio y/o de explosión no respire los humos. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Líquido combustible.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Eliminar todas las fuentes de ignición (no fumar, teas, chispas ni llamas en los alrededores). Use equipo y ropa de protección apropiados durante la limpieza. Asegúrese una ventilación apropiada. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Mantenga los materiales combustibles (madera, papel, petróleo, etc.) lejos del material derramado . Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Usar un material no combustible como vermiculita, arena o tierra para absorber el producto y colocarlo en un recipiente para su eliminación posterior. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Absorba con tierra, arena y otro material no combustible y transfiera a recipientes para su posterior eliminación. Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	Mantener apartado de las llamas abiertas, de las superficies calientes y de los focos de ignición. No fumar durante su utilización. Evite la exposición prolongada. Asegúre una ventilación adecuada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.
Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Guardar lejos del calor, las chispas o llamas desnudas. Guárdese en un lugar fresco y seco sin exposición a la luz solar directa. Almacenar en un recipiente herméticamente cerrado. Almacenar en un lugar bien ventilado. Manténgase fuera del alcance de los niños. Guardar en una zona equipada con extinctores automáticos. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Límites de exposición profesional

Los constituyentes siguientes son los únicos constituyentes del producto que tienen un PEL, TLV u otro límite de exposición recomendado. En este momento, los demás constituyentes no tienen límites de exposición conocidos.

US. Workplace Environmental Exposure Level (WEEL) Guides

Componentes	Tipo	Valor
CICLOPENTASILOXANO (CAS 541-02-6)	TWA	10 ppm

Valores límite biológicos No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.

Controles técnicos apropiados Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).

Protección de la piel

Protección de las manos De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros De aplicación solamente en entornos industriales. Úsese indumentaria protectora adecuada.

Protección respiratoria De aplicación solamente en entornos industriales. Si los controles de ingeniería no mantienen las concentraciones en el aire por debajo de los límites de exposición recomendados (cuando proceda) o a un nivel aceptable (en países donde no se hayan establecido límites de exposición), ha de utilizarse un respirador aprobado.

Peligros térmicos Use ropa protectora térmica adecuada si resulta necesario.

Consideraciones generales de higiene No fumar durante su utilización. Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto

Estado físico Líquido.

Color No disponible.

Olor Característico.

Umbral olfativo No disponible.

pH No disponible.

Punto de fusión/punto de congelación No disponible.

Punto inicial de ebullición e intervalo de ebullición > 100 °C (> 212 °F)

Punto de inflamación 82.0 °C (179.6 °F) Copa Cerrada

Tasa de evaporación No disponible.

Inflamabilidad (sólido, gas) No aplicable.

Límites superior/inferior de inflamabilidad o de explosividad

Límite de inflamabilidad - inferior (%) No disponible.

Límite de inflamabilidad - superior (%) No disponible.

Límite de explosividad inferior (%) No disponible.

Límite de explosividad superior (%) No disponible.

Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Evitar temperaturas por encima del punto de flash. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	La inhalación prolongada puede resultar nociva.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	No adverse effects due to eye contact are expected.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	No disponible.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Producto	**Especies**	**Resultados de la prueba**
PULP RIOT MUNICH HAIR SERUM

Corrosión/irritación cutánea Debido a la falta total o parcial de datos, la clasificación no es posible. No se esperan efectos adversos por contacto con la piel.

Irritación/Corrosión- Piel

CICLOPENTASILOXANO	OECD 404 Resultado: No Irritante Especies: Conejo
FENIL TRIMETICONA	OECD 404 Resultado: No Irritante Especies: Conejo

Lesiones oculares graves/irritación ocular Debido a la falta total o parcial de datos, la clasificación no es posible. No adverse effects due to eye contact are expected.

Irritación/Corrosión- Ojos

CICLOPENTASILOXANO	OECD 405 Resultado: No Irritante Especies: Conejo
FENIL TRIMETICONA	OECD 405 Resultado: No Irritante Especies: Conejo

Sensibilización respiratoria o cutánea

Sensibilización respiratoria Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea

FENIL TRIMETICONA	OECD 406 Resultado: Not Sensibilizante Especies: Conejillo de indias
CICLOPENTASILOXANO	Prueba Buehler Resultado: Not Sensibilizante Especies: Conejillo de indias

Mutagenicidad en células germinales Debido a la falta total o parcial de datos, la clasificación no es posible.

Mutagenicidad

FENIL TRIMETICONA	Resultado: Las pruebas in vitro no demostraron efectos mutágenos
CICLOPENTASILOXANO	Resultado: Pruebas in vitro e in vivo no mostraron efectos mutagénicos.

Carcinogenicidad No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción Debido a la falta total o parcial de datos, la clasificación no es posible.

Efectos sobre el desarrollo

FENIL TRIMETICONA	>= 1000 mg/kg bw/d OECD 471 Resultado: NOAEL Especies: Rata

Reproductividad

CICLOPENTASILOXANO	> 160 ppm EPA OPPTS 870.3800, Vapor Resultado: NOAEL Especies: Rata

Toxicidad específica en determinados órganos – exposición única

Debido a la falta total o parcial de datos, la clasificación no es posible.

Toxicidad específica en determinados órganos – exposición repetida

Debido a la falta total o parcial de datos, la clasificación no es posible.

CICLOPENTASILOXANO	> 1600 mg/kg bw/d OECD 407, Oral Resultado: NOAEL Especies: Rata
FENIL TRIMETICONA	1000 mg/kg bw/d OECD 408, Oral Resultado: NOAEL Especies: Rata Duración de la prueba: 90 d
CICLOPENTASILOXANO	160 ppm OECD 412, Inhalación Resultado: NOEAC Especies: Rata 1600 mg/kg bw/d OECD 410, Dérmico Resultado: NOAEL Especies: Rata

Peligro por aspiración

Debido a la falta total o parcial de datos, la clasificación no es posible.

Información adicional

En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad

El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Componentes		Especies	Resultados de la prueba
CICLOPENTASILOXANO (CAS 541-02-6)			
Acuático (a)			
Agudo			
Algas	EC50	Pseudokirchneriella subcapitata	> 12 µg/L, 96 h OECD 201
Crustáceos	EC50	Dafnia magna	> 2.9 µg/L, 48 h OECD 202
Pez	LC50	Oncorhynchus mykiss	> 16 µg/L, 96 h OECD 204
Crónico			
Crustáceos	NOEC	Dafnia magna	> 15 µg/L, 21 d OECD 211
Otros	EC50	Lodo activado de una depuradora predominantemente doméstica	> 2000 mg/l, 3 h EU C.11
Pez	NOEC	Oncorhynchus mykiss	> 14 µg/L, 90 d OECD 210
FENIL TRIMETICONA (CAS 70131-69-0)			
Acuático (a)			
Crónico			
Pez	NOEC	Oncorhynchus mykiss	>= 0.008 mg/l, 60 d OECD 210

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

CICLOPENTASILOXANO	0.14 % OECD 310 Resultado: No Es Fácilmente Biodegradable
FENIL TRIMETICONA	2.2 % OECD 301 F Resultado: No Es Fácilmente Biodegradable Duración de la prueba: 28 d

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

CICLOPENTASILOXANO	5.2
FENIL TRIMETICONA	9, QSAR

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

FINISHED GOODS

No se regula como artículo peligroso.

BULK

Número ONU NA1993

Designación oficial de transporte de las Naciones Unidas LÍQUIDO COMBUSTIBLE, N.E.P. (CICLOPENTASILOXANO)

Clase COMB LIQ

Grupo de embalaje III

Clase(s) de peligro para el transporte

Label(s) Ninguno

Disposiciones especiales IB3, T1, T4, TP1

Envasado no a granel 203

Materials classified as combustible liquids are only regulated for transport when offered in bulk packaging (>119 gallons).

IATA

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

IMDG

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

15. Información reglamentaria

reglamentación Federal de EE.UU. El producto es un "Producto químico peligroso" tal como lo define la Norma de comunicación de peligro OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

No listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso No (Exempt)

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

No reglamentado.

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

No reglamentado.

Ley Safe Drinking Water Act (SDWA) No reglamentado.

16. Otra información, como fecha de preparación o última revisión

Fecha de publicación	18-Noviembre-2020
Nº de versión	01
Clasificaciones NFPA	Salud: 0 Inflamabilidad: 2 Inestabilidad: 0
Cláusula de exención de responsabilidad	La información facilitada en esta Ficha de Datos de Seguridad es correcta, a nuestro leal saber y entender, en la fecha de su publicación. Dicha información está concebida únicamente como guía para la seguridad en la manipulación, el uso, el procesamiento, el almacenamiento, el transporte, la eliminación y la liberación, no debiendo tomarse como garantía o especificación de calidades. La información se refiere únicamente al material específico mencionado y puede no ser válida para tal material usado en combinación con cualesquiera otros materiales o en cualquier proceso salvo que se especifique expresamente en el texto.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT MUNICH HAIR SERUM**

Autres moyens d'identification

Numéro de la FDS 34-19-0000036

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Liquides inflammables Catégorie 4

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Symbole de danger Aucune.

Mention d'avertissement Attention

Mention de danger Liquide combustible.

Conseil de prudence

Prévention Tenir loin des flammes et des surfaces chaudes - défense de fumer. Porter des gants de protection/un équipement de protection des yeux/du visage.

Intervention En cas d'incendie : utiliser un agent d'extinction approprié.

Stockage Stocker dans un endroit bien ventilé. Tenir au frais.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
CYCLOPENTASILOXANE		541-02-6	67.05
PHÉNYLTRIMÉTHICONE		70131-69-0	6

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux	Rincer avec de l'eau. Consulter un médecin si une irritation se développe et persiste.
Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Non disponible.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes.
Informations générales	S’assurer que le personnel médical est averti du (des) produits(s) en cause et qu’il prend des mesures pour se protéger.

5. Mesures à prendre en cas d’incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Ce produit est combustible et son chauffage peut générer des vapeurs qui peuvent former des mélanges vapeurs/air explosifs. Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	En cas d'incendie et/ou d'explosion ne pas respirer les fumées. Éloigner les récipients du lieu de l’incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d’incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Liquide combustible.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d’urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Éliminer toutes les sources d'ignition (pas de cigarettes, de torches, d’étincelles ou de flammes dans la zone immédiate). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Utiliser un matériau non combustible comme la vermiculite, le sable ou la terre pour absorber le produit et le mettre dans un récipient pour élimination ultérieure. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Absorber avec de la terre, du sable ou une autre matière non combustible et transférer dans des contenants pour une élimination ultérieure. Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l’élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Tenir à l'écart des flammes nues, des surfaces chaudes et des sources d'ignition. Ne pas fumer pendant l'utilisation. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Tenir à l'écart de la chaleur, des étincelles et des flammes nues. Stocker dans un endroit frais et sec, à l'écart de la lumière solaire directe. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Tenir hors de la portée des enfants. Conserver dans un endroit muni de gicleurs. Entreposer à l’écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d’exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d’exposition connues.

États-Unis. Guides WEEL (niveau d’exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
CYCLOPENTASILOXANE (CAS 541-02-6)	TWA	10 ppm

Valeurs biologiques limites Aucune limite d’exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter un vêtement de protection approprié.

Protection respiratoire Pour usage industriel seulement. Si les contrôles d’ingénierie ne maintiennent pas les concentrations atmosphériques sous les limites d’exposition recommandées (lorsqu’il y a lieu) ou à un taux acceptable (dans les pays où des limites d’exposition n’ont pas été établies), un respirateur homologué doit être porté

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Couleur Non disponible.

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH Non disponible.

Point de fusion et point de congélation Non disponible.

Point initial d’ébullition et domaine d’ébullition > 100 °C (> 212 °F)

Point d’éclair 82.0 °C (179.6 °F) Coupelle fermée

Taux d’évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d’inflammabilité ou d’explosibilité

Limites d’inflammabilité - inférieure (%) Non disponible.

Limites d’inflammabilité - supérieure (%) Non disponible.

Limite d'explosibilité - inférieure (%) Non disponible.

Limite d'explosibilité - supérieure (%) Non disponible.

Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Éviter les températures supérieures au point d'éclair. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Aucun effet indésirable dû au contact des yeux n'est prévu.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Corrosion cutanée/irritation cutanée La classification n’est pas possible en raison d’un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

CYCLOPENTASILOXANE	OCDE 404 Résultat: Non Irritant Espèces: Lapin
PHÉNYLTRIMÉTHICONE	OCDE 404 Résultat: Non Irritant Espèces: Lapin

Lésions oculaires graves/irritation oculaire La classification n’est pas possible en raison d’un manque partiel ou total de données. Aucun effet indésirable dû au contact des yeux n'est prévu.

Irritation- corrosion - Œil

CYCLOPENTASILOXANE	OCDE 405 Résultat: Non Irritant Espèces: Lapin
PHÉNYLTRIMÉTHICONE	OCDE 405 Résultat: Non Irritant Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n’est pas possible en raison d’un manque partiel ou total de données.

Sensibilisation cutanée La classification n’est pas possible en raison d’un manque partiel ou total de données.

Sensibilisation cutanée

PHÉNYLTRIMÉTHICONE	OCDE 406 Résultat: Non Sensibilisant Espèces: Cobaye
CYCLOPENTASILOXANE	Test de Buehler Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n’est pas possible en raison d’un manque partiel ou total de données.

Mutagénicité

CYCLOPENTASILOXANE	Résultat: Des essais in vitro et in vivo n’ont pas montré d’effets mutagènes.
PHÉNYLTRIMÉTHICONE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n’est pas possible en raison d’un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l’OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n’est pas possible en raison d’un manque partiel ou total de données.

Effets sur le développement

PHÉNYLTRIMÉTHICONE	>= 1000 mg/kg bw/d OCDE 471 Résultat: DSENO Espèces: Rat

Reproductivité

CYCLOPENTASILOXANE	> 160 ppm EPA OPPTS 870.3800, Vapeur Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

CYCLOPENTASILOXANE	> 1600 mg/kg bw/d OCDE 407, Orale Résultat: DSENO Espèces: Rat
PHÉNYLTRIMÉTHICONE	1000 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d
CYCLOPENTASILOXANE	160 ppm OCDE 412, Inhalation Résultat: NOEAC Espèces: Rat
	1600 mg/kg bw/d OECD 410, Cutané Résultat: DSENO Espèces: Rat

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
CYCLOPENTASILOXANE (CAS 541-02-6)			
Aquatique			
Aiguë			
Algues	CE50	Pseudokirchneriella subcapitata	> 12 µg/L, 96 h OCDE 201
Crustacés	CE50	Daphnia magna	> 2.9 µg/L, 48 h OCDE 202
Poisson	CL50	Oncorhynchus mykiss	> 16 µg/L, 96 h OECD 204
Chronique			
Autre	CE50	Boues activées d'eaux usées d'origine principalement domestique	> 2000 mg/l, 3 h EU C.11
Crustacés	NOEC (concentration sans effet observé)	Daphnia magna	> 15 µg/L, 21 d OECD 211
Poisson	NOEC (concentration sans effet observé)	Oncorhynchus mykiss	> 14 µg/L, 90 d OECD 210

Poisson	NOEC (concentration sans effet observé)	Oncorhynchus mykiss	>= 0.008 mg/l, 60 d OECD 210

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

CYCLOPENTASILOXANE	0.14 % OECD 310 Résultat: Difficilement Biodégradable
PHÉNYLTRIMÉTHICONE	2.2 % OECD 301 F Résultat: Difficilement Biodégradable Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

CYCLOPENTASILOXANE	5.2
PHÉNYLTRIMÉTHICONE	9, QSAR

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

FINISHED GOODS

N'entre pas dans la réglementation des marchandises dangereuses.

BULK

Numéro ONU	Pas Applicable 1993
Désignation officielle de transport de l'ONU	liquide combustible, n.s.a. (CYCLOPENTASILOXANE)
Classe	Liq. comb.
Groupe d'emballage	III
Classe de danger relative au transport	
Étiquette(s)	Aucune
Dispositions particulières	IB3, T1, T4, TP1
Conditionnement autrement qu'en vrac	203

Materials classified as combustible liquids are only regulated for transport when offered in bulk packaging (>119 gallons).

IATA

FINISHED GOODS

N'entre pas dans la réglementation des marchandises dangereuses.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

Non inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux	No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre)	Non réglementé.

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	18-Novembre-2020
Version n°	01
Classements NFPA	Santé: 0 Inflammabilité: 2 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT MUNICH HAIR SERUM

鉴别的其他方法

SDS编号 34-19-0000036

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 易燃液体 类别 4

健康危害 未被分类。

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

危险符号 无。

警示词 警告

危险性说明 可燃液体。

防范说明

预防措施 远离明火和热表面 - 禁止吸烟。 戴防护手套/防护眼罩/防护面具。

事故响应 火灾时：使用适当的介质灭火。

安全储存 存放在通风良好的地方。保持低温。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
环戊硅氧烷		541-02-6	67.05
苯基三甲基聚硅氧烷		70131-69-0	6

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 用水冲洗。 如果刺激症状持续或加重，应就医。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 无资料。

指明任何需要立即就医或特殊治疗的情况 提供一般支持措施，并根据症状进行治疗。

一般信息 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂 水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质 禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害 该产品为易燃物，加热可产生可能形成爆炸性的蒸气/空气混合物的蒸汽。 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施 发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明 一旦发生火灾和/或爆炸，不得吸入烟气。 在不会发生危险的情况下将容器撤离火灾现场。

特定的方法 采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险 可燃液体。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序 让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 消除所有的点火源（在邻近区域严禁吸烟、火苗、火花或火焰）。 清洁时，戴合适防护设备和衣物。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料 使可燃物（木材、纸张、油等）远离泄漏物。

大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 使用如蛭石、沙或土等非可燃性材料来吸收产品，并放入容器中以便之后进行处理。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用泥土、沙子或其它不燃材料吸收，并转移到容器内待以后处置。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施 防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项 远离明火、热的表面和点火源。 使用时严禁吸烟。 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物 远离热源、火花和明火。 储存于阴凉、干燥的场所，远离直接日光光照。 储存在密闭的容器中。 存放在通风良好的地方。 避免儿童触及。 保存在装备有喷淋设备的地方。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国工作场所环境暴露水平（WEEL）指南

组分	类型	标准值
环戊硅氧烷 (CAS 541-02-6)	TWA	10 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 需穿上合适的防护衣服。

呼吸系统防护 仅用於工业环境。 如果工程工致措施不能维持空气中的浓度低于推荐的接触限值（如建立）或可接受的水平（未建立接触限值的国家），必须佩戴许可的呼吸器。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 使用时严禁吸烟。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状	液体。
颜色	无资料。
气味	特征的。
气味阈值	无资料。
pH 值	无资料。
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	82.0 ° C (179.6 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。

溶解性

溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。

其他信息

爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 避免温度超過閃火點温度。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	预计没有因皮肤接触导致的任何有害影响。
眼睛接触	预计不会因眼神接触而产生不良影响.
经口	预计较低的食入危害。

与物理,化学和毒物学特性有关的症状	无资料。

毒理学效应信息

急性毒性	未知。

产品	物种	试验结果
PULP RIOT MUNICH HAIR SERUM

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

刺激性腐蚀性 - 皮肤

环戊硅氧烷	OECD 404 结果: 非刺激性 物种: 兔子
苯基三甲基聚硅氧烷	OECD 404 结果: 非刺激性 物种: 兔子

严重眼睛损伤/眼睛刺激性 由于部分或完全缺乏数据，不可能进行分类。 预计不会因眼神接触而产生不良影响.

刺激性腐蚀性 - 眼睛

环戊硅氧烷	OECD 405 结果: 非刺激性 物种: 兔子
苯基三甲基聚硅氧烷	OECD 405 结果: 非刺激性 物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物

环戊硅氧烷	Buehler试验（一种灵敏度的试验法） 结果: Not Sensitizing 物种: 豚鼠
苯基三甲基聚硅氧烷	OECD 406 结果: Not Sensitizing 物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

环戊硅氧烷	结果: 体外和体内试验均未见致突变作用。
苯基三甲基聚硅氧烷	结果: 离体试验未见诱变效应

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

苯基三甲基聚硅氧烷 >= 1000 mg/kg bw/d OECD 471
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

生殖能力

环戊硅氧烷 > 160 ppm EPA OPPTS 870.3800, 蒸气
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

环戊硅氧烷 > 1600 mg/kg bw/d OECD 407, 经口
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

苯基三甲基聚硅氧烷 1000 mg/kg bw/d OECD 408, 经口
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠
测试时间: 90 D

环戊硅氧烷 160 ppm OECD 412, 吸入
结果: NOEAC
物种: 大鼠
1600 mg/kg bw/d OECD 410, 经皮肤
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
环戊硅氧烷 (CAS 541-02-6)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	> 2.9 µg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	> 12 µg/l, 96 h OECD 201
鱼	LC50	虹鳟鱼	> 16 µg/l, 96 h OECD 204
慢性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	> 2000 mg/l, 3 h EU C.11

慢性的			
鱼	无明显反应浓度（NOEC）	虹鳟鱼	>= 0.008 mg/l, 60 D OECD 210

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

环戊硅氧烷	0.14 % OECD 310 结果: 不容易生物降解
苯基三甲基聚硅氧烷	2.2 % OECD 301 F 结果: 不容易生物降解 测试时间: 28 D

潜在的生物累积性

辛醇/水分配系数 log Kow

环戊硅氧烷	5.2
苯基三甲基聚硅氧烷	9, QSAR

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

FINISHED GOODS

不作为危险货物运输

BULK

联合国危险货物编号(UN No.) NA1993

联合国正式运输名称 易燃液体，未另作规定的 (环戊硅氧烷)

类别 COMB LIQ

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

不适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

16. 其他信息，包括编制日期或最新修订日期

最初编制日期	18-十一月-2020
版本号	01
NFPA分级	健康 0 可燃性 2 不稳定性: 0
免责声明	这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT INSTANBUL BLOW DRY SPRAY**

Other means of identification

SDS number 00-31-0000064

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word None.

Hazard statement The mixture does not meet the criteria for classification.

Precautionary statement

Prevention Observe good industrial hygiene practices.

Response Wash hands after handling.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Not available.

Indication of immediate medical attention and special treatment needed	Treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	4.5 - 5.5
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity	Not known.

Product	Species	Test Results
PULP RIOT INSTANBUL BLOW DRY SPRAY		
Acute		
Dermal		
ATEmix		813000 mg/kg
Oral		
ATEmix		2.041e+006 mg/kg

Skin corrosion/irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.
Serious eye damage/eye irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.
Respiratory or skin sensitization	
Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.
Germ cell mutagenicity	Due to partial or complete lack of data the classification is not possible.
Carcinogenicity	Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - single exposure	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - repeated exposure	Due to partial or complete lack of data the classification is not possible.
Aspiration hazard	Due to partial or complete lack of data the classification is not possible.
Further information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity	The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.
Persistence and degradability	
Bioaccumulative potential	
Mobility in soil	No data available.
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT INSTANBUL BLOW DRY SPRAY
Synonyms	None.
SDS number	00-31-0000064
Product code	1241017 B
Issue date	11-18-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

This mixture does not meet the criteria for classification according to Regulation (EC) 1272/2008 as amended.

Hazard summary This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	The mixture does not meet the criteria for classification.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.
Supplemental label information	3% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 3% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.
2.3. Other hazards	Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

The components are not hazardous or are below required disclosure limits.

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits No exposure limits noted for ingredient(s).

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Characteristic.

Odor threshold Not available.

pH 4,5 - 5,5

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212,0 °F (> 100,0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity	Not known.
Skin corrosion/irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.
Serious eye damage/eye irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.
Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.
Germ cell mutagenicity	Due to partial or complete lack of data the classification is not possible.
Carcinogenicity	Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - single exposure	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - repeated exposure	Due to partial or complete lack of data the classification is not possible.
Aspiration hazard	Due to partial or complete lack of data the classification is not possible.
Mixture versus substance information	No information available.

Other information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity	Based on available data, the classification criteria are not met for hazardous to the aquatic environment.
12.2. Persistence and degradability	
12.3. Bioaccumulative potential	
Partition coefficient n-octanol/water (log Kow)	Not available.
Bioconcentration factor (BCF)	Not available.
12.4. Mobility in soil	No data available.
12.5. Results of PBT and vPvB assessment	Not a PBT or vPvB substance or mixture.
12.6. Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.
12.7. Additional information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	None.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT INSTANBUL BLOW DRY SPRAY**

Otros medios de identificación

Número de FDS 00-31-0000064

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos No clasificado.

Peligros para la salud No clasificado.

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Símbolo de riesgo Ninguno.

Palabra de advertencia Ninguno.

Declaración de peligro La mezcla no cumple los criterios para su clasificación.

Consejos de prudencia

Prevención Respete las normas para una manipulación correcta de productos químicos.

Respuesta Lávese las manos después del uso.

Almacenamiento Consérvese alejado de materiales incompatibles.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuagar con agua. Busque atención médica si la irritación se desarrolla y persiste.

Ingestión Enjuagarse la boca. Obtenga atención médica en caso de síntomas.

Principales síntomas y efectos, agudos y retardados No disponible.

Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Tratamiento sintomático.
Información general	Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Ningún riesgo excepcional de incendio o explosión señalado.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	Respete las normas para una manipulación correcta de productos químicos.
Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Almacenar en un recipiente herméticamente cerrado. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Valores límite biológicos	No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.
Controles técnicos apropiados	Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara	De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).
Protección de la piel	
Protección de las manos	De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros	De aplicación solamente en entornos industriales.
Protección respiratoria	De aplicación solamente en entornos industriales. En caso de ventilación insuficiente, úsese equipo respiratorio adecuado.
Peligros térmicos	Use ropa protectora térmica adecuada si resulta necesario.
Consideraciones generales de higiene	Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto	
Estado físico	Líquido.
Color	No disponible.
Olor	Característico.
Umbral olfativo	No disponible.
pH	4.5 - 5.5
Punto de fusión/punto de congelación	No disponible.
Punto inicial de ebullición e intervalo de ebullición	> 100 °C (> 212 °F)
Punto de inflamación	> 100.0 °C (> 212.0 °F) Copa Cerrada
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No aplicable.
Límites superior/inferior de inflamabilidad o de explosividad	
Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.

Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	No es de esperar que se produzcan efectos adversos por inhalación.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	No adverse effects due to eye contact are expected.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	No disponible.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Producto	Especies	Resultados de la prueba
PULP RIOT INSTANBUL BLOW DRY SPRAY		
Agudo		
Dérmico		
ATEmix		813000 mg/kg
Oral		
ATEmix		2.041e+006 mg/kg

Corrosión/irritación cutánea	Debido a la falta total o parcial de datos, la clasificación no es posible. No se esperan efectos adversos por contacto con la piel.
Lesiones oculares graves/irritación ocular	Debido a la falta total o parcial de datos, la clasificación no es posible. No adverse effects due to eye contact are expected.

Sensibilización respiratoria o cutánea

Sensibilización respiratoria	Debido a la falta total o parcial de datos, la clasificación no es posible.
Sensibilización cutánea	Debido a la falta total o parcial de datos, la clasificación no es posible.
Mutagenicidad en células germinales	Debido a la falta total o parcial de datos, la clasificación no es posible.
Carcinogenicidad	No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción	Debido a la falta total o parcial de datos, la clasificación no es posible.
Toxicidad específica en determinados órganos – exposición única	Debido a la falta total o parcial de datos, la clasificación no es posible.
Toxicidad específica en determinados órganos – exposición repetida	Debido a la falta total o parcial de datos, la clasificación no es posible.
Peligro por aspiración	Debido a la falta total o parcial de datos, la clasificación no es posible.
Información adicional	En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Persistencia y degradabilidad

Potencial de bioacumulación

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

IATA

FINISHED GOODS

15. Información reglamentaria

reglamentación Federal de EE.UU. No se tiene conocimiento de que este producto sea un "Producto químico peligroso" tal como está definido por la Norma de comunicación de riesgos OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

No listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso No (Exempt)

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

No reglamentado.

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

No reglamentado.

Ley Safe Drinking Water Act (SDWA) No reglamentado.

16. Otra información, como fecha de preparación o última revisión

Fecha de publicación	20-Noviembre-2020
Nº de versión	01
Clasificaciones NFPA	Salud: 0 Inflamabilidad: 1 Inestabilidad: 0
Cláusula de exención de responsabilidad	La información facilitada en esta Ficha de Datos de Seguridad es correcta, a nuestro leal saber y entender, en la fecha de su publicación. Dicha información está concebida únicamente como guía para la seguridad en la manipulación, el uso, el procesamiento, el almacenamiento, el transporte, la eliminación y la liberación, no debiendo tomarse como garantía o especificación de calidades. La información se refiere únicamente al material específico mencionado y puede no ser válida para tal material usado en combinación con cualesquiera otros materiales o en cualquier proceso salvo que se especifique expresamente en el texto.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT INSTANBUL BLOW DRY SPRAY**

Autres moyens d'identification

Numéro de la FDS 00-31-0000064

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Symbole de danger Aucune.

Mention d'avertissement Aucune.

Mention de danger Le mélange ne satisfait pas les critères de classification.

Conseil de prudence

Prévention Observer de bonnes pratiques d'hygiène industrielle.

Intervention Se laver les mains après utilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Le fabricant ne mentionne aucun ingrédient comme étant dangereux selon la norme 29 CFR 1910.1200 de l'OSHA.

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer avec de l'eau. Consulter un médecin si une irritation se développe et persiste.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Non disponible.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Traiter de manière symptomatique.
Informations générales	S’assurer que le personnel médical est averti du (des) produits(s) en cause et qu’il prend des mesures pour se protéger.

5. Mesures à prendre en cas d’incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l’incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d’incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d’incendie ou d’explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d’urgence	Tenir à l'écart le personnel non requis. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l’élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l’écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Valeurs biologiques limites	Aucune limite d’exposition biologique observée pour les ingrédients.
Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement.
Protection respiratoire	Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Couleur	Non disponible.
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	4.5 - 5.5
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.

Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	On ne s'attend à aucun effet néfaste en cas d'inhalation.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Aucun effet indésirable dû au contact des yeux n'est prévu.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Produit	Espèces	Résultats d'épreuves
PULP RIOT INSTANBUL BLOW DRY SPRAY		
Aiguë		
Cutané		
ATEmix		813000 mg/kg
Orale		
ATEmix		2.041e+006 mg/kg

Corrosion cutanée/irritation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Lésions oculaires graves/irritation oculaire	La classification n'est pas possible en raison d'un manque partiel ou total de données. Aucun effet indésirable dû au contact des yeux n'est prévu.

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Sensibilisation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Mutagénicité sur les cellules germinales	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Cancérogénicité	Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Toxicité pour certains organes cibles - exposition unique	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Toxicité pour certains organes cibles - expositions répétées	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Danger par aspiration	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Autres informations	La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Persistance et dégradation

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

Classements NFPA Santé: 0
Inflammabilité: 1
Instabilité: 0

Avis de non-responsabilité À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT INSTANBUL BLOW DRY SPRAY

鉴别的其他方法

SDS编号 00-31-0000064

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害 未被分类。

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

危险符号 无。

警示词 无。

危险性说明 混合物不符合分类的标准。

防范说明

预防措施 遵守良好工业卫生习惯。

事故响应 操作后洗手。

安全储存 远离禁忌物保存。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 用水冲洗。 如果刺激症状持续或加重，应就医。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 无资料。

指明任何需要立即就医或特殊治疗的情况 根据症状处理。

一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	发生火灾时，使用自给式呼吸设备并穿全身防护服。
消防设备/使用说明	在不会发生危险的情况下将容器撤离火灾现场。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。
一般火灾危险	无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

生物限值	没有该成分的生物接触限值。
适当的技术控制	应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。
个人防护措施，如个人防护设备	
眼/面保护	仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。
皮肤防护	
手防护	仅用於工业环境。 佩戴适当的抗化学手套。
其它的，其它	仅用於工业环境。
呼吸系统防护	仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。
热危害	必要时，穿戴适当的热防护服。
一般的卫生考虑	始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观	
性状	液体。
颜色	无资料。
气味	特征的。
气味阈值	无资料。
pH 值	4.5 - 5.5
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%） 无资料。

蒸气压 无资料。

蒸气密度 无资料。

相对密度 无资料。

溶解性

溶解性（水） 无资料。

分配系数（辛醇/水） 无资料。

自燃温度 无资料。

分解温度 无资料。

黏度 无资料。

其他信息

爆炸特性 不具有爆炸性。

氧化特性 没有氧化性。

10. 稳定性和反应性

反应性 产品在正常的使用、储存和运输条件下是稳定的和非活性的。

化学稳定性 正常条件下物料稳定。

可能的危险反应 正常使用的条件下未见有危险反应。

避免接触的条件 远离热，热表面，火花，明火和其他点火源。 接触禁配物。

禁配物 强氧化剂。

危险的分解产物 没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入 预期吸入无有害影响。

皮肤接触 预计没有因皮肤接触导致的任何有害影响。

眼睛接触 预计不会因眼神接触而产生不良影响.

经口 预计较低的食入危害。

与物理,化学和毒物学特性有关的症状 无资料。

毒理学效应信息

急性毒性 未知。

产品	物种	试验结果
PULP RIOT INSTANBUL BLOW DRY SPRAY		
急性的		
经口		
ATEmix		2.041e+006 mg/kg
经皮肤		
ATEmix		813000 mg/kg

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

严重眼睛损伤/眼睛刺激性 由于部分或完全缺乏数据，不可能进行分类。 预计不会因眼神接触而产生不良影响.

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性	由于部分或完全缺乏数据，不可能进行分类。
特定目标器官系统毒性－单次接触	由于部分或完全缺乏数据，不可能进行分类。
特定目标器官系统毒性－重复接触	由于部分或完全缺乏数据，不可能进行分类。
吸入危害	由于部分或完全缺乏数据，不可能进行分类。
更多信息	本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性	产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。
持久性和降解性	
潜在的生物累积性	
土壤中的迁移性	无数据
其它不良影响	本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导	回收再生或装在密封的容器中送至专门的废弃物处理场处理。
地方处置法规	按照所有适用的法规进行处置。
残渣废料/未用掉的产品	按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。
污染包装物	容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT MEMPHIS SHINE MIST**

Other means of identification

SDS number 34-31-0000011

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Flammable liquids Category 4

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word Warning

Hazard statement Combustible liquid.

Precautionary statement

Prevention Keep away from flames and hot surfaces-No smoking. Wear protective gloves/eye protection/face protection.

Response In case of fire: Use appropriate media to extinguish.

Storage Store in a well-ventilated place. Keep cool.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
CYCLOPENTASILOXANE		541-02-6	89.48

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed	Not available.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	The product is combustible, and heating may generate vapors which may form explosive vapor/air mixtures. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	Combustible liquid.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Keep combustibles (wood, paper, oil, etc.) away from spilled material. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water. Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Keep away from open flames, hot surfaces and sources of ignition. When using do not smoke. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Keep away from heat, sparks and open flame. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep out of the reach of children. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value
CYCLOPENTASILOXANE (CAS 541-02-6)	TWA	10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	170.6 - 199.4 °F (77.0 - 93.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity

Components	Species	Test Results
CYCLOPENTASILOXANE (CAS 541-02-6)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg bw OECD 402
Inhalation		
Aerosol		
LC50	Rat	8.67 mg/L air, 4 h OECD 403
Oral		
LD50	Rat	> 5000 mg/kg bw OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

CYCLOPENTASILOXANE	OECD 404 Result: Not Irritating Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

CYCLOPENTASILOXANE	OECD 405 Result: Not Irritating Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.

Skin sensitization

CYCLOPENTASILOXANE	Buehler Test Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

CYCLOPENTASILOXANE	Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Reproductivity

CYCLOPENTASILOXANE	> 160 ppm EPA OPPTS 870.3800, Vapor Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

CYCLOPENTASILOXANE	> 1600 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat 160 ppm OECD 412, Inhalation Result: NOEAC Species: Rat 1600 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
CYCLOPENTASILOXANE (CAS 541-02-6)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 12 µg/l, 96 h OECD 201
Crustacea	EC50	Daphnia magna	> 2.9 µg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	> 16 µg/l, 96 h OECD 204
Chronic			
Crustacea	NOEC	Daphnia magna	> 15 µg/l, 21 d OECD 211
Fish	NOEC	Oncorhynchus mykiss	> 14 µg/l, 90 d OECD 210
Other	EC50	Activated sludge of a predominantly domestic sewage	> 2000 mg/l, 3 h EU C.11

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

CYCLOPENTASILOXANE	0.14 % OECD 310 Result: Not Readily Biodegradable

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

CYCLOPENTASILOXANE	5.2

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT MEMPHIS SHINE MIST
Synonyms	None.
SDS number	34-31-0000011
Product code	1241018
Issue date	11-18-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

This mixture does not meet the criteria for classification according to Regulation (EC) 1272/2008 as amended.

Hazard summary This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	The mixture does not meet the criteria for classification.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.
Supplemental label information	10% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.
2.3. Other hazards	The mixture contains a substance that is assessed to be a PBT or a vPvB.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
CYCLOPENTASILOXANE	89,48	541-02-6 208-764-9	01-2119511367-43	-	PBT vPvB

Classification: -

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits	No exposure limits noted for ingredient(s).
Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	170,6 - 199,4 °F (77,0 - 93,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.

Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity

Components	Species	Test Results
CYCLOPENTASILOXANE (CAS 541-02-6)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg bw OECD 402
Inhalation		
Aerosol		
LC50	Rat	8,67 mg/L air, 4 h OECD 403
Oral		
LD50	Rat	> 5000 mg/kg bw OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

CYCLOPENTASILOXANE	OECD 404 Result: Not Irritating Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye
CYCLOPENTASILOXANE
OECD 405
Result: Not Irritating
Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization
CYCLOPENTASILOXANE
Buehler Test
Result: Not Sensitizing
Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity
CYCLOPENTASILOXANE
Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Reproductivity
CYCLOPENTASILOXANE
> 160 ppm EPA OPPTS 870,3800, Vapor
Result: NOAEL
Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

CYCLOPENTASILOXANE
> 1600 mg/kg bw/d OECD 407, Oral
Result: NOAEL
Species: Rat
160 ppm OECD 412, Inhalation
Result: NOEAC
Species: Rat
1600 mg/kg bw/d OECD 410, Dermal
Result: NOAEL
Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information This product has no known adverse effect on human health. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
CYCLOPENTASILOXANE (CAS 541-02-6)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 12 µg/l, 96 h OECD 201
Crustacea	EC50	Daphnia magna	> 2,9 µg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	> 16 µg/l, 96 h OECD 204
Chronic			
Crustacea	NOEC	Daphnia magna	> 15 µg/l, 21 d OECD 211
Fish	NOEC	Oncorhynchus mykiss	> 14 µg/l, 90 d OECD 210
Other	EC50	Activated sludge of a predominantly domestic sewage	> 2000 mg/l, 3 h EU C.11

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

CYCLOPENTASILOXANE	0,14 % OECD 310 Result: Not Readily Biodegradable

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

CYCLOPENTASILOXANE	5,2

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment The mixture contains a substance that is assessed to be a PBT or a vPvB.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

CYCLOPENTASILOXANE (CAS 541-02-6)

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

CYCLOPENTASILOXANE (CAS 541-02-6)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	None.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT MEMPHIS SHINE MIST**

Otros medios de identificación

Número de FDS 34-31-0000011

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos Líquidos inflamables Categoría 4

Peligros para la salud No clasificado.

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Símbolo de riesgo Ninguno.

Palabra de advertencia Atención

Declaración de peligro Líquido combustible.

Consejos de prudencia

Prevención Mantener alejado de llamas y de superficies calientes. No fumar. Llevar guantes protectores / protección ocular / protección facial.

Respuesta En caso de incendio: Utilizar medios apropiados para apagarlo.

Almacenamiento Almacenar en un lugar bien ventilado. Mantener en lugar fresco.

Eliminación Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
CICLOPENTASILOXANO		541-02-6	89.48

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuagar con agua. Busque atención médica si la irritación se desarrolla y persiste.

Ingestión Enjuagarse la boca. Obtenga atención médica en caso de síntomas.

Principales síntomas y efectos, agudos y retardados	No disponible.
Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Provea las medidas de apoyo generales y de tratamiento sintomático.
Información general	Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	El producto es combustible, y en caso de calentamiento pueden producirse vapores que forman mezclas explosivas de aire/vapor. En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	En caso de incendio y/o de explosión no respire los humos. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Líquido combustible.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Eliminar todas las fuentes de ignición (no fumar, teas, chispas ni llamas en los alrededores). Use equipo y ropa de protección apropiados durante la limpieza. Asegúrese una ventilación apropiada. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Mantenga los materiales combustibles (madera, papel, petróleo, etc.) lejos del material derramado . Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Usar un material no combustible como vermiculita, arena o tierra para absorber el producto y colocarlo en un recipiente para su eliminación posterior. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Absorba con tierra, arena y otro material no combustible y transfiera a recipientes para su posterior eliminación. Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	Mantener apartado de las llamas abiertas, de las superficies calientes y de los focos de ignición. No fumar durante su utilización. Evite la exposición prolongada. Asegúre una ventilación adecuada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.
Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Guardar lejos del calor, las chispas o llamas desnudas. Guárdese en un lugar fresco y seco sin exposición a la luz solar directa. Almacenar en un recipiente herméticamente cerrado. Almacenar en un lugar bien ventilado. Manténgase fuera del alcance de los niños. Guardar en una zona equipada con extinctores automáticos. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Límites de exposición profesional

Los constituyentes siguientes son los únicos constituyentes del producto que tienen un PEL, TLV u otro límite de exposición recomendado. En este momento, los demás constituyentes no tienen límites de exposición conocidos.

US. Workplace Environmental Exposure Level (WEEL) Guides

Componentes	Tipo	Valor
CICLOPENTASILOXANO (CAS 541-02-6)	TWA	10 ppm

Valores límite biológicos No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.

Controles técnicos apropiados Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).

Protección de la piel

Protección de las manos De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros De aplicación solamente en entornos industriales. Úsese indumentaria protectora adecuada.

Protección respiratoria De aplicación solamente en entornos industriales. Si los controles de ingeniería no mantienen las concentraciones en el aire por debajo de los límites de exposición recomendados (cuando proceda) o a un nivel aceptable (en países donde no se hayan establecido límites de exposición), ha de utilizarse un respirador aprobado.

Peligros térmicos Use ropa protectora térmica adecuada si resulta necesario.

Consideraciones generales de higiene No fumar durante su utilización. Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto

Estado físico Líquido.

Color No disponible.

Olor Característico.

Umbral olfativo No disponible.

pH No disponible.

Punto de fusión/punto de congelación No disponible.

Punto inicial de ebullición e intervalo de ebullición > 100 °C (> 212 °F)

Punto de inflamación 77.0 - 93.0 °C (170.6 - 199.4 °F) Copa Cerrada

Tasa de evaporación No disponible.

Inflamabilidad (sólido, gas) No aplicable.

Límites superior/inferior de inflamabilidad o de explosividad

Límite de inflamabilidad - inferior (%) No disponible.

Límite de inflamabilidad - superior (%) No disponible.

Límite de explosividad inferior (%) No disponible.

Límite de explosividad superior (%) No disponible.

Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Evitar temperaturas por encima del punto de flash. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	La inhalación prolongada puede resultar nociva.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	No adverse effects due to eye contact are expected.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	No disponible.

Información sobre los efectos toxicológicos

Toxicidad aguda

Componentes	Especies	Resultados de la prueba
CICLOPENTASILOXANO (CAS 541-02-6)		
Agudo		
Dérmico		
LD50	Conejo	> 2000 mg/kg bw OECD 402
Inhalación		
Aerosol		
LC50	Rata	8.67 mg/L air, 4 h OECD 403
Oral		
LD50	Rata	> 5000 mg/kg bw OECD 401

Corrosión/irritación cutánea	Debido a la falta total o parcial de datos, la clasificación no es posible. No se esperan efectos adversos por contacto con la piel.

Irritación/Corrosión- Piel

CICLOPENTASILOXANO	OECD 404 Resultado: No Irritante Especies: Conejo

Lesiones oculares graves/irritación ocular Debido a la falta total o parcial de datos, la clasificación no es posible. No adverse effects due to eye contact are expected.

Irritación/Corrosión- Ojos

CICLOPENTASILOXANO	OECD 405 Resultado: No Irritante Especies: Conejo

Sensibilización respiratoria o cutánea

Sensibilización respiratoria Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea

CICLOPENTASILOXANO	Prueba Buehler Resultado: Not Sensibilizante Especies: Conejillo de indias

Mutagenicidad en células germinales Debido a la falta total o parcial de datos, la clasificación no es posible.

Mutagenicidad

CICLOPENTASILOXANO	Resultado: Pruebas in vitro e in vivo no mostraron efectos mutagénicos.

Carcinogenicidad No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción Debido a la falta total o parcial de datos, la clasificación no es posible.

Reproductividad

CICLOPENTASILOXANO	> 160 ppm EPA OPPTS 870.3800, Vapor Resultado: NOAEL Especies: Rata

Toxicidad específica en determinados órganos – exposición única Debido a la falta total o parcial de datos, la clasificación no es posible.

Toxicidad específica en determinados órganos – exposición repetida Debido a la falta total o parcial de datos, la clasificación no es posible.

CICLOPENTASILOXANO	> 1600 mg/kg bw/d OECD 407, Oral Resultado: NOAEL Especies: Rata 160 ppm OECD 412, Inhalación Resultado: NOEAC Especies: Rata 1600 mg/kg bw/d OECD 410, Dérmico Resultado: NOAEL Especies: Rata

Peligro por aspiración Debido a la falta total o parcial de datos, la clasificación no es posible.

Información adicional En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Componentes		Especies	Resultados de la prueba
CICLOPENTASILOXANO (CAS 541-02-6)			
Acuático (a)			
Agudo			
Algas	EC50	Pseudokirchneriella subcapitata	> 12 µg/L, 96 h OECD 201
Crustáceos	EC50	Dafnia magna	> 2.9 µg/L, 48 h OECD 202
Pez	LC50	Oncorhynchus mykiss	> 16 µg/L, 96 h OECD 204
Crónico			
Crustáceos	NOEC	Dafnia magna	> 15 µg/L, 21 d OECD 211
Otros	EC50	Lodo activado de una depuradora predominantemente doméstica	> 2000 mg/l, 3 h EU C.11
Pez	NOEC	Oncorhynchus mykiss	> 14 µg/L, 90 d OECD 210

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

CICLOPENTASILOXANO	0.14 % OECD 310 Resultado: No Es Fácilmente Biodegradable

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

CICLOPENTASILOXANO	5.2

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

FINISHED GOODS

No se regula como artículo peligroso.

BULK

Número ONU	NA1993
Designación oficial de transporte de las Naciones Unidas	LÍQUIDO COMBUSTIBLE, N.E.P. (CICLOPENTASILOXANO)
Clase	COMB LIQ
Grupo de embalaje	III
Clase(s) de peligro para el transporte	
Label(s)	Ninguno
Disposiciones especiales	IB3, T1, T4, TP1
Envasado no a granel	203

Materials classified as combustible liquids are only regulated for transport when offered in bulk packaging (>119 gallons).

IATA

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

IMDG

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

15. Información reglamentaria

reglamentación Federal de EE.UU. El producto es un "Producto químico peligroso" tal como lo define la Norma de comunicación de peligro OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

No listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso No (Exempt)

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

No reglamentado.

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

No reglamentado.

Ley Safe Drinking Water Act (SDWA) No reglamentado.

16. Otra información, como fecha de preparación o última revisión

Fecha de publicación	20-Noviembre-2020
Nº de versión	01
Clasificaciones NFPA	Salud: 0 Inflamabilidad: 2 Inestabilidad: 0
Cláusula de exención de responsabilidad	La información facilitada en esta Ficha de Datos de Seguridad es correcta, a nuestro leal saber y entender, en la fecha de su publicación. Dicha información está concebida únicamente como guía para la seguridad en la manipulación, el uso, el procesamiento, el almacenamiento, el transporte, la eliminación y la liberación, no debiendo tomarse como garantía o especificación de calidades. La información se refiere únicamente al material específico mencionado y puede no ser válida para tal material usado en combinación con cualesquiera otros materiales o en cualquier proceso salvo que se especifique expresamente en el texto.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT MEMPHIS SHINE MIST**

Autres moyens d'identification

Numéro de la FDS 34-31-0000011

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Liquides inflammables Catégorie 4

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Symbole de danger Aucune.

Mention d'avertissement Attention

Mention de danger Liquide combustible.

Conseil de prudence

Prévention Tenir loin des flammes et des surfaces chaudes - défense de fumer. Porter des gants de protection/un équipement de protection des yeux/du visage.

Intervention En cas d'incendie : utiliser un agent d'extinction approprié.

Stockage Stocker dans un endroit bien ventilé. Tenir au frais.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
CYCLOPENTASILOXANE		541-02-6	89.48

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer avec de l'eau. Consulter un médecin si une irritation se développe et persiste.

Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Non disponible.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes.
Informations générales	S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Ce produit est combustible et son chauffage peut générer des vapeurs qui peuvent former des mélanges vapeurs/air explosifs. Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	En cas d'incendie et/ou d'explosion ne pas respirer les fumées. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Liquide combustible.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Éliminer toutes les sources d'ignition (pas de cigarettes, de torches, d'étincelles ou de flammes dans la zone immédiate). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Utiliser un matériau non combustible comme la vermiculite, le sable ou la terre pour absorber le produit et le mettre dans un récipient pour élimination ultérieure. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Absorber avec de la terre, du sable ou une autre matière non combustible et transférer dans des contenants pour une élimination ultérieure. Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Tenir à l'écart des flammes nues, des surfaces chaudes et des sources d'ignition. Ne pas fumer pendant l'utilisation. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Tenir à l'écart de la chaleur, des étincelles et des flammes nues. Stocker dans un endroit frais et sec, à l'écart de la lumière solaire directe. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Tenir hors de la portée des enfants. Conserver dans un endroit muni de gicleurs. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d’exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d’exposition connues.

États-Unis. Guides WEEL (niveau d’exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
CYCLOPENTASILOXANE (CAS 541-02-6)	TWA	10 ppm

Valeurs biologiques limites Aucune limite d’exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter un vêtement de protection approprié.

Protection respiratoire Pour usage industriel seulement. Si les contrôles d’ingénierie ne maintiennent pas les concentrations atmosphériques sous les limites d’exposition recommandées (lorsqu’il y a lieu) ou à un taux acceptable (dans les pays où des limites d’exposition n’ont pas été établies), un respirateur homologué doit être porté

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Couleur Non disponible.

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH Non disponible.

Point de fusion et point de congélation Non disponible.

Point initial d’ébullition et domaine d’ébullition > 100 °C (> 212 °F)

Point d’éclair 77.0 - 93.0 °C (170.6 - 199.4 °F) Coupelle fermée

Taux d’évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d’inflammabilité ou d’explosibilité

Limites d’inflammabilité - inférieure (%) Non disponible.

Limite d'explosibilité - supérieure (%) Non disponible.

Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Éviter les températures supérieures au point d'éclair. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Aucun effet indésirable dû au contact des yeux n'est prévu.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë

Composants	Espèces	Résultats d'épreuves
CYCLOPENTASILOXANE (CAS 541-02-6)		
Aiguë		
Cutané		
DL50	Lapin	> 2000 mg/kg bw OCDE 402
Inhalation		
Aérosol		
CL50	Rat	8.67 mg/L air, 4 h OECD 403
Orale		
DL50	Rat	> 5000 mg/kg bw OCDE 401

Corrosion cutanée/irritation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

CYCLOPENTASILOXANE	OCDE 404 Résultat: Non Irritant Espèces: Lapin

Lésions oculaires graves/irritation oculaire La classification n'est pas possible en raison d'un manque partiel ou total de données. Aucun effet indésirable dû au contact des yeux n'est prévu.

Irritation- corrosion - Œil

CYCLOPENTASILOXANE	OCDE 405 Résultat: Non Irritant Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée

CYCLOPENTASILOXANE	Test de Buehler Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

CYCLOPENTASILOXANE	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Reproductivité

CYCLOPENTASILOXANE	> 160 ppm EPA OPPTS 870.3800, Vapeur Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

CYCLOPENTASILOXANE	> 1600 mg/kg bw/d OCDE 407, Orale Résultat: DSENO Espèces: Rat 160 ppm OCDE 412, Inhalation Résultat: NOEAC Espèces: Rat 1600 mg/kg bw/d OECD 410, Cutané Résultat: DSENO Espèces: Rat

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
CYCLOPENTASILOXANE (CAS 541-02-6)			
Aquatique			
Aiguë			
Algues	CE50	Pseudokirchneriella subcapitata	> 12 µg/L, 96 h OCDE 201
Crustacés	CE50	Daphnia magna	> 2.9 µg/L, 48 h OCDE 202
Poisson	CL50	Oncorhynchus mykiss	> 16 µg/L, 96 h OECD 204
Chronique			
Autre	CE50	Boues activées d'eaux usées d'origine principalement domestique	> 2000 mg/l, 3 h EU C.11
Crustacés	NOEC (concentration sans effet observé)	Daphnia magna	> 15 µg/L, 21 d OECD 211
Poisson	NOEC (concentration sans effet observé)	Oncorhynchus mykiss	> 14 µg/L, 90 d OECD 210

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

CYCLOPENTASILOXANE — 0.14 % OECD 310
Résultat: Difficilement Biodégradable

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

CYCLOPENTASILOXANE — 5.2

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

FINISHED GOODS

N'entre pas dans la réglementation des marchandises dangereuses.

BULK

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT MEMPHIS SHINE MIST

鉴别的其他方法

SDS编号 34-31-0000011

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 易燃液体 类别 4

健康危害 未被分类。

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

危险符号 无。

警示词 警告

危险性说明 可燃液体。

防范说明

预防措施 远离明火和热表面 - 禁止吸烟。 戴防护手套/防护眼罩/防护面具。

事故响应 火灾时：使用适当的介质灭火。

安全储存 存放在通风良好的地方。保持低温。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
环戊硅氧烷		541-02-6	89.48

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 用水冲洗。 如果刺激症状持续或加重，应就医。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 无资料。

指明任何需要立即就医或特殊治疗的情况 提供一般支持措施，并根据症状进行治疗。

一般信息 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂 水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质 禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害 该产品为易燃物，加热可产生可能形成爆炸性的蒸气/空气混合物的蒸汽。 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施 发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明 一旦发生火灾和/或爆炸，不得吸入烟气。 在不会发生危险的情况下将容器撤离火灾现场。

特定的方法 采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险 可燃液体。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序 让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 消除所有的点火源（在邻近区域严禁吸烟、火苗、火花或火焰）。 清洁时，戴合适防护设备和衣物。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料 使可燃物（木材、纸张、油等）远离泄漏物。

大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 使用如蛭石、沙或土等非可燃性材料来吸收产品，并放入容器中以便之后进行处理。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用泥土、沙子或其它不燃材料吸收，并转移到容器内待以后处置。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施 防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项 远离明火、热的表面和点火源。 使用时严禁吸烟。 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物 远离热源、火花和明火。 储存于阴凉、干燥的场所，远离直接日光光照。 储存在密闭的容器中。 存放在通风良好的地方。 避免儿童触及。 保存在装备有喷淋设备的地方。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国工作场所环境暴露水平（WEEL）指南

组分	类型	标准值
环戊硅氧烷 (CAS 541-02-6)	TWA	10 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 需穿上合适的防护衣服。

呼吸系统防护 仅用於工业环境。 如果工程工致措施不能维持空气中的浓度低于推荐的接触限值（如建立）或可接受的水平（未建立接触限值的国家），必须佩戴许可的呼吸器。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 使用时严禁吸烟。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状	液体。
颜色	无资料。
气味	特征的。
气味阈值	无资料。
pH 值	无资料。
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	77.0 - 93.0 ° C (170.6 - 199.4 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。

溶解性

溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。

其他信息

爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 避免温度超過閃火點温度。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	预计没有因皮肤接触导致的任何有害影响。
眼睛接触	预计不会因眼神接触而产生不良影响.
经口	预计较低的食入危害。

与物理,化学和毒物学特性有关的症状	无资料。

毒理学效应信息

急性毒性

组分	物种	试验结果
环戊硅氧烷 (CAS 541-02-6)		
急性的		
吸入		
气溶胶		
LC50	大鼠	8.67 mg/L air, 4 h OECD 403
经口		
LD50	大鼠	> 5000 mg/kg bw OECD 401
经皮肤		
LD50	兔子	> 2000 mg/kg bw OECD 402

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

刺激性腐蚀性 - 皮肤

环戊硅氧烷

OECD 404
结果: 非刺激性
物种: 兔子

严重眼睛损伤/眼睛刺激性 由于部分或完全缺乏数据，不可能进行分类。 预计不会因眼神接触而产生不良影响.

刺激性腐蚀性 - 眼睛

环戊硅氧烷

OECD 405
结果: 非刺激性
物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物

环戊硅氧烷

Buehler试验（一种灵敏度的试验法）
结果: Not Sensitizing
物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

环戊硅氧烷

结果: 体外和体内试验均未见致突变作用。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

生殖能力

环戊硅氧烷

> 160 ppm EPA OPPTS 870.3800, 蒸气
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

环戊硅氧烷

> 1600 mg/kg bw/d OECD 407, 经口
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

160 ppm OECD 412, 吸入
结果: NOEAC
物种: 大鼠

1600 mg/kg bw/d OECD 410, 经皮肤
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
环戊硅氧烷 (CAS 541-02-6)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	> 2.9 µg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	> 12 µg/l, 96 h OECD 201
鱼	LC50	虹鳟鱼	> 16 µg/l, 96 h OECD 204
慢性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	> 2000 mg/l, 3 h EU C.11
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	> 15 µg/l, 21 D OECD 211
鱼	无明显反应浓度（NOEC）	虹鳟鱼	> 14 µg/l, 90 D OECD 210

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

环戊硅氧烷	0.14 % OECD 310 结果: 不容易生物降解

潜在的生物累积性

辛醇/水分配系数 log Kow

环戊硅氧烷	5.2

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT HANOI CURL CREAM STYLING LOTION**

Other means of identification

SDS number 00-19-0000247

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word None.

Hazard statement The mixture does not meet the criteria for classification.

Precautionary statement

Prevention Observe good industrial hygiene practices.

Response Wash hands after handling.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
MYRISTYL ALCOHOL		112-72-1	1

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Not available.

Indication of immediate medical attention and special treatment needed	Treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state	Liquid.
Form	Cream.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	5 - 6
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT HANOI CURL CREAM STYLING LOTION		
Acute		
Oral		
ATEmix		1e+008 mg/kg

Components	Species	Test Results
MYRISTYL ALCOHOL (CAS 112-72-1)		
Acute		
Dermal		
LD50	Rabbit	> 5000 mg/kg
Inhalation		
Dust		
LC50	Rat	> 1.5 mg/l, 1 h
Oral		
LD50	Rat	> 2000 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

MYRISTYL ALCOHOL
OECD 404
Result: Not Irritating
Species: Human

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

MYRISTYL ALCOHOL
OECD 405
Result: Irritating
Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

MYRISTYL ALCOHOL
OECD 406
Result: Not Sensitizing
Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

MYRISTYL ALCOHOL
Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

MYRISTYL ALCOHOL
> 2000 mg/kg bw/d OECD 422
Result: NOAEL
Species: Rat

Reproductivity

MYRISTYL ALCOHOL

> 2000 mg/kg bw/d OECD 422, Based on test data for structurally similar materials.
Result: NOAEL
Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

MYRISTYL ALCOHOL

3548 mg/kg bw/d OECD 408, Based on test data for structurally similar materials.
Result: NOAEL
Species: Rat
Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
MYRISTYL ALCOHOL (CAS 112-72-1)			
Aquatic			
Acute			
Algae	EL50	Desmodesmus subspicatus	2.9 mg/l, 96 h OECD 201
Crustacea	EC50	Daphnia magna	3.2 mg/l, 96 h OECD 202
Fish	LC50	Oncorhynchus mykiss	> 1 mg/l, 96 h OECD 203
Chronic			
Crustacea	NOEC	Daphnia magna	0.0016 mg/l, 21 d OECD 211

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

MYRISTYL ALCOHOL

92 % ISO 10708
Result: Readily Biodegradable
Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

MYRISTYL ALCOHOL

6.03

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

Issue date 11-20-2020

Version # 01

NFPA ratings Health: 0
Flammability: 1
Instability: 0

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT HANOI CURL CREAM STYLING LOTION
Synonyms	None.
SDS number	00-19-0000247
Product code	1241020 C
Issue date	11-20-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Environmental hazards

Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Dangerous for the environment if discharged into watercourses. Not classified for health hazards. However, occupational exposure to the mixture or substance(s) may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.

Hazard statements

H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P273	Avoid release to the environment.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage Store away from incompatible materials.

Disposal

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 6,83% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 5,83% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
MYRISTYL ALCOHOL	1	112-72-1 204-000-3	01-2119485910-33	-	
Classification:	Eye Irrit. 2;H319, Aquatic Chronic 1;H410				
PHENYL TRIMETHICONE	0,5	- 939-487-8	01-2119974594-23	-	
Classification:	Acute Tox. 2;H330				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Prevent product from entering drains. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
MYRISTYL ALCOHOL (CAS 112-72-1)	AGW	178 mg/m3	Vapor and aerosol.
		20 ppm	Vapor and aerosol.

Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Cream.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	5 - 6
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
MYRISTYL ALCOHOL (CAS 112-72-1)		
Acute		
Dermal		
LD50	Rabbit	> 5000 mg/kg
Inhalation		
Dust		
LC50	Rat	> 1,5 mg/l, 1 h
Oral		
LD50	Rat	> 2000 mg/kg OECD 401
PHENYL TRIMETHICONE		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg OECD 402
Inhalation		
Mist		
LC50	Rat	0,467 mg/l, 4 h OECD 403
Oral		
LD50	Rat	> 5000 mg/kg

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

MYRISTYL ALCOHOL	OECD 404 Result: Not Irritating Species: Human
PHENYL TRIMETHICONE	OECD 404 Result: Not Irritating Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

MYRISTYL ALCOHOL	OECD 405 Result: Irritating Species: Rabbit
PHENYL TRIMETHICONE	OECD 405 Result: Not Irritating Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

MYRISTYL ALCOHOL	OECD 406 Result: Not Sensitizing Species: Guinea pig
PHENYL TRIMETHICONE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

MYRISTYL ALCOHOL	Result: In vitro and in vivo tests did not show mutagenic effects.
PHENYL TRIMETHICONE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

MYRISTYL ALCOHOL	> 2000 mg/kg bw/d OECD 422 Result: NOAEL Species: Rat
PHENYL TRIMETHICONE	>= 1000 mg/kg bw/d OECD 471 Result: NOAEL Species: Rat

Reproductivity

MYRISTYL ALCOHOL	> 2000 mg/kg bw/d OECD 422, Based on test data for structurally similar materials. Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

PHENYL TRIMETHICONE	1000 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
MYRISTYL ALCOHOL	3548 mg/kg bw/d OECD 408, Based on test data for structurally similar materials. Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
MYRISTYL ALCOHOL (CAS 112-72-1)			
Aquatic			
Acute			
Algae	EL50	Desmodesmus subspicatus	2,9 mg/l, 96 h OECD 201
Crustacea	EC50	Daphnia magna	3,2 mg/l, 96 h OECD 202
Fish	LC50	Oncorhynchus mykiss	> 1 mg/l, 96 h OECD 203
Chronic			
Crustacea	NOEC	Daphnia magna	0,0016 mg/l, 21 d OECD 211
PHENYL TRIMETHICONE			
Aquatic			
Chronic			
Fish	NOEC	Oncorhynchus mykiss	>= 0,008 mg/l, 60 d OECD 210

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

MYRISTYL ALCOHOL	92 % ISO 10708 Result: Readily Biodegradable Test Duration: 28 d
PHENYL TRIMETHICONE	2,2 % OECD 301 F Result: Not Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

MYRISTYL ALCOHOL	6,03
PHENYL TRIMETHICONE	9, QSAR

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H319 Causes serious eye irritation. H330 Fatal if inhaled. H410 Very toxic to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT HANOI CURL CREAM STYLING LOTION**

Otros medios de identificación

Número de FDS 00-19-0000247

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos No clasificado.

Peligros para la salud No clasificado.

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Símbolo de riesgo Ninguno.

Palabra de advertencia Ninguno.

Declaración de peligro La mezcla no cumple los criterios para su clasificación.

Consejos de prudencia

Prevención Respete las normas para una manipulación correcta de productos químicos.

Respuesta Lávese las manos después del uso.

Almacenamiento Consérvese alejado de materiales incompatibles.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
Alcohol miristílico		112-72-1	1

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuagar con agua. Busque atención médica si la irritación se desarrolla y persiste.

Ingestión Enjuagarse la boca. Obtenga atención médica en caso de síntomas.

Principales síntomas y efectos, agudos y retardados	No disponible.
Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Tratamiento sintomático.
Información general	Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Ningún riesgo excepcional de incendio o explosión señalado.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	Respete las normas para una manipulación correcta de productos químicos.
Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Almacenar en un recipiente herméticamente cerrado. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Valores límite biológicos	No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.
Controles técnicos apropiados	Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara	De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).

Protección de la piel	
Protección de las manos	De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.
Otros	De aplicación solamente en entornos industriales.
Protección respiratoria	De aplicación solamente en entornos industriales. En caso de ventilación insuficiente, úsese equipo respiratorio adecuado.
Peligros térmicos	Use ropa protectora térmica adecuada si resulta necesario.
Consideraciones generales de higiene	Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto	
Estado físico	Líquido.
Forma	Nata.
Color	No disponible.
Olor	Característico.
Umbral olfativo	No disponible.
pH	5 - 6
Punto de fusión/punto de congelación	No disponible.
Punto inicial de ebullición e intervalo de ebullición	> 100 °C (> 212 °F)
Punto de inflamación	> 100.0 °C (> 212.0 °F) Copa Cerrada
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No aplicable.
Límites superior/inferior de inflamabilidad o de explosividad	
Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	No es de esperar que se produzcan efectos adversos por inhalación.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	No adverse effects due to eye contact are expected.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	No disponible.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Producto	Especies	Resultados de la prueba
PULP RIOT HANOI CURL CREAM STYLING LOTION		
Agudo		
Oral		
ATEmix		1e+008 mg/kg

Componentes	Especies	Resultados de la prueba
Alcohol miristílico (CAS 112-72-1)		
Agudo		
Dérmico		
LD50	Conejo	> 5000 mg/kg
Inhalación		
Polvo		
LC50	Rata	> 1.5 mg/l, 1 h
Oral		
LD50	Rata	> 2000 mg/kg OECD 401

Corrosión/irritación cutánea Debido a la falta total o parcial de datos, la clasificación no es posible. No se esperan efectos adversos por contacto con la piel.

Irritación/Corrosión- Piel

Alcohol miristílico	OECD 404 Resultado: No Irritante Especies: humano

Lesiones oculares graves/irritación ocular Debido a la falta total o parcial de datos, la clasificación no es posible. No adverse effects due to eye contact are expected.

Irritación/Corrosión- Ojos

Alcohol miristílico	OECD 405 Resultado: Irritante Especies: Conejo

Sensibilización respiratoria o cutánea

Sensibilización respiratoria	Debido a la falta total o parcial de datos, la clasificación no es posible.
Sensibilización cutánea	Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea

Alcohol miristílico — OECD 406
Resultado: Not Sensibilizante
Especies: Conejillo de indias

Mutagenicidad en células germinales Debido a la falta total o parcial de datos, la clasificación no es posible.

Mutagenicidad

Alcohol miristílico — Resultado: Pruebas in vitro e in vivo no mostraron efectos mutagénicos.

Carcinogenicidad No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción Debido a la falta total o parcial de datos, la clasificación no es posible.

Efectos sobre el desarrollo

Alcohol miristílico — > 2000 mg/kg bw/d OECD 422
Resultado: NOAEL
Especies: Rata

Reproductividad

Alcohol miristílico — > 2000 mg/kg bw/d OECD 422, Basado en datos de pruebas para materiales estructuralmente similares
Resultado: NOAEL
Especies: Rata

Toxicidad específica en determinados órganos – exposición única Debido a la falta total o parcial de datos, la clasificación no es posible.

Toxicidad específica en determinados órganos – exposición repetida Debido a la falta total o parcial de datos, la clasificación no es posible.

Alcohol miristílico — 3548 mg/kg bw/d OECD 408, Basado en datos de pruebas para materiales estructuralmente similares
Resultado: NOAEL
Especies: Rata
Duración de la prueba: 90 d

Peligro por aspiración Debido a la falta total o parcial de datos, la clasificación no es posible.

Información adicional En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Componentes		Especies	Resultados de la prueba
Alcohol miristílico (CAS 112-72-1)			
Acuático (a)			
Agudo			
Algas	EL50	Desmodesmus subspicatus	2.9 mg/l, 96 h OECD 201
Crustáceos	EC50	Dafnia magna	3.2 mg/l, 96 h OECD 202
Pez	LC50	Oncorhynchus mykiss	> 1 mg/l, 96 h OECD 203
Crónico			
Crustáceos	NOEC	Dafnia magna	0.0016 mg/l, 21 d OECD 211

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

Alcohol miristílico	92 % ISO 10708 Resultado: Fácilmente Biodegradable Duración de la prueba: 28 d

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

Alcohol miristílico	6.03

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

IATA

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

IMDG

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

15. Información reglamentaria

reglamentación Federal de EE.UU. No se tiene conocimiento de que este producto sea un "Producto químico peligroso" tal como está definido por la Norma de comunicación de riesgos OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

No listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso No (Exempt)

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

No reglamentado.

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

No reglamentado.

Ley Safe Drinking Water Act (SDWA) No reglamentado.

16. Otra información, como fecha de preparación o última revisión

Fecha de publicación	20-Noviembre-2020
Nº de versión	01
Clasificaciones NFPA	Salud: 0 Inflamabilidad: 1 Inestabilidad: 0
Cláusula de exención de responsabilidad	La información facilitada en esta Ficha de Datos de Seguridad es correcta, a nuestro leal saber y entender, en la fecha de su publicación. Dicha información está concebida únicamente como guía para la seguridad en la manipulación, el uso, el procesamiento, el almacenamiento, el transporte, la eliminación y la liberación, no debiendo tomarse como garantía o especificación de calidades. La información se refiere únicamente al material específico mencionado y puede no ser válida para tal material usado en combinación con cualesquiera otros materiales o en cualquier proceso salvo que se especifique expresamente en el texto.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT HANOI CURL CREAM STYLING LOTION**

Autres moyens d'identification

Numéro de la FDS 00-19-0000247

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Symbole de danger Aucune.

Mention d'avertissement Aucune.

Mention de danger Le mélange ne satisfait pas les critères de classification.

Conseil de prudence

Prévention Observer de bonnes pratiques d'hygiène industrielle.

Intervention Se laver les mains après utilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
Alcool myristique		112-72-1	1

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer avec de l'eau. Consulter un médecin si une irritation se développe et persiste.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Non disponible.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Traiter de manière symptomatique.
Informations générales	S’assurer que le personnel médical est averti du (des) produits(s) en cause et qu’il prend des mesures pour se protéger.

5. Mesures à prendre en cas d’incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l’incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d’incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d’incendie ou d’explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d’urgence	Tenir à l'écart le personnel non requis. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l’élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l’écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Valeurs biologiques limites	Aucune limite d’exposition biologique observée pour les ingrédients.
Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement.
Protection respiratoire	Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Forme	Crème.
Couleur	Non disponible.
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	5 - 6
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.

Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	On ne s'attend à aucun effet néfaste en cas d'inhalation.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Aucun effet indésirable dû au contact des yeux n'est prévu.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Produit	Espèces	Résultats d'épreuves
PULP RIOT HANOI CURL CREAM STYLING LOTION		
Aiguë		
Orale		
ATEmix		1e+008 mg/kg

Composants	Espèces	Résultats d'épreuves

Corrosion cutanée/irritation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

Alcool myristique	OCDE 404 Résultat: Non Irritant Espèces: Homme

Lésions oculaires graves/irritation oculaire La classification n'est pas possible en raison d'un manque partiel ou total de données. Aucun effet indésirable dû au contact des yeux n'est prévu.

Irritation- corrosion - Œil

Alcool myristique	OCDE 405 Résultat: Irritant Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Sensibilisation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée

Alcool myristique	OCDE 406 Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

Alcool myristique — Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets sur le développement

Alcool myristique — > 2000 mg/kg bw/d OECD 422
Résultat: DSENO
Espèces: Rat

Reproductivité

Alcool myristique — > 2000 mg/kg bw/d OECD 422, Basé sur des données expérimentales relatives à des produits de structure semblable.
Résultat: DSENO
Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

Alcool myristique — 3548 mg/kg bw/d OCDE 408, Basé sur des données expérimentales relatives à des produits de structure semblable.
Résultat: DSENO
Espèces: Rat
Durée du test: 90 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
Alcool myristique (CAS 112-72-1)			
Aquatique			
Aiguë			
Algues	DE50	Desmodesmus subspicatus	2.9 mg/l, 96 h OCDE 201
Crustacés	CE50	Daphnia magna	3.2 mg/l, 96 h OCDE 202
Poisson	CL50	Oncorhynchus mykiss	> 1 mg/l, 96 h OCDE 203
Chronique			
Crustacés	NOEC (concentration sans effet observé)	Daphnia magna	0.0016 mg/l, 21 d OECD 211

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

Alcool myristique — 92 % ISO 10708
Résultat: Facilement Biodegradable
Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

Alcool myristique	6.03

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit n'est pas connu comme un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

Non inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre)	Non réglementé.

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	20-Novembre-2020
Version n°	01
Classements NFPA	Santé: 0 Inflammabilité: 1 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT HANOI CURL CREAM STYLING LOTION

鉴别的其他方法

SDS编号 00-19-0000247

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害 未被分类。

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

危险符号 无。

警示词 无。

危险性说明 混合物不符合分类的标准。

防范说明

预防措施 遵守良好工业卫生习惯。

事故响应 操作后洗手。

安全储存 远离禁忌物保存。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
蜂蜡醇		112-72-1	1

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 用水冲洗。 如果刺激症状持续或加重，应就医。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 无资料。

指明任何需要立即就医或特殊治疗的情况	根据症状处理。
一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	发生火灾时，使用自给式呼吸设备并穿全身防护服。
消防设备/使用说明	在不会发生危险的情况下将容器撤离火灾现场。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。
一般火灾危险	无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

生物限值	没有该成分的生物接触限值。
适当的技术控制	应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。
个人防护措施，如个人防护设备	
眼/面保护	仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。
皮肤防护	
手防护	仅用於工业环境。 佩戴适当的抗化学手套。
其它的，其它	仅用於工业环境。
呼吸系统防护	仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。
热危害	必要时，穿戴适当的热防护服。
一般的卫生考虑	始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观	
性状	液体。
形状	奶油。
颜色	无资料。
气味	特征的。
气味阈值	无资料。
pH 值	5 - 6
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。

易燃性（固体，气体） 不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%） 无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%） 无资料。

蒸气压 无资料。

蒸气密度 无资料。

相对密度 无资料。

溶解性

溶解性（水） 无资料。

分配系数（辛醇/水） 无资料。

自燃温度 无资料。

分解温度 无资料。

黏度 无资料。

其他信息

爆炸特性 不具有爆炸性。

氧化特性 没有氧化性。

10. 稳定性和反应性

反应性 产品在正常的使用、储存和运输条件下是稳定的和非活性的。

化学稳定性 正常条件下物料稳定。

可能的危险反应 正常使用的条件下未见有危险反应。

避免接触的条件 远离热，热表面，火花，明火和其他点火源。 接触禁配物。

禁配物 强氧化剂。

危险的分解产物 没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入 预期吸入无有害影响。

皮肤接触 预计没有因皮肤接触导致的任何有害影响。

眼睛接触 预计不会因眼神接触而产生不良影响.

经口 预计较低的食入危害。

与物理,化学和毒物学特性有关的症状 无资料。

毒理学效应信息

急性毒性 未知。

产品	物种	试验结果
PULP RIOT HANOI CURL CREAM STYLING LOTION		
急性的		
经口		
ATEmix		1e+008 mg/kg

组分	物种	试验结果
蜂蜡醇 (CAS 112-72-1)		
急性的		
吸入		
粉尘		
LC50	大鼠	> 1.5 mg/l, 1 h
经口		
LD50	大鼠	> 2000 mg/kg OECD 401
经皮肤		
LD50	兔子	> 5000 mg/kg

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

刺激性腐蚀性 - 皮肤

蜂蜡醇

OECD 404
结果: 非刺激性
物种: 人类

严重眼睛损伤/眼睛刺激性 由于部分或完全缺乏数据，不可能进行分类。 预计不会因眼神接触而产生不良影响.

刺激性腐蚀性 - 眼睛

蜂蜡醇

OECD 405
结果: 刺激性的
物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物

蜂蜡醇

OECD 406
结果: Not Sensitizing
物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

蜂蜡醇

结果: 体外和体内试验均未见致突变作用。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

蜂蜡醇

> 2000 mg/kg bw/d OECD 422
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

生殖能力

蜂蜡醇

> 2000 mg/kg bw/d OECD 422, 根据结构相似材料的试验数据。 结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

蜂蜡醇

3548 mg/kg bw/d OECD 408, 根据结构相似材料的试验数据。
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠
测试时间: 90 D

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
蜂蜡醇 (CAS 112-72-1)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	3.2 mg/l, 96 h OECD 202
藻类	EL50	Desmodesmus subspicatus	2.9 mg/l, 96 h OECD 201
鱼	LC50	虹鳟鱼	> 1 mg/l, 96 h OECD 203

组分		物种	试验结果
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.0016 mg/l, 21 D OECD 211

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

蜂蜡醇	92 % ISO 10708 结果: 易生物降解 测试时间: 28 D

潜在的生物累积性

辛醇/水分配系数 log Kow

蜂蜡醇	6.03

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

15. 法规信息

美国联邦法规 依OSHA 危害通识规则，该产品不是“化学危险物品”。

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

不适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

16. 其他信息，包括编制日期或最新修订日期

最初编制日期 20-十一月-2020

版本号 01

NFPA分级 健康 0
可燃性 1
不稳定性: 0

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT SANTA BARBARA INTENSIVE MOISTURIZING HAIR MASK**

Other means of identification

SDS number 00-12-0000832

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards

Serious eye damage/eye irritation	Category 2A
Specific target organ toxicity, repeated exposure	Category 2

OSHA defined hazards Not classified.

Label elements

Signal word Warning

Hazard statement Causes serious eye irritation. May cause damage to organs through prolonged or repeated exposure.

Precautionary statement

Prevention Do not breathe mist/vapors. Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical advice/attention if you feel unwell. If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
BEHENTRIMONIUM CHLORIDE		68607-24-9	1.58

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Prolonged exposure may cause chronic effects.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Do not breathe mist/vapors. Avoid contact with eyes. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Chemical respirator with organic vapor cartridge and full facepiece.

Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear suitable protective clothing. Use of an impervious apron is recommended.
Respiratory protection	Applicable for industrial settings only. Chemical respirator with organic vapor cartridge and full facepiece.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Cream.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	4.5 - 4.7
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.

Incompatible materials Strong oxidizing agents.

Hazardous decomposition products No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation No adverse effects due to inhalation are expected.

Skin contact No adverse effects due to skin contact are expected.

Eye contact Causes serious eye irritation.

Ingestion Expected to be a low ingestion hazard.

Symptoms related to the physical, chemical and toxicological characteristics Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Reproductivity

BEHENTRIMONIUM CHLORIDE	75 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure May cause damage to organs through prolonged or repeated exposure.

BEHENTRIMONIUM CHLORIDE	10 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat Test Duration: 28 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Chronic effects May cause damage to organs through prolonged or repeated exposure.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
BEHENTRIMONIUM CHLORIDE (CAS 68607-24-9)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	3.48 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	1.39 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	0.5 - 1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	43 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.128 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0.24 mg/l, 9 d OECD 212

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

BEHENTRIMONIUM CHLORIDE	80 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT SANTA BARBARA INTENSIVE MOISTURIZING HAIR MASK
Synonyms	None.
SDS number	00-12-0000832
Product code	1241019 A
Issue date	11-20-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye irritation. Dangerous for the environment if discharged into watercourses. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: BEHENTRIMONIUM CHLORIDE

Hazard pictograms

Signal word Warning

Hazard statements

H319	Causes serious eye irritation.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P264	Wash thoroughly after handling.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 2,8% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 2,8% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains HEXYL SALICYLATE. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
BEHENTRIMONIUM CHLORIDE	1,58	68607-24-9 271-756-9	01-2119484817-22	-	
Classification:	Skin Irrit. 2;H315, Eye Dam. 1;H318, STOT RE 2;H373, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	0,19	65497-29-2 613-809-4	-	-	
Classification:	Aquatic Acute 1;H400, Aquatic Chronic 1;H410				
HEXYL SALICYLATE	0,01	6259-76-3 228-408-6	01-2119638275-36	-	
Classification:	Skin Irrit. 2;H315, Skin Sens. 1A;H317, Aquatic Acute 1;H400				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising from the substance or mixture	During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Special fire fighting procedures	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Prevent product from entering drains. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Avoid contact with eyes. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits	No exposure limits noted for ingredient(s).
Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Cream.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	4,5 - 4,7
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.

10.5. Incompatible materials Strong oxidizing agents.

10.6. Hazardous decomposition products No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation Not available.

Skin contact May cause an allergic skin reaction.

Eye contact Causes serious eye irritation.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
BEHENTRIMONIUM CHLORIDE (CAS 68607-24-9)		
Acute		
Oral		
LD50	Rat	3190 mg/kg OECD 401
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE (CAS 65497-29-2)		
Acute		
Oral		
LD50	Rat	> 10000 mg/kg
HEXYL SALICYLATE (CAS 6259-76-3)		
Acute		
Dermal		
LD50	Rabbit	> 5000 mg/kg
Oral		
LD50	Rat	> 5000 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HEXYL SALICYLATE	OECD 404 Result: Irritating Species: Rabbit
BEHENTRIMONIUM CHLORIDE	OECD 405 Result: Irritating Species: Rabbit
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

BEHENTRIMONIUM CHLORIDE	OECD 404 Result: Corrosive Species: Rabbit
HEXYL SALICYLATE	OECD 405 Result: Not Irritating Species: Rabbit
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	Result: Slightly Irritating Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

BEHENTRIMONIUM CHLORIDE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Skin sensitization

HEXYL SALICYLATE	OECD 429 Result: Sensitizing Species: Mouse
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HEXYL SALICYLATE	Result: In vitro and in vivo tests did not show mutagenic effects.
BEHENTRIMONIUM CHLORIDE	Result: In vitro tests did not show mutagenic effects
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

HEXYL SALICYLATE	360 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

HEXYL SALICYLATE	714 mg/kg bw/d OECD 416 Result: NOAEL Species: Mouse
BEHENTRIMONIUM CHLORIDE	75 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

BEHENTRIMONIUM CHLORIDE	10 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat Test Duration: 28 d
HEXYL SALICYLATE	249 mg/m3 air OECD 412, Inhalation Result: NOAEC Species: Rat Test Duration: 28 d 46,9 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
BEHENTRIMONIUM CHLORIDE (CAS 68607-24-9)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	3,48 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	1,39 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	0,5 - 1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	43 mg/l, 3 h OECD 209

Components		Species	Test Results
Chronic			
Crustacea	NOEC	Daphnia magna	0,128 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0,24 mg/l, 9 d OECD 212
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE (CAS 65497-29-2)			
Aquatic			
Acute			
Crustacea	EC50	Daphnia magna	100 mg/l, 48 h
Fish	LC50	Oncorhynchus mykiss	0,39 - 1,22 mg/l, 96 h
HEXYL SALICYLATE (CAS 6259-76-3)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0,61 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,357 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	1,34 mg/l, 96 h EU C.1

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

BEHENTRIMONIUM CHLORIDE	80 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	< 60 % OECD 301 Result: Not Readily Biodegradable Test Duration: 28 d
HEXYL SALICYLATE	91 % OECD 301 F Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

HEXYL SALICYLATE	5,5 OECD 117

Bioconcentration factor (BCF)

HEXYL SALICYLATE	8913

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H373 May cause damage to organs through prolonged or repeated exposure by ingestion. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT SANTA BARBARA INTENSIVE MOISTURIZING HAIR MASK**

Otros medios de identificación

Número de FDS 00-12-0000832

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos No clasificado.

Peligros para la salud

Lesiones oculares graves/irritación ocular	Categoría 2A
Toxicidad sistémica específica de órganos diana (exposiciones repetidas)	Categoría 2

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Atención

Declaración de peligro Provoca irritación ocular grave. Puede provocar daños en los órganos tras exposiciones prolongadas o repetidas.

Consejos de prudencia

Prevención No respirar la niebla/los vapores. Lavarse concienzudamente tras la manipulación. Llevar protección ocular/facial.

Respuesta En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. Consultar a un médico en caso de malestar. Si persiste la irritación ocular: Consultar a un médico.

Almacenamiento Consérvese alejado de materiales incompatibles.

Eliminación Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
BEHENTRIMONIUM CHLORIDE		68607-24-9	1.58

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación	Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.
Contacto con la piel	Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.
Contacto con los ojos	Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Si persiste la irritación ocular: Consultar a un médico.
Ingestión	Enjuagarse la boca. Obtenga atención médica en caso de síntomas.
Principales síntomas y efectos, agudos y retardados	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Una exposición prolongada puede producir efectos crónicos.
Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Provea las medidas de apoyo generales y de tratamiento sintomático. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.
Información general	En caso de malestar, acuda al médico (si es posible, muéstrele la etiqueta). Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Ningún riesgo excepcional de incendio o explosión señalado.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Use equipo y ropa de protección apropiados durante la limpieza. No respirar la niebla/los vapores. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Asegúrese una ventilación apropiada. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	No respirar la niebla/los vapores. Evítese el contacto con los ojos. Asegúre una ventilación adecuada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.

Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Almacenar en un recipiente herméticamente cerrado. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Valores límite biológicos	No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.
Controles técnicos apropiados	Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación para lavado de ojos.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara	De aplicación solamente en entornos industriales. Equipo respiratorio con cartucho de vapor orgánico y pantalla facial.
Protección de la piel	
Protección de las manos	De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.
Otros	De aplicación solamente en entornos industriales. Úsese indumentaria protectora adecuada. Se recomienda el uso de delantal impermeable.
Protección respiratoria	De aplicación solamente en entornos industriales. Equipo respiratorio con cartucho de vapor orgánico y pantalla facial.
Peligros térmicos	Use ropa protectora térmica adecuada si resulta necesario.
Consideraciones generales de higiene	Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto	
Estado físico	Líquido.
Forma	Nata.
Color	No disponible.
Olor	Característico.
Umbral olfativo	No disponible.
pH	4.5 - 4.7
Punto de fusión/punto de congelación	No disponible.
Punto inicial de ebullición e intervalo de ebullición	> 100 °C (> 212 °F)
Punto de inflamación	> 100.0 °C (> 212.0 °F) Copa Cerrada
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No aplicable.
Límites superior/inferior de inflamabilidad o de explosividad	
Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.

Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	No es de esperar que se produzcan efectos adversos por inhalación.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	Provoca irritación ocular grave.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Producto	Especies	Resultados de la prueba
PULP RIOT SANTA BARBARA INTENSIVE MOISTURIZING HAIR MASK		
Agudo		
Dérmico		
ATEmix		133500 mg/kg
Oral		
ATEmix		76920 mg/kg

Componentes	Especies	Resultados de la prueba
BEHENTRIMONIUM CHLORIDE (CAS 68607-24-9)		
Agudo		
Oral		
LD50	Rata	3190 mg/kg OECD 401

Corrosión/irritación cutánea Debido a la falta total o parcial de datos, la clasificación no es posible. No se esperan efectos adversos por contacto con la piel.

Irritación/Corrosión- Piel

BEHENTRIMONIUM CHLORIDE	OECD 405 Resultado: Irritante Especies: Conejo

Lesiones oculares graves/irritación ocular Provoca irritación ocular grave.

Irritación/Corrosión- Ojos

BEHENTRIMONIUM CHLORIDE	OECD 404 Resultado: Corrosivo Especies: Conejo

Sensibilización respiratoria o cutánea

Sensibilización respiratoria Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea

BEHENTRIMONIUM CHLORIDE	OECD 406 Resultado: Not Sensibilizante Especies: Conejillo de indias

Mutagenicidad en células germinales Debido a la falta total o parcial de datos, la clasificación no es posible.

Mutagenicidad

BEHENTRIMONIUM CHLORIDE	Resultado: Las pruebas in vitro no demostraron efectos mutágenos

Carcinogenicidad No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción Debido a la falta total o parcial de datos, la clasificación no es posible.

Reproductividad

BEHENTRIMONIUM CHLORIDE	75 mg/kg bw/d OCDE 421 Resultado: NOAEL Especies: Rata

Toxicidad específica en determinados órganos – exposición única Debido a la falta total o parcial de datos, la clasificación no es posible.

Toxicidad específica en determinados órganos – exposición repetida Puede provocar daños en los órganos tras exposiciones prolongadas o repetidas.

BEHENTRIMONIUM CHLORIDE	10 mg/kg bw/d OECD 407, Oral Resultado: NOAEL Especies: Rata Duración de la prueba: 28 d

Peligro por aspiración Debido a la falta total o parcial de datos, la clasificación no es posible.

Efectos crónicos Puede provocar daños en los órganos tras exposiciones prolongadas o repetidas.

Información adicional En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Componentes		Especies	Resultados de la prueba
BEHENTRIMONIUM CHLORIDE (CAS 68607-24-9)			
Acuático (a)			
Agudo			
Algas	EC50	Desmodesmus subspicatus	3.48 mg/l, 72 h OECD 201
Crustáceos	EC50	Dafnia magna	1.39 mg/l, 48 h OECD 202
Otros	EC50	Lodo activado de una depuradora predominantemente doméstica	43 mg/l, 3 h OECD 209
Pez	LC50	Danio rerio	0.5 - 1 mg/l, 96 h OECD 203
Crónico			
Crustáceos	NOEC	Dafnia magna	0.128 mg/l, 21 d OECD 211
Pez	NOEC	Danio rerio	0.24 mg/l, 9 d OECD 212

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

BEHENTRIMONIUM CHLORIDE — 80 % OECD 301
Resultado: Fácilmente Biodegradable
Duración de la prueba: 28 d

Potencial de bioacumulación

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

Cláusula de exención de responsabilidad	La información facilitada en esta Ficha de Datos de Seguridad es correcta, a nuestro leal saber y entender, en la fecha de su publicación. Dicha información está concebida únicamente como guía para la seguridad en la manipulación, el uso, el procesamiento, el almacenamiento, el transporte, la eliminación y la liberación, no debiendo tomarse como garantía o especificación de calidades. La información se refiere únicamente al material específico mencionado y puede no ser válida para tal material usado en combinación con cualesquiera otros materiales o en cualquier proceso salvo que se especifique expresamente en el texto.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT SANTA BARBARA INTENSIVE MOISTURIZING HAIR MASK**

Autres moyens d'identification

Numéro de la FDS 00-12-0000832

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé

Lésions oculaires graves/irritation oculaire	Catégorie 2A
Toxicité pour certains organes cibles - expositions répétées	Catégorie 2

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Attention

Mention de danger Provoque une sévère irritation des yeux. Risque présumé d'effets graves pour les organes à la suite d'expositions répétées ou d'une exposition prolongée.

Conseil de prudence

Prévention Ne pas respirer les brouillards/vapeurs. Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Demander un avis médical/Consulter un médecin en cas de malaise. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
BEHENTRIMONIUM CHLORIDE		68607-24-9	1.58

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Une exposition prolongée peut causer des effets chroniques.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales En cas de malaise, demander un avis médical (montrer l'étiquette du produit lorsque possible). S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas respirer les brouillards/vapeurs. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention Ne pas respirer les brouillards/vapeurs. Éviter tout contact avec les yeux. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Valeurs biologiques limites	Aucune limite d'exposition biologique observée pour les ingrédients.
Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Pour usage industriel seulement. Respirateur chimique à cartouche contre les vapeurs organiques et masque complet.
Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement. Porter un vêtement de protection approprié. Il est recommandé d'utiliser un tablier imperméable.
Protection respiratoire	Pour usage industriel seulement. Respirateur chimique à cartouche contre les vapeurs organiques et masque complet.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Forme	Crème.
Couleur	Non disponible.
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	4.5 - 4.7
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.

Solubilité

Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.

Autres informations

Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	On ne s'attend à aucun effet néfaste en cas d'inhalation.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

DL50	Rat	3190 mg/kg OCDE 401

Corrosion cutanée/irritation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

BEHENTRIMONIUM CHLORIDE	OCDE 405 Résultat: Irritant Espèces: Lapin

Lésions oculaires graves/irritation oculaire Provoque une sévère irritation des yeux.

Irritation- corrosion - Œil

BEHENTRIMONIUM CHLORIDE	OCDE 404 Résultat: Corrosif Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée

BEHENTRIMONIUM CHLORIDE	OCDE 406 Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

BEHENTRIMONIUM CHLORIDE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Reproductivité

BEHENTRIMONIUM CHLORIDE	75 mg/kg bw/d OCDE 421 Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées Risque présumé d'effets graves pour les organes à la suite d'expositions répétées ou d'une exposition prolongée.

BEHENTRIMONIUM CHLORIDE	10 mg/kg bw/d OCDE 407, Orale Résultat: DSENO Espèces: Rat Durée du test: 28 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets chroniques Risque présumé d'effets graves pour les organes à la suite d'expositions répétées ou d'une exposition prolongée.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
BEHENTRIMONIUM CHLORIDE (CAS 68607-24-9)			
Aquatique			
Aiguë			
Algues	CE50	Desmodesmus subspicatus	3.48 mg/l, 72 h OCDE 201

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

BEHENTRIMONIUM CHLORIDE — 80 % OCED 301
Résultat: Facilement Biodegradable
Durée du test: 28 d

Potentiel de bioaccumulation

Mobilité dans le sol — Aucune donnée disponible.

Autres effets nocifs — On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination — Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination — Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés — Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés — Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

BEHENTRIMONIUM CHLORIDE		68607-24-9	1.58

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触	立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如仍觉眼刺激：求医/就诊。
经口	漱口。 如症状出现，就医。
最重要的症状/影响，急性和延迟性	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 长期接触可能会导致慢性的影响。
指明任何需要立即就医或特殊治疗的情况	提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。
一般信息	如感觉不舒服,寻求医生的建议(可能的话出示此标签)。 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	发生火灾时，使用自给式呼吸设备并穿全身防护服。
消防设备/使用说明	在不会发生危险的情况下将容器撤离火灾现场。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。
一般火灾危险	无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 不要吸入雾气。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	不要吸入雾气。 避免接触到眼睛。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

生物限值	没有该成分的生物接触限值。
适当的技术控制	应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。
个人防护措施，如个人防护设备	
眼/面保护	仅用於工业环境。 带有机蒸气滤毒罐和全面罩的化学呼吸器。
皮肤防护	
手防护	仅用於工业环境。 佩戴适当的抗化学手套。
其它的，其它	仅用於工业环境。 需穿上合适的防护衣服。 建议使用不渗透的围裙。
呼吸系统防护	仅用於工业环境。 带有机蒸气滤毒罐和全面罩的化学呼吸器。
热危害	必要时，穿戴适当的热防护服。
一般的卫生考虑	始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观	
性状	液体。
形状	奶油。
颜色	无资料。
气味	特征的。

气味阈值	无资料。
pH 值	4.5 - 4.7
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	预期吸入无有害影响。
皮肤接触	预计没有因皮肤接触导致的任何有害影响。
眼睛接触	造成严重眼刺激。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。

毒理学效应信息

急性毒性 未知。

产品	**物种**	**试验结果**
PULP RIOT SANTA BARBARA INTENSIVE MOISTURIZING HAIR MASK		
急性的		
经口

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

刺激性腐蚀性 - 皮肤

BEHENTRIMONIUM CHLORIDE
OECD 405
结果: 刺激性的
物种: 兔子

严重眼睛损伤/眼睛刺激性 造成严重眼刺激。

刺激性腐蚀性 - 眼睛

BEHENTRIMONIUM CHLORIDE
OECD 404
结果: 腐蚀性的
物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物

BEHENTRIMONIUM CHLORIDE
OECD 406
结果: Not Sensitizing
物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

BEHENTRIMONIUM CHLORIDE
结果: 离体试验未见诱变效应

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

生殖能力

BEHENTRIMONIUM CHLORIDE
75 mg/kg bw/d OECD 421
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 长期或反复接触可能损害器官。

BEHENTRIMONIUM CHLORIDE
10 mg/kg bw/d OECD 407, 经口
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠
测试时间: 28 D

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

慢性影响 长期或反复接触可能损害器官。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分	物种	试验结果
BEHENTRIMONIUM CHLORIDE (CAS 68607-24-9)		
水生的		
急性的		
其它的, 其它 EC50	以国内污水为主的活性污泥	43 mg/l, 3 h OECD 209

组分		物种	试验结果
甲壳纲动物	EC50	水蚤	1.39 mg/l, 48 h OECD 202
藻类	EC50	Desmodesmus subspicatus	3.48 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	0.5 - 1 mg/l, 96 h OECD 203
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.128 mg/l, 21 D OECD 211
鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	0.24 mg/l, 9 D OECD 212

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

BEHENTRIMONIUM CHLORIDE

80 % OECD 301
结果: 易生物降解
测试时间: 28 D

潜在的生物累积性

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

国际航空运输协会(IATA)

不作为危险货物运输

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

不适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

16. 其他信息，包括编制日期或最新修订日期

最初编制日期 20-十一月-2020

版本号 01

NFPA分级 健康 2
可燃性 1
不稳定性: 0

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT PERMANENT COLOR - GROUP 6**

Other means of identification

SDS number 00-21-0000368

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards

Skin corrosion/irritation	Category 2
Serious eye damage/eye irritation	Category 1
Sensitization, skin	Category 1A

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage.

Precautionary statement

Prevention Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear eye protection/face protection. Wear protective gloves.

Response If on skin: Wash with plenty of water. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
LAURETH-3		68439-50-9	5
AMMONIUM HYDROXIDE		1336-21-6	1.8

Chemical name	Common name and synonyms	CAS number	%
2-AMINO-6-CHLORO-4-NITROPHENOL		6358-09-4	< 2
ETHANOLAMINE		141-43-5	< 2
OLEYL PHOSPHATE		37310-83-1	1.25
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
TOLUENE-2,5-DIAMINE SULFATE		615-50-9	< 1
P-AMINOPHENOL		123-30-8	< 1
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE		83763-48-8	< 0.6
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE		54381-16-7	< 0.6
M-AMINOPHENOL		591-27-5	< 0.6
1-NAPHTHOL		90-15-3	≤ 0.5
RESORCINOL		108-46-3	≤ 0.5

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation
Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact
Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion
Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed
Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Indication of immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions
Move containers from fire area if you can do so without risk.

Specific methods
Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards
No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

This material is classified as a water pollutant under the Clean Water Act and should be prevented from contaminating soil or from entering sewage and drainage systems which lead to waterways.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Do not get in eyes, on skin, or on clothing. Avoid breathing mist/vapors. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	PEL	35 mg/m3
		50 ppm
ETHANOLAMINE (CAS 141-43-5)	PEL	6 mg/m3
		3 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	6 ppm
	TWA	3 ppm
RESORCINOL (CAS 108-46-3)	STEL	20 ppm
	TWA	10 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	15 mg/m3
		6 ppm
	TWA	8 mg/m3
		3 ppm
RESORCINOL (CAS 108-46-3)	STEL	90 mg/m3

US. NIOSH: Pocket Guide to Chemical Hazards Components	Type	Value
		20 ppm
	TWA	45 mg/m3
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Form Cream.

Color Shaded

Odor Characteristic.

Odor threshold Not available.

pH 9.7 - 10.1

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction. Prolonged or repeated exposure may cause liver and kidney damage. These effects have not been observed in humans.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Information on toxicological effects

Acute toxicity Not known.

OLEYL PHOSPHATE	OECD 439 Result: Not Irritating Species: RhE
TOLUENE-2,5-DIAMINE SULFATE	OECD 439 Result: Not Irritating Species: RhE
1-NAPHTHOL	Result: Irritating Species: Rabbit
P-AMINOPHENOL	Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

P-AMINOPHENOL	EPA OPPTS 870.2400 Result: Slightly Irritating Species: Rabbit
RESORCINOL	FHLS Act, (100%) Result: Corrosive Species: Rabbit
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	OECD 405 Result: Corrosive Species: Rabbit
ETHANOLAMINE	OECD 405 Result: Corrosive Species: Rabbit
LAURETH-3	OECD 405 Result: Corrosive Species: Rabbit
M-AMINOPHENOL	OECD 405 Result: Not Irritating Species: Rabbit
RESORCINOL	OECD 405, (2.5%) Result: Not Irritating Species: Rabbit
1-NAPHTHOL	OECD 438 Result: Corrosive Species: In vitro
OLEYL PHOSPHATE	OECD 438 Result: Corrosive Species: In vitro
2-AMINO-6-CHLORO-4-NITROPHENOL	OECD 438 Result: Irritating Species: ICE
TOLUENE-2,5-DIAMINE SULFATE	OECD 438 Result: Irritating Species: ICE
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	OECD 438 Result: Irritating Species: In vitro
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	OECD 492 Result: Irritating Species: RhCE

Irritation Corrosion - Eye

AMMONIUM HYDROXIDE	Result: Corrosive

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization May cause an allergic skin reaction.

Skin sensitization

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	EU Method B.6 - Cat 1 Result: Sensitizing Species: Guinea pig
P-AMINOPHENOL	OECD 406 Result: Sensitizing Species: Guinea pig
OLEYL PHOSPHATE	OECD 429 Result: Not Sensitizing Species: Mouse
1-NAPHTHOL	OECD 429 Result: Sensitizing Species: Mouse
2-AMINO-6-CHLORO-4-NITROPHENOL	OECD 429 Result: Sensitizing Species: Mouse
M-AMINOPHENOL	OECD 429 Result: Sensitizing Species: Mouse
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	OECD 429 Result: Sensitizing Species: Mouse
RESORCINOL	OECD 429 Result: Sensitizing Species: Mouse
TOLUENE-2,5-DIAMINE SULFATE	OECD 429 Result: Sensitizing Species: Mouse
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	QSAR Result: Sensitizing
ETHANOLAMINE	Result: Not Sensitizing Species: Guinea pig
AMMONIUM HYDROXIDE	Result: Not Sensitzing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	Result: In vitro and in vivo tests did not show mutagenic effects.
ETHANOLAMINE	Result: In vitro and in vivo tests did show mutagenic effects
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Result: In vitro tests did not show mutagenic effects
AMMONIUM HYDROXIDE	Result: In vitro tests did not show mutagenic effects
LAURETH-3	Result: In vitro tests did not show mutagenic effects
OLEYL PHOSPHATE	Result: In vitro tests did not show mutagenic effects
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
M-AMINOPHENOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
RESORCINOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
TOLUENE-2,5-DIAMINE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
1-NAPHTHOL	Result: In vitro tests showed varied results. In vivo tests showed negative results.
P-AMINOPHENOL	Result: In vivo tests showed mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

RESORCINOL (CAS 108-46-3)	3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOLAMINE	>= 450 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	>= 50 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
TOLUENE-2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 Result: NOAEL Species: Mouse
M-AMINOPHENOL	100 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
RESORCINOL	250 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	30 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
1-NAPHTHOL	400 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
2-AMINO-6-CHLORO-4-NITROPHENOL	90 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

TOLUENE-2,5-DIAMINE SULFATE	>= 45 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 412 Result: NOEAL Species: Rat
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
RESORCINOL	245 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OECD 415 Species: Rat
ETHANOLAMINE	300 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
1-NAPHTHOL	Result: No Data

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

AMMONIUM HYDROXIDE	Result: Highly Irritating
1-NAPHTHOL	Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

P-AMINOPHENOL	10 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d

Specific target organ toxicity - repeated exposure

TOLUENE-2,5-DIAMINE SULFATE	10 mg/kg bw/d OECD 408, oral Result: NOAEL Species: Rat Test Duration: 90 d
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 27 d
1-NAPHTHOL	130 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	15 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 108 d
ETHANOLAMINE	150 mg/m3 air OECD 412, Inhalation Result: NOAEC Species: Rat Test Duration: 28 d
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
2-AMINO-6-CHLORO-4-NITROPHENOL	30 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 13 weeks
ETHANOLAMINE	300 mg/kg bw/d OECD 416, Oral Result: NOAEL Species: Rat
RESORCINOL	80 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d 991 mg/m³ Result: NOAEC Species: Rat Test Duration: 14 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Chronic effects May be harmful if absorbed through skin.

Prolonged or repeated exposure may cause liver and kidney damage. These effects have not been observed in humans.

Further information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Aquatic			
Acute			
Algae		Pseudokirchneriella subcapitata	5.33 mg/l, 72 h EU C.3
Crustacea	EC50	Daphnia magna	11.12 mg/l, 48 h TG 202
Fish	LC50	Danio rerio	86.2 mg/l, 96 h EU C.1
1-NAPHTHOL (CAS 90-15-3)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 2.18 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	2.51 mg/l, 48 h
Fish	LC50	Pimephales promelas	4.24 mg/l, 96 h
Chronic			
Crustacea	NOEC	Daphnia magna	0.25 mg/l, 21 d OECD 211
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE (CAS 83763-48-8)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0.733 mg/l, 72 h OECD 201
	NOEC	Pseudokirchneriella subcapitata	0.341 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	3 mg/l, 48 h OECD 202
2-AMINO-6-CHLORO-4-NITROPHENOL (CAS 6358-09-4)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	82.4 mg/l, 72 h OECD 201

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E Result: Not readily biodegradable
1-NAPHTHOL	> 77.8 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 29 d
2-AMINO-6-CHLORO-4-NITROPHENOL	0 % OECD 301 F Result: Not Readily Biodegradable Test Duration: 28 d
ETHANOLAMINE	> 90 % OECD 301 A Result: Readily Biodegradable Test Duration: 21 d
LAURETH-3	Result: Readily Biodegradable
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14.3 % OECD 301B Result: Not Readilby Biodegradable Test Duration: 28 d
OLEYL PHOSPHATE	26.1 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d
RESORCINOL	66.7 % OECD 301 C Result: Readily Biodegradable Test Duration: 14 d
TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

1-NAPHTHOL	2.836 OECD 107
ETHANOLAMINE	-2.3 OECD 107
M-AMINOPHENOL	0.21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2.8

Partition coefficient n-octanol / water (log Kow)

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2.8 OECD 107
P-AMINOPHENOL	0.25
RESORCINOL	0.8

Bioconcentration factor (BCF)

P-AMINOPHENOL	10 - 46 OECD 305 C

Bioaccumulation

1-NAPHTHOL	Result: Bioaccumulation is unlikely
ETHANOLAMINE	Result: Bioaccumulation is unlikely.
P-AMINOPHENOL	Result: Bioaccumulation is unlikely.

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT PERMANENT COLOR - GROUP 6
Synonyms	None.
SDS number	00-21-0000368
Issue date	10-02-2020
Version number	02
Revision date	11-26-2020
Supersedes date	10-06-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Skin sensitization	Category 1A	H317 - May cause an allergic skin reaction.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye damage. Causes skin irritation. May cause an allergic skin reaction. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 1-NAPHTHOL, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE, 2-AMINO-6-CHLORO-4-NITROPHENOL, 2-METHYLRESORCINOL, AMMONIUM HYDROXIDE, BISABOLOL, ETHANOLAMINE, LAURETH-3, M-AMINOPHENOL, N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE, OLEYL PHOSPHATE, P-AMINOPHENOL, RESORCINOL, TOLUENE-2,5-DIAMINE SULFATE

Hazard pictograms

Signal word Danger

Hazard statements

H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P272	Contaminated work clothing should not be allowed out of the workplace.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.
P280	Wear protective gloves.

Response

P101	If medical advice is needed, have product container or label at hand.
P302 + P352	IF ON SKIN: Wash with plenty of water.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P333 + P313	If skin irritation or rash occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 2,27% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Do not breathe vapor. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	STEL	91 mg/m3
		20 ppm
	TWA	46 mg/m3
		10 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	VLE	14 mg/m3
Regulatory status: Regulatory binding (VRC)		
		20 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	7 mg/m3
Regulatory status: Regulatory binding (VRC)		
		10 ppm
Regulatory status: Regulatory binding (VRC)		
ETHANOLAMINE (CAS 141-43-5)	VLE	7,6 mg/m3
Regulatory status: Regulatory binding (VRC)		
		3 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	2,5 mg/m3
Regulatory status: Regulatory binding (VRC)		
		1 ppm
Regulatory status: Regulatory binding (VRC)		
RESORCINOL (CAS 108-46-3)	VME	45 mg/m3
Regulatory status: Regulatory indicative (VRI)		
		10 ppm
Regulatory status: Regulatory indicative (VRI)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
ETHANOLAMINE (CAS 141-43-5)	TWA	0,51 mg/m3	Vapor and aerosol.
		0,2 ppm	Vapor and aerosol.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
AMMONIUM HYDROXIDE (CAS 1336-21-6)	AGW	14 mg/m3	
		20 ppm	
ETHANOLAMINE (CAS 141-43-5)	AGW	0,5 mg/m3	Vapor and aerosol.
		0,2 ppm	Vapor and aerosol.
RESORCINOL (CAS 108-46-3)	AGW	20 mg/m3	Inhalable fraction.
		4 ppm	Inhalable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	28 mg/m3	
	TWA	14 mg/m3	
ETHANOLAMINE (CAS 141-43-5)	STEL	7,5 mg/m3	
	TWA	2,5 mg/m3	
P-AMINOPHENOL (CAS 123-30-8)	TWA	5 mg/m3	Inhalable fraction.
RESORCINOL (CAS 108-46-3)	STEL	90 mg/m3	
	TWA	45 mg/m3	

Spain. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,5 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	46 mg/m3
		10 ppm

EU. Indicative Exposure Limit Values in Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

Exposure guidelines

EU Exposure Limit Values: Skin designation

ETHANOLAMINE (CAS 141-43-5)	Can be absorbed through the skin.
RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

Slovenia. OELs. Regulations concerning protection of workers against risks due to exposure to chemicals while working (Official Gazette of the Republic of Slovenia)

ETHANOLAMINE (CAS 141-43-5)	Can be absorbed through the skin.
RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

Environmental exposure controls Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Characteristic.
Odor threshold	Not available.
pH	9,7 - 10,1
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

11.1. Information on toxicological effects

Acute toxicity	Not known.

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization May cause an allergic skin reaction.

Skin sensitization

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	EU Method B,6 - Cat 1 Result: Sensitizing Species: Guinea pig
COCAMIDOPROPYL BETAINE	OECD 406 Result: Not Sensitizing Species: Guinea pig
P-AMINOPHENOL	OECD 406 Result: Sensitizing Species: Guinea pig
OLEYL PHOSPHATE	OECD 429 Result: Not Sensitizing Species: Mouse
1-NAPHTHOL	OECD 429 Result: Sensitizing Species: Mouse
2,4-DIAMINOPHENOXYETHANOL HCL	OECD 429 Result: Sensitizing Species: Mouse
2-AMINO-6-CHLORO-4-NITROPHENOL	OECD 429 Result: Sensitizing Species: Mouse
2-METHYLRESORCINOL	OECD 429 Result: Sensitizing Species: Mouse
BISABOLOL	OECD 429 Result: Sensitizing Species: Mouse
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	OECD 429 Result: Sensitizing Species: Mouse
M-AMINOPHENOL	OECD 429 Result: Sensitizing Species: Mouse
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	OECD 429 Result: Sensitizing Species: Mouse
RESORCINOL	OECD 429 Result: Sensitizing Species: Mouse
TOLUENE-2,5-DIAMINE SULFATE	OECD 429 Result: Sensitizing Species: Mouse
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	QSAR Result: Sensitizing
ETHANOLAMINE	Result: Not Sensitizing Species: Guinea pig
AMMONIUM HYDROXIDE	Result: Not Sensitzing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

COCAMIDOPROPYL BETAINE	Result: In vitro and in vivo tests did not show mutagenic effects.
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	Result: In vitro and in vivo tests did not show mutagenic effects.
ETHANOLAMINE	Result: In vitro and in vivo tests did show mutagenic effects
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Result: In vitro tests did not show mutagenic effects
AMMONIUM HYDROXIDE	Result: In vitro tests did not show mutagenic effects
BISABOLOL	Result: In vitro tests did not show mutagenic effects
LAURETH-3	Result: In vitro tests did not show mutagenic effects
OLEYL PHOSPHATE	Result: In vitro tests did not show mutagenic effects
2,4-DIAMINOPHENOXYETHANOL HCL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
2-METHYLRESORCINOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Mutagenicity

HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
M-AMINOPHENOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
RESORCINOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
TOLUENE-2,5-DIAMINE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
1-NAPHTHOL	Result: In vitro tests showed varied results. In vivo tests showed negative results.
P-AMINOPHENOL	Result: In vivo tests showed mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

RESORCINOL (CAS 108-46-3)	3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOLAMINE	>= 450 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	>= 50 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
TOLUENE-2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 Result: NOAEL Species: Mouse
M-AMINOPHENOL	100 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
2,4-DIAMINOPHENOXYETHANOL HCL	20 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
RESORCINOL	250 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	26 mg/kg bw/day OECD 414 Result: NOAEL Species: Rat
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	30 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
COCAMIDOPROPYL BETAINE	300 mg/kg bw/d OECD 414, No effects on development Result: NOEL Species: Rat
1-NAPHTHOL	400 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
2-METHYLRESORCINOL	400 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
2-AMINO-6-CHLORO-4-NITROPHENOL	90 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

TOLUENE-2,5-DIAMINE SULFATE	>= 45 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 412 Result: NOEAL Species: Rat

Reproductivity

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
RESORCINOL	245 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
COCAMIDOPROPYL BETAINE	247 mg/kg bw/d OECD 408 Result: NOEL Species: Rat
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OECD 415 Species: Rat
ETHANOLAMINE	300 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
1-NAPHTHOL	Result: No Data

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

AMMONIUM HYDROXIDE	Result: Highly Irritating
1-NAPHTHOL	Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

P-AMINOPHENOL	10 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
TOLUENE-2,5-DIAMINE SULFATE	10 mg/kg bw/d OECD 408, oral Result: NOAEL Species: Rat Test Duration: 90 d
2-METHYLRESORCINOL	100 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 27 d
1-NAPHTHOL	130 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	15 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 108 d
ETHANOLAMINE	150 mg/m3 air OECD 412, Inhalation Result: NOAEC Species: Rat Test Duration: 28 d
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 13 weeks
2,4-DIAMINOPHENOXYETHANOL HCL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
BISABOLOL	200 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat Test Duration: 4 weeks

Specific target organ toxicity - repeated exposure

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
2-AMINO-6-CHLORO-4-NITROPHENOL	30 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 13 weeks
COCAMIDOPROPYL BETAINE	300 mg/kg bw/d OECD 408, Oral Result: NOEL Species: Rat Test Duration: 90 d
ETHANOLAMINE	300 mg/kg bw/d OECD 416, Oral Result: NOAEL Species: Rat
RESORCINOL	80 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d 991 mg/m³ Result: NOAEC Species: Rat Test Duration: 14 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Aquatic			
Acute			
Algae		Pseudokirchneriella subcapitata	5,33 mg/l, 72 h EU C.3
Crustacea	EC50	Daphnia magna	11,12 mg/l, 48 h TG 202
Fish	LC50	Danio rerio	86,2 mg/l, 96 h EU C.1
1-NAPHTHOL (CAS 90-15-3)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 2,18 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	2,51 mg/l, 48 h
Fish	LC50	Pimephales promelas	4,24 mg/l, 96 h
Chronic			
Crustacea	NOEC	Daphnia magna	0,25 mg/l, 21 d OECD 211
2,4-DIAMINOPHENOXYETHANOL HCL (CAS 66422-95-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	36,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	7,4 mg/l, 48 h OECD 202
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE (CAS 83763-48-8)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0,733 mg/l, 72 h OECD 201
	NOEC	Pseudokirchneriella subcapitata	0,341 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	3 mg/l, 48 h OECD 202

Components		Species	Test Results
2-AMINO-6-CHLORO-4-NITROPHENOL (CAS 6358-09-4)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	82,4 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	5,17 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	> 100 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	281,5 mg/l, 3 h OECD 209
2-METHYLRESORCINOL (CAS 608-25-3)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	71 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,605 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	58,1 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	131 mg/l, 3 h OECD 209
AMMONIUM HYDROXIDE (CAS 1336-21-6)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2700 mg/l, 18 d
Crustacea	EC50	Daphnia magna	101 mg/l, 48 h ASTM E729-80
Fish	LC50	Oncorhynchus mykiss	0,89 mg/l, 96 h
Chronic			
Crustacea	NOEC	Daphnia magna	0,79 mg/l, 21 d
Fish	NOEC	Oncorhynchus mykiss	1,2 mg/l, 61 d OECD 210
BISABOLOL (CAS 72691-24-8)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	5,72 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia	1,3 mg/l, 48 h OECD 202
Fish	LC50	Leuciscus idus	6,81 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 180 min OECD 209
COCAMIDOPROPYL BETAINE (CAS 97862-59-4)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	2,4 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	1,9 mg/l, 48 h OECD 202
Fish	LC50	Pimephales promelas	1,1 mg/l, 96 h OECD 203
Other	EC0	Pseudomonas putida	3000 mg/l, 16 h ISO 10712
Chronic			
Crustacea	NOEC	Daphnia magna	0,32 mg/l, 21 d OECD 211
Fish	NOEC	Oncorhynchus mykiss	0,135 mg/l, 37 d OECD 210
ETHANOLAMINE (CAS 141-43-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	2,8 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	65 mg/l, 48 h EU C.2
Fish	LC50	Cyprinus carpio	349 mg/l, 96 h EU C.1
Other	EC10	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,85 mg/l, 21 d OECD 211

Components		Species	Test Results
Fish	NOEC	Oryzias latipes	1,24 mg/l, 41 d OECD 210
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL (CAS 94158-14-2)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	17,9 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	2,67 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	106 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	77 mg/l, 3 h OECD 209
Chronic			
Algae	NOEC	Desmodesmus subspicatus	12,5 mg/l, 72 h OECD 201
LAURETH-3 (CAS 68439-50-9)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	1 - 10 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	1 - 10 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	1 - 10 mg/l, 96 h ISO 7346-2
Other	EC0	Pseudomonas putida	> 100 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	<= 1 mg/l, 21 d
M-AMINOPHENOL (CAS 591-27-5)			
Acute			
Other	IC50	Tetrahymena pyriformis	361 mg/l, 40 h
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	62 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	1,1 mg/l, 48 h DIN 38412, Pt. 11
Fish	LC50	Danio rerio	82,64 mg/l, 96 h OECD 203

Crustacea	LC50	Daphnia magna	1 mg/l, 48 h OECD 202
Fish	LC50	Pimephales promelas	26,8 mg/l, 96 h EPA-660/3/75-009
Other		Activated sludge of a predominantly domestic sewage	79 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	>= 0,172 mg/l, 21 d
Fish	LOEC	Oncorhynchus mykiss	320 mg/l, 60 d
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0,653 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,82 mg/l, 48 h OECD 202
	NOEC	Daphnia magna	0,63 mg/l, 21 d OECD 211
Fish	LC50	Danio rerio	1,08 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	17,7 mg/l, 3 h OECD 209

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33,3 % EU C,4-E Result: Not readily biodegradable
1-NAPHTHOL	> 77,8 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 29 d
2-AMINO-6-CHLORO-4-NITROPHENOL	0 % OECD 301 F Result: Not Readily Biodegradable Test Duration: 28 d
2-METHYLRESORCINOL	64 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
BISABOLOL	70 - 80 % OECD 301 F Result: Readily Biodegradable Test Duration: 28 d
COCAMIDOPROPYL BETAINE	91,6 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
ETHANOLAMINE	> 90 % OECD 301 A Result: Readily Biodegradable Test Duration: 21 d
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	0 - 16 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 28 d
LAURETH-3	Result: Readily Biodegradable

Biodegradability

Percent degradation (Aerobic biodegradation)

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14,3 % OECD 301B Result: Not Readilby Biodegradable Test Duration: 28 d
OLEYL PHOSPHATE	26,1 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d
RESORCINOL	66,7 % OECD 301 C Result: Readily Biodegradable Test Duration: 14 d
TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

1-NAPHTHOL	2,836 OECD 107
COCAMIDOPROPYL BETAINE	4,2
ETHANOLAMINE	-2,3 OECD 107
M-AMINOPHENOL	0,21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2,8 -2,8 OECD 107
P-AMINOPHENOL	0,25
RESORCINOL	0,8

Bioconcentration factor (BCF)

COCAMIDOPROPYL BETAINE	71
P-AMINOPHENOL	10 - 46 OECD 305 C

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

Estonia Dangerous substances in groundwater Data

RESORCINOL (CAS 108-46-3)	RESORCINOL 0,5 UG/L RESORCINOL 50 UG/L

Estonia Dangerous substances in soil Data

RESORCINOL (CAS 108-46-3)	RESORCINOL 0,1 MG/KG RESORCINOL 1 MG/KG RESORCINOL 10 MG/KG

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.
General information	IMDG Regulated Marine Pollutant.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
AMMONIUM HYDROXIDE (CAS 1336-21-6)
M-AMINOPHENOL (CAS 591-27-5)
P-AMINOPHENOL (CAS 123-30-8)
RESORCINOL (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.

15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H301 Toxic if swallowed. H302 Harmful if swallowed. H311 Toxic in contact with skin. H312 Harmful in contact with skin. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H331 Toxic if inhaled. H332 Harmful if inhaled. H335 May cause respiratory irritation. H341 Suspected of causing genetic defects. H370 Causes damage to organs by ingestion. H371 May cause damage to organs by ingestion. H373 May cause damage to organs through prolonged or repeated exposure by ingestion. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	This document has undergone significant changes and should be reviewed in its entirety.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT PERMANENT COLOR - Groupe 6**

Autres moyens d'identification

Numéro de la FDS 00-21-0000368

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé

Corrosion cutanée/irritation cutanée	Catégorie 2
Lésions oculaires graves/irritation oculaire	Catégorie 1
Sensibilisation cutanée	Catégorie 1A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Provoque une irritation cutanée. Peut provoquer une allergie cutanée. Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Il ne faut pas que les vêtements de travail contaminés quittent le lieu de travail. Porter un équipement de protection des yeux/du visage. Porter des gants de protection.

Intervention En contact avec la peau : Laver avec beaucoup d'eau. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation ou d'éruption cutanée : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
LAURETH-3		68439-50-9	5
HYDROXYDE D'AMMONIUM		1336-21-6	1.8
2-AMINO-6-CHLORO-4-NITROPHÉNOL		6358-09-4	< 2
ÉTHANOLAMINE		141-43-5	< 2
OLEYL PHOSPHATE		37310-83-1	1.25
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
TOLUÈNE -2,5-DIAMINE SULFATE		615-50-9	< 1
p-Aminophénol		123-30-8	< 1
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE		83763-48-8	< 0.6
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE		54381-16-7	< 0.6
M-AMINOPHÉNOL		591-27-5	< 0.6
1-NAPHTOL		90-15-3	≤ 0.5
RÉSORCINOL		108-46-3	≤ 0.5

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Enlever immédiatement les vêtements contaminés et laver la peau à l'eau et au savon. En cas d'eczéma ou d'autres problèmes cutanés : consulter un médecin et apporter cette fiche. Laver les vêtements contaminés avant réutilisation.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.
Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence

Tenir à l'écart le personnel non requis. Tenir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Éviter de respirer les brouillards/vapeurs. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Ce produit est classé comme un polluant de l'eau en vertu de la Loi sur la qualité de l'eau (Clean Water Act) et ne doit pas contaminer les sols ni pénétrer dans les systèmes d'égouts et d'évacuation qui se déversent dans les cours d'eau.

Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Éviter tout contact avec les yeux, la peau ou les vêtements. Éviter de respirer les brouillards/vapeurs. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	PEL (limite d'exposition admissible)	6 mg/m3
		3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	PEL (limite d'exposition admissible)	35 mg/m3
		50 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	STEL	6 ppm
	TWA	3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm
RÉSORCINOL (CAS 108-46-3)	STEL	20 ppm
	TWA	10 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	STEL	15 mg/m3
		6 ppm
	TWA	8 mg/m3
		3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm
RÉSORCINOL (CAS 108-46-3)	STEL	90 mg/m3
		20 ppm
	TWA	45 mg/m3
		10 ppm

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial. Un écran facial est recommandé.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques Il est recommandé d'utiliser un tablier imperméable.

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Crème.

Couleur Nuancé

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH 9.7 - 10.1

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 100 °C (> 212 °F)

Point d'éclair > 100.0 °C (> 212.0 °F) Coupelle fermée

Taux d’évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d’inflammabilité ou d’explosibilité	
Limites d’inflammabilité - inférieure (%)	Non disponible.
Limites d’inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d’auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d’utilisation, d’entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d’utilisation.
Conditions à éviter	Tenir à l’écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d’ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée. Peut provoquer une allergie cutanée. L'exposition répétée ou prolongée peut causer des lésions aux reins et au foie. Ces effets n'ont pas été observés chez l'humain.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d’ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Renseignements sur les effets toxicologiques

Toxicité aiguë	Inconnu(e).

RÉSORCINOL	245 mg/kg bw/d OCDE 416 Résultat: DSENO Espèces: Rat
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OCDE 415 Espèces: Rat
ÉTHANOLAMINE	300 mg/kg bw/d OCDE 416 Résultat: DSENO Espèces: Rat
1-NAPHTOL	Résultat: Aucune donnée

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

1-NAPHTOL	Résultat: Irritant
HYDROXYDE D'AMMONIUM	Résultat: Très irritant

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

p-Aminophénol	10 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
TOLUÈNE -2,5-DIAMINE SULFATE	10 mg/kg bw/d OCDE 408, orale Résultat: DSENO Espèces: Rat Durée du test: 90 d
OLEYL PHOSPHATE	1000 mg/kg bw/d OCDE 407 Résultat: DSENO Espèces: Rat Durée du test: 27 d
1-NAPHTOL	130 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	15 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 108 d
ÉTHANOLAMINE	150 mg/m3 air OCDE 412, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 28 d
M-AMINOPHÉNOL	20 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d
2-AMINO-6-CHLORO-4-NITROPHÉNOL	30 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 13 semaines
ÉTHANOLAMINE	300 mg/kg bw/d OCDE 416, Orale Résultat: DSENO Espèces: Rat
RÉSORCINOL	80 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d

Toxicité pour certains organes cibles - expositions répétées

RÉSORCINOL — 991 mg/m³
Résultat: CSENO
Espèces: Rat
Durée du test: 14 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets chroniques Peut être nocif en cas d'absorption par la peau.

L'exposition répétée ou prolongée peut causer des lésions aux reins et au foie. Ces effets n'ont pas été observés chez l'humain.

Autres informations Peut provoquer des allergies respiratoires et cutanées. La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Aquatique			
Aiguë			
Algues		Pseudokirchneriella subcapitata	5.33 mg/l, 72 h EU C.3
Crustacés	CE50	Daphnia magna	11.12 mg/l, 48 h TG 202

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E Résultat: Difficilement Biodégradable
1-NAPHTOL	> 77.8 % OCDE 301 B Résultat: Facilement Biodegradable Durée du test: 28 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OCDE 301 B Résultat: Difficilement Biodégradable Durée du test: 29 d
2-AMINO-6-CHLORO-4-NITROPHÉNOL	0 % OECD 301 F Résultat: Difficilement Biodégradable Durée du test: 28 d
ÉTHANOLAMINE	> 90 % OCDE 301 A Résultat: Facilement Biodegradable Durée du test: 21 d
LAURETH-3	Résultat: Facilement Biodegradable
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14.3 % OECD 301B Résultat: Not Readilby Biodegradable Durée du test: 28 d
OLEYL PHOSPHATE	26.1 % OECD 301 D Résultat: Facilement Biodegradable Durée du test: 28 d
RÉSORCINOL	66.7 % OCDE 301 C Résultat: Facilement Biodegradable Durée du test: 14 d
TOLUÈNE -2,5-DIAMINE SULFATE	17 % OECD 301 D Résultat: Difficilement Biodégradable Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

1-NAPHTOL	2.836 OECD 107
ÉTHANOLAMINE	-2.3 OECD 107
M-AMINOPHÉNOL	0.21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2.8 -2.8 OECD 107

Log Koe du coefficient de répartition octanol/eau

p-Aminophénol	0.25
RÉSORCINOL	0.8

Facteur de bioconcentration

p-Aminophénol	10 - 46 OECD 305 C

Bioaccumulation

1-NAPHTOL	Résultat: Bioaccumulation is unlikely
ÉTHANOLAMINE	Résultat: Une bioaccumulation est peu probable.
p-Aminophénol	Résultat: Une bioaccumulation est peu probable.

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

Informations générales Polluant marin réglementé par l'IMDG. Polluant marin réglementé par le DOT.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	Inscrit.
RÉSORCINOL (CAS 108-46-3)	Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Dénomination chimique	Numéro d'enregistreme	% en poids.
HYDROXYDE D'AMMONIUM	1336-21-6	1.8

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

RÉSORCINOL (CAS 108-46-3) Faible priorité

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	02-Octobre-2020
Date de la révision	26-Novembre-2020
Version n°	02
Classements NFPA	Santé: 3 Inflammabilité: 1 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.
Informations relatives à la révision	Des modifications importantes ont été apportées à ce document et il devrait donc être relu entièrement.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT PERMANENT COLOR - GRUPPO 6
Sinonimi	Nessuno.
Numero SDS	00-21-0000368
Data di pubblicazione	10-Settembre-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli per la salute

Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.
Sensibilizzazione cutanea	Categoria 1A	H317 - Può provocare una reazione allergica cutanea.

Pericoli per l'ambiente

Pericoloso per l'ambiente acquatico, pericolo acquatico a lungo termine	Categoria 3	H412 - Nocivo per gli organismi acquatici con effetti di lunga durata.

Riepilogo dei pericoli Provoca gravi lesioni oculari. Provoca irritazione cutanea. Può provocare una reazione allergica cutanea. Pericoloso per l'ambiente se scaricato nei corsi d'acqua. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 1-NAFTOLO, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE, 2-AMINO-6-CHLORO-4-NITROFENOLO, 2-METHYLRESORCINOL, 4-Aminofenolo, AMMONIACA .... %, BISABOLOL, ETANOLAMINA, LAURETH-3, M-AMINOFENOLO, N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE, OLEYL PHOSPHATE, RESORCINOLO, TOLUENE-2,5-DIAMINE SULFATE

Pittogrammi di pericolo

Avvertenza Pericolo

Indicazioni di pericolo

H315	Provoca irritazione cutanea.
H317	Può provocare una reazione allergica cutanea.
H318	Provoca gravi lesioni oculari.
H412	Nocivo per gli organismi acquatici con effetti di lunga durata.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P260	Non respirare il vapore.
P264	Lavare attentamente dopo l'uso.
P272	Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
P273	Non disperdere nell'ambiente.
P280	Proteggere gli occhi.
P280	Indossare guanti protettivi.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P302 + P352	IN CASO DI CONTATTO CON LA PELLE: lavare abbondantemente con acqua.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P333 + P313	In caso di irritazione o eruzione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.

Immagazzinamento Conservare lontano da materiali non compatibili.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette La miscela contiene il 2,27 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi.
Lavare gli indumenti contaminati prima di indossarli nuovamente.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea Togliere immediatamente gli indumenti contaminati e lavare la pelle con acqua e sapone. In caso di eczema o altri disturbi alla pelle: consultare un medico e portare con sé queste istruzioni. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio Non sono indicati rischi d'incendio o di esplosione particolari.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO_2).

Mezzi di estinzione non idonei Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi In caso d'incendio indossare autorespiratore e indumenti protettivi completi.

Procedure speciali per l'estinzione degli incendi Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.

Metodi specifici Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Prevedere una ventilazione adeguata. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.

Per chi interviene direttamente Allontanare il personale non necessario. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS

6.2. Precauzioni ambientali

Non disperdere nell'ambiente. Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente. Evitare sversamenti o perdite supplementari, se questo può essere fatto senza pericolo. Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.

6.3. Metodi e materiali per il contenimento e per la bonifica

Non scaricare il prodotto nelle fogne.

Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Assorbire in vermiculite, sabbia o terra asciutta e riporre in contenitori. Una volta recuperato il prodotto, sciacquare l'area con acqua.

Versamenti di piccole dimensioni: Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua.

Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo

6.4. Riferimento ad altre sezioni

Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura

Non respirare il vapore. Non permettere che questo materiale vada a contatto con gli occhi. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Garantire una ventilazione adeguata. Indossare attrezzature di protezione personale adeguate. Non disperdere nell'ambiente. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità

Conservare in un recipiente ermeticamente chiuso. Conservare fuori della portata dei bambini. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari

Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
ETANOLAMINA (CAS 141-43-5)	8 ore	2,5 mg/m3
		1 ppm
	Breve termine	7,6 mg/m3
		3 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite d'esposizione indicativi dell'UE in Direttive 91/322/CEE, 2000/39/CE, 2006/15/CE, 2009/161/UE

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
ETANOLAMINA (CAS 141-43-5)	8 ore	2,5 mg/m3
		1 ppm
	Breve termine	7,6 mg/m3
		3 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite biologici

Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate	Seguire le procedure standard di monitoraggio.
Livelli derivati senza effetto (DNEL)	Non conosciuto.
Prevedibili concentrazioni prive di effetti (PNEC)	Non conosciuto.

Linee guida sull'esposizione

OEL Italia: Specifica cutanea

ETANOLAMINA (CAS 141-43-5)	Assorbimento attraverso la pelle
RESORCINOLO (CAS 108-46-3)	Assorbimento attraverso la pelle

8.2. Controlli dell'esposizione

Controlli tecnici idonei	È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali	Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.
Protezione degli occhi/del volto	Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura). Si raccomanda l'uso di una visiera protettiva.
Protezione della pelle	
- Protezione delle mani	Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.
- Altro	Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici. Si consiglia di utilizzare un grembiule impenetrabile.
Protezione respiratoria	Applicabile soltanto per gli impianti industriali. In caso di ventilazione insufficiente, usare un apparecchio respiratorio adatto.
Pericoli termici	Indossare opportuni indumenti termoprotettivi, quando necessario.
Misure d'igiene	Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti. Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
Controlli dell'esposizione ambientale	Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto	
Stato fisico	Liquido.
Forma	Panna.
Colore	Shaded
Odore	Caratteristico/a.
Soglia olfattiva	Non conosciuto.
pH	9,7 - 10,1
Punto di fusione/punto di congelamento	Non conosciuto.
Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	> 100,0 °C (> 212,0 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.

Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	Non sono disponibili informazioni supplementari pertinenti.

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Forti agenti ossidanti.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.
Informazioni sulle vie probabili di esposizione	
Inalazione	L'inalazione prolungata può essere nociva.
Cutanea	Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca gravi lesioni oculari.
Ingestione	In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.
Sintomi	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta Non conosciuto.

2-METHYLRESORCINOL	OECD 429 Risultato: sensibilizzante Specie: Topo
BISABOLOL	OECD 429 Risultato: sensibilizzante Specie: Topo
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	OECD 429 Risultato: sensibilizzante Specie: Topo
M-AMINOFENOLO	OECD 429 Risultato: sensibilizzante Specie: Topo
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	OECD 429 Risultato: sensibilizzante Specie: Topo
RESORCINOLO	OECD 429 Risultato: sensibilizzante Specie: Topo
TOLUENE-2,5-DIAMINE SULFATE	OECD 429 Risultato: sensibilizzante Specie: Topo
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	QSAR Risultato: sensibilizzante
ETANOLAMINA	Risultato: Not Sensitizing Specie: Porcellino d'india
AMMONIACA .... %	Risultato: Not Sensitzing Specie: Porcellino d'india

Mutagenicità sulle cellule germinali A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Mutagenicità

2,4-DIAMINOPHENOXYETHANOL HCL	Risultato: I saggi in vitro hanno rivelato effetti mutagenici, allorché i saggi in vivo non li hanno rivelati.
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	Risultato: I saggi in vitro hanno rivelato effetti mutagenici, allorché i saggi in vivo non li hanno rivelati.
2-METHYLRESORCINOL	Risultato: I saggi in vitro hanno rivelato effetti mutagenici, allorché i saggi in vivo non li hanno rivelati.
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	Risultato: I saggi in vitro hanno rivelato effetti mutagenici, allorché i saggi in vivo non li hanno rivelati.
M-AMINOFENOLO	Risultato: I saggi in vitro hanno rivelato effetti mutagenici, allorché i saggi in vivo non li hanno rivelati.
RESORCINOLO	Risultato: I saggi in vitro hanno rivelato effetti mutagenici, allorché i saggi in vivo non li hanno rivelati.
TOLUENE-2,5-DIAMINE SULFATE	Risultato: I saggi in vitro hanno rivelato effetti mutagenici, allorché i saggi in vivo non li hanno rivelati.
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Risultato: I saggi in vitro non hanno rivelato effetti mutagenici
AMMONIACA .... %	Risultato: I saggi in vitro non hanno rivelato effetti mutagenici
BISABOLOL	Risultato: I saggi in vitro non hanno rivelato effetti mutagenici
LAURETH-3	Risultato: I saggi in vitro non hanno rivelato effetti mutagenici
OLEYL PHOSPHATE	Risultato: I saggi in vitro non hanno rivelato effetti mutagenici
4-Aminofenolo	Risultato: I saggi in vivo hanno rivelato effetti mutagenici
COCAMIDOPROPYL BETAINE	Risultato: I test in vitro e in vivo non hanno evidenziato effetti mutageni.
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	Risultato: I test in vitro e in vivo non hanno evidenziato effetti mutageni.
ETANOLAMINA	Risultato: In vitro and in vivo tests did show mutagenic effects
1-NAFTOLO	Risultato: In vitro tests showed varied results. In vivo tests showed negative results.

Cancerogenicità Non classificabile in relazione alla cancerogenicità per l'uomo. A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Monografie IARC. Valutazione generale di cancerogenicità

RESORCINOLO (CAS 108-46-3)	3 Non classificabile per la cancerogenicità nell'uomo.

Tossicità per la riproduzione A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Effetti sullo sviluppo

ETANOLAMINA	>= 450 mg/kg bw/d OECD 414 Risultato: NOAEL Specie: Ratto
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	>= 50 mg/kg bw/d OECD 414 Risultato: NOAEL Specie: Ratto
TOLUENE-2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 Risultato: NOAEL Specie: Topo

Tossicità specifica per organi bersaglio (STOT) — esposizione ripetuta

RESORCINOLO	991 mg/m3 Risultato: NOAEC Specie: Ratto Durata del test: 14 d

Pericolo in caso di aspirazione A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Informazioni sulle miscele rispetto alle informazioni sulle sostanze Nessuna informazione disponibile.

Altre informazioni Può provocare reazioni allergiche all'apparato respiratorio e alla pelle. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 12: Informazioni ecologiche

12.1. Tossicità Nocivo per gli organismi acquatici con effetti di lunga durata. In base ai dati disponibili, i criteri di classificazione non sono soddisfatti per "pericoloso per l'ambiente acquatico, rischio acuto".

Componenti		Specie	Risultati del test
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Acquatico			
Acuto			
Alga		Pseudokirchneriella subcapitata	5,33 mg/l, 72 h EU C.3
Crostacei	EC50	Daphnia magna	11,12 mg/l, 48 h TG 202
Pesci	LC50	Danio rerio	86,2 mg/l, 96 h EU C.1
1-NAFTOLO (CAS 90-15-3)			
Acquatico			
Acuto			
Alga	EC50	Pseudokirchneriella subcapitata	> 2,18 mg/l, 72 h OECD 201
Crostacei	EC50	Daphnia magna	2,51 mg/l, 48 h
Pesci	LC50	Pimephales promelas	4,24 mg/l, 96 h
Cronico			
Crostacei	NOEC	Daphnia magna	0,25 mg/l, 21 d OECD 211
2,4-DIAMINOPHENOXYETHANOL HCL (CAS 66422-95-5)			
Acquatico			
Acuto			
Alga	EC50	Pseudokirchneriella subcapitata	36,5 mg/l, 72 h OECD 201
Crostacei	EC50	Daphnia magna	7,4 mg/l, 48 h OECD 202
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE (CAS 83763-48-8)			
Acquatico			
Acuto			
Alga	EC50	Pseudokirchneriella subcapitata	0,733 mg/l, 72 h OECD 201
	NOEC	Pseudokirchneriella subcapitata	0,341 mg/l, 72 h OECD 201
Crostacei	EC50	Daphnia magna	3 mg/l, 48 h OECD 202
2-AMINO-6-CHLORO-4-NITROFENOLO (CAS 6358-09-4)			
Acquatico			
Acuto			
Alga	EC50	Pseudokirchneriella subcapitata	82,4 mg/l, 72 h OECD 201
Altro	EC50	Fanghi attivi di acque nere prevalentemente domestiche	281,5 mg/l, 3 h OCSE 209
Crostacei	EC50	Daphnia magna	5,17 mg/l, 48 h OECD 202
Pesci	LC50	Danio rerio	> 100 mg/l, 96 h OCSE 203
2-METHYLRESORCINOL (CAS 608-25-3)			
Acquatico			
Acuto			
Alga	EC50	Pseudokirchneriella subcapitata	71 mg/l, 72 h OECD 201

Componenti		Specie	Risultati del test
Altro	EC50	Fanghi attivi di acque nere prevalentemente domestiche	131 mg/l, 3 h OCSE 209
Crostacei	EC50	Daphnia magna	0,605 mg/l, 48 h OECD 202
Pesci	LC50	Danio rerio	58,1 mg/l, 96 h
4-Aminofenolo (CAS 123-30-8)			
Acquatico			
Acuto			
Alga	EC50	Pseudokirchneriella subcapitata	> 0,253 mg/l, 72 h OECD 201
Altro	EC50	Fanghi attivi di acque nere prevalentemente domestiche	29,9 mg/l, 3 h OCSE 209
Crostacei	EC50	Daphnia magna	0,182 mg/l, 48 h OECD 202
Pesci	LC50	Oryzias latipes	0,82 mg/l, 96 h OCSE 203
AMMONIACA .... % (CAS 1336-21-6)

12.2. Persistenza e degradabilità

Biodegradabilità

Percentuale di degradazione (biodegradazione aerobica)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33,3 % EU C,4-E Risultato: Not readily biodegradable
1-NAFTOLO	> 77,8 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OECD 301 B Risultato: Not Readily Biodegradable Durata del test: 29 d
2-AMINO-6-CHLORO-4-NITROFENOLO	0 % OECD 301 F Risultato: Not Readily Biodegradable Durata del test: 28 d
2-METHYLRESORCINOL	64 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
BISABOLOL	70 - 80 % OECD 301 F Risultato: Rapidamente biodegradabile Durata del test: 28 d
COCAMIDOPROPYL BETAINE	91,6 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
ETANOLAMINA	> 90 % OECD 301 A Risultato: Rapidamente biodegradabile Durata del test: 21 d
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	0 - 16 % OECD 301 B Risultato: Not Readily Biodegradable Durata del test: 28 d
LAURETH-3	Risultato: Rapidamente biodegradabile
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14,3 % OECD 301B Risultato: Not Readilby Biodegradable Durata del test: 28 d
OLEYL PHOSPHATE	26,1 % OECD 301 D Risultato: Rapidamente biodegradabile Durata del test: 28 d
RESORCINOLO	66,7 % OECD 301 C Risultato: Rapidamente biodegradabile Durata del test: 14 d
TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Risultato: Not Readily Biodegradable Durata del test: 28 d

12.3. Potenziale di bioaccumulo

Coefficiente di partizione n-ottanolo/acqua (log Kow)

1-NAFTOLO	2,836 OECD 107

4-Aminofenolo	0,25
COCAMIDOPROPYL BETAINE	4,2
ETANOLAMINA	-2,3 OECD 107
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	0,412, OECD 117
M-AMINOFENOLO	0,21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2,8
	-2,8 OECD 107
RESORCINOLO	0,8

Fattore di bioconcentrazione (BCF)

4-Aminofenolo	10 - 46 OECD 305 C
COCAMIDOPROPYL BETAINE	71

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.

12.7. Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).

Imballaggi contaminati Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.

Codice Europeo dei Rifiuti Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.

Metodi di smaltimento/informazioni Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Impedire a questo prodotto di penetrare nelle fogne e nelle riserve d'acqua. Non contaminare stagni, canali o fossati con il prodotto chimico o il contenitore usato. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Precauzioni particolari Smaltire secondo le norme applicabili.

SEZIONE 14: Informazioni sul trasporto

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H301 Tossico se ingerito. H302 Nocivo se ingerito. H311 Tossico per contatto con la pelle. H312 Nocivo per contatto con la pelle. H314 Provoca gravi ustioni cutanee e gravi lesioni oculari. H315 Provoca irritazione cutanea.

H317 Può provocare una reazione allergica cutanea.
H318 Provoca gravi lesioni oculari.
H319 Provoca grave irritazione oculare.
H331 Tossico se inalato.
H332 Nocivo se inalato.
H335 Può irritare le vie respiratorie.
H341 Sospettato di provocare alterazioni genetiche.
H370 Provoca danni agli organi per ingestione.
H371 Può provocare danni agli organi per ingestione.
H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta per ingestione.
H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta.
H400 Molto tossico per gli organismi acquatici.
H410 Molto tossico per gli organismi acquatici con effetti di lunga durata.
H411 Tossico per gli organismi acquatici con effetti di lunga durata.
H412 Nocivo per gli organismi acquatici con effetti di lunga durata.

Informazioni di revisione

Prodotto e la Società Identificazione: Tipi di materiale
COMPOSIZIONE/INFORMAZIONI SUGLI INGREDIENTI: Ingredienti
Proprietà fisiche e chimiche: Proprietà multiple
GHS: Classificazione

Informazioni formative

Seguire le istruzioni di formazione durante la manipolazione di questo materiale.

Clausole di esclusione della responsabilità

Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT PERMANENT COLOR - 组 6

鉴别的其他方法

SDS编号 00-21-0000368

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害

皮肤腐蚀/刺激	类别 2
严重眼睛损伤/眼睛刺激性	类别 1
皮肤过敏	类别 1A

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 造成皮肤刺激。 可能造成皮肤过敏反应。 造成严重眼损伤。

防范说明

预防措施 作业后彻底清洗。 受沾染的工作服不得带出工作场地。 戴防护眼罩/防护面具。 戴防护手套。

事故响应 如皮肤沾染：用大量水清洗。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。 如发生皮肤刺激或皮疹：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。

安全储存 远离禁忌物保存。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
LAURETH-3		68439-50-9	5
氢氧化铵		1336-21-6	1.8
2-AMINO-6-CHLORO-4-NITROPHENOL		6358-09-4	< 2
乙醇胺		141-43-5	< 2

化学名称	通用名称和别名	登记号(CAS号)	%
OLEYL PHOSPHATE		37310-83-1	1.25
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
甲苯 -2,5-DIAMINE SULFATE		615-50-9	< 1
P-AMINOPHENOL		123-30-8	< 1
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE		83763-48-8	< 0.6
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE		54381-16-7	< 0.6
M-AMINOPHENOL		591-27-5	< 0.6
1-NAPHTHOL		90-15-3	≤ 0.5
间苯二酚		108-46-3	≤ 0.5

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入
移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触
立即脱掉受污染的衣服，用肥皂水冲洗皮肤。 若出现湿疹或其它皮肤疾病：就医治疗，并带上本说明书。 沾染的衣服清洗后方可重新使用。

眼睛接触
立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即就医。

经口
漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性
严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

指明任何需要立即就医或特殊治疗的情况
提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息
务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。
沾染的衣服清洗后方可重新使用。

5. 消防措施

合适的灭火剂
水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质
禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害
燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施
发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明
在不会发生危险的情况下将容器撤离火灾现场。

特定的方法
采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险
无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序
让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 Avoid breathing mist/vapors. 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料
根据水净化法，这种材料被分类为水污染物，应防止污染土壤，或防止进入下水道及流至水路的排水系统。

大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施
防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项
严防进入眼中、接触皮肤或衣服。 Avoid breathing mist/vapors. 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物
储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	PEL-常期暴露极限	6 mg/m3
		3 ppm
氢氧化铵 (CAS 1336-21-6)	PEL-常期暴露极限	35 mg/m3
		50 ppm

美国ACGIH阈限值

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	TWA	3 ppm
	短期暴露极限（STEL）	6 ppm
氢氧化铵 (CAS 1336-21-6)	TWA	25 ppm
	短期暴露极限（STEL）	35 ppm
间苯二酚 (CAS 108-46-3)	TWA	10 ppm
	短期暴露极限（STEL）	20 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	TWA	8 mg/m3
		3 ppm
	短期暴露极限（STEL）	15 mg/m3
		6 ppm
氢氧化铵 (CAS 1336-21-6)	TWA	18 mg/m3
		25 ppm
	短期暴露极限（STEL）	27 mg/m3
		35 ppm
间苯二酚 (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm
	短期暴露极限（STEL）	90 mg/m3
		20 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼和安全淋浴设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 佩戴带侧边的安全眼镜（护目镜）和面罩。 建议穿戴面罩。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。 建议使用不渗透的围裙。

呼吸系统防护 仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。 受沾染的工作服不得带出工作场地。

9. 理化特性

外观

性状	液体。
形状	奶油。
颜色	有色
气味	特征的。
气味阈值	无资料。
pH 值	9.7 - 10.1
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	造成皮肤刺激。 可能造成皮肤过敏反应。 长时间或是重复暴露可能导致肝脏和肾损伤。 这些影响在人体尚未被观察到。
眼睛接触	造成严重眼损伤。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

毒理学效应信息

急性毒性	未知。

间苯二酚	250 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	30 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
1-NAPHTHOL	400 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
2-AMINO-6-CHLORO-4-NITROPHENOL	90 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

甲苯 -2,5-DIAMINE SULFATE	>= 45 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 412 结果: NOEAL 物种: 大鼠
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
间苯二酚	245 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OECD 415 物种: 大鼠
乙醇胺	300 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

1-NAPHTHOL	结果: 无数据

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

1-NAPHTHOL	结果: 刺激性的
氢氧化铵	结果: 高刺激性

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

P-AMINOPHENOL	10 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
甲苯 -2,5-DIAMINE SULFATE	10 mg/kg bw/d OECD 408, 口服 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 27 D
1-NAPHTHOL	130 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	15 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 108 D
乙醇胺	150 mg/m3 空气 OECD 412, 吸入 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 28 D
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
2-AMINO-6-CHLORO-4-NITROPHENOL	30 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 13 星期
乙醇胺	300 mg/kg bw/d OECD 416, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
间苯二酚	80 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D 991 mg/m³ 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 14 D

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

慢性影响 如通过皮肤吸收可能有害.

长时间或是重复暴露可能导致肝脏和肾损伤。 这些影响在人体尚未被观察到。

更多信息 可能造成皮肤和呼吸过敏性反应。 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性

产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	11.12 mg/l, 48 h TG 202
藻类		近头状伪蹄形藻	5.33 mg/l, 72 h EU C.3
鱼	LC50	斑马鱼 (Danio rerio)	86.2 mg/l, 96 h EU C.1
1-NAPHTHOL (CAS 90-15-3)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	2.51 mg/l, 48 h
藻类	EC50	近头状伪蹄形藻	> 2.18 mg/l, 72 h OECD 201
鱼	LC50	呆鲦鱼	4.24 mg/l, 96 h
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.25 mg/l, 21 D OECD 211
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE (CAS 83763-48-8)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	3 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	0.733 mg/l, 72 h OECD 201
	无明显反应浓度（NOEC）	近头状伪蹄形藻	0.341 mg/l, 72 h OECD 201
2-AMINO-6-CHLORO-4-NITROPHENOL (CAS 6358-09-4)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	281.5 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	5.17 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	82.4 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	> 100 mg/l, 96 h OECD 203

藻类	EC50	近头状伪蹄形藻	> 97 mg/l, 97 h OECD 201
鱼	LC50	呆鲦鱼	26.8 mg/l, 96 h EPA-660/3/75-009
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	>= 0.172 mg/l, 21 D
鱼	最低可观察效应浓度（LOEC）	虹鳟鱼	320 mg/l, 60 D

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E 结果: 不容易生物降解
1-NAPHTHOL	> 77.8 % OECD 301 B 结果: 易生物降解 测试时间: 28 D
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OECD 301 B 结果: 不容易生物降解 测试时间: 29 D
2-AMINO-6-CHLORO-4-NITROPHENOL	0 % OECD 301 F 结果: 不容易生物降解 测试时间: 28 D
LAURETH-3	结果: 易生物降解
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14.3 % OECD 301B 结果: Not Readilby Biodegradable 测试时间: 28 D
OLEYL PHOSPHATE	26.1 % OECD 301 D 结果: 易生物降解 测试时间: 28 D
乙醇胺	> 90 % OECD 301 A 结果: 易生物降解 测试时间: 21 D
甲苯 -2,5-DIAMINE SULFATE	17 % OECD 301 D 结果: 不容易生物降解 测试时间: 28 D
间苯二酚	66.7 % OECD 301 C 结果: 易生物降解 测试时间: 14 D

潜在的生物累积性

辛醇/水分配系数 log Kow

1-NAPHTHOL	2.836 OECD 107
M-AMINOPHENOL	0.21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2.8
	-2.8 OECD 107
P-AMINOPHENOL	0.25
乙醇胺	-2.3 OECD 107
间苯二酚	0.8

生物积累性

1-NAPHTHOL	结果: Bioaccumulation is unlikely
P-AMINOPHENOL	结果: 不一定是生物积累性的。
乙醇胺	结果: 不一定是生物积累性的。

生物富集因子

P-AMINOPHENOL	10 - 46 OECD 305 C

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

国际航空运输协会(IATA)

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

国际海运危险货物规则(IMDG)

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

一般信息 IMDG 规定的海洋污染物。 交通运输部规定的海洋污染物。

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

氢氧化铵 (CAS 1336-21-6)	适用。
间苯二酚 (CAS 108-46-3)	适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

化学名称	登记号(CAS号)	% by wt.
氢氧化铵	1336-21-6	1.8

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

间苯二酚 (CAS 108-46-3) Low priority

16. 其他信息，包括编制日期或最新修订日期

最初编制日期 26-十一月-2020

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT PERMANENT COLOR - GROUP 6**

Other means of identification

SDS number 00-21-0000368

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards

Skin corrosion/irritation	Category 2
Serious eye damage/eye irritation	Category 1
Sensitization, skin	Category 1A

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage.

Precautionary statement

Prevention Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear eye protection/face protection. Wear protective gloves.

Response If on skin: Wash with plenty of water. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
LAURETH-3		68439-50-9	5
AMMONIUM HYDROXIDE		1336-21-6	1.8

Chemical name	Common name and synonyms	CAS number	%
2-AMINO-6-CHLORO-4-NITROPHENOL		6358-09-4	< 2
ETHANOLAMINE		141-43-5	< 2
OLEYL PHOSPHATE		37310-83-1	1.25
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
TOLUENE-2,5-DIAMINE SULFATE		615-50-9	< 1
P-AMINOPHENOL		123-30-8	< 1
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE		83763-48-8	< 0.6
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE		54381-16-7	< 0.6
M-AMINOPHENOL		591-27-5	< 0.6
1-NAPHTHOL		90-15-3	≤ 0.5
RESORCINOL		108-46-3	≤ 0.5

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation
Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact
Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion
Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed
Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Indication of immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions
Move containers from fire area if you can do so without risk.

Specific methods
Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards
No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

This material is classified as a water pollutant under the Clean Water Act and should be prevented from contaminating soil or from entering sewage and drainage systems which lead to waterways.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Do not get in eyes, on skin, or on clothing. Avoid breathing mist/vapors. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	PEL	35 mg/m3
		50 ppm
ETHANOLAMINE (CAS 141-43-5)	PEL	6 mg/m3
		3 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	6 ppm
	TWA	3 ppm
RESORCINOL (CAS 108-46-3)	STEL	20 ppm
	TWA	10 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	15 mg/m3
		6 ppm
	TWA	8 mg/m3
		3 ppm
RESORCINOL (CAS 108-46-3)	STEL	90 mg/m3

US. NIOSH: Pocket Guide to Chemical Hazards Components	Type	Value
		20 ppm
	TWA	45 mg/m3
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Form Cream.

Color Shaded

Odor Characteristic.

Odor threshold Not available.

pH 9.7 - 10.1

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction. Prolonged or repeated exposure may cause liver and kidney damage. These effects have not been observed in humans.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT PERMANENT COLOR - GROUP 6		
Acute		
Dermal		
ATEmix		65450 mg/kg
Oral		
ATEmix		11920 mg/kg

Components	Species	Test Results
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)

ETHANOLAMINE	Result: Not Sensitizing Species: Guinea pig
AMMONIUM HYDROXIDE	Result: Not Sensitzing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	Result: In vitro and in vivo tests did not show mutagenic effects.
ETHANOLAMINE	Result: In vitro and in vivo tests did show mutagenic effects
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Result: In vitro tests did not show mutagenic effects
AMMONIUM HYDROXIDE	Result: In vitro tests did not show mutagenic effects
LAURETH-3	Result: In vitro tests did not show mutagenic effects
OLEYL PHOSPHATE	Result: In vitro tests did not show mutagenic effects
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
M-AMINOPHENOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
RESORCINOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
TOLUENE-2,5-DIAMINE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
1-NAPHTHOL	Result: In vitro tests showed varied results. In vivo tests showed negative results.
P-AMINOPHENOL	Result: In vivo tests showed mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

RESORCINOL (CAS 108-46-3)	3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOLAMINE	>= 450 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	>= 50 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
TOLUENE-2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 Result: NOAEL Species: Mouse

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
2-AMINO-6-CHLORO-4-NITROPHENOL	30 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 13 weeks
ETHANOLAMINE	300 mg/kg bw/d OECD 416, Oral Result: NOAEL Species: Rat
RESORCINOL	80 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d 991 mg/m³ Result: NOAEC Species: Rat Test Duration: 14 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Chronic effects May be harmful if absorbed through skin.

Prolonged or repeated exposure may cause liver and kidney damage. These effects have not been observed in humans.

Further information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Aquatic

Bioconcentration factor (BCF)

P-AMINOPHENOL	10 - 46 OECD 305 C

Bioaccumulation

1-NAPHTHOL	Result: Bioaccumulation is unlikely
ETHANOLAMINE	Result: Bioaccumulation is unlikely.
P-AMINOPHENOL	Result: Bioaccumulation is unlikely.

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
Revision information	This document has undergone significant changes and should be reviewed in its entirety.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT PERMANENT COLOR - GROUP 6
Synonyms	None.
SDS number	00-21-0000368
Issue date	10-02-2020
Version number	02
Revision date	11-26-2020
Supersedes date	10-06-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Skin sensitization	Category 1A	H317 - May cause an allergic skin reaction.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye damage. Causes skin irritation. May cause an allergic skin reaction. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 1-NAPHTHOL, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE, 2-AMINO-6-CHLORO-4-NITROPHENOL, 2-METHYLRESORCINOL, AMMONIUM HYDROXIDE, BISABOLOL, ETHANOLAMINE, LAURETH-3, M-AMINOPHENOL, N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE, OLEYL PHOSPHATE, P-AMINOPHENOL, RESORCINOL, TOLUENE-2,5-DIAMINE SULFATE

Hazard pictograms

Signal word Danger

Hazard statements

H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P272	Contaminated work clothing should not be allowed out of the workplace.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.
P280	Wear protective gloves.

Response

P101	If medical advice is needed, have product container or label at hand.
P302 + P352	IF ON SKIN: Wash with plenty of water.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P333 + P313	If skin irritation or rash occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 2,27% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Do not breathe vapor. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	STEL	91 mg/m3
		20 ppm
	TWA	46 mg/m3
		10 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	VLE	14 mg/m3
Regulatory status: Regulatory binding (VRC)		
		20 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	7 mg/m3
Regulatory status: Regulatory binding (VRC)		
		10 ppm
Regulatory status: Regulatory binding (VRC)		
ETHANOLAMINE (CAS 141-43-5)	VLE	7,6 mg/m3
Regulatory status: Regulatory binding (VRC)		
		3 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	2,5 mg/m3
Regulatory status: Regulatory binding (VRC)		
		1 ppm
Regulatory status: Regulatory binding (VRC)		
RESORCINOL (CAS 108-46-3)	VME	45 mg/m3
Regulatory status: Regulatory indicative (VRI)		
		10 ppm
Regulatory status: Regulatory indicative (VRI)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
ETHANOLAMINE (CAS 141-43-5)	TWA	0,51 mg/m3	Vapor and aerosol.
		0,2 ppm	Vapor and aerosol.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
AMMONIUM HYDROXIDE (CAS 1336-21-6)	AGW	14 mg/m3	
		20 ppm	
ETHANOLAMINE (CAS 141-43-5)	AGW	0,5 mg/m3	Vapor and aerosol.
		0,2 ppm	Vapor and aerosol.
RESORCINOL (CAS 108-46-3)	AGW	20 mg/m3	Inhalable fraction.
		4 ppm	Inhalable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	28 mg/m3	
	TWA	14 mg/m3	
ETHANOLAMINE (CAS 141-43-5)	STEL	7,5 mg/m3	
	TWA	2,5 mg/m3	
P-AMINOPHENOL (CAS 123-30-8)	TWA	5 mg/m3	Inhalable fraction.
RESORCINOL (CAS 108-46-3)	STEL	90 mg/m3	
	TWA	45 mg/m3	

Spain. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,5 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	46 mg/m3
		10 ppm

EU. Indicative Exposure Limit Values in Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

Exposure guidelines

EU Exposure Limit Values: Skin designation

ETHANOLAMINE (CAS 141-43-5)	Can be absorbed through the skin.
RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

Slovenia. OELs. Regulations concerning protection of workers against risks due to exposure to chemicals while working (Official Gazette of the Republic of Slovenia)

ETHANOLAMINE (CAS 141-43-5)	Can be absorbed through the skin.
RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

Environmental exposure controls Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Characteristic.
Odor threshold	Not available.
pH	9,7 - 10,1
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

11.1. Information on toxicological effects

Acute toxicity	Not known.

Product	Species	Test Results

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	OECD 429 Result: Sensitizing Species: Mouse
RESORCINOL	OECD 429 Result: Sensitizing Species: Mouse
TOLUENE-2,5-DIAMINE SULFATE	OECD 429 Result: Sensitizing Species: Mouse
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	QSAR Result: Sensitizing
ETHANOLAMINE	Result: Not Sensitizing Species: Guinea pig
AMMONIUM HYDROXIDE	Result: Not Sensitzing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

COCAMIDOPROPYL BETAINE	Result: In vitro and in vivo tests did not show mutagenic effects.
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	Result: In vitro and in vivo tests did not show mutagenic effects.
ETHANOLAMINE	Result: In vitro and in vivo tests did show mutagenic effects
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Result: In vitro tests did not show mutagenic effects
AMMONIUM HYDROXIDE	Result: In vitro tests did not show mutagenic effects
BISABOLOL	Result: In vitro tests did not show mutagenic effects
LAURETH-3	Result: In vitro tests did not show mutagenic effects
OLEYL PHOSPHATE	Result: In vitro tests did not show mutagenic effects
2,4-DIAMINOPHENOXYETHANOL HCL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
2-METHYLRESORCINOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Mutagenicity

HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
M-AMINOPHENOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
RESORCINOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
TOLUENE-2,5-DIAMINE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
1-NAPHTHOL	Result: In vitro tests showed varied results. In vivo tests showed negative results.
P-AMINOPHENOL	Result: In vivo tests showed mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

RESORCINOL (CAS 108-46-3)	3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOLAMINE	>= 450 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	>= 50 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
TOLUENE-2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 Result: NOAEL Species: Mouse
M-AMINOPHENOL	100 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
2,4-DIAMINOPHENOXYETHANOL HCL	20 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
RESORCINOL	250 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

BISABOLOL	200 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat Test Duration: 4 weeks

Specific target organ toxicity - repeated exposure

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
2-AMINO-6-CHLORO-4-NITROPHENOL	30 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 13 weeks
COCAMIDOPROPYL BETAINE	300 mg/kg bw/d OECD 408, Oral Result: NOEL Species: Rat Test Duration: 90 d
ETHANOLAMINE	300 mg/kg bw/d OECD 416, Oral Result: NOAEL Species: Rat
RESORCINOL	80 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d 991 mg/m³ Result: NOAEC Species: Rat Test Duration: 14 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Aquatic			
Acute			
Algae		Pseudokirchneriella subcapitata	5,33 mg/l, 72 h EU C.3
Crustacea	EC50	Daphnia magna	11,12 mg/l, 48 h TG 202
Fish	LC50	Danio rerio	86,2 mg/l, 96 h EU C.1
1-NAPHTHOL (CAS 90-15-3)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 2,18 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	2,51 mg/l, 48 h
Fish	LC50	Pimephales promelas	4,24 mg/l, 96 h
Chronic			
Crustacea	NOEC	Daphnia magna	0,25 mg/l, 21 d OECD 211
2,4-DIAMINOPHENOXYETHANOL HCL (CAS 66422-95-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	36,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	7,4 mg/l, 48 h OECD 202
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE (CAS 83763-48-8)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0,733 mg/l, 72 h OECD 201
	NOEC	Pseudokirchneriella subcapitata	0,341 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	3 mg/l, 48 h OECD 202

Components		Species	Test Results
2-AMINO-6-CHLORO-4-NITROPHENOL (CAS 6358-09-4)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	82,4 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	5,17 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	> 100 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	281,5 mg/l, 3 h OECD 209
2-METHYLRESORCINOL (CAS 608-25-3)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	71 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,605 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	58,1 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	131 mg/l, 3 h OECD 209
AMMONIUM HYDROXIDE (CAS 1336-21-6)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2700 mg/l, 18 d
Crustacea	EC50	Daphnia magna	101 mg/l, 48 h ASTM E729-80
Fish	LC50	Oncorhynchus mykiss	0,89 mg/l, 96 h
Chronic			
Crustacea	NOEC	Daphnia magna	0,79 mg/l, 21 d
Fish	NOEC	Oncorhynchus mykiss	1,2 mg/l, 61 d OECD 210
BISABOLOL (CAS 72691-24-8)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	5,72 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia	1,3 mg/l, 48 h OECD 202
Fish	LC50	Leuciscus idus	6,81 mg/l, 96 h OECD 203

Other	EC50	Activated sludge of a predominantly domestic sewage	17,7 mg/l, 3 h OECD 209

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33,3 % EU C,4-E Result: Not readily biodegradable
1-NAPHTHOL	> 77,8 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 29 d
2-AMINO-6-CHLORO-4-NITROPHENOL	0 % OECD 301 F Result: Not Readily Biodegradable Test Duration: 28 d
2-METHYLRESORCINOL	64 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
BISABOLOL	70 - 80 % OECD 301 F Result: Readily Biodegradable Test Duration: 28 d
COCAMIDOPROPYL BETAINE	91,6 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
ETHANOLAMINE	> 90 % OECD 301 A Result: Readily Biodegradable Test Duration: 21 d
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	0 - 16 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 28 d
LAURETH-3	Result: Readily Biodegradable

Biodegradability

Percent degradation (Aerobic biodegradation)

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14,3 % OECD 301B Result: Not Readilby Biodegradable Test Duration: 28 d
OLEYL PHOSPHATE	26,1 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d
RESORCINOL	66,7 % OECD 301 C Result: Readily Biodegradable Test Duration: 14 d
TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

1-NAPHTHOL	2,836 OECD 107
COCAMIDOPROPYL BETAINE	4,2
ETHANOLAMINE	-2,3 OECD 107
M-AMINOPHENOL	0,21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2,8 -2,8 OECD 107
P-AMINOPHENOL	0,25
RESORCINOL	0,8

Bioconcentration factor (BCF)

COCAMIDOPROPYL BETAINE	71
P-AMINOPHENOL	10 - 46 OECD 305 C

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

Estonia Dangerous substances in groundwater Data

RESORCINOL (CAS 108-46-3)	RESORCINOL 0,5 UG/L RESORCINOL 50 UG/L

Estonia Dangerous substances in soil Data

RESORCINOL (CAS 108-46-3)	RESORCINOL 0,1 MG/KG RESORCINOL 1 MG/KG RESORCINOL 10 MG/KG

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.
General information	IMDG Regulated Marine Pollutant.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
AMMONIUM HYDROXIDE (CAS 1336-21-6)
M-AMINOPHENOL (CAS 591-27-5)
P-AMINOPHENOL (CAS 123-30-8)
RESORCINOL (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.

15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H301 Toxic if swallowed. H302 Harmful if swallowed. H311 Toxic in contact with skin. H312 Harmful in contact with skin. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H331 Toxic if inhaled. H332 Harmful if inhaled. H335 May cause respiratory irritation. H341 Suspected of causing genetic defects. H370 Causes damage to organs by ingestion. H371 May cause damage to organs by ingestion. H373 May cause damage to organs through prolonged or repeated exposure by ingestion. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	This document has undergone significant changes and should be reviewed in its entirety.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT PERMANENT COLOR - Groupe 6**

Autres moyens d'identification

Numéro de la FDS 00-21-0000368

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé

Corrosion cutanée/irritation cutanée	Catégorie 2
Lésions oculaires graves/irritation oculaire	Catégorie 1
Sensibilisation cutanée	Catégorie 1A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Provoque une irritation cutanée. Peut provoquer une allergie cutanée. Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Il ne faut pas que les vêtements de travail contaminés quittent le lieu de travail. Porter un équipement de protection des yeux/du visage. Porter des gants de protection.

Intervention En contact avec la peau : Laver avec beaucoup d'eau. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation ou d'éruption cutanée : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
LAURETH-3		68439-50-9	5
HYDROXYDE D'AMMONIUM		1336-21-6	1.8
2-AMINO-6-CHLORO-4-NITROPHÉNOL		6358-09-4	< 2
ÉTHANOLAMINE		141-43-5	< 2

1-NAPHTOL		90-15-3	≤ 0.5
RÉSORCINOL		108-46-3	≤ 0.5

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Enlever immédiatement les vêtements contaminés et laver la peau à l'eau et au savon. En cas d'eczéma ou d'autres problèmes cutanés : consulter un médecin et apporter cette fiche. Laver les vêtements contaminés avant réutilisation.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.
Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence

Tenir à l'écart le personnel non requis. Tenir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Éviter de respirer les brouillards/vapeurs. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Ce produit est classé comme un polluant de l'eau en vertu de la Loi sur la qualité de l'eau (Clean Water Act) et ne doit pas contaminer les sols ni pénétrer dans les systèmes d'égouts et d'évacuation qui se déversent dans les cours d'eau.

Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Éviter tout contact avec les yeux, la peau ou les vêtements. Éviter de respirer les brouillards/vapeurs. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	PEL (limite d'exposition admissible)	6 mg/m3
		3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	PEL (limite d'exposition admissible)	35 mg/m3
		50 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	STEL	6 ppm
	TWA	3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm
RÉSORCINOL (CAS 108-46-3)	STEL	20 ppm
	TWA	10 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	STEL	15 mg/m3
		6 ppm
	TWA	8 mg/m3
		3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm
RÉSORCINOL (CAS 108-46-3)	STEL	90 mg/m3
		20 ppm
	TWA	45 mg/m3
		10 ppm

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial. Un écran facial est recommandé.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques Il est recommandé d'utiliser un tablier imperméable.

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Crème.

Couleur Nuancé

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH 9.7 - 10.1

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 100 °C (> 212 °F)

Point d'éclair > 100.0 °C (> 212.0 °F) Coupelle fermée

Taux d’évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d’inflammabilité ou d’explosibilité	
Limites d’inflammabilité - inférieure (%)	Non disponible.
Limites d’inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d’auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d’utilisation, d’entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d’utilisation.
Conditions à éviter	Tenir à l’écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d’ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée. Peut provoquer une allergie cutanée. L'exposition répétée ou prolongée peut causer des lésions aux reins et au foie. Ces effets n'ont pas été observés chez l'humain.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d’ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

OLEYL PHOSPHATE	OECD 438 Résultat: Corrosif Espèces: In vitro
2-AMINO-6-CHLORO-4-NITROPHÉNOL	OECD 438 Résultat: Irritant Espèces: ICE
TOLUÈNE -2,5-DIAMINE SULFATE	OECD 438 Résultat: Irritant Espèces: ICE
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	OECD 438 Résultat: Irritant Espèces: In vitro
HYDROXYDE D'AMMONIUM	Résultat: Corrosif

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n’est pas possible en raison d’un manque partiel ou total de données.

Sensibilisation cutanée Peut provoquer une allergie cutanée.

Sensibilisation cutanée

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	EU Method B.6 - Chat 1 Résultat: Sensibilisant Espèces: Cobaye
p-Aminophénol	OCDE 406 Résultat: Sensibilisant Espèces: Cobaye
OLEYL PHOSPHATE	OCDE 429 Résultat: Non Sensibilisant Espèces: Souris
1-NAPHTOL	OCDE 429 Résultat: Sensibilisant Espèces: Souris
2-AMINO-6-CHLORO-4-NITROPHÉNOL	OCDE 429 Résultat: Sensibilisant Espèces: Souris
M-AMINOPHÉNOL	OCDE 429 Résultat: Sensibilisant Espèces: Souris
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	OCDE 429 Résultat: Sensibilisant Espèces: Souris
RÉSORCINOL	OCDE 429 Résultat: Sensibilisant Espèces: Souris
TOLUÈNE -2,5-DIAMINE SULFATE	OCDE 429 Résultat: Sensibilisant Espèces: Souris
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	QSAR Résultat: Sensibilisant
ÉTHANOLAMINE	Résultat: Non Sensibilisant Espèces: Cobaye
HYDROXYDE D'AMMONIUM	Résultat: Not Sensitzing Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n’est pas possible en raison d’un manque partiel ou total de données.

Mutagénicité

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	Résultat: Des essais in vitro et in vivo n’ont pas montré d’effets mutagènes.
ÉTHANOLAMINE	Résultat: In vitro and in vivo tests did show mutagenic effects
1-NAPHTOL	Résultat: In vitro tests showed varied results. In vivo tests showed negative results.

Mutagénicité

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
HYDROXYDE D'AMMONIUM	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
LAURETH-3	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
OLEYL PHOSPHATE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
M-AMINOPHÉNOL	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
RÉSORCINOL	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
TOLUÈNE -2,5-DIAMINE SULFATE	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
p-Aminophénol	Résultat: Les tests in vivo ont montré des effets mutagènes

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

RÉSORCINOL (CAS 108-46-3)	3 Inclassable quant à sa cancérogénicité pour l'homme.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets sur le développement

ÉTHANOLAMINE	>= 450 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	>= 50 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
TOLUÈNE -2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Souris
M-AMINOPHÉNOL	100 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
p-Aminophénol	100 mg/kg bw/d OCDE 421 Résultat: DSENO Espèces: Rat
RÉSORCINOL	250 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	30 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
1-NAPHTOL	400 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
2-AMINO-6-CHLORO-4-NITROPHÉNOL	90 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat

Reproductivité

TOLUÈNE -2,5-DIAMINE SULFATE	>= 45 mg/kg bw/d OCDE 416 Résultat: DSENO Espèces: Rat
p-Aminophénol	100 mg/kg bw/d OCDE 421 Résultat: DSENO Espèces: Rat
OLEYL PHOSPHATE	1000 mg/kg bw/d OCDE 412 Résultat: NOEAL Espèces: Rat

Reproductivité

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
RÉSORCINOL	245 mg/kg bw/d OCDE 416 Résultat: DSENO Espèces: Rat
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OCDE 415 Espèces: Rat
ÉTHANOLAMINE	300 mg/kg bw/d OCDE 416 Résultat: DSENO Espèces: Rat
1-NAPHTOL	Résultat: Aucune donnée

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

1-NAPHTOL	Résultat: Irritant
HYDROXYDE D'AMMONIUM	Résultat: Très irritant

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

p-Aminophénol	10 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
TOLUÈNE -2,5-DIAMINE SULFATE	10 mg/kg bw/d OCDE 408, orale Résultat: DSENO Espèces: Rat Durée du test: 90 d
OLEYL PHOSPHATE	1000 mg/kg bw/d OCDE 407 Résultat: DSENO Espèces: Rat Durée du test: 27 d
1-NAPHTOL	130 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	15 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 108 d
ÉTHANOLAMINE	150 mg/m3 air OCDE 412, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 28 d
M-AMINOPHÉNOL	20 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d
2-AMINO-6-CHLORO-4-NITROPHÉNOL	30 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 13 semaines
ÉTHANOLAMINE	300 mg/kg bw/d OCDE 416, Orale Résultat: DSENO Espèces: Rat
RÉSORCINOL	80 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d

Toxicité pour certains organes cibles - expositions répétées

RÉSORCINOL — 991 mg/m³
Résultat: CSENO
Espèces: Rat
Durée du test: 14 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets chroniques Peut être nocif en cas d'absorption par la peau.

L'exposition répétée ou prolongée peut causer des lésions aux reins et au foie. Ces effets n'ont pas été observés chez l'humain.

Autres informations Peut provoquer des allergies respiratoires et cutanées. La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Aquatique			
Aiguë			
Algues		Pseudokirchneriella subcapitata	5.33 mg/l, 72 h EU C.3
Crustacés	CE50	Daphnia magna	11.12 mg/l, 48 h TG 202
Poisson	CL50	Danio rerio	86.2 mg/l, 96 h EU C.1
1-NAPHTOL (CAS 90-15-3)			
Aquatique			
Aiguë			
Algues	CE50	Pseudokirchneriella subcapitata	> 2.18 mg/l, 72 h OCDE 201
Crustacés	CE50	Daphnia magna	2.51 mg/l, 48 h
Poisson	CL50	Pimephales promelas	4.24 mg/l, 96 h
Chronique			
Crustacés	NOEC (concentration sans effet observé)	Daphnia magna	0.25 mg/l, 21 d OECD 211
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE (CAS 83763-48-8)			
Aquatique			
Aiguë			
Algues	CE50	Pseudokirchneriella subcapitata	0.733 mg/l, 72 h OCDE 201
	NOEC (concentration sans effet observé)	Pseudokirchneriella subcapitata	0.341 mg/l, 72 h OCDE 201
Crustacés	CE50	Daphnia magna	3 mg/l, 48 h OCDE 202
2-AMINO-6-CHLORO-4-NITROPHÉNOL (CAS 6358-09-4)			
Aquatique			
Aiguë			
Algues	CE50	Pseudokirchneriella subcapitata	82.4 mg/l, 72 h OCDE 201
Autre	CE50	Boues activées d'eaux usées d'origine principalement domestique	281.5 mg/l, 3 h OCDE 209
Crustacés	CE50	Daphnia magna	5.17 mg/l, 48 h OCDE 202
Poisson	CL50	Danio rerio	> 100 mg/l, 96 h OCDE 203

Composants		Espèces	Résultats d'épreuves
ÉTHANOLAMINE (CAS 141-43-5)			
Aquatique			
Aiguë

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E Résultat: Difficilement Biodégradable
1-NAPHTOL	> 77.8 % OCDE 301 B Résultat: Facilement Biodegradable Durée du test: 28 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OCDE 301 B Résultat: Difficilement Biodégradable Durée du test: 29 d
2-AMINO-6-CHLORO-4-NITROPHÉNOL	0 % OECD 301 F Résultat: Difficilement Biodégradable Durée du test: 28 d
ÉTHANOLAMINE	> 90 % OCDE 301 A Résultat: Facilement Biodegradable Durée du test: 21 d
LAURETH-3	Résultat: Facilement Biodegradable
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14.3 % OECD 301B Résultat: Not Readilby Biodegradable Durée du test: 28 d
OLEYL PHOSPHATE	26.1 % OECD 301 D Résultat: Facilement Biodegradable Durée du test: 28 d
RÉSORCINOL	66.7 % OCDE 301 C Résultat: Facilement Biodegradable Durée du test: 14 d
TOLUÈNE -2,5-DIAMINE SULFATE	17 % OECD 301 D Résultat: Difficilement Biodégradable Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

1-NAPHTOL	2.836 OECD 107
ÉTHANOLAMINE	-2.3 OECD 107
M-AMINOPHÉNOL	0.21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2.8 -2.8 OECD 107

Log Koe du coefficient de répartition octanol/eau

p-Aminophénol	0.25
RÉSORCINOL	0.8

Facteur de bioconcentration

p-Aminophénol	10 - 46 OECD 305 C

Bioaccumulation

1-NAPHTOL	Résultat: Bioaccumulation is unlikely
ÉTHANOLAMINE	Résultat: Une bioaccumulation est peu probable.
p-Aminophénol	Résultat: Une bioaccumulation est peu probable.

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

Informations générales Polluant marin réglementé par l'IMDG. Polluant marin réglementé par le DOT.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	Inscrit.
RÉSORCINOL (CAS 108-46-3)	Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Dénomination chimique	Numéro d'enregistreme	% en poids.
HYDROXYDE D'AMMONIUM	1336-21-6	1.8

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

RÉSORCINOL (CAS 108-46-3) Faible priorité

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	02-Octobre-2020
Date de la révision	26-Novembre-2020
Version n°	02
Classements NFPA	Santé: 3 Inflammabilité: 1 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.
Informations relatives à la révision	Des modifications importantes ont été apportées à ce document et il devrait donc être relu entièrement.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT PERMANENT COLOR - GRUPPO 6
Sinonimi	Nessuno.
Numero SDS	00-21-0000368
Data di pubblicazione	10-Settembre-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli per la salute

Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.
Sensibilizzazione cutanea	Categoria 1A	H317 - Può provocare una reazione allergica cutanea.

Pericoli per l'ambiente

Pericoloso per l'ambiente acquatico, pericolo acquatico a lungo termine	Categoria 3	H412 - Nocivo per gli organismi acquatici con effetti di lunga durata.

Riepilogo dei pericoli Provoca gravi lesioni oculari. Provoca irritazione cutanea. Può provocare una reazione allergica cutanea. Pericoloso per l'ambiente se scaricato nei corsi d'acqua. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 1-NAFTOLO, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE, 2-AMINO-6-CHLORO-4-NITROFENOLO, 2-METHYLRESORCINOL, 4-Aminofenolo, AMMONIACA .... %, BISABOLOL, ETANOLAMINA, LAURETH-3, M-AMINOFENOLO, N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE, OLEYL PHOSPHATE, RESORCINOLO, TOLUENE-2,5-DIAMINE SULFATE

Pittogrammi di pericolo

Avvertenza Pericolo

Indicazioni di pericolo

H315	Provoca irritazione cutanea.
H317	Può provocare una reazione allergica cutanea.
H318	Provoca gravi lesioni oculari.
H412	Nocivo per gli organismi acquatici con effetti di lunga durata.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P260	Non respirare il vapore.
P264	Lavare attentamente dopo l'uso.
P272	Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
P273	Non disperdere nell'ambiente.
P280	Proteggere gli occhi.
P280	Indossare guanti protettivi.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P302 + P352	IN CASO DI CONTATTO CON LA PELLE: lavare abbondantemente con acqua.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P333 + P313	In caso di irritazione o eruzione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.

Immagazzinamento Conservare lontano da materiali non compatibili.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette La miscela contiene il 2,27 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi.
Lavare gli indumenti contaminati prima di indossarli nuovamente.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea Togliere immediatamente gli indumenti contaminati e lavare la pelle con acqua e sapone. In caso di eczema o altri disturbi alla pelle: consultare un medico e portare con sé queste istruzioni. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio Non sono indicati rischi d'incendio o di esplosione particolari.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO_2).

Mezzi di estinzione non idonei Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi In caso d'incendio indossare autorespiratore e indumenti protettivi completi.

Procedure speciali per l'estinzione degli incendi Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.

Metodi specifici Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Prevedere una ventilazione adeguata. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.

Per chi interviene direttamente Allontanare il personale non necessario. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS

6.2. Precauzioni ambientali

Non disperdere nell'ambiente. Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente. Evitare sversamenti o perdite supplementari, se questo può essere fatto senza pericolo. Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.

6.3. Metodi e materiali per il contenimento e per la bonifica

Non scaricare il prodotto nelle fogne.

Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Assorbire in vermiculite, sabbia o terra asciutta e riporre in contenitori. Una volta recuperato il prodotto, sciacquare l'area con acqua.

Versamenti di piccole dimensioni: Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua.

Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo

6.4. Riferimento ad altre sezioni

Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura

Non respirare il vapore. Non permettere che questo materiale vada a contatto con gli occhi. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Garantire una ventilazione adeguata. Indossare attrezzature di protezione personale adeguate. Non disperdere nell'ambiente. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità

Conservare in un recipiente ermeticamente chiuso. Conservare fuori della portata dei bambini. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari

Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
ETANOLAMINA (CAS 141-43-5)	8 ore	2,5 mg/m3
		1 ppm
	Breve termine	7,6 mg/m3
		3 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite d'esposizione indicativi dell'UE in Direttive 91/322/CEE, 2000/39/CE, 2006/15/CE, 2009/161/UE

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
ETANOLAMINA (CAS 141-43-5)	8 ore	2,5 mg/m3
		1 ppm
	Breve termine	7,6 mg/m3
		3 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite biologici

Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate	Seguire le procedure standard di monitoraggio.
Livelli derivati senza effetto (DNEL)	Non conosciuto.
Prevedibili concentrazioni prive di effetti (PNEC)	Non conosciuto.

Linee guida sull'esposizione

OEL Italia: Specifica cutanea

ETANOLAMINA (CAS 141-43-5)	Assorbimento attraverso la pelle
RESORCINOLO (CAS 108-46-3)	Assorbimento attraverso la pelle

8.2. Controlli dell'esposizione

Controlli tecnici idonei	È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali	Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.
Protezione degli occhi/del volto	Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura). Si raccomanda l'uso di una visiera protettiva.
Protezione della pelle	
- Protezione delle mani	Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.
- Altro	Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici. Si consiglia di utilizzare un grembiule impenetrabile.
Protezione respiratoria	Applicabile soltanto per gli impianti industriali. In caso di ventilazione insufficiente, usare un apparecchio respiratorio adatto.
Pericoli termici	Indossare opportuni indumenti termoprotettivi, quando necessario.
Misure d'igiene	Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti. Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
Controlli dell'esposizione ambientale	Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto	
Stato fisico	Liquido.
Forma	Panna.
Colore	Shaded
Odore	Caratteristico/a.
Soglia olfattiva	Non conosciuto.
pH	9,7 - 10,1
Punto di fusione/punto di congelamento	Non conosciuto.
Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	> 100,0 °C (> 212,0 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.

Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	Non sono disponibili informazioni supplementari pertinenti.

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Forti agenti ossidanti.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.
Informazioni sulle vie probabili di esposizione	
Inalazione	L'inalazione prolungata può essere nociva.
Cutanea	Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca gravi lesioni oculari.
Ingestione	In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.
Sintomi	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta Non conosciuto.

Biodegradabilità

Percentuale di degradazione (biodegradazione aerobica)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33,3 % EU C,4-E Risultato: Not readily biodegradable
1-NAFTOLO	> 77,8 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OECD 301 B Risultato: Not Readily Biodegradable Durata del test: 29 d
2-AMINO-6-CHLORO-4-NITROFENOLO	0 % OECD 301 F Risultato: Not Readily Biodegradable Durata del test: 28 d
2-METHYLRESORCINOL	64 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
BISABOLOL	70 - 80 % OECD 301 F Risultato: Rapidamente biodegradabile Durata del test: 28 d
COCAMIDOPROPYL BETAINE	91,6 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
ETANOLAMINA	> 90 % OECD 301 A Risultato: Rapidamente biodegradabile Durata del test: 21 d
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	0 - 16 % OECD 301 B Risultato: Not Readily Biodegradable Durata del test: 28 d
LAURETH-3	Risultato: Rapidamente biodegradabile
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14,3 % OECD 301B Risultato: Not Readilby Biodegradable Durata del test: 28 d
OLEYL PHOSPHATE	26,1 % OECD 301 D Risultato: Rapidamente biodegradabile Durata del test: 28 d
RESORCINOLO	66,7 % OECD 301 C Risultato: Rapidamente biodegradabile Durata del test: 14 d
TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Risultato: Not Readily Biodegradable Durata del test: 28 d

12.3. Potenziale di bioaccumulo

Coefficiente di partizione n-ottanolo/acqua (log Kow)

1-NAFTOLO	2,836 OECD 107

4-Aminofenolo	0,25
COCAMIDOPROPYL BETAINE	4,2
ETANOLAMINA	-2,3 OECD 107
HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL	0,412, OECD 117
M-AMINOFENOLO	0,21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2,8
	-2,8 OECD 107
RESORCINOLO	0,8

Fattore di bioconcentrazione (BCF)

4-Aminofenolo	10 - 46 OECD 305 C
COCAMIDOPROPYL BETAINE	71

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.

12.7. Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).

Imballaggi contaminati Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.

Codice Europeo dei Rifiuti Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.

Metodi di smaltimento/informazioni Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Impedire a questo prodotto di penetrare nelle fogne e nelle riserve d'acqua. Non contaminare stagni, canali o fossati con il prodotto chimico o il contenitore usato. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Precauzioni particolari Smaltire secondo le norme applicabili.

SEZIONE 14: Informazioni sul trasporto

ADR

FINISHED GOODS

14.1. - 14.6.: Non è regolamentato come merci pericolose.

BULK

14.1. - 14.6.: Non è regolamentato come merci pericolose.

IATA

FINISHED GOODS

14.1. - 14.6.: Non è regolamentato come merci pericolose.

FINISHED GOODS

14.1. - 14.6.: Non è regolamentato come merci pericolose.

BULK

14.1. - 14.6.: Non è regolamentato come merci pericolose.

14.7. Trasporto di rinfuse secondo l'allegato II di MARPOL ed il codice IBC Non stabilito.

Informazioni generali Inquinante Marino Regolato (IMDG).

SEZIONE 15: Informazioni sulla regolamentazione

15.1. Disposizioni legislative e regolamentari su salute, sicurezza e ambiente specifiche per la sostanza o la miscela

Regolamenti UE

Regolamento (CE) n. 1005/2009 sulle sostanze che riducono lo strato di ozono, Allegato I e II e successive modifiche

Non listato.

Regolamento (CE) n. 850/2004 relativo agli inquinanti organici persistenti, Allegato I e successivi adeguamenti

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 1 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 2 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 3 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato V e successive modifiche

Non listato.

Regolamento (CE) n. 166/2006 Allegato II Registro delle emissioni e dei trasferimenti di sostanze inquinanti e successive modifiche

Non listato.

Regolamento (CE) n. 1907/2006, REACH, Articolo 59(10), Elenco di sostanze candidate così come attualmente pubblicato dall'Agenzia europea per le sostanze chimiche (ECHA)

Non listato.

Autorizzazioni

Regolamento (CE) n. 1907/2006, REACH Allegato XIV - Sostanze soggette ad autorizzazione, modificata

Non listato.

Restrizioni d'uso

Regolamento (CE) n. 1907/2006, REACH Allegato XVII, Sostanze soggette a restrizioni in materia di immissione sul mercato e di uso e successivi adeguamenti

Non listato.

Direttiva 2004/37/CE: sulla protezione dei lavoratori contro i rischi derivanti da un'esposizione ad agenti cancerogeni e mutageni durante il lavoro e successive modifiche

Non listato.

Altri regolamenti UE

Direttiva 2012/18/UE sugli incidenti rilevanti connessi con determinate sostanze pericolose e successive modifiche

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
4-Aminofenolo (CAS 123-30-8)
AMMONIACA .... % (CAS 1336-21-6)
M-AMINOFENOLO (CAS 591-27-5)
RESORCINOLO (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H301 Tossico se ingerito. H302 Nocivo se ingerito. H311 Tossico per contatto con la pelle. H312 Nocivo per contatto con la pelle. H314 Provoca gravi ustioni cutanee e gravi lesioni oculari. H315 Provoca irritazione cutanea.

H317 Può provocare una reazione allergica cutanea.
H318 Provoca gravi lesioni oculari.
H319 Provoca grave irritazione oculare.
H331 Tossico se inalato.
H332 Nocivo se inalato.
H335 Può irritare le vie respiratorie.
H341 Sospettato di provocare alterazioni genetiche.
H370 Provoca danni agli organi per ingestione.
H371 Può provocare danni agli organi per ingestione.
H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta per ingestione.
H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta.
H400 Molto tossico per gli organismi acquatici.
H410 Molto tossico per gli organismi acquatici con effetti di lunga durata.
H411 Tossico per gli organismi acquatici con effetti di lunga durata.
H412 Nocivo per gli organismi acquatici con effetti di lunga durata.

Informazioni di revisione

Prodotto e la Società Identificazione: Tipi di materiale
COMPOSIZIONE/INFORMAZIONI SUGLI INGREDIENTI: Ingredienti
Proprietà fisiche e chimiche: Proprietà multiple
GHS: Classificazione

Informazioni formative

Seguire le istruzioni di formazione durante la manipolazione di questo materiale.

Clausole di esclusione della responsabilità

Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT PERMANENT COLOR - 组 6

鉴别的其他方法

SDS编号 00-21-0000368

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害

皮肤腐蚀/刺激	类别 2
严重眼睛损伤/眼睛刺激性	类别 1
皮肤过敏	类别 1A

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 造成皮肤刺激。 可能造成皮肤过敏反应。 造成严重眼损伤。

防范说明

预防措施 作业后彻底清洗。 受沾染的工作服不得带出工作场地。 戴防护眼罩/防护面具。 戴防护手套。

事故响应 如皮肤沾染：用大量水清洗。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。 如发生皮肤刺激或皮疹：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。

安全储存 远离禁忌物保存。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
LAURETH-3		68439-50-9	5
氢氧化铵		1336-21-6	1.8
2-AMINO-6-CHLORO-4-NITROPHENOL		6358-09-4	< 2
乙醇胺		141-43-5	< 2

化学名称	通用名称和别名	登记号(CAS号)	%
OLEYL PHOSPHATE		37310-83-1	1.25
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
甲苯 -2,5-DIAMINE SULFATE		615-50-9	< 1
P-AMINOPHENOL		123-30-8	< 1
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE		83763-48-8	< 0.6
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE		54381-16-7	< 0.6
M-AMINOPHENOL		591-27-5	< 0.6
1-NAPHTHOL		90-15-3	≤ 0.5
间苯二酚		108-46-3	≤ 0.5

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入
移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触
立即脱掉受污染的衣服，用肥皂水冲洗皮肤。 若出现湿疹或其它皮肤疾病：就医治疗，并带上本说明书。 沾染的衣服清洗后方可重新使用。

眼睛接触
立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即就医。

经口
漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性
严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

指明任何需要立即就医或特殊治疗的情况
提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息
务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。
沾染的衣服清洗后方可重新使用。

5. 消防措施

合适的灭火剂
水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质
禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害
燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施
发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明
在不会发生危险的情况下将容器撤离火灾现场。

特定的方法
采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险
无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序
让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 Avoid breathing mist/vapors. 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料
根据水净化法，这种材料被分类为水污染物，应防止污染土壤，或防止进入下水道及流至水路的排水系统。

大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施
防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项
严防进入眼中、接触皮肤或衣服。 Avoid breathing mist/vapors. 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物
储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	PEL-常期暴露极限	6 mg/m3
		3 ppm
氢氧化铵 (CAS 1336-21-6)	PEL-常期暴露极限	35 mg/m3
		50 ppm

美国ACGIH阈限值

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	TWA	3 ppm
	短期暴露极限（STEL）	6 ppm
氢氧化铵 (CAS 1336-21-6)	TWA	25 ppm
	短期暴露极限（STEL）	35 ppm
间苯二酚 (CAS 108-46-3)	TWA	10 ppm
	短期暴露极限（STEL）	20 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	TWA	8 mg/m3
		3 ppm
	短期暴露极限（STEL）	15 mg/m3
		6 ppm
氢氧化铵 (CAS 1336-21-6)	TWA	18 mg/m3
		25 ppm
	短期暴露极限（STEL）	27 mg/m3
		35 ppm
间苯二酚 (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm
	短期暴露极限（STEL）	90 mg/m3
		20 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼和安全淋浴设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 佩戴带侧边的安全眼镜（护目镜）和面罩。 建议穿戴面罩。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。 建议使用不渗透的围裙。

呼吸系统防护 仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。 受沾染的工作服不得带出工作场地。

9. 理化特性

外观

性状	液体。
形状	奶油。
颜色	有色
气味	特征的。
气味阈值	无资料。
pH 值	9.7 - 10.1
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	造成皮肤刺激。 可能造成皮肤过敏反应。 长时间或是重复暴露可能导致肝脏和肾损伤。 这些影响在人体尚未被观察到。
眼睛接触	造成严重眼损伤。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

P-AMINOPHENOL	结果: 轻微刺激性 物种: 兔子

严重眼睛损伤/眼睛刺激性 造成严重眼损伤。

刺激性腐蚀性 - 眼睛

P-AMINOPHENOL	EPA OPPTS 870.2400 结果: 轻微刺激性 物种: 兔子
间苯二酚	FHLS Act, (100%) 结果: 腐蚀性的 物种: 兔子
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	OECD 405 结果: 腐蚀性的 物种: 兔子
LAURETH-3	OECD 405 结果: 腐蚀性的 物种: 兔子
乙醇胺	OECD 405 结果: 腐蚀性的 物种: 兔子
M-AMINOPHENOL	OECD 405 结果: 非刺激性 物种: 兔子
间苯二酚	OECD 405, (2.5%) 结果: 非刺激性 物种: 兔子
2-AMINO-6-CHLORO-4-NITROPHENOL	OECD 438 结果: 刺激性的 物种: ICE

刺激性腐蚀性 - 眼睛

甲苯 -2,5-DIAMINE SULFATE	OECD 438 结果: 刺激性的 物种: ICE
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	OECD 438 结果: 刺激性的 物种: 在試管內
1-NAPHTHOL	OECD 438 结果: 腐蚀性的 物种: 在試管內
OLEYL PHOSPHATE	OECD 438 结果: 腐蚀性的 物种: 在試管內
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	OECD 492 结果: 刺激性的 物种: RhCE
氢氧化铵	结果: 腐蚀性的

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 可能造成皮肤过敏反应。

皮肤致敏物

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	EU Method B.6 - 催化剂 1 结果: 致敏 物种: 豚鼠
P-AMINOPHENOL	OECD 406 结果: 致敏 物种: 豚鼠
OLEYL PHOSPHATE	OECD 429 结果: Not Sensitizing 物种: 小鼠
1-NAPHTHOL	OECD 429 结果: 致敏 物种: 小鼠
2-AMINO-6-CHLORO-4-NITROPHENOL	OECD 429 结果: 致敏 物种: 小鼠
M-AMINOPHENOL	OECD 429 结果: 致敏 物种: 小鼠
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	OECD 429 结果: 致敏 物种: 小鼠
甲苯 -2,5-DIAMINE SULFATE	OECD 429 结果: 致敏 物种: 小鼠
间苯二酚	OECD 429 结果: 致敏 物种: 小鼠
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	QSAR 结果: 致敏
乙醇胺	结果: Not Sensitizing 物种: 豚鼠
氢氧化铵	结果: Not Sensitzing 物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

乙醇胺	结果: In vitro and in vivo tests did show mutagenic effects
1-NAPHTHOL	结果: In vitro tests showed varied results. In vivo tests showed negative results.
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	结果: 体外和体内试验均未见致突变作用。
P-AMINOPHENOL	结果: 活体试验表明有诱变效应
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	结果: 离体试验未见诱变效应
LAURETH-3	结果: 离体试验未见诱变效应

突变性

OLEYL PHOSPHATE	结果: 离体试验未见诱变效应
氢氧化铵	结果: 离体试验未见诱变效应
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
M-AMINOPHENOL	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
甲苯 -2,5-DIAMINE SULFATE	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
间苯二酚	结果: 离体试验表明有在活体试验中未观察到的诱变效应。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

间苯二酚 (CAS 108-46-3)	3 尚不能确定对人有致癌作用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

乙醇胺	>= 450 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	>= 50 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
甲苯 -2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 小鼠
M-AMINOPHENOL	100 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
间苯二酚	250 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	30 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
1-NAPHTHOL	400 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
2-AMINO-6-CHLORO-4-NITROPHENOL	90 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

甲苯 -2,5-DIAMINE SULFATE	>= 45 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 412 结果: NOEAL 物种: 大鼠
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
间苯二酚	245 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OECD 415 物种: 大鼠
乙醇胺	300 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

1-NAPHTHOL	结果: 无数据

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

1-NAPHTHOL	结果: 刺激性的
氢氧化铵	结果: 高刺激性

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

P-AMINOPHENOL	10 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
甲苯 -2,5-DIAMINE SULFATE	10 mg/kg bw/d OECD 408, 口服 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 27 D
1-NAPHTHOL	130 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	15 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 108 D
乙醇胺	150 mg/m3 空气 OECD 412, 吸入 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 28 D
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
2-AMINO-6-CHLORO-4-NITROPHENOL	30 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 13 星期
乙醇胺	300 mg/kg bw/d OECD 416, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
间苯二酚	80 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D 991 mg/m³ 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 14 D

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

慢性影响 如通过皮肤吸收可能有害.

长时间或是重复暴露可能导致肝脏和肾损伤。 这些影响在人体尚未被观察到。

更多信息 可能造成皮肤和呼吸过敏性反应。 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性

产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	11.12 mg/l, 48 h TG 202
藻类		近头状伪蹄形藻	5.33 mg/l, 72 h EU C.3
鱼	LC50	斑马鱼 (Danio rerio)	86.2 mg/l, 96 h EU C.1
1-NAPHTHOL (CAS 90-15-3)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	2.51 mg/l, 48 h
藻类	EC50	近头状伪蹄形藻	> 2.18 mg/l, 72 h OECD 201
鱼	LC50	呆鲦鱼	4.24 mg/l, 96 h
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.25 mg/l, 21 D OECD 211
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE (CAS 83763-48-8)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	3 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	0.733 mg/l, 72 h OECD 201
	无明显反应浓度（NOEC）	近头状伪蹄形藻	0.341 mg/l, 72 h OECD 201
2-AMINO-6-CHLORO-4-NITROPHENOL (CAS 6358-09-4)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	281.5 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	5.17 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	82.4 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	> 100 mg/l, 96 h OECD 203
LAURETH-3 (CAS 68439-50-9)			
水生的			
急性的			
其它的, 其它	EC0	恶臭假单胞菌	> 100 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	1 - 10 mg/l, 48 h OECD 202
藻类	EC50	Desmodesmus subspicatus	1 - 10 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	1 - 10 mg/l, 96 h ISO 7346-2
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	<= 1 mg/l, 21 D
M-AMINOPHENOL (CAS 591-27-5)			
急性的			
其它的, 其它	IC50	Tetrahymena pyriformis	361 mg/l, 40 h
水生的			
急性的			
甲壳纲动物	EC50	水蚤	1.1 mg/l, 48 h DIN38412, Pt. 11
藻类	EC50	近头状伪蹄形藻	62 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	82.64 mg/l, 96 h OECD 203

组分		物种	试验结果
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.05 mg/l, 21 D OECD 211
鱼	无明显反应浓度（NOEC）	Oryzias latipes	25 mg/l, 25 D OECD 204
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE (CAS 54381-16-7)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	228 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.381 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	0.338 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	> 235 mg/l, 96 h
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.674 mg/l, 21 D OECD 211
OLEYL PHOSPHATE (CAS 37310-83-1)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	318.56 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	> 100 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	> 100 mg/l, 72 h OECD 201
	无明显反应浓度（NOEC）	近头状伪蹄形藻	100 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	> 100 mg/l, 96 h OECD 203
P-AMINOPHENOL (CAS 123-30-8)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	29.9 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.182 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	> 0.253 mg/l, 72 h OECD 201
鱼	LC50	Oryzias latipes	0.82 mg/l, 96 h OECD 203
乙醇胺 (CAS 141-43-5)			
水生的			
急性的			
其它的, 其它	EC10	以国内污水为主的活性污泥	> 1000 mg/l, 30 最小 OECD 209
甲壳纲动物	EC50	水蚤	65 mg/l, 48 h EU C.2
藻类	EC50	近头状伪蹄形藻	2.8 mg/l, 72 h OECD 201
鱼	LC50	鲤鱼	349 mg/l, 96 h EU C.1
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.85 mg/l, 21 D OECD 211
鱼	无明显反应浓度（NOEC）	Oryzias latipes	1.24 mg/l, 41 D OECD 210
氢氧化铵 (CAS 1336-21-6)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	101 mg/l, 48 h ASTM E729-80
藻类	EC50	普通小球藻	2700 mg/l, 18 D
鱼	LC50	虹鳟鱼	0.89 mg/l, 96 h

组分		物种	试验结果
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.79 mg/l, 21 D
鱼	无明显反应浓度（NOEC）	虹鳟鱼	1.2 mg/l, 61 D OECD 210
甲苯 -2,5-DIAMINE SULFATE (CAS 615-50-9)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	17.7 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.82 mg/l, 48 h OECD 202
	无明显反应浓度（NOEC）	水蚤	0.63 mg/l, 21 D OECD 211
藻类	EC50	Desmodesmus subspicatus	0.653 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	1.08 mg/l, 96 h OECD 203
间苯二酚 (CAS 108-46-3)			
水生的			
急性的			
其它的, 其它		以国内污水为主的活性污泥	79 mg/l, 3 h OECD 209
甲壳纲动物	LC50	水蚤	1 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	> 97 mg/l, 97 h OECD 201
鱼	LC50	呆鲦鱼	26.8 mg/l, 96 h EPA-660/3/75-009
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	>= 0.172 mg/l, 21 D
鱼	最低可观察效应浓度（LOEC）	虹鳟鱼	320 mg/l, 60 D

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E 结果: 不容易生物降解
1-NAPHTHOL	> 77.8 % OECD 301 B 结果: 易生物降解 测试时间: 28 D
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OECD 301 B 结果: 不容易生物降解 测试时间: 29 D
2-AMINO-6-CHLORO-4-NITROPHENOL	0 % OECD 301 F 结果: 不容易生物降解 测试时间: 28 D
LAURETH-3	结果: 易生物降解
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14.3 % OECD 301B 结果: Not Readilby Biodegradable 测试时间: 28 D
OLEYL PHOSPHATE	26.1 % OECD 301 D 结果: 易生物降解 测试时间: 28 D
乙醇胺	> 90 % OECD 301 A 结果: 易生物降解 测试时间: 21 D
甲苯 -2,5-DIAMINE SULFATE	17 % OECD 301 D 结果: 不容易生物降解 测试时间: 28 D
间苯二酚	66.7 % OECD 301 C 结果: 易生物降解 测试时间: 14 D

潜在的生物累积性

辛醇/水分配系数 log Kow

1-NAPHTHOL	2.836 OECD 107
M-AMINOPHENOL	0.21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2.8
	-2.8 OECD 107
P-AMINOPHENOL	0.25
乙醇胺	-2.3 OECD 107
间苯二酚	0.8

生物积累性

1-NAPHTHOL	结果: Bioaccumulation is unlikely
P-AMINOPHENOL	结果: 不一定是生物积累性的。
乙醇胺	结果: 不一定是生物积累性的。

生物富集因子

P-AMINOPHENOL	10 - 46 OECD 305 C

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

国际航空运输协会(IATA)

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

国际海运危险货物规则(IMDG)

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

一般信息 IMDG 规定的海洋污染物。 交通运输部规定的海洋污染物。

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

氢氧化铵 (CAS 1336-21-6)	适用。
间苯二酚 (CAS 108-46-3)	适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

化学名称	登记号(CAS号)	% by wt.
氢氧化铵	1336-21-6	1.8

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

间苯二酚 (CAS 108-46-3) Low priority

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT PERMANENT COLOR - GROUP 6**

Other means of identification

SDS number 00-21-0000368

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards

Skin corrosion/irritation	Category 2
Serious eye damage/eye irritation	Category 1
Sensitization, skin	Category 1A

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage.

Precautionary statement

Prevention Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear eye protection/face protection. Wear protective gloves.

Response If on skin: Wash with plenty of water. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
LAURETH-3		68439-50-9	5
AMMONIUM HYDROXIDE		1336-21-6	1.8

Chemical name	Common name and synonyms	CAS number	%
2-AMINO-6-CHLORO-4-NITROPHENOL		6358-09-4	< 2
ETHANOLAMINE		141-43-5	< 2
OLEYL PHOSPHATE		37310-83-1	1.25
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
TOLUENE-2,5-DIAMINE SULFATE		615-50-9	< 1
P-AMINOPHENOL		123-30-8	< 1
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE		83763-48-8	< 0.6
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE		54381-16-7	< 0.6
M-AMINOPHENOL		591-27-5	< 0.6
1-NAPHTHOL		90-15-3	≤ 0.5
RESORCINOL		108-46-3	≤ 0.5

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation
Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact
Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion
Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed
Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Indication of immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions
Move containers from fire area if you can do so without risk.

Specific methods
Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards
No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

This material is classified as a water pollutant under the Clean Water Act and should be prevented from contaminating soil or from entering sewage and drainage systems which lead to waterways.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Do not get in eyes, on skin, or on clothing. Avoid breathing mist/vapors. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	PEL	35 mg/m3
		50 ppm
ETHANOLAMINE (CAS 141-43-5)	PEL	6 mg/m3
		3 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	6 ppm
	TWA	3 ppm
RESORCINOL (CAS 108-46-3)	STEL	20 ppm
	TWA	10 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	15 mg/m3
		6 ppm
	TWA	8 mg/m3
		3 ppm
RESORCINOL (CAS 108-46-3)	STEL	90 mg/m3

US. NIOSH: Pocket Guide to Chemical Hazards Components	Type	Value
		20 ppm
	TWA	45 mg/m3
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Form Cream.

Color Shaded

Odor Characteristic.

Odor threshold Not available.

pH 9.7 - 10.1

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction. Prolonged or repeated exposure may cause liver and kidney damage. These effects have not been observed in humans.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Information on toxicological effects

Acute toxicity Not known.

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Chronic effects May be harmful if absorbed through skin.

Prolonged or repeated exposure may cause liver and kidney damage. These effects have not been observed in humans.

Further information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E Result: Not readily biodegradable
1-NAPHTHOL	> 77.8 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 29 d
2-AMINO-6-CHLORO-4-NITROPHENOL	0 % OECD 301 F Result: Not Readily Biodegradable Test Duration: 28 d
ETHANOLAMINE	> 90 % OECD 301 A Result: Readily Biodegradable Test Duration: 21 d
LAURETH-3	Result: Readily Biodegradable
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14.3 % OECD 301B Result: Not Readilby Biodegradable Test Duration: 28 d
OLEYL PHOSPHATE	26.1 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d
RESORCINOL	66.7 % OECD 301 C Result: Readily Biodegradable Test Duration: 14 d
TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

1-NAPHTHOL	2.836 OECD 107
ETHANOLAMINE	-2.3 OECD 107
M-AMINOPHENOL	0.21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2.8

Partition coefficient n-octanol / water (log Kow)

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2.8 OECD 107
P-AMINOPHENOL	0.25
RESORCINOL	0.8

Bioconcentration factor (BCF)

P-AMINOPHENOL	10 - 46 OECD 305 C

Bioaccumulation

1-NAPHTHOL	Result: Bioaccumulation is unlikely
ETHANOLAMINE	Result: Bioaccumulation is unlikely.
P-AMINOPHENOL	Result: Bioaccumulation is unlikely.

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Issue date	10-02-2020
Revision date	11-26-2020
Version #	02
NFPA ratings	Health: 3 Flammability: 1 Instability: 0
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
Revision information	This document has undergone significant changes and should be reviewed in its entirety.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT PERMANENT COLOR - GROUP 6
Synonyms	None.
SDS number	00-21-0000368
Issue date	10-02-2020
Version number	02
Revision date	11-26-2020
Supersedes date	10-06-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Skin sensitization	Category 1A	H317 - May cause an allergic skin reaction.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye damage. Causes skin irritation. May cause an allergic skin reaction. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 1-NAPHTHOL, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE, 2-AMINO-6-CHLORO-4-NITROPHENOL, 2-METHYLRESORCINOL, AMMONIUM HYDROXIDE, BISABOLOL, ETHANOLAMINE, LAURETH-3, M-AMINOPHENOL, N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE, OLEYL PHOSPHATE, P-AMINOPHENOL, RESORCINOL, TOLUENE-2,5-DIAMINE SULFATE

Hazard pictograms

Signal word Danger

Hazard statements

H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P272	Contaminated work clothing should not be allowed out of the workplace.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.
P280	Wear protective gloves.

Response

P101	If medical advice is needed, have product container or label at hand.
P302 + P352	IF ON SKIN: Wash with plenty of water.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P333 + P313	If skin irritation or rash occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 2,27% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Do not breathe vapor. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	STEL	91 mg/m3
		20 ppm
	TWA	46 mg/m3
		10 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	VLE	14 mg/m3
Regulatory status: Regulatory binding (VRC)		
		20 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	7 mg/m3
Regulatory status: Regulatory binding (VRC)		
		10 ppm
Regulatory status: Regulatory binding (VRC)		
ETHANOLAMINE (CAS 141-43-5)	VLE	7,6 mg/m3
Regulatory status: Regulatory binding (VRC)		
		3 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	2,5 mg/m3
Regulatory status: Regulatory binding (VRC)		
		1 ppm
Regulatory status: Regulatory binding (VRC)		
RESORCINOL (CAS 108-46-3)	VME	45 mg/m3
Regulatory status: Regulatory indicative (VRI)		
		10 ppm
Regulatory status: Regulatory indicative (VRI)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
ETHANOLAMINE (CAS 141-43-5)	TWA	0,51 mg/m3	Vapor and aerosol.
		0,2 ppm	Vapor and aerosol.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
AMMONIUM HYDROXIDE (CAS 1336-21-6)	AGW	14 mg/m3	
		20 ppm	
ETHANOLAMINE (CAS 141-43-5)	AGW	0,5 mg/m3	Vapor and aerosol.
		0,2 ppm	Vapor and aerosol.
RESORCINOL (CAS 108-46-3)	AGW	20 mg/m3	Inhalable fraction.
		4 ppm	Inhalable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	28 mg/m3	
	TWA	14 mg/m3	
ETHANOLAMINE (CAS 141-43-5)	STEL	7,5 mg/m3	
	TWA	2,5 mg/m3	
P-AMINOPHENOL (CAS 123-30-8)	TWA	5 mg/m3	Inhalable fraction.
RESORCINOL (CAS 108-46-3)	STEL	90 mg/m3	
	TWA	45 mg/m3	

Spain. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,5 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	46 mg/m3
		10 ppm

EU. Indicative Exposure Limit Values in Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

Exposure guidelines

EU Exposure Limit Values: Skin designation

ETHANOLAMINE (CAS 141-43-5)	Can be absorbed through the skin.
RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

Slovenia. OELs. Regulations concerning protection of workers against risks due to exposure to chemicals while working (Official Gazette of the Republic of Slovenia)

ETHANOLAMINE (CAS 141-43-5)	Can be absorbed through the skin.
RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

Environmental exposure controls Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Characteristic.
Odor threshold	Not available.
pH	9,7 - 10,1
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

11.1. Information on toxicological effects

Acute toxicity	Not known.

Product	Species	Test Results
PULP RIOT PERMANENT COLOR - GROUP 6		
Acute		
Dermal		
ATEmix		41000 mg/kg
Inhalation		
Vapor		
ATEmix		866,1 mg/l
Oral		
ATEmix		4619 mg/kg

Components	Species	Test Results

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

1-NAPHTHOL	2,836 OECD 107
COCAMIDOPROPYL BETAINE	4,2
ETHANOLAMINE	-2,3 OECD 107
M-AMINOPHENOL	0,21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2,8 -2,8 OECD 107
P-AMINOPHENOL	0,25
RESORCINOL	0,8

Bioconcentration factor (BCF)

COCAMIDOPROPYL BETAINE	71
P-AMINOPHENOL	10 - 46 OECD 305 C

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

Estonia Dangerous substances in groundwater Data

RESORCINOL (CAS 108-46-3)	RESORCINOL 0,5 UG/L RESORCINOL 50 UG/L

Estonia Dangerous substances in soil Data

RESORCINOL (CAS 108-46-3)	RESORCINOL 0,1 MG/KG RESORCINOL 1 MG/KG RESORCINOL 10 MG/KG

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.
General information	IMDG Regulated Marine Pollutant.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
AMMONIUM HYDROXIDE (CAS 1336-21-6)
M-AMINOPHENOL (CAS 591-27-5)
P-AMINOPHENOL (CAS 123-30-8)
RESORCINOL (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.

15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H301 Toxic if swallowed. H302 Harmful if swallowed. H311 Toxic in contact with skin. H312 Harmful in contact with skin. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H331 Toxic if inhaled. H332 Harmful if inhaled. H335 May cause respiratory irritation. H341 Suspected of causing genetic defects. H370 Causes damage to organs by ingestion. H371 May cause damage to organs by ingestion. H373 May cause damage to organs through prolonged or repeated exposure by ingestion. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	This document has undergone significant changes and should be reviewed in its entirety.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT PERMANENT COLOR - Groupe 6**

Autres moyens d'identification

Numéro de la FDS 00-21-0000368

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé

Corrosion cutanée/irritation cutanée	Catégorie 2
Lésions oculaires graves/irritation oculaire	Catégorie 1
Sensibilisation cutanée	Catégorie 1A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Provoque une irritation cutanée. Peut provoquer une allergie cutanée. Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Il ne faut pas que les vêtements de travail contaminés quittent le lieu de travail. Porter un équipement de protection des yeux/du visage. Porter des gants de protection.

Intervention En contact avec la peau : Laver avec beaucoup d'eau. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation ou d'éruption cutanée : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
LAURETH-3		68439-50-9	5
HYDROXYDE D'AMMONIUM		1336-21-6	1.8
2-AMINO-6-CHLORO-4-NITROPHÉNOL		6358-09-4	< 2
ÉTHANOLAMINE		141-43-5	< 2
OLEYL PHOSPHATE		37310-83-1	1.25
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
TOLUÈNE -2,5-DIAMINE SULFATE		615-50-9	< 1
p-Aminophénol		123-30-8	< 1
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE		83763-48-8	< 0.6
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE		54381-16-7	< 0.6
M-AMINOPHÉNOL		591-27-5	< 0.6
1-NAPHTOL		90-15-3	≤ 0.5
RÉSORCINOL		108-46-3	≤ 0.5

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Enlever immédiatement les vêtements contaminés et laver la peau à l'eau et au savon. En cas d'eczéma ou d'autres problèmes cutanés : consulter un médecin et apporter cette fiche. Laver les vêtements contaminés avant réutilisation.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.
Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence

Tenir à l'écart le personnel non requis. Tenir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Éviter de respirer les brouillards/vapeurs. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Ce produit est classé comme un polluant de l'eau en vertu de la Loi sur la qualité de l'eau (Clean Water Act) et ne doit pas contaminer les sols ni pénétrer dans les systèmes d'égouts et d'évacuation qui se déversent dans les cours d'eau.

Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Éviter tout contact avec les yeux, la peau ou les vêtements. Éviter de respirer les brouillards/vapeurs. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	PEL (limite d'exposition admissible)	6 mg/m3
		3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	PEL (limite d'exposition admissible)	35 mg/m3
		50 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	STEL	6 ppm
	TWA	3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm
RÉSORCINOL (CAS 108-46-3)	STEL	20 ppm
	TWA	10 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	STEL	15 mg/m3
		6 ppm
	TWA	8 mg/m3
		3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm
RÉSORCINOL (CAS 108-46-3)	STEL	90 mg/m3
		20 ppm
	TWA	45 mg/m3
		10 ppm

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial. Un écran facial est recommandé.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques Il est recommandé d'utiliser un tablier imperméable.

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Crème.

Couleur Nuancé

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH 9.7 - 10.1

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 100 °C (> 212 °F)

Point d'éclair > 100.0 °C (> 212.0 °F) Coupelle fermée

Taux d’évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d’inflammabilité ou d’explosibilité	
Limites d’inflammabilité - inférieure (%)	Non disponible.
Limites d’inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d’auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d’utilisation, d’entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d’utilisation.
Conditions à éviter	Tenir à l’écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d’ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée. Peut provoquer une allergie cutanée. L'exposition répétée ou prolongée peut causer des lésions aux reins et au foie. Ces effets n'ont pas été observés chez l'humain.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d’ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Renseignements sur les effets toxicologiques

Toxicité aiguë	Inconnu(e).

RÉSORCINOL	OCDE 429 Résultat: Sensibilisant Espèces: Souris
TOLUÈNE -2,5-DIAMINE SULFATE	OCDE 429 Résultat: Sensibilisant Espèces: Souris
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	QSAR Résultat: Sensibilisant
ÉTHANOLAMINE	Résultat: Non Sensibilisant Espèces: Cobaye
HYDROXYDE D'AMMONIUM	Résultat: Not Sensitzing Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n’est pas possible en raison d’un manque partiel ou total de données.

Mutagénicité

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	Résultat: Des essais in vitro et in vivo n’ont pas montré d’effets mutagènes.
ÉTHANOLAMINE	Résultat: In vitro and in vivo tests did show mutagenic effects
1-NAPHTOL	Résultat: In vitro tests showed varied results. In vivo tests showed negative results.

Mutagénicité

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
HYDROXYDE D'AMMONIUM	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
LAURETH-3	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
OLEYL PHOSPHATE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
M-AMINOPHÉNOL	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
RÉSORCINOL	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
TOLUÈNE -2,5-DIAMINE SULFATE	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
p-Aminophénol	Résultat: Les tests in vivo ont montré des effets mutagènes

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

RÉSORCINOL (CAS 108-46-3)	3 Inclassable quant à sa cancérogénicité pour l'homme.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets sur le développement

ÉTHANOLAMINE	>= 450 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	>= 50 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
TOLUÈNE -2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Souris
M-AMINOPHÉNOL	100 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
p-Aminophénol	100 mg/kg bw/d OCDE 421 Résultat: DSENO Espèces: Rat
RÉSORCINOL	250 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat

1-NAPHTOL	400 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
2-AMINO-6-CHLORO-4-NITROPHÉNOL	90 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat

Reproductivité

TOLUÈNE -2,5-DIAMINE SULFATE	>= 45 mg/kg bw/d OCDE 416 Résultat: DSENO Espèces: Rat
p-Aminophénol	100 mg/kg bw/d OCDE 421 Résultat: DSENO Espèces: Rat
OLEYL PHOSPHATE	1000 mg/kg bw/d OCDE 412 Résultat: NOEAL Espèces: Rat

Reproductivité

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
RÉSORCINOL	245 mg/kg bw/d OCDE 416 Résultat: DSENO Espèces: Rat
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OCDE 415 Espèces: Rat
ÉTHANOLAMINE	300 mg/kg bw/d OCDE 416 Résultat: DSENO Espèces: Rat
1-NAPHTOL	Résultat: Aucune donnée

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

1-NAPHTOL	Résultat: Irritant
HYDROXYDE D'AMMONIUM	Résultat: Très irritant

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

p-Aminophénol	10 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
TOLUÈNE -2,5-DIAMINE SULFATE	10 mg/kg bw/d OCDE 408, orale Résultat: DSENO Espèces: Rat Durée du test: 90 d
OLEYL PHOSPHATE	1000 mg/kg bw/d OCDE 407 Résultat: DSENO Espèces: Rat Durée du test: 27 d
1-NAPHTOL	130 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	15 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 108 d
ÉTHANOLAMINE	150 mg/m3 air OCDE 412, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 28 d
M-AMINOPHÉNOL	20 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d
2-AMINO-6-CHLORO-4-NITROPHÉNOL	30 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 13 semaines
ÉTHANOLAMINE	300 mg/kg bw/d OCDE 416, Orale Résultat: DSENO Espèces: Rat
RÉSORCINOL	80 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d

Toxicité pour certains organes cibles - expositions répétées

RÉSORCINOL — 991 mg/m³
Résultat: CSENO
Espèces: Rat
Durée du test: 14 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets chroniques Peut être nocif en cas d'absorption par la peau.

L'exposition répétée ou prolongée peut causer des lésions aux reins et au foie. Ces effets n'ont pas été observés chez l'humain.

Autres informations Peut provoquer des allergies respiratoires et cutanées. La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E Résultat: Difficilement Biodégradable
1-NAPHTOL	> 77.8 % OCDE 301 B Résultat: Facilement Biodegradable Durée du test: 28 d
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	0 % OCDE 301 B Résultat: Difficilement Biodégradable Durée du test: 29 d
2-AMINO-6-CHLORO-4-NITROPHÉNOL	0 % OECD 301 F Résultat: Difficilement Biodégradable Durée du test: 28 d
ÉTHANOLAMINE	> 90 % OCDE 301 A Résultat: Facilement Biodegradable Durée du test: 21 d
LAURETH-3	Résultat: Facilement Biodegradable
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	14.3 % OECD 301B Résultat: Not Readilby Biodegradable Durée du test: 28 d
OLEYL PHOSPHATE	26.1 % OECD 301 D Résultat: Facilement Biodegradable Durée du test: 28 d
RÉSORCINOL	66.7 % OCDE 301 C Résultat: Facilement Biodegradable Durée du test: 14 d
TOLUÈNE -2,5-DIAMINE SULFATE	17 % OECD 301 D Résultat: Difficilement Biodégradable Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

1-NAPHTOL	2.836 OECD 107
ÉTHANOLAMINE	-2.3 OECD 107
M-AMINOPHÉNOL	0.21
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2.8 -2.8 OECD 107

Log Koe du coefficient de répartition octanol/eau

p-Aminophénol	0.25
RÉSORCINOL	0.8

Facteur de bioconcentration

p-Aminophénol	10 - 46 OECD 305 C

Bioaccumulation

1-NAPHTOL	Résultat: Bioaccumulation is unlikely
ÉTHANOLAMINE	Résultat: Une bioaccumulation est peu probable.
p-Aminophénol	Résultat: Une bioaccumulation est peu probable.

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

Informations générales Polluant marin réglementé par l'IMDG. Polluant marin réglementé par le DOT.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	Inscrit.
RÉSORCINOL (CAS 108-46-3)	Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Dénomination chimique	Numéro d'enregistreme	% en poids.
HYDROXYDE D'AMMONIUM	1336-21-6	1.8

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

RÉSORCINOL (CAS 108-46-3) Faible priorité

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	02-Octobre-2020
Date de la révision	26-Novembre-2020
Version n°	02
Classements NFPA	Santé: 3 Inflammabilité: 1 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.
Informations relatives à la révision	Des modifications importantes ont été apportées à ce document et il devrait donc être relu entièrement.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT PERMANENT COLOR - GRUPPO 6
Sinonimi	Nessuno.
Numero SDS	00-21-0000368
Data di pubblicazione	10-Settembre-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli per la salute

Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.
Sensibilizzazione cutanea	Categoria 1A	H317 - Può provocare una reazione allergica cutanea.

Pericoli per l'ambiente

Pericoloso per l'ambiente acquatico, pericolo acquatico a lungo termine	Categoria 3	H412 - Nocivo per gli organismi acquatici con effetti di lunga durata.

Riepilogo dei pericoli Provoca gravi lesioni oculari. Provoca irritazione cutanea. Può provocare una reazione allergica cutanea. Pericoloso per l'ambiente se scaricato nei corsi d'acqua. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 1-NAFTOLO, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE, 2-AMINO-6-CHLORO-4-NITROFENOLO, 2-METHYLRESORCINOL, 4-Aminofenolo, AMMONIACA .... %, BISABOLOL, ETANOLAMINA, LAURETH-3, M-AMINOFENOLO, N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE, OLEYL PHOSPHATE, RESORCINOLO, TOLUENE-2,5-DIAMINE SULFATE

Pittogrammi di pericolo

Avvertenza Pericolo

Indicazioni di pericolo

H315	Provoca irritazione cutanea.
H317	Può provocare una reazione allergica cutanea.
H318	Provoca gravi lesioni oculari.
H412	Nocivo per gli organismi acquatici con effetti di lunga durata.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P260	Non respirare il vapore.
P264	Lavare attentamente dopo l'uso.
P272	Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
P273	Non disperdere nell'ambiente.
P280	Proteggere gli occhi.
P280	Indossare guanti protettivi.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P302 + P352	IN CASO DI CONTATTO CON LA PELLE: lavare abbondantemente con acqua.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P333 + P313	In caso di irritazione o eruzione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.

Immagazzinamento Conservare lontano da materiali non compatibili.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette La miscela contiene il 2,27 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Informazioni generali

Denominazione chimica	%	Numero CAS / Numero CE	Numero di registrazione REACH	Numero della sostanza	Note

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi.
Lavare gli indumenti contaminati prima di indossarli nuovamente.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea Togliere immediatamente gli indumenti contaminati e lavare la pelle con acqua e sapone. In caso di eczema o altri disturbi alla pelle: consultare un medico e portare con sé queste istruzioni. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio Non sono indicati rischi d'incendio o di esplosione particolari.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO_2).

Mezzi di estinzione non idonei Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi In caso d'incendio indossare autorespiratore e indumenti protettivi completi.

Procedure speciali per l'estinzione degli incendi Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.

Metodi specifici Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Prevedere una ventilazione adeguata. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.

Per chi interviene direttamente Allontanare il personale non necessario. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS

6.2. Precauzioni ambientali

Non disperdere nell'ambiente. Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente. Evitare sversamenti o perdite supplementari, se questo può essere fatto senza pericolo. Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.

6.3. Metodi e materiali per il contenimento e per la bonifica

Non scaricare il prodotto nelle fogne.

Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Assorbire in vermiculite, sabbia o terra asciutta e riporre in contenitori. Una volta recuperato il prodotto, sciacquare l'area con acqua.

Versamenti di piccole dimensioni: Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua.

Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo

6.4. Riferimento ad altre sezioni

Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura

Non respirare il vapore. Non permettere che questo materiale vada a contatto con gli occhi. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Garantire una ventilazione adeguata. Indossare attrezzature di protezione personale adeguate. Non disperdere nell'ambiente. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità

Conservare in un recipiente ermeticamente chiuso. Conservare fuori della portata dei bambini. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari

Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
ETANOLAMINA (CAS 141-43-5)	8 ore	2,5 mg/m3
		1 ppm
	Breve termine	7,6 mg/m3
		3 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite d'esposizione indicativi dell'UE in Direttive 91/322/CEE, 2000/39/CE, 2006/15/CE, 2009/161/UE

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
ETANOLAMINA (CAS 141-43-5)	8 ore	2,5 mg/m3
		1 ppm
	Breve termine	7,6 mg/m3
		3 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite biologici

Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate	Seguire le procedure standard di monitoraggio.
Livelli derivati senza effetto (DNEL)	Non conosciuto.
Prevedibili concentrazioni prive di effetti (PNEC)	Non conosciuto.

Linee guida sull'esposizione

OEL Italia: Specifica cutanea

ETANOLAMINA (CAS 141-43-5)	Assorbimento attraverso la pelle
RESORCINOLO (CAS 108-46-3)	Assorbimento attraverso la pelle

8.2. Controlli dell'esposizione

Controlli tecnici idonei	È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali	Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.
Protezione degli occhi/del volto	Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura). Si raccomanda l'uso di una visiera protettiva.
Protezione della pelle	
- Protezione delle mani	Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.
- Altro	Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici. Si consiglia di utilizzare un grembiule impenetrabile.
Protezione respiratoria	Applicabile soltanto per gli impianti industriali. In caso di ventilazione insufficiente, usare un apparecchio respiratorio adatto.
Pericoli termici	Indossare opportuni indumenti termoprotettivi, quando necessario.
Misure d'igiene	Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti. Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
Controlli dell'esposizione ambientale	Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto	
Stato fisico	Liquido.
Forma	Panna.
Colore	Shaded
Odore	Caratteristico/a.
Soglia olfattiva	Non conosciuto.
pH	9,7 - 10,1
Punto di fusione/punto di congelamento	Non conosciuto.
Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	> 100,0 °C (> 212,0 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.

Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	Non sono disponibili informazioni supplementari pertinenti.

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Forti agenti ossidanti.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.
Informazioni sulle vie probabili di esposizione	
Inalazione	L'inalazione prolungata può essere nociva.
Cutanea	Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca gravi lesioni oculari.
Ingestione	In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.
Sintomi	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta Non conosciuto.

Prodotto	**Specie**	**Risultati del test**
PULP RIOT PERMANENT COLOR - GRUPPO 6		
Acuto		
Dermico		
ATEmix		41000 mg/kg
Inalazione		
Vapore		
ATEmix		866,1 mg/l
Orale		
ATEmix		4619 mg/kg

Componenti	**Specie**	**Risultati del test**
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)		
Acuto		
Inalazione		
Aerosol		
LD50	Ratto	> 5,24 mg/m3, 4 h OECD 403

Componenti	Specie	Risultati del test
Orale		
LD50	Ratto	> 2000 mg/kg OECD 401

N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	-2,8
	-2,8 OECD 107
RESORCINOLO	0,8

Fattore di bioconcentrazione (BCF)

4-Aminofenolo	10 - 46 OECD 305 C
COCAMIDOPROPYL BETAINE	71

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.

12.7. Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).

Imballaggi contaminati Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.

Codice Europeo dei Rifiuti Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.

Metodi di smaltimento/informazioni Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Impedire a questo prodotto di penetrare nelle fogne e nelle riserve d'acqua. Non contaminare stagni, canali o fossati con il prodotto chimico o il contenitore usato. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Precauzioni particolari Smaltire secondo le norme applicabili.

SEZIONE 14: Informazioni sul trasporto

14.1. - 14.6.: Non è regolamentato come merci pericolose.

14.7. Trasporto di rinfuse secondo l'allegato II di MARPOL ed il codice IBC Non stabilito.

Informazioni generali Inquinante Marino Regolato (IMDG).

SEZIONE 15: Informazioni sulla regolamentazione

15.1. Disposizioni legislative e regolamentari su salute, sicurezza e ambiente specifiche per la sostanza o la miscela

Regolamenti UE

Regolamento (CE) n. 1005/2009 sulle sostanze che riducono lo strato di ozono, Allegato I e II e successive modifiche

Non listato.

Regolamento (CE) n. 850/2004 relativo agli inquinanti organici persistenti, Allegato I e successivi adeguamenti

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 1 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 2 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 3 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato V e successive modifiche

Non listato.

Regolamento (CE) n. 166/2006 Allegato II Registro delle emissioni e dei trasferimenti di sostanze inquinanti e successive modifiche

Non listato.

Regolamento (CE) n. 1907/2006, REACH, Articolo 59(10), Elenco di sostanze candidate così come attualmente pubblicato dall'Agenzia europea per le sostanze chimiche (ECHA)

Non listato.

Autorizzazioni

Regolamento (CE) n. 1907/2006, REACH Allegato XIV - Sostanze soggette ad autorizzazione, modificata

Non listato.

Restrizioni d'uso

Regolamento (CE) n. 1907/2006, REACH Allegato XVII, Sostanze soggette a restrizioni in materia di immissione sul mercato e di uso e successivi adeguamenti

Non listato.

Direttiva 2004/37/CE: sulla protezione dei lavoratori contro i rischi derivanti da un'esposizione ad agenti cancerogeni e mutageni durante il lavoro e successive modifiche

Non listato.

Altri regolamenti UE

Direttiva 2012/18/UE sugli incidenti rilevanti connessi con determinate sostanze pericolose e successive modifiche

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
4-Aminofenolo (CAS 123-30-8)
AMMONIACA .... % (CAS 1336-21-6)
M-AMINOFENOLO (CAS 591-27-5)
RESORCINOLO (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H301 Tossico se ingerito. H302 Nocivo se ingerito. H311 Tossico per contatto con la pelle. H312 Nocivo per contatto con la pelle. H314 Provoca gravi ustioni cutanee e gravi lesioni oculari. H315 Provoca irritazione cutanea.

H317 Può provocare una reazione allergica cutanea.
H318 Provoca gravi lesioni oculari.
H319 Provoca grave irritazione oculare.
H331 Tossico se inalato.
H332 Nocivo se inalato.
H335 Può irritare le vie respiratorie.
H341 Sospettato di provocare alterazioni genetiche.
H370 Provoca danni agli organi per ingestione.
H371 Può provocare danni agli organi per ingestione.
H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta per ingestione.
H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta.
H400 Molto tossico per gli organismi acquatici.
H410 Molto tossico per gli organismi acquatici con effetti di lunga durata.
H411 Tossico per gli organismi acquatici con effetti di lunga durata.
H412 Nocivo per gli organismi acquatici con effetti di lunga durata.

Informazioni di revisione

Prodotto e la Società Identificazione: Tipi di materiale
COMPOSIZIONE/INFORMAZIONI SUGLI INGREDIENTI: Ingredienti
Proprietà fisiche e chimiche: Proprietà multiple
GHS: Classificazione

Informazioni formative

Seguire le istruzioni di formazione durante la manipolazione di questo materiale.

Clausole di esclusione della responsabilità

Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT PERMANENT COLOR - 组 6

鉴别的其他方法

SDS编号 00-21-0000368

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害

皮肤腐蚀/刺激	类别 2
严重眼睛损伤/眼睛刺激性	类别 1
皮肤过敏	类别 1A

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 造成皮肤刺激。 可能造成皮肤过敏反应。 造成严重眼损伤。

防范说明

预防措施 作业后彻底清洗。 受沾染的工作服不得带出工作场地。 戴防护眼罩/防护面具。 戴防护手套。

事故响应 如皮肤沾染：用大量水清洗。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。 如发生皮肤刺激或皮疹：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。

安全储存 远离禁忌物保存。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
LAURETH-3		68439-50-9	5
氢氧化铵		1336-21-6	1.8
2-AMINO-6-CHLORO-4-NITROPHENOL		6358-09-4	< 2
乙醇胺		141-43-5	< 2

化学名称	通用名称和别名	登记号(CAS号)	%
OLEYL PHOSPHATE		37310-83-1	1.25
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
甲苯 -2,5-DIAMINE SULFATE		615-50-9	< 1
P-AMINOPHENOL		123-30-8	< 1
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE		83763-48-8	< 0.6
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE		54381-16-7	< 0.6
M-AMINOPHENOL		591-27-5	< 0.6
1-NAPHTHOL		90-15-3	≤ 0.5
间苯二酚		108-46-3	≤ 0.5

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入
移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触
立即脱掉受污染的衣服，用肥皂水冲洗皮肤。 若出现湿疹或其它皮肤疾病：就医治疗，并带上本说明书。 沾染的衣服清洗后方可重新使用。

眼睛接触
立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即就医。

经口
漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性
严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

指明任何需要立即就医或特殊治疗的情况
提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息
务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。
沾染的衣服清洗后方可重新使用。

5. 消防措施

合适的灭火剂
水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质
禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害
燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施
发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明
在不会发生危险的情况下将容器撤离火灾现场。

特定的方法
采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险
无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序
让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 Avoid breathing mist/vapors. 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料
根据水净化法，这种材料被分类为水污染物，应防止污染土壤，或防止进入下水道及流至水路的排水系统。

大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施
防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项
严防进入眼中、接触皮肤或衣服。 Avoid breathing mist/vapors. 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物
储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	PEL-常期暴露极限	6 mg/m3
		3 ppm
氢氧化铵 (CAS 1336-21-6)	PEL-常期暴露极限	35 mg/m3
		50 ppm

美国ACGIH阈限值

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	TWA	3 ppm
	短期暴露极限（STEL）	6 ppm
氢氧化铵 (CAS 1336-21-6)	TWA	25 ppm
	短期暴露极限（STEL）	35 ppm
间苯二酚 (CAS 108-46-3)	TWA	10 ppm
	短期暴露极限（STEL）	20 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	TWA	8 mg/m3
		3 ppm
	短期暴露极限（STEL）	15 mg/m3
		6 ppm
氢氧化铵 (CAS 1336-21-6)	TWA	18 mg/m3
		25 ppm
	短期暴露极限（STEL）	27 mg/m3
		35 ppm
间苯二酚 (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm
	短期暴露极限（STEL）	90 mg/m3
		20 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼和安全淋浴设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 佩戴带侧边的安全眼镜（护目镜）和面罩。 建议穿戴面罩。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。 建议使用不渗透的围裙。

呼吸系统防护 仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。 受沾染的工作服不得带出工作场地。

9. 理化特性

外观

性状	液体。
形状	奶油。
颜色	有色
气味	特征的。
气味阈值	无资料。
pH 值	9.7 - 10.1
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	造成皮肤刺激。 可能造成皮肤过敏反应。 长时间或是重复暴露可能导致肝脏和肾损伤。 这些影响在人体尚未被观察到。
眼睛接触	造成严重眼损伤。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

毒理学效应信息

急性毒性	未知。

2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	QSAR 结果: 致敏
乙醇胺	结果: Not Sensitizing 物种: 豚鼠
氢氧化铵	结果: Not Sensitzing 物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

乙醇胺	结果: In vitro and in vivo tests did show mutagenic effects
1-NAPHTHOL	结果: In vitro tests showed varied results. In vivo tests showed negative results.
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	结果: 体外和体内试验均未见致突变作用。
P-AMINOPHENOL	结果: 活体试验表明有诱变效应
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	结果: 离体试验未见诱变效应
LAURETH-3	结果: 离体试验未见诱变效应

突变性

OLEYL PHOSPHATE	结果: 离体试验未见诱变效应
氢氧化铵	结果: 离体试验未见诱变效应
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
M-AMINOPHENOL	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
甲苯 -2,5-DIAMINE SULFATE	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
间苯二酚	结果: 离体试验表明有在活体试验中未观察到的诱变效应。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

间苯二酚 (CAS 108-46-3)	3 尚不能确定对人有致癌作用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

乙醇胺	>= 450 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	>= 50 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
甲苯 -2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 小鼠

乙醇胺	300 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

1-NAPHTHOL	结果: 无数据

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

1-NAPHTHOL	结果: 刺激性的
氢氧化铵	结果: 高刺激性

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

P-AMINOPHENOL	10 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
甲苯 -2,5-DIAMINE SULFATE	10 mg/kg bw/d OECD 408, 口服 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 27 D
1-NAPHTHOL	130 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE	15 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 108 D
乙醇胺	150 mg/m3 空气 OECD 412, 吸入 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 28 D
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
2-AMINO-6-CHLORO-4-NITROPHENOL	30 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 13 星期
乙醇胺	300 mg/kg bw/d OECD 416, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
间苯二酚	80 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D 991 mg/m³ 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 14 D

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

慢性影响 如通过皮肤吸收可能有害.

长时间或是重复暴露可能导致肝脏和肾损伤。 这些影响在人体尚未被观察到。

更多信息 可能造成皮肤和呼吸过敏性反应。 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性

产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	11.12 mg/l, 48 h TG 202
藻类		近头状伪蹄形藻	5.33 mg/l, 72 h EU C.3
鱼	LC50	斑马鱼 (Danio rerio)	86.2 mg/l, 96 h EU C.1

生物积累性

1-NAPHTHOL	结果: Bioaccumulation is unlikely
P-AMINOPHENOL	结果: 不一定是生物积累性的。
乙醇胺	结果: 不一定是生物积累性的。

生物富集因子

P-AMINOPHENOL	10 - 46 OECD 305 C

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

不作为危险货物运输

一般信息 IMDG 规定的海洋污染物。 交通运输部规定的海洋污染物。

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

氢氧化铵 (CAS 1336-21-6)	适用。
间苯二酚 (CAS 108-46-3)	适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

化学名称	登记号(CAS号)	% by wt.
氢氧化铵	1336-21-6	1.8

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

间苯二酚 (CAS 108-46-3) Low priority

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT PERMANENT COLOR - GROUP 8**

Other means of identification

SDS number 00-21-0000369

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards

Skin corrosion/irritation	Category 2
Serious eye damage/eye irritation	Category 1
Sensitization, skin	Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage.

Precautionary statement

Prevention Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear eye protection/face protection. Wear protective gloves.

Response If on skin: Wash with plenty of water. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
LAURETH-3		68439-50-9	5
AMMONIUM HYDROXIDE		1336-21-6	1.8

Chemical name	Common name and synonyms	CAS number	%
OLEYL PHOSPHATE		37310-83-1	1.25
P-AMINOPHENOL		123-30-8	< 0.6
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 0.4

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Indication of immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling Do not get this material in contact with eyes. Avoid breathing mist/vapors. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	PEL	35 mg/m3
		50 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Form Cream.

Color Shaded

Odor Characteristic.

Odor threshold Not available.

pH 9.7 - 10.1

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Information on toxicological effects

Acute toxicity Not known.

Skin corrosion/irritation Causes skin irritation.

Irritation Corrosion - Skin

AMMONIUM HYDROXIDE	OECD 404 Result: Corrosive Species: Rat
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	OECD 404 Result: Slightly Irritating Species: Rabbit
LAURETH-3	OECD 404 Result: Slightly Irritating Species: Rabbit
OLEYL PHOSPHATE	OECD 439 Result: Not Irritating Species: RhE
P-AMINOPHENOL	Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

P-AMINOPHENOL	EPA OPPTS 870.2400 Result: Slightly Irritating Species: Rabbit
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	OECD 405 Result: Corrosive Species: Rabbit
LAURETH-3	OECD 405 Result: Corrosive Species: Rabbit
OLEYL PHOSPHATE	OECD 438 Result: Corrosive Species: In vitro
AMMONIUM HYDROXIDE	Result: Corrosive

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization May cause an allergic skin reaction.

Skin sensitization

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	EU Method B.6 - Cat 1 Result: Sensitizing Species: Guinea pig
P-AMINOPHENOL	OECD 406 Result: Sensitizing Species: Guinea pig
OLEYL PHOSPHATE	OECD 429 Result: Not Sensitizing Species: Mouse
AMMONIUM HYDROXIDE	Result: Not Sensitzing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Result: In vitro tests did not show mutagenic effects
AMMONIUM HYDROXIDE	Result: In vitro tests did not show mutagenic effects
LAURETH-3	Result: In vitro tests did not show mutagenic effects
OLEYL PHOSPHATE	Result: In vitro tests did not show mutagenic effects
P-AMINOPHENOL	Result: In vivo tests showed mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E Result: Not readily biodegradable
LAURETH-3	Result: Readily Biodegradable
OLEYL PHOSPHATE	26.1 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

P-AMINOPHENOL	0.25

Bioconcentration factor (BCF)

P-AMINOPHENOL	10 - 46 OECD 305 C

Bioaccumulation

P-AMINOPHENOL	Result: Bioaccumulation is unlikely.

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT PERMANENT COLOR - GROUP 8
Synonyms	None.
SDS number	00-21-0000369
Issue date	10-04-2020
Version number	02
Revision date	11-27-2020
Supersedes date	10-04-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye damage. Causes skin irritation. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: AMMONIUM HYDROXIDE, LAURETH-3, OLEYL PHOSPHATE

Hazard pictograms

Signal word Danger

Hazard statements

H315	Causes skin irritation.
H318	Causes serious eye damage.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.
P280	Wear protective gloves.

Response

P101	If medical advice is needed, have product container or label at hand.
P302 + P352	IF ON SKIN: Wash with plenty of water.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P332 + P313	If skin irritation occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 1,2% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 4,25% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains P-AMINOPHENOL, 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 2-METHYLRESORCINOL, BISABOLOL, RESORCINOL, TOLUENE-2,5-DIAMINE SULFATE, M-AMINOPHENOL. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing. Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders

Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions

Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up

Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Do not breathe vapor. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
RESORCINOL (CAS 108-46-3)	STEL	91 mg/m3
		20 ppm
	TWA	46 mg/m3
		10 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	VLE	14 mg/m3
Regulatory status: Regulatory binding (VRC)		
		20 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	7 mg/m3
Regulatory status: Regulatory binding (VRC)		
		10 ppm
Regulatory status: Regulatory binding (VRC)		
RESORCINOL (CAS 108-46-3)	VME	45 mg/m3
Regulatory status: Regulatory indicative (VRI)		
		10 ppm
Regulatory status: Regulatory indicative (VRI)		

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
AMMONIUM HYDROXIDE (CAS 1336-21-6)	AGW	14 mg/m3	
		20 ppm	
RESORCINOL (CAS 108-46-3)	AGW	20 mg/m3	Inhalable fraction.
		4 ppm	Inhalable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	28 mg/m3	
	TWA	14 mg/m3	
P-AMINOPHENOL (CAS 123-30-8)	TWA	5 mg/m3	Inhalable fraction.
RESORCINOL (CAS 108-46-3)	STEL	90 mg/m3	
	TWA	45 mg/m3	

Spain. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
RESORCINOL (CAS 108-46-3)	TWA	46 mg/m3
		10 ppm

EU. Indicative Exposure Limit Values in Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

Exposure guidelines

EU Exposure Limit Values: Skin designation

RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

Slovenia. OELs. Regulations concerning protection of workers against risks due to exposure to chemicals while working (Official Gazette of the Republic of Slovenia)

RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Characteristic.
Odor threshold	Not available.
pH	9,7 - 10,1
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.

Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT PERMANENT COLOR - GROUP 8

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
AMMONIUM HYDROXIDE (CAS 1336-21-6)
M-AMINOPHENOL (CAS 591-27-5)
P-AMINOPHENOL (CAS 123-30-8)
RESORCINOL (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H301 Toxic if swallowed. H302 Harmful if swallowed. H312 Harmful in contact with skin. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H335 May cause respiratory irritation. H341 Suspected of causing genetic defects. H370 Causes damage to organs by ingestion. H371 May cause damage to organs by ingestion. H373 May cause damage to organs through prolonged or repeated exposure by ingestion. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	Product and Company Identification: Product and Company Identification - L'Oreal Composition / Information on Ingredients: Ingredients SECTION 9: Physical and chemical properties: Odor
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT PERMANENT COLOR - Groupe 8**

Autres moyens d'identification

Numéro de la FDS 00-21-0000369

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé

Corrosion cutanée/irritation cutanée	Catégorie 2
Lésions oculaires graves/irritation oculaire	Catégorie 1
Sensibilisation cutanée	Catégorie 1

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Provoque une irritation cutanée. Peut provoquer une allergie cutanée. Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Il ne faut pas que les vêtements de travail contaminés quittent le lieu de travail. Porter un équipement de protection des yeux/du visage. Porter des gants de protection.

Intervention En contact avec la peau : Laver avec beaucoup d'eau. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation ou d'éruption cutanée : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
LAURETH-3		68439-50-9	5
HYDROXYDE D'AMMONIUM		1336-21-6	1.8
OLEYL PHOSPHATE		37310-83-1	1.25
p-Aminophénol		123-30-8	< 0.6
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 0.4

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation
Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau
Enlever immédiatement les vêtements contaminés et laver la peau à l'eau et au savon. En cas d'eczéma ou d'autres problèmes cutanés : consulter un médecin et apporter cette fiche. Laver les vêtements contaminés avant réutilisation.

Contact avec les yeux
Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.

Ingestion
Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés
Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire
Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales
S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.
Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés
Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés
Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux
Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers
Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies
Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention
Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux
Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence
Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Éviter de respirer les brouillards/vapeurs. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Éviter tout contact de ce produit avec les yeux. Éviter de respirer les brouillards/vapeurs. Éviter tout contact avec les yeux, la peau et les vêtements. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	PEL (limite d'exposition admissible)	35 mg/m3
		50 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm

Valeurs biologiques limites

Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés

Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux

Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial. Un écran facial est recommandé.

Protection de la peau

Protection des mains

Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre	Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques Il est recommandé d'utiliser un tablier imperméable.
Protection respiratoire	Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Forme	Crème.
Couleur	Nuancé
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	9.7 - 10.1
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.

Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée. Peut provoquer une allergie cutanée.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OCDE 415 Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n’est pas possible en raison d’un manque partiel ou total de données.

HYDROXYDE D'AMMONIUM	Résultat: Très irritant

Toxicité pour certains organes cibles - expositions répétées La classification n’est pas possible en raison d’un manque partiel ou total de données.

p-Aminophénol	10 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
OLEYL PHOSPHATE	1000 mg/kg bw/d OCDE 407 Résultat: DSENO Espèces: Rat Durée du test: 27 d
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d

Danger par aspiration La classification n’est pas possible en raison d’un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n’est pas classé comme dangereux pour l’environnement. Toutefois, ceci n’exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l’environnement.

Composants		Espèces	Résultats d'épreuves
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)

Bioaccumulation

p-Aminophénol	Résultat: Une bioaccumulation est peu probable.

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT PERMANENT COLOR - GRUPPO 8
Sinonimi	Nessuno.
Numero SDS	00-21-0000369
Data di pubblicazione	10-Settembre-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli per la salute

Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.

Pericoli per l'ambiente

Pericoloso per l'ambiente acquatico, pericolo acquatico a lungo termine	Categoria 3	H412 - Nocivo per gli organismi acquatici con effetti di lunga durata.

Riepilogo dei pericoli

Provoca gravi lesioni oculari. Provoca irritazione cutanea. Pericoloso per l'ambiente se scaricato nei corsi d'acqua. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: AMMONIACA .... %, LAURETH-3, OLEYL PHOSPHATE

Pittogrammi di pericolo

Avvertenza Pericolo

Indicazioni di pericolo

H315	Provoca irritazione cutanea.
H318	Provoca gravi lesioni oculari.
H412	Nocivo per gli organismi acquatici con effetti di lunga durata.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P260	Non respirare il vapore.
P264	Lavare attentamente dopo l'uso.
P273	Non disperdere nell'ambiente.
P280	Proteggere gli occhi.
P280	Indossare guanti protettivi.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P302 + P352	IN CASO DI CONTATTO CON LA PELLE: lavare abbondantemente con acqua.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P332 + P313	In caso di irritazione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.

Immagazzinamento Conservare lontano da materiali non compatibili.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette La miscela contiene il 1,2 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico. La miscela contiene il 4,25 % di componenti di cui è ignoto il pericolo a lungo termine per l'ambiente acquatico. EUH208 - Contiene 4-Aminofenolo, 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 2-METHYLRESORCINOL, BISABOLOL, RESORCINOLO, TOLUENE-2,5-DIAMINE SULFATE, M-AMINOFENOLO. Può provocare una reazione allergica.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Informazioni generali

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea Togliersi di dosso gli indumenti contaminati. Lavare abbondantemente con acqua e sapone. In caso di irritazione della pelle: consultare un medico. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.)

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio Non sono indicati rischi d'incendio o di esplosione particolari.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO2).

Mezzi di estinzione non idonei Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi In caso d'incendio indossare autorespiratore e indumenti protettivi completi.

Procedure speciali per l'estinzione degli incendi Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.

Metodi specifici Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Prevedere una ventilazione adeguata. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.

Per chi interviene direttamente Allontanare il personale non necessario. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS

6.2. Precauzioni ambientali Non disperdere nell'ambiente. Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente. Evitare sversamenti o perdite supplementari, se questo può essere fatto senza pericolo. Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.

6.3. Metodi e materiali per il contenimento e per la bonifica Non scaricare il prodotto nelle fogne.

Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Assorbire in vermiculite, sabbia o terra asciutta e riporre in contenitori. Una volta recuperato il prodotto, sciacquare l'area con acqua.

Versamenti di piccole dimensioni: Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua.

Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo

6.4. Riferimento ad altre sezioni Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura Non respirare il vapore. Non permettere che questo materiale vada a contatto con gli occhi. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Garantire una ventilazione adeguata. Indossare attrezzature di protezione personale adeguate. Non disperdere nell'ambiente. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità Conservare in un recipiente ermeticamente chiuso. Conservare fuori della portata dei bambini. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite d'esposizione indicativi dell'UE in Direttive 91/322/CEE, 2000/39/CE, 2006/15/CE, 2009/161/UE

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite biologici Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate Seguire le procedure standard di monitoraggio.

Livelli derivati senza effetto (DNEL) Non conosciuto.

Prevedibili concentrazioni prive di effetti (PNEC) Non conosciuto.

Linee guida sull'esposizione

OEL Italia: Specifica cutanea

RESORCINOLO (CAS 108-46-3) Assorbimento attraverso la pelle

8.2. Controlli dell'esposizione

Controlli tecnici idonei È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.

Protezione degli occhi/del volto Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura).

Protezione della pelle

- Protezione delle mani Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.

- Altro Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici.

Protezione respiratoria Applicabile soltanto per gli impianti industriali. In caso di ventilazione insufficiente, usare un apparecchio respiratorio adatto.

Pericoli termici Indossare opportuni indumenti termoprotettivi, quando necessario.

Misure d'igiene Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti.

Controlli dell'esposizione ambientale Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto

Stato fisico Liquido.

Forma Panna.

Colore Shaded

Odore Caratteristico/a.

Soglia olfattiva Non conosciuto.

pH 9,7 - 10,1

Punto di fusione/punto di congelamento Non conosciuto.

Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	> 100,0 °C (> 212,0 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.
Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	Non sono disponibili informazioni supplementari pertinenti.

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Forti agenti ossidanti.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.
Informazioni sulle vie probabili di esposizione	
Inalazione	L'inalazione prolungata può essere nociva.
Cutanea	Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca gravi lesioni oculari.
Ingestione	In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.
Sintomi	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.)

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta	Non conosciuto.

12.2. Persistenza e degradabilità

Biodegradabilità

Percentuale di degradazione (biodegradazione aerobica)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33,3 % EU C,4-E Risultato: Not readily biodegradable
2-METHYLRESORCINOL	64 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
BISABOLOL	70 - 80 % OECD 301 F Risultato: Rapidamente biodegradabile Durata del test: 28 d
COCAMIDOPROPYL BETAINE	91,6 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
LAURETH-3	Risultato: Rapidamente biodegradabile
OLEYL PHOSPHATE	26,1 % OECD 301 D Risultato: Rapidamente biodegradabile Durata del test: 28 d
RESORCINOLO	66,7 % OECD 301 C Risultato: Rapidamente biodegradabile Durata del test: 14 d
TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Risultato: Not Readily Biodegradable Durata del test: 28 d

12.3. Potenziale di bioaccumulo

Coefficiente di partizione n-ottanolo/acqua (log Kow)

4-Aminofenolo	0,25
COCAMIDOPROPYL BETAINE	4,2
M-AMINOFENOLO	0,21
RESORCINOLO	0,8

Fattore di bioconcentrazione (BCF)

4-Aminofenolo	10 - 46 OECD 305 C
COCAMIDOPROPYL BETAINE	71

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.

12.7. Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).

Imballaggi contaminati Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.

Codice Europeo dei Rifiuti Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.

Metodi di smaltimento/informazioni Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Impedire a questo prodotto di penetrare nelle fogne e nelle riserve d'acqua. Non contaminare stagni, canali o fossati con il prodotto chimico o il contenitore usato. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Precauzioni particolari Smaltire secondo le norme applicabili.

SEZIONE 14: Informazioni sul trasporto

Restrizioni d'uso

Regolamento (CE) n. 1907/2006, REACH Allegato XVII, Sostanze soggette a restrizioni in materia di immissione sul mercato e di uso e successivi adeguamenti

Non listato.

Direttiva 2004/37/CE: sulla protezione dei lavoratori contro i rischi derivanti da un'esposizione ad agenti cancerogeni e mutageni durante il lavoro e successive modifiche

Non listato.

Altri regolamenti UE

Direttiva 2012/18/UE sugli incidenti rilevanti connessi con determinate sostanze pericolose e successive modifiche

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
4-Aminofenolo (CAS 123-30-8)
AMMONIACA .... % (CAS 1336-21-6)
M-AMINOFENOLO (CAS 591-27-5)
RESORCINOLO (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H301 Tossico se ingerito. H302 Nocivo se ingerito. H312 Nocivo per contatto con la pelle. H314 Provoca gravi ustioni cutanee e gravi lesioni oculari. H315 Provoca irritazione cutanea. H317 Può provocare una reazione allergica cutanea. H318 Provoca gravi lesioni oculari. H319 Provoca grave irritazione oculare. H332 Nocivo se inalato. H335 Può irritare le vie respiratorie. H341 Sospettato di provocare alterazioni genetiche.

H370 Provoca danni agli organi per ingestione.
H371 Può provocare danni agli organi per ingestione.
H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta per ingestione.
H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta.
H400 Molto tossico per gli organismi acquatici.
H410 Molto tossico per gli organismi acquatici con effetti di lunga durata.
H411 Tossico per gli organismi acquatici con effetti di lunga durata.
H412 Nocivo per gli organismi acquatici con effetti di lunga durata.

Informazioni formative

Seguire le istruzioni di formazione durante la manipolazione di questo materiale.

Clausole di esclusione della responsabilità

Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT PERMANENT COLOR - 组 8

鉴别的其他方法

SDS编号 00-21-0000369

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害

皮肤腐蚀/刺激	类别 2
严重眼睛损伤/眼睛刺激性	类别 1
皮肤过敏	类别 1

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 造成皮肤刺激。 可能造成皮肤过敏反应。 造成严重眼损伤。

防范说明

预防措施 作业后彻底清洗。 受沾染的工作服不得带出工作场地。 戴防护眼罩/防护面具。 戴防护手套。

事故响应 如皮肤沾染：用大量水清洗。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。 如发生皮肤刺激或皮疹：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。

安全储存 远离禁忌物保存。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
LAURETH-3		68439-50-9	5
氢氧化铵		1336-21-6	1.8
OLEYL PHOSPHATE		37310-83-1	1.25
P-AMINOPHENOL		123-30-8	< 0.6

化学名称	通用名称和别名	登记号(CAS号)	%
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 0.4

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 立即脱掉受污染的衣服，用肥皂水冲洗皮肤。 若出现湿疹或其它皮肤疾病：就医治疗，并带上本说明书。 沾染的衣服清洗后方可重新使用。

眼睛接触 立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即就医。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

指明任何需要立即就医或特殊治疗的情况 提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。
沾染的衣服清洗后方可重新使用。

5. 消防措施

合适的灭火剂 水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质 禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施 发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明 在不会发生危险的情况下将容器撤离火灾现场。

特定的方法 采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险 无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序 让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 Avoid breathing mist/vapors. 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料 大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施 防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项 不得让本材料接触眼睛。 Avoid breathing mist/vapors. 避免接触眼睛、皮肤和衣物。 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物 储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
氢氧化铵 (CAS 1336-21-6)	PEL-常期暴露极限	35 mg/m3 50 ppm

美国ACGIH阈限值

组分	类型	标准值
氢氧化铵 (CAS 1336-21-6)	TWA	25 ppm

美国ACGIH阈限值

组分	类型	标准值
	短期暴露极限（STEL）	35 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
氢氧化铵 (CAS 1336-21-6)	TWA	18 mg/m3
		25 ppm
	短期暴露极限（STEL）	27 mg/m3
		35 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼和安全淋浴设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 佩戴带侧边的安全眼镜（护目镜）和面罩。 建议穿戴面罩。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。 建议使用不渗透的围裙。

呼吸系统防护 仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。 受沾染的工作服不得带出工作场地。

9. 理化特性

外观

性状 液体。

形状 奶油。

颜色 有色

气味 特征的。

气味阈值 无资料。

pH 值 9.7 - 10.1

熔点/凝固点 无资料。

初始沸点和沸程 > 100 ° C (> 212 ° F)

闪点 > 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法

蒸发速率 无资料。

易燃性（固体，气体） 不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%） 无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%） 无资料。

蒸气压 无资料。

蒸气密度 无资料。

相对密度 无资料。

溶解性

溶解性（水） 无资料。

分配系数（辛醇/水） 无资料。

自燃温度 无资料。

分解温度 无资料。

黏度 无资料。

其他信息

爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	造成皮肤刺激。 可能造成皮肤过敏反应。
眼睛接触	造成严重眼损伤。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

毒理学效应信息

急性毒性 未知。

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards

Skin corrosion/irritation	Category 2
Serious eye damage/eye irritation	Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes skin irritation. Causes serious eye damage.

Precautionary statement

Prevention Wash thoroughly after handling. Wear eye protection/face protection. Wear protective gloves.

Response If on skin: Wash with plenty of water. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
LAURETH-3		68439-50-9	5
AMMONIUM HYDROXIDE		1336-21-6	1.8
OLEYL PHOSPHATE		37310-83-1	1.25
HC YELLOW NO. 2		4926-55-0	< 2

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Remove contaminated clothing. Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	PEL	35 mg/m3
		50 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Form Cream.

Color Shaded

Odor Characteristic.

Odor threshold Not available.

pH 9.7 - 10.1

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

Information on toxicological effects

Acute toxicity Not known.

AMMONIUM HYDROXIDE	Result: Corrosive

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

OLEYL PHOSPHATE	OECD 429 Result: Not Sensitizing Species: Mouse
HC YELLOW NO. 2	OECD 429, (2%) Result: Not Sensitizing Species: Mouse

Skin sensitization

AMMONIUM HYDROXIDE	Result: Not Sensitzing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

AMMONIUM HYDROXIDE	Result: In vitro tests did not show mutagenic effects
LAURETH-3	Result: In vitro tests did not show mutagenic effects
OLEYL PHOSPHATE	Result: In vitro tests did not show mutagenic effects
HC YELLOW NO. 2	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

HC YELLOW NO. 2	500 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 412 Result: NOEAL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

AMMONIUM HYDROXIDE	Result: Highly Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 27 d
HC YELLOW NO. 2	50 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 91 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

LAURETH-3	Result: Readily Biodegradable
OLEYL PHOSPHATE	26.1 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT PERMANENT COLOR - GROUP 10
Synonyms	None.
SDS number	00-21-0000370
Issue date	10-04-2020
Version number	02
Revision date	11-27-2020
Supersedes date	10-04-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye damage. Causes skin irritation. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: AMMONIUM HYDROXIDE, LAURETH-3, OLEYL PHOSPHATE

Hazard pictograms

Signal word Danger

Hazard statements

H315	Causes skin irritation.
H318	Causes serious eye damage.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.
P280	Wear protective gloves.

Response

P101	If medical advice is needed, have product container or label at hand.
P302 + P352	IF ON SKIN: Wash with plenty of water.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P332 + P313	If skin irritation occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 2,32% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 4,25% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains BISABOLOL, TOLUENE-2,5-DIAMINE SULFATE, M-AMINOPHENOL, 1-NAPHTHOL, RESORCINOL, 2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing. Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders

Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions

Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up

Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Do not breathe vapor. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
RESORCINOL (CAS 108-46-3)	STEL	91 mg/m3
		20 ppm
	TWA	46 mg/m3
		10 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	VLE	14 mg/m3
Regulatory status: Regulatory binding (VRC)		
		20 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	7 mg/m3
Regulatory status: Regulatory binding (VRC)		
		10 ppm
Regulatory status: Regulatory binding (VRC)		
RESORCINOL (CAS 108-46-3)	VME	45 mg/m3
Regulatory status: Regulatory indicative (VRI)		
		10 ppm
Regulatory status: Regulatory indicative (VRI)		

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
AMMONIUM HYDROXIDE (CAS 1336-21-6)	AGW	14 mg/m3	
		20 ppm	
RESORCINOL (CAS 108-46-3)	AGW	20 mg/m3	Inhalable fraction.
		4 ppm	Inhalable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	28 mg/m3
	TWA	14 mg/m3
RESORCINOL (CAS 108-46-3)	STEL	90 mg/m3
	TWA	45 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
RESORCINOL (CAS 108-46-3)	TWA	46 mg/m3
		10 ppm

EU. Indicative Exposure Limit Values in Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

Exposure guidelines

EU Exposure Limit Values: Skin designation

RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

Slovenia. OELs. Regulations concerning protection of workers against risks due to exposure to chemicals while working (Official Gazette of the Republic of Slovenia)

RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Characteristic.
Odor threshold	Not available.
pH	9,7 - 10,1
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.

Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT PERMANENT COLOR - GROUP 10

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

AMMONIUM HYDROXIDE (CAS 1336-21-6)
M-AMINOPHENOL (CAS 591-27-5)
RESORCINOL (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H301 Toxic if swallowed. H302 Harmful if swallowed. H312 Harmful in contact with skin. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H335 May cause respiratory irritation. H370 Causes damage to organs by ingestion. H371 May cause damage to organs by ingestion. H373 May cause damage to organs through prolonged or repeated exposure by ingestion. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	Product and Company Identification: Product and Company Identification - L'Oreal SECTION 2: Hazards identification: Hazard statements Composition / Information on Ingredients: Ingredients SECTION 9: Physical and chemical properties: Odor
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT PERMANENT COLOR - Groupe 10**

Autres moyens d'identification

Numéro de la FDS 00-21-0000370

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé

Corrosion cutanée/irritation cutanée	Catégorie 2
Lésions oculaires graves/irritation oculaire	Catégorie 1

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Provoque une irritation cutanée. Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage. Porter des gants de protection.

Intervention En contact avec la peau : Laver avec beaucoup d'eau. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation cutanée : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
LAURETH-3		68439-50-9	5

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
HYDROXYDE D'AMMONIUM		1336-21-6	1.8
OLEYL PHOSPHATE		37310-83-1	1.25
HC YELLOW NO. 2		4926-55-0	< 2

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Enlever les vêtements contaminés. Laver abondamment au savon et à l'eau. En cas d'irritation cutanée : Demander un avis médical/Consulter un médecin. Laver les vêtements contaminés avant réutilisation.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Éviter tout contact de ce produit avec les yeux. Éviter tout contact avec les yeux, la peau et les vêtements. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	PEL (limite d'exposition admissible)	35 mg/m3
		50 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm

Valeurs biologiques limites

Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés

Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux

Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial.

Protection de la peau

Protection des mains

Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre

Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire

Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques

Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale

Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique	Liquide.
Forme	Crème.
Couleur	Nuancé
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	9.7 - 10.1
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée.

Contact avec les yeux Provoque de graves lésions des yeux.

Ingestion Faible danger présumé en cas d'ingestion.

Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

HYDROXYDE D'AMMONIUM (CAS 1336-21-6) Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Dénomination chimique	Numéro d'enregistreme	% en poids.
HYDROXYDE D'AMMONIUM	1336-21-6	1.8

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT PERMANENT COLOR - GRUPPO 10
Sinonimi	Nessuno.
Numero SDS	00-21-0000370
Data di pubblicazione	10-Settembre-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli per la salute

Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.

Pericoli per l'ambiente

Pericoloso per l'ambiente acquatico, pericolo acquatico a lungo termine	Categoria 3	H412 - Nocivo per gli organismi acquatici con effetti di lunga durata.

Riepilogo dei pericoli

Provoca gravi lesioni oculari. Provoca irritazione cutanea. Pericoloso per l'ambiente se scaricato nei corsi d'acqua. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: AMMONIACA .... %, LAURETH-3, OLEYL PHOSPHATE

Pittogrammi di pericolo

Avvertenza Pericolo

Indicazioni di pericolo

H315 Provoca irritazione cutanea.
H318 Provoca gravi lesioni oculari.
H412 Nocivo per gli organismi acquatici con effetti di lunga durata.

Consigli di prudenza

Prevenzione

P102 Tenere fuori dalla portata dei bambini.
P103 Leggere l'etichetta prima dell'uso.
P260 Non respirare il vapore.
P264 Lavare attentamente dopo l'uso.
P273 Non disperdere nell'ambiente.
P280 Proteggere gli occhi.
P280 Indossare guanti protettivi.

Reazione

P101 In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P302 + P352 IN CASO DI CONTATTO CON LA PELLE: lavare abbondantemente con acqua.
P305 + P351 + P338 IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310 Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P332 + P313 In caso di irritazione della pelle: consultare un medico.
P362 + P364 Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.

Immagazzinamento Conservare lontano da materiali non compatibili.

Smaltimento

P501 Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette La miscela contiene il 2,32 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico. La miscela contiene il 4,25 % di componenti di cui è ignoto il pericolo a lungo termine per l'ambiente acquatico. EUH208 - Contiene BISABOLOL, TOLUENE-2,5-DIAMINE SULFATE, M-AMINOFENOLO, 1-NAFTOLO, RESORCINOLO, 2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE. Può provocare una reazione allergica.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Informazioni generali

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea Togliersi di dosso gli indumenti contaminati. Lavare abbondantemente con acqua e sapone. In caso di irritazione della pelle: consultare un medico. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.)

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio Non sono indicati rischi d'incendio o di esplosione particolari.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO_2).

Mezzi di estinzione non idonei Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi In caso d'incendio indossare autorespiratore e indumenti protettivi completi.

Procedure speciali per l'estinzione degli incendi Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.

Metodi specifici Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Prevedere una ventilazione adeguata. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.

Per chi interviene direttamente Allontanare il personale non necessario. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS

6.2. Precauzioni ambientali Non disperdere nell'ambiente. Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente. Evitare sversamenti o perdite supplementari, se questo può essere fatto senza pericolo. Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.

6.3. Metodi e materiali per il contenimento e per la bonifica Non scaricare il prodotto nelle fogne.

Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Assorbire in vermiculite, sabbia o terra asciutta e riporre in contenitori. Una volta recuperato il prodotto, sciacquare l'area con acqua.

Versamenti di piccole dimensioni: Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua.

Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo

6.4. Riferimento ad altre sezioni Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura Non respirare il vapore. Non permettere che questo materiale vada a contatto con gli occhi. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Garantire una ventilazione adeguata. Indossare attrezzature di protezione personale adeguate. Non disperdere nell'ambiente. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità Conservare in un recipiente ermeticamente chiuso. Conservare fuori della portata dei bambini. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite d'esposizione indicativi dell'UE in Direttive 91/322/CEE, 2000/39/CE, 2006/15/CE, 2009/161/UE

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite biologici Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate Seguire le procedure standard di monitoraggio.

Livelli derivati senza effetto (DNEL) Non conosciuto.

Prevedibili concentrazioni prive di effetti (PNEC) Non conosciuto.

Linee guida sull'esposizione

OEL Italia: Specifica cutanea

RESORCINOLO (CAS 108-46-3) Assorbimento attraverso la pelle

8.2. Controlli dell'esposizione

Controlli tecnici idonei È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.

Protezione degli occhi/del volto Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura).

Protezione della pelle

- Protezione delle mani Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.

- Altro Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici.

Protezione respiratoria Applicabile soltanto per gli impianti industriali. In caso di ventilazione insufficiente, usare un apparecchio respiratorio adatto.

Pericoli termici Indossare opportuni indumenti termoprotettivi, quando necessario.

Misure d'igiene Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti.

Controlli dell'esposizione ambientale Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto

Stato fisico Liquido.

Forma Panna.

Colore	Shaded
Odore	Caratteristico/a.
Soglia olfattiva	Non conosciuto.
pH	9,7 - 10,1
Punto di fusione/punto di congelamento	Non conosciuto.
Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	> 100,0 °C (> 212,0 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.
Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	Non sono disponibili informazioni supplementari pertinenti.

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Forti agenti ossidanti.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.
Informazioni sulle vie probabili di esposizione	
Inalazione	L'inalazione prolungata può essere nociva.
Cutanea	Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca gravi lesioni oculari.
Ingestione	In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.
Sintomi	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.)

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta	Non conosciuto.

Fattore di bioconcentrazione (BCF)

COCAMIDOPROPYL BETAINE	71

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi Nessun effetto nocivo per l’ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.

12.7. Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).

Imballaggi contaminati Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull’etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.

Codice Europeo dei Rifiuti Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.

Metodi di smaltimento/informazioni Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Impedire a questo prodotto di penetrare nelle fogne e nelle riserve d'acqua. Non contaminare stagni, canali o fossati con il prodotto chimico o il contenitore usato. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Precauzioni particolari Smaltire secondo le norme applicabili.

SEZIONE 14: Informazioni sul trasporto

RESORCINOLO (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Altri regolamenti Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.

Regolamenti nazionali Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.

15.2. Valutazione della sicurezza chimica Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni Non conosciuto.

Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H301 Tossico se ingerito. H302 Nocivo se ingerito. H312 Nocivo per contatto con la pelle. H314 Provoca gravi ustioni cutanee e gravi lesioni oculari. H315 Provoca irritazione cutanea. H317 Può provocare una reazione allergica cutanea. H318 Provoca gravi lesioni oculari. H319 Provoca grave irritazione oculare. H332 Nocivo se inalato. H335 Può irritare le vie respiratorie. H370 Provoca danni agli organi per ingestione. H371 Può provocare danni agli organi per ingestione. H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta per ingestione. H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta. H400 Molto tossico per gli organismi acquatici. H410 Molto tossico per gli organismi acquatici con effetti di lunga durata. H411 Tossico per gli organismi acquatici con effetti di lunga durata. H412 Nocivo per gli organismi acquatici con effetti di lunga durata.
Informazioni di revisione	Prodotto e la Società Identificazione: Tipi di materiale COMPOSIZIONE/INFORMAZIONI SUGLI INGREDIENTI: Ingredienti GHS: Classificazione
Informazioni formative	Seguire le istruzioni di formazione durante la manipolazione di questo materiale.
Clausole di esclusione della responsabilità	Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT PERMANENT COLOR - 组 10

鉴别的其他方法

SDS编号 00-21-0000370

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害

皮肤腐蚀/刺激	类别 2
严重眼睛损伤/眼睛刺激性	类别 1

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 造成皮肤刺激。 造成严重眼损伤。

防范说明

预防措施 作业后彻底清洗。 戴防护眼罩/防护面具。 戴防护手套。

事故响应 如皮肤沾染：用大量水清洗。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。 如发生皮肤刺激：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。

安全储存 远离禁忌物保存。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
LAURETH-3		68439-50-9	5
氢氧化铵		1336-21-6	1.8
OLEYL PHOSPHATE		37310-83-1	1.25
HC YELLOW NO. 2		4926-55-0	< 2

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入	移至空气新鲜处。 如果症状持续或恶化，联络医生。
皮肤接触	脱掉受污染的衣服。 用大量肥皂和水清洗。 如发生皮肤刺激：求医/就诊。 沾染的衣服清洗后方可重新使用。
眼睛接触	立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即就医。
经口	漱口。 如症状出现，就医。
最重要的症状/影响，急性和延迟性	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。
指明任何需要立即就医或特殊治疗的情况	提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。
一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	发生火灾时，使用自给式呼吸设备并穿全身防护服。
消防设备/使用说明	在不会发生危险的情况下将容器撤离火灾现场。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。
一般火灾危险	无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	不得让本材料接触眼睛。 避免接触眼睛、皮肤和衣物。 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参數

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
氢氧化铵 (CAS 1336-21-6)	PEL-常期暴露极限	35 mg/m3
		50 ppm

美国ACGIH阈限值

组分	类型	标准值
氢氧化铵 (CAS 1336-21-6)	TWA	25 ppm
	短期暴露极限（STEL）	35 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
氢氧化铵 (CAS 1336-21-6)	TWA	18 mg/m3
		25 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南 组分	类型	标准值
	短期暴露极限（STEL）	27 mg/m3 35 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼和安全淋浴设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 佩戴带侧边的安全眼镜（护目镜）和面罩。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。

呼吸系统防护 仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状 液体。

形状 奶油。

颜色 有色

气味 特征的。

气味阈值 无资料。

pH 值 9.7 - 10.1

熔点/凝固点 无资料。

初始沸点和沸程 > 100 ° C (> 212 ° F)

闪点 > 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法

蒸发速率 无资料。

易燃性（固体，气体） 不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%） 无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%） 无资料。

蒸气压 无资料。

蒸气密度 无资料。

相对密度 无资料。

溶解性

溶解性（水） 无资料。

分配系数（辛醇/水） 无资料。

自燃温度 无资料。

分解温度 无资料。

黏度 无资料。

其他信息

爆炸特性 不具有爆炸性。

氧化特性 没有氧化性。

10. 稳定性和反应性

反应性 产品在正常的使用、储存和运输条件下是稳定的和非活性的。

化学稳定性 正常条件下物料稳定。

可能的危险反应 正常使用的条件下未见有危险反应。

避免接触的条件 远离热，热表面，火花，明火和其他点火源。 接触禁配物。

禁配物 强氧化剂。

危险的分解产物 没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入 持续的吸入可能是有害的。

皮肤接触 造成皮肤刺激。

眼睛接触 造成严重眼损伤。

经口 预计较低的食入危害。

与物理,化学和毒物学特性有关的症状 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。

毒理学效应信息

急性毒性 未知。

产品	物种	试验结果

皮肤腐蚀/刺激 造成皮肤刺激。

刺激性腐蚀性 - 皮肤

氢氧化铵	OECD 404 结果: 腐蚀性的 物种: 大鼠

刺激性腐蚀性 - 皮肤

LAURETH-3	OECD 404 结果: 轻微刺激性 物种: 兔子
HC YELLOW NO. 2	OECD 439 结果: 非刺激性 物种: RhE
OLEYL PHOSPHATE	OECD 439 结果: 非刺激性 物种: RhE

严重眼睛损伤/眼睛刺激性 造成严重眼损伤。

刺激性腐蚀性 - 眼睛

LAURETH-3	OECD 405 结果: 腐蚀性的 物种: 兔子
HC YELLOW NO. 2	OECD 438 结果: 刺激性的 物种: ICE
OLEYL PHOSPHATE	OECD 438 结果: 腐蚀性的 物种: 在試管内
氢氧化铵	结果: 腐蚀性的

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物

OLEYL PHOSPHATE	OECD 429 结果: Not Sensitizing 物种: 小鼠
HC YELLOW NO. 2	OECD 429, (2%) 结果: Not Sensitizing 物种: 小鼠
氢氧化铵	结果: Not Sensitzing 物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

LAURETH-3	结果: 离体试验未见诱变效应
OLEYL PHOSPHATE	结果: 离体试验未见诱变效应
氢氧化铵	结果: 离体试验未见诱变效应
HC YELLOW NO. 2	结果: 离体试验表明有在活体试验中未观察到的诱变效应。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

HC YELLOW NO. 2	500 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 412 结果: NOEAL 物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

氢氧化铵	结果: 高刺激性

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触

OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 27 D
HC YELLOW NO. 2	50 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 91 D

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
HC YELLOW NO. 2 (CAS 4926-55-0)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	92.8 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	79.1 mg/l, 72 h OECD 201
LAURETH-3 (CAS 68439-50-9)			
水生的			
急性的			
其它的, 其它	EC0	恶臭假单胞菌	> 100 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	1 - 10 mg/l, 48 h OECD 202
藻类	EC50	Desmodesmus subspicatus	1 - 10 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	1 - 10 mg/l, 96 h ISO 7346-2
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	<= 1 mg/l, 21 D
OLEYL PHOSPHATE (CAS 37310-83-1)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	318.56 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	> 100 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	> 100 mg/l, 72 h OECD 201
	无明显反应浓度（NOEC）	近头状伪蹄形藻	100 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	> 100 mg/l, 96 h OECD 203
氢氧化铵 (CAS 1336-21-6)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	101 mg/l, 48 h ASTM E729-80
藻类	EC50	普通小球藻	2700 mg/l, 18 D
鱼	LC50	虹鳟鱼	0.89 mg/l, 96 h
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.79 mg/l, 21 D
鱼	无明显反应浓度（NOEC）	虹鳟鱼	1.2 mg/l, 61 D OECD 210

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

HC YELLOW NO. 2	2.5 - 4 % OECD 301 F 结果: 不容易生物降解 测试时间: 28 D
LAURETH-3	结果: 易生物降解
OLEYL PHOSPHATE	26.1 % OECD 301 D 结果: 易生物降解 测试时间: 28 D

潜在的生物累积性

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

国际航空运输协会(IATA)

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

国际海运危险货物规则(IMDG)

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

氢氧化铵 (CAS 1336-21-6) 适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

化学名称	登记号(CAS号)	% by wt.
氢氧化铵	1336-21-6	1.8

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

16. 其他信息，包括编制日期或最新修订日期

最初编制日期 27-十一月-2020

版本号 01

NFPA分级 健康 3
可燃性 1
不稳定性: 0

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT SEMI-PERMANENT COLOR - GROUP 10**

Other means of identification

SDS number 00-22-0000168

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Warning

Hazard statement Causes serious eye irritation.

Precautionary statement

Prevention Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1
PETROLATUM		8009-03-8	≤ 1

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Indication of immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value	Form
PETROLATUM (CAS 8009-03-8)	PEL	5 mg/m3	Mist.

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
PETROLATUM (CAS 8009-03-8)	TWA	5 mg/m3	Inhalable fraction.

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value	Form
PETROLATUM (CAS 8009-03-8)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Form Cream.

Color Shaded

Odor Characteristic.

Odor threshold Not available.

pH 3.8 - 4.8

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.98 - 1 g/cm³
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Information on toxicological effects

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 Result: Corrosive Species: Rabbit
PETROLATUM	OECD 405, Based on test data for structurally similar materials. Result: Not Irritating Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Not a respiratory sensitizer.

Skin sensitization This product is not expected to cause skin sensitization.

Skin sensitization

PETROLATUM	OECD 406 Result: Not Sensitizing Species: Guinea pig
STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.

Mutagenicity

STEARAMIDOPROPYL DIMETHYLAMINE	Result: In vitro tests did not show mutagenic effects
PETROLATUM	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

PETROLATUM (CAS 8009-03-8)	Known To Be Human Carcinogen.

Reproductive toxicity This product is not expected to cause reproductive or developmental effects.

Developmental effects

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, No effects on development Result: NOAEL Species: Rat
PETROLATUM	30 mg/kg bw/d OECD 414, Based on test data for structurally similar materials. Result: NOAEL Species: Rat

Reproductivity

PETROLATUM	> 1000 mg/kg bw/d OECD 421, Based on test data for structurally similar materials. Result: NOAEL Species: Rat

Reproductivity

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Not classified.

Specific target organ toxicity - repeated exposure Not classified.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dermal Result: NOAEL Species: Rat Test Duration: 90 d
PETROLATUM	5000 mg/kg bw/d OECD 453, Oral Result: NOAEL Species: Rat

Aspiration hazard Not an aspiration hazard.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
PETROLATUM (CAS 8009-03-8)			
Aquatic			
Acute			
Algae	NOEL	Pseudokirchneriella subcapitata	> 100 mg/l, 72 h Based on test data for structurally similar materials.
Crustacea	NOEL	Daphnia magna	> 10000 mg/l, 48 h Based on test data for structurally similar materials.
Fish	LL50	Pimephales promelas	> 100 mg/l, 96 h Based on test data for structurally similar materials.
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0.14 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0.381 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	0.1 - 1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	100 - 1000 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.2 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0.1 mg/l, 9 d OECD 212

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

PETROLATUM	> 6

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

1. Identification

Identificateur de produit **PULP RIOT SEMI-PERMANENT COLOR - Groupe 10**

Autres moyens d'identification

Numéro de la FDS 00-22-0000168

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Lésions oculaires graves/irritation oculaire Catégorie 2A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Attention

Mention de danger Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1
Pétrolatum		8009-03-8	≤ 1

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.
Contact avec la peau	Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.
Contact avec les yeux	Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.
Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Éviter tout contact avec les yeux. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d’exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d’exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur	Forme
Pétrolatum (CAS 8009-03-8)	PEL (limite d'exposition admissible)	5 mg/m3	Brouillard.

ÉTATS-UNIS. Valeurs limites d’exposition de l’ACGIH

Composants	Type	Valeur	Forme
Pétrolatum (CAS 8009-03-8)	TWA	5 mg/m3	Fraction inhalable.

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur	Forme
Pétrolatum (CAS 8009-03-8)	STEL	10 mg/m3	Brouillard.
	TWA	5 mg/m3	Brouillard.

Valeurs biologiques limites Aucune limite d’exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Crème.

Couleur Nuancé

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH 3.8 - 4.8

Point de fusion et point de congélation Non disponible.

Point initial d’ébullition et domaine d’ébullition > 100 °C (> 212 °F)

Point d’éclair > 100.0 °C (> 212.0 °F) Coupelle fermée

Taux d’évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d'inflammabilité ou d'explosibilité

Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Densité	0.98 - 1 g/cm3
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.

Renseignements sur les effets toxicologiques

Toxicité aiguë

Produit	Espèces	Résultats d'épreuves
PULP RIOT SEMI-PERMANENT COLOR - Groupe 10		
Aiguë		
Cutané		
ATEmix		3.226e+006 mg/kg

Aiguë		
Cutané		
DL50	Lapin	> 2000 mg/kg bw Basé sur des données expérimentales relatives à des produits de structure semblable.
Orale		
DL50	Rat	> 5000 mg/kg bw Basé sur des données expérimentales relatives à des produits de structure semblable.
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)		
Aiguë		
Cutané		
DL50	Lapin	> 2000 mg/kg
Orale		
DL50	Rat	> 2000 mg/kg OECD 423

Corrosion cutanée/irritation cutanée On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

Pétrolatum	OCDE 404, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: Non Irritant Espèces: Lapin
STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Résultat: Légèrement Irritant Espèces: Lapin

Lésions oculaires graves/irritation oculaire Provoque une sévère irritation des yeux.

Irritation- corrosion - Œil

STEARAMIDOPROPYL DIMETHYLAMINE	OCDE 405 Résultat: Corrosif Espèces: Lapin
Pétrolatum	OCDE 405, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: Non Irritant Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire Pas un sensibilisant respiratoire.

Sensibilisation cutanée On ne s'attend pas à ce que ce produit provoque une sensibilisation cutanée.

Sensibilisation cutanée

Pétrolatum	OCDE 406 Résultat: Non Sensibilisant Espèces: Cobaye
STEARAMIDOPROPYL DIMETHYLAMINE	OCDE 406 Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales Il n'existe pas de données qui indiquent que ce produit, ou tout composant présent à des taux de plus de 0,1 %, soit mutagène ou génétoxique.

Mutagénicité

STEARAMIDOPROPYL DIMETHYLAMINE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
Pétrolatum	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Pétrolatum (CAS 8009-03-8)	Carcinogène connu chez l'homme.

Toxicité pour la reproduction On ne s'attend pas à ce que ce produit présente des effets sur la reproduction ou le développement.

Effets sur le développement

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OCDE 421, Pas d'effets sur le développement Résultat: DSENO Espèces: Rat
Pétrolatum	30 mg/kg bw/d OCDE 414, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: DSENO Espèces: Rat

Reproductivité

Pétrolatum	> 1000 mg/kg bw/d OCDE 421, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: DSENO Espèces: Rat
STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OCDE 421 Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique Non classé.

Toxicité pour certains organes cibles - expositions répétées Non classé.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OCDE 411, Cutané Résultat: DSENO Espèces: Rat Durée du test: 90 d
Pétrolatum	5000 mg/kg bw/d OCDE 453, Orale Résultat: DSENO Espèces: Rat

Danger par aspiration Pas un danger par aspiration.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
Pétrolatum (CAS 8009-03-8)

Pétrolatum	> 6

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

2. 危险标识

物理危险 未被分类。

健康危害 严重眼睛损伤/眼睛刺激性 类别 2A

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 警告

危险性说明 造成严重眼刺激。

防范说明

预防措施 作业后彻底清洗。 戴防护眼罩/防护面具。

事故响应 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如仍觉眼刺激：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。

安全储存 远离禁忌物保存。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1
凡士林		8009-03-8	≤ 1

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如仍觉眼刺激：求医/就诊。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。

指明任何需要立即就医或特殊治疗的情况 提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂 水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质 禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施 发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明 在不会发生危险的情况下将容器撤离火灾现场。

特定的方法 采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险 无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序 让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料 大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施 防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项 避免接触到眼睛。 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物 储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值	形状
凡士林 (CAS 8009-03-8)	PEL-常期暴露极限	5 mg/m3	雾气。

美国ACGIH阈限值

组分	类型	标准值	形状
凡士林 (CAS 8009-03-8)	TWA	5 mg/m3	可吸入组分。

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值	形状
凡士林 (CAS 8009-03-8)	TWA	5 mg/m3	雾气。
	短期暴露极限（STEL）	10 mg/m3	雾气。

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。

呼吸系统防护 仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状 液体。

形状 奶油。

颜色 有色

气味 特征的。

气味阈值 无资料。

pH 值 3.8 - 4.8

熔点/凝固点 无资料。

初始沸点和沸程 > 100 ° C (> 212 ° F)

闪点 > 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法

蒸发速率 无资料。

易燃性（固体，气体） 不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%） 无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%） 无资料。

蒸气压 无资料。

蒸气密度 无资料。

相对密度 无资料。

溶解性

溶解性（水） 无资料。

分配系数（辛醇/水） 无资料。

自燃温度 无资料。

分解温度 无资料。

黏度 无资料。

其他信息

密度 0.98 - 1 g/cm³

爆炸特性 不具有爆炸性。

氧化特性 没有氧化性。

10. 稳定性和反应性

反应性 产品在正常的使用、储存和运输条件下是稳定的和非活性的。

化学稳定性 正常条件下物料稳定。

可能的危险反应 正常使用的条件下未见有危险反应。

避免接触的条件 远离热，热表面，火花，明火和其他点火源。 接触禁配物。

禁配物 强氧化剂。

危险的分解产物 没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入 持续的吸入可能是有害的。

皮肤接触 预计没有因皮肤接触导致的任何有害影响。

眼睛接触 造成严重眼刺激。

经口 预计较低的食入危害。

与物理,化学和毒物学特性有关的症状 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。

毒理学效应信息

急性毒性

产品	物种	试验结果
PULP RIOT SEMI-PERMANENT COLOR - 组 10		
急性的		
经口		
ATEmix		120300 mg/kg
经皮肤		
ATEmix		3.226e+006 mg/kg

组分	物种	试验结果
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)		
急性的		
经口		
LD50	大鼠	> 2000 mg/kg 经济合作发展组织 423
经皮肤		
LD50	兔子	> 2000 mg/kg
凡士林 (CAS 8009-03-8)		
急性的		
经口		
LD50	大鼠	> 5000 mg/kg bw 根据结构相似材料的试验数据。
经皮肤		
LD50	兔子	> 2000 mg/kg bw 根据结构相似材料的试验数据。

皮肤腐蚀/刺激 预计没有因皮肤接触导致的任何有害影响。

刺激性腐蚀性 - 皮肤

凡士林	OECD 404, 根据结构相似材料的试验数据。 结果: 非刺激性 物种: 兔子
STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 结果: 轻微刺激性 物种: 兔子

严重眼睛损伤/眼睛刺激性 造成严重眼刺激。

刺激性腐蚀性 - 眼睛

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 结果: 腐蚀性的 物种: 兔子
凡士林	OECD 405, 根据结构相似材料的试验数据。 结果: 非刺激性 物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 不是呼吸道致敏物。

皮肤致敏物 此产品将不会引起皮肤敏感。

皮肤致敏物

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 结果: Not Sensitizing 物种: 豚鼠
凡士林	OECD 406 结果: Not Sensitizing 物种: 豚鼠

生殖细胞突变性 无数据表明本产品或其含量超过0.1%的任何组分具有致变性或基因毒性。

突变性

STEARAMIDOPROPYL DIMETHYLAMINE	结果: 离体试验未见诱变效应
凡士林	结果: 离体试验表明有在活体试验中未观察到的诱变效应。

致癌性 尚不能确定对人有致癌作用。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

凡士林 (CAS 8009-03-8) 已知为人类致癌物质。

生殖毒性 这种产品预期不会导致生殖或发育效应。

发育效应

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, 对发展没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
凡士林	30 mg/kg bw/d OECD 414, 根据结构相似材料的试验数据。 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

凡士林	> 1000 mg/kg bw/d OECD 421, 根据结构相似材料的试验数据。 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

特定目标器官系统毒性－单次接触 未被分类。

特定目标器官系统毒性－重复接触 未被分类。

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, 经皮肤 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
凡士林	5000 mg/kg bw/d OECD 453, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

吸入危害 非吸入危险。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	100 - 1000 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.381 mg/l, 48 h OECD 202
藻类	EC50	Desmodesmus subspicatus	0.14 mg/l, 72 h OECD 201
鱼	LC50	虹鳟鱼	0.1 - 1 mg/l, 96 h OECD 203
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.2 mg/l, 21 D OECD 211
鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	0.1 mg/l, 9 D OECD 212
凡士林 (CAS 8009-03-8)			
水生的			
急性的			
甲壳纲动物	无可观察到的效应剂量（NOEL）	水蚤	> 10000 mg/l, 48 h 根据结构相似材料的试验数据。

组分		物种	试验结果
藻类	无可观察到的效应剂量（NOEL）	近头状伪蹄形藻	> 100 mg/l, 72 h 根据结构相似材料的试验数据。
鱼	LL50	呆鲦鱼	> 100 mg/l, 96 h 根据结构相似材料的试验数据。

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 结果: 易生物降解 测试时间: 28 D

潜在的生物累积性

辛醇/水分配系数 log Kow

凡士林	> 6

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

国际航空运输协会(IATA)

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

国际海运危险货物规则(IMDG)

FINISHED GOODS

不作为危险货物运输

BULK

不作为危险货物运输

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

不适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

16. 其他信息，包括编制日期或最新修订日期

最初编制日期 14-二月-2023

版本号 01

NFPA分级 健康 2
可燃性 1
不稳定性: 0

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

修订信息 产品和公司标识 : 产品和公司标识 - L'Oreal
危险标识: 事故响应
合成物/成分信息: 成分
急救措施: 眼睛接触
急救措施: 吸入
急救措施: 皮肤接触
操作处置与储存: 安全储存条件，包括任何禁配物
接触控制/个体防护: 眼/面保护
接触控制/个体防护: 手防护
接触控制/个体防护: 呼吸系统防护
理化特性：多项属性
稳定性和反应性: 避免接触的条件

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT SEMI-PERMANENT COLOR - GRUPO 10**

Otros medios de identificación

Número de FDS 00-22-0000168

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos No clasificado.

Peligros para la salud Lesiones oculares graves/irritación ocular Categoría 2A

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Atención

Declaración de peligro Provoca irritación ocular grave.

Consejos de prudencia

Prevención Lavarse concienzudamente tras la manipulación. Llevar protección ocular/facial.

Respuesta En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. Si persiste la irritación ocular: Consultar a un médico. Quitar las prendas contaminadas y lavarlas antes de volver a usarlas.

Almacenamiento Consérvese alejado de materiales incompatibles.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1
PETROLATO		8009-03-8	≤ 1

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación	Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.
Contacto con la piel	Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.
Contacto con los ojos	Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Si persiste la irritación ocular: Consultar a un médico.
Ingestión	Enjuagarse la boca. Obtenga atención médica en caso de síntomas.
Principales síntomas y efectos, agudos y retardados	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa.
Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Provea las medidas de apoyo generales y de tratamiento sintomático. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.
Información general	Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Ningún riesgo excepcional de incendio o explosión señalado.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Use equipo y ropa de protección apropiados durante la limpieza. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Asegúrese una ventilación apropiada. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	Evítese el contacto con los ojos. Evite la exposición prolongada. Asegúre una ventilación adecuada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.
Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Almacenar en un recipiente herméticamente cerrado. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Límites de exposición profesional

Los constituyentes siguientes son los únicos constituyentes del producto que tienen un PEL, TLV u otro límite de exposición recomendado. En este momento, los demás constituyentes no tienen límites de exposición conocidos.

EEUU. Administración de Seguridad y Salud Ocupacional (OSHA) Tabla Z-1 Límites para los contaminantes del aire (29 CFR 1910.1000)

Componentes	Tipo	Valor	Forma
PETROLATO (CAS 8009-03-8)	Limite de Exposición Permisible (LEP)	5 mg/m³	Neblina.

EE.UU. ACGIH Valores umbrales límite

Componentes	Tipo	Valor	Forma
PETROLATO (CAS 8009-03-8)	TWA	5 mg/m³	Fracción inhalable.

EEUU. Instituto Nacional para la Seguridad y Salud Ocupacional (NIOSH): Guía de bolsillo sobre riesgos químicos

Componentes	Tipo	Valor	Forma
PETROLATO (CAS 8009-03-8)	STEL	10 mg/m³	Neblina.
	TWA	5 mg/m³	Neblina.

Valores límite biológicos No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.

Controles técnicos apropiados Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación para lavado de ojos.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).

Protección de la piel

Protección de las manos De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros De aplicación solamente en entornos industriales. Use ropa adecuada resistente a los productos químicos.

Protección respiratoria De aplicación solamente en entornos industriales. En caso de ventilación insuficiente, úsese equipo respiratorio adecuado.

Peligros térmicos Use ropa protectora térmica adecuada si resulta necesario.

Consideraciones generales de higiene Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto

Estado físico Líquido.

Forma Nata.

Color Sombreado

Olor Característico.

Umbral olfativo No disponible.

pH 3.8 - 4.8

Punto de fusión/punto de congelación No disponible.

Punto inicial de ebullición e intervalo de ebullición > 100 °C (> 212 °F)

Punto de inflamación > 100.0 °C (> 212.0 °F) Copa Cerrada

Tasa de evaporación No disponible.

Inflamabilidad (sólido, gas)	No aplicable.

Límites superior/inferior de inflamabilidad o de explosividad

Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.

Solubilidad(es)

Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.

Información adicional

Densidad	0.98 - 1 g/cm³
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	La inhalación prolongada puede resultar nociva.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	Provoca irritación ocular grave.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa.

Información sobre los efectos toxicológicos

Toxicidad aguda

Producto	Especies	Resultados de la prueba
PULP RIOT SEMI-PERMANENT COLOR - GRUPO 10		
Agudo		
Dérmico		
ATEmix		3.226e+006 mg/kg
Oral		
ATEmix		120300 mg/kg

PETROLATO	OECD 405, Basado en datos de pruebas para materiales estructuralmente similares Resultado: No Irritante Especies: Conejo

Sensibilización respiratoria o cutánea

Sensibilización respiratoria No es un sensibilizante respiratorio.

Sensibilización cutánea No se espera que este producto cause sensibilización cutánea.

Sensibilización cutánea

PETROLATO	OECD 406 Resultado: Not Sensibilizante Especies: Conejillo de indias
STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Resultado: Not Sensibilizante Especies: Conejillo de indias

Mutagenicidad en células germinales No hay datos disponibles que indiquen que el producto o cualquier compuesto presente en una cantidad superior al 0.1% sea mutagénico o genotóxico.

Mutagenicidad

PETROLATO	Resultado: Las pruebas in vitro demostraron efectos mutágenos los cuáles no fueron observados con la prueba in vivo.
STEARAMIDOPROPYL DIMETHYLAMINE	Resultado: Las pruebas in vitro no demostraron efectos mutágenos

Carcinogenicidad No clasificable en cuanto a su carcinogenicidad para los seres humanos.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

PETROLATO (CAS 8009-03-8)	Carcinógeno conocido para los seres humanos.

Toxicidad para la reproducción No se espera que este producto tenga efectos adversos para la reproducción o el feto.

Efectos sobre el desarrollo

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OCDE 421, No afecta el desarrollo Resultado: NOAEL Especies: Rata
PETROLATO	30 mg/kg bw/d OECD 414, Basado en datos de pruebas para materiales estructuralmente similares Resultado: NOAEL Especies: Rata

Reproductividad

PETROLATO	> 1000 mg/kg bw/d OCDE 421, Basado en datos de pruebas para materiales estructuralmente similares Resultado: NOAEL Especies: Rata
STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OCDE 421 Resultado: NOAEL Especies: Rata

Toxicidad específica en determinados órganos – exposición única No clasificado.

Toxicidad específica en determinados órganos – exposición repetida No clasificado.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dérmico Resultado: NOAEL Especies: Rata Duración de la prueba: 90 d
PETROLATO	5000 mg/kg bw/d OECD 453, Oral Resultado: NOAEL Especies: Rata

Peligro por aspiración No constituye ningún peligro por aspiración.

Información adicional En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Componentes		Especies	Resultados de la prueba
PETROLATO (CAS 8009-03-8)			
Acuático (a)			
Agudo			
Algas	NOEL	Pseudokirchneriella subcapitata	> 100 mg/l, 72 h Basado en datos de pruebas para materiales estructuralmente similares
Crustáceos	NOEL	Dafnia magna	> 10000 mg/l, 48 h Basado en datos de pruebas para materiales estructuralmente similares

Componentes		Especies	Resultados de la prueba
Pez	LL50	Pimephales promelas	> 100 mg/l, 96 h Basado en datos de pruebas para materiales estructuralmente similares

STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)

Acuático (a)			
Agudo			
Algas	EC50	Desmodesmus subspicatus	0.14 mg/l, 72 h OECD 201
Crustáceos	EC50	Dafnia magna	0.381 mg/l, 48 h OECD 202
Otros	EC50	Lodo activado de una depuradora predominantemente doméstica	100 - 1000 mg/l, 3 h OECD 209
Pez	LC50	Oncorhynchus mykiss	0.1 - 1 mg/l, 96 h OECD 203
Crónico			
Crustáceos	NOEC	Dafnia magna	0.2 mg/l, 21 d OECD 211

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Resultado: Fácilmente Biodegradable Duración de la prueba: 28 d

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

PETROLATO	> 6

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

2. Nhận diện các hiểm họa

Hiểm Họa Vật Lý Không được phân loại.

Hiểm Họa Cho Sức Khỏe Gây tổn thương mắt /kích ứng mắt nghiêm trọng Loại 2A

OSHA defined hazards Không được phân loại.

Các thành phần của nhãn

Từ cảnh báo Cảnh báo

Công bố hiểm họa Gây kích ứng mắt nghiêm trọng.

Thông điệp đề phòng

Phòng Ngừa Rửa kỹ sau khi thao tác. Sử dụng phương tiện bảo vệ mắt/mặt.

Ứng phó Nếu bị văng vào mắt: Rửa cẩn thận bằng nước trong nhiều phút. Lấy kính tiếp xúc ra, nếu có và dễ thực hiện. Tiếp tục rửa. Nếu vẫn không hết bị kích ứng mắt: Tìm bác sĩ hướng dẫn/chăm sóc. Cởi bỏ quần áo bị ô nhiễm và đem giặt trước khi dùng lại.

Bảo Quản Bảo quản tránh xa các vật liệu tương kỵ.

Thải bỏ Thải bỏ chất thải và các phần cặn dư theo các quy định của cơ quan có thẩm quyền tại địa phương.

Hazard(s) not otherwise classified (HNOC) Chưa được biết.

Thông tin thêm Không có.

3. Thành phần/ thông tin về các phụ liệu

Các hỗn hợp

Tên Hóa Chất	Tên thông dụng và từ đồng nghĩa	Số CAS	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1
PETROLATUM		8009-03-8	≤ 1

*Cho biết lai lịch và/hoặc thành phần phần trăm của một hóa chất cụ thể đã được lưu giữ ở dạng bí mật thương mại.

4. Các biện pháp sơ cứu

Hít phải	Đưa ra nơi không khí trong lành. Hãy gọi cho bác sĩ nếu các triệu chứng xuất hiện hoặc không hết.
Tiếp xúc với da	Rửa sạch bằng xà bông và nước. Tìm kiếm sự chăm sóc y tế nếu vùng kích ứng lan rộng và dai dẳng
Tiếp xúc với mắt	Rửa mắt ngay bằng nhiều nước trong ít nhất 15 phút. Tháo kính sát tròng, nếu có và nếu dễ tháo. Tiếp tục súc rửa. Nếu vẫn không hết bị kích ứng mắt: Tìm bác sĩ hướng dẫn/chăm sóc.
Ăn phải	Súc miệng. Tìm gặp y bác sĩ để điều trị nếu các triệu chứng xảy ra.
Các triệu chứng/tác dụng quan trọng nhất, cấp tính và chậm xuất hiện	Kích ứng mắt nghiêm trọng. Các triệu chứng có thể bao gồm xót, chảy nước mắt, đỏ, sưng, và mờ mắt.
Dấu hiệu cần phải được chăm sóc y tế ngay lập tức và điều trị đặc biệt	Có các biện pháp hỗ trợ tổng quát và điều trị triệu chứng. Theo dõi nạn nhân. Các triệu chứng có thể chậm.
Thông tin tổng quát	Đảm bảo rằng các nhân viên y tế nhận thức được (các) vật liệu liên quan, và thực hiện thận trọng để bảo vệ chính mình.

5. Các biện pháp cứu hỏa

Các chất chữa cháy phù hợp	Sương nước. Bọt. Bộ hóa chất khô. Carbon dioxide (CO2).
Chất chữa cháy không phù hợp	Không dùng vòi xịt nước để dập lửa, vì việc này sẽ gây lan thêm lửa.
Hiểm họa đặc trưng phát sinh từ hóa chất	Trong khi cháy, các khí nguy hiểm cho sức khỏe có thể được hình thành.
Trang bị bảo hộ đặc biệt cho nhân viên chữa cháy	Phải sử dụng thiết bị thở tự điều khiển và trang phục bảo hộ đầy đủ khi chữa cháy.
Các chỉ dẫn/trang thiết bị cứu hỏa	Đưa các thùng chứa ra khỏi khu vực cháy nếu bạn có thể làm mà không gặp nguy hiểm.
Các biện pháp cụ thể	Sử dụng các quy trình chữa cháy tiêu chuẩn và xem xét các hiểm họa của các vật liệu liên quan khác.
Các hiểm họa cháy nói chung	Không có hiểm họa cháy hoặc nổ bất thường nào đáng chú ý.

6. Các biện pháp xử lý rò rỉ bất ngờ

Các biện pháp đề phòng cá nhân, thiết bị bảo vệ và các quy trình xử lý khẩn cấp	Để xa những người không cần thiết. Giữ mọi người tránh xa khỏi khu vực tràn đổ/rò rỉ và tránh hướng gió thổi. Mang thiết bị và quần áo bảo hộ thích hợp trong khi dọn dẹp. Không chạm vào các dụng cụ đựng đã hư hỏng hoặc vật liệu tràn đổ trừ khi có sử dụng trang phục bảo vệ phù hợp. Đảm bảo sự thông hơi đầy đủ. Các nhà chức trách địa phương cần được thông báo nếu xảy ra sự cố tràn đổ lớn không thể kiểm soát được. Về vấn đề bảo hộ cá nhân, xin xem mục 8 của Phiếu An Toàn Hóa Chất.
Phương pháp và vật liệu để ngăn chặn và làm sạch	Lượng Đổ Lớn: Ngăn dòng chảy vật liệu, nếu việc này không gây nguy hiểm. Đắp đê giữ vật liệu đã đổ, khi có thể. Dùng chất khoáng bón cây, cát hoặc đất khô thấm hút rồi cho vào thùng chứa. Sau khi thu hồi sản phẩm, dùng nước xả sạch khu vực. Lượng Đổ Nhỏ: Lau sạch bằng các vật liệu hút nước (ví dụ như khăn, bông). Làm sạch bề mặt cẩn thận để loại bỏ lượng ô nhiễm còn lại. Không bao giờ bỏ chất đã đổ vào bao chứa ban đầu để tái sử dụng. Về thải bỏ chất thải, xin xem mục 13 của Phiếu An Toàn Hóa Chất.
Các biện pháp đề phòng cho môi trường	Không xả vào cống rãnh, kênh rạch hoặc xuống đất.

7. Thao tác và bảo quản

Các biện pháp đề phòng cho thao tác an toàn	Tránh tiếp xúc với mắt. Tránh tiếp xúc lâu. Thực hiện thông khí đầy đủ. Sử dụng thiết bị bảo hộ cá nhân phù hợp. Giám sát thực hiện tốt các biện pháp vệ sinh công nghiệp.
Các điều kiện bảo quản an toàn, kể cả mọi tính chất tương kỵ	Cất giữ trong dụng cụ đựng thật kín. Giữ xa tầm tay của trẻ em. Bảo quản xa các vật liệu tương kỵ (Xem Mục 10 của Phiếu An Toàn Hóa Chất).

8. Kiểm soát việc tiếp xúc / bảo hộ cá nhân

Các giới hạn tiếp xúc nghề nghiệp

Các cấu tử sau đây là những cấu tử duy nhất của sản phẩm có giá trị PEL, TLV hoặc giới hạn tiếp xúc đề nghị khác. Hiện nay, những cấu tử khác chưa được biết giới hạn tiếp xúc.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Thành phần	Loại	Giá trị	Dạng
PETROLATUM (CAS 8009-03-8)	PEL	5 mg/m3	Sương.

Các Ngưỡng Giới Hạn của Hiệp Hội Vệ Sinh Công Nghiệp Hoa Kỳ (ACGIH), Hoa Kỳ

Thành phần	Loại	Giá trị	Dạng
PETROLATUM (CAS 8009-03-8)	TWA	5 mg/m3	Phần có thể hít.

NIOSH của Hoa Kỳ: Hướng Dẫn Bỏ Túi về Hiểm Họa Hóa Chất

Thành phần	Loại	Giá trị	Dạng
PETROLATUM (CAS 8009-03-8)	STEL	10 mg/m3	Sương.
	TWA	5 mg/m3	Sương.

Các giá trị giới hạn sinh học Không có giới hạn tiếp xúc sinh học nào đáng lưu ý cho (các) thành phần.

Các biện pháp kiểm soát kỹ thuật phù hợp Nên sử dụng phương pháp thông khí toàn bộ. Tốc độ thông khí phải phù hợp với các điều kiện. Nếu áp dụng, sử dụng tủ xử lý kín, thông hút khí tại chỗ, hoặc các biện pháp kỹ thuật khác để duy trì mức nồng độ trong không khí dưới giới hạn tiếp xúc đề nghị. Nếu chưa thiết lập được các giới hạn tiếp xúc, hãy duy trì mức nồng độ trong không khí ở mức có thể chấp nhận. Cung cấp nơi rửa mắt.

Các biện pháp bảo vệ cá nhân, như trang bị bảo hộ cá nhân

Biện pháp bảo vệ mắt/mặt Chỉ được áp dụng đối với các môi trường công nghiệp. Đeo kính an toàn có gờ chắn bên (hoặc kính bảo hộ).

Bảo vệ da

Bảo vệ tay Chỉ được áp dụng đối với các môi trường công nghiệp. Mang bao tay chống hóa chất thích hợp.

Khác Chỉ được áp dụng đối với các môi trường công nghiệp. Mặc quần áo chống hóa chất thích hợp.

Bảo vệ đường hô hấp Chỉ được áp dụng đối với các môi trường công nghiệp. Trong trường hợp không đủ thông thoáng, sử dụng thiết bị bảo vệ đường hô hấp phù hợp.

Các hiểm họa nhiệt Sử dụng trang phục bảo hộ chống nhiệt, khi cần thiết.

Các lưu ý vệ sinh chung Luôn giám sát việc thực hiện tốt các biện pháp vệ sinh cá nhân, như rửa sạch sau khi làm việc với vật liệu và trước khi ăn, uống, và/hoặc hút thuốc. Thường xuyên giặt quần áo và các thiết bị bảo hộ cho sạch các chất gây ô nhiễm.

9. Tính chất lý hóa

Ngoại Quan

Trạng thái vật lý Chất lỏng.

Dạng Kem.

Màu Màu

Mùi Đặc điểm.

Ngưỡng phát hiện mùi Không có.

pH 3.8 - 4.8

Điểm chảy/điểm đông Không có.

Điểm và vùng nhiệt độ sôi ban đầu > 100 °C (> 212 °F)

Điểm chớp cháy > 100.0 °C (> 212.0 °F) Cốc Kín

Tốc độ bay hơi Không có.

Khả năng cháy (rắn, khí) Không áp dụng.

Giới hạn cháy trên/dưới hoặc các giới hạn nổ

Giới hạn cháy - dưới (%) Không có.

Giới hạn cháy - trên (%) Không có.

Giới hạn nổ – dưới (%)	Không có.
Giới hạn nổ – trên (%)	Không có.
Áp suất hơi	Không có.
Tỷ khối hơi	Không có.
Tỷ trọng tương đối	Không có.
(Các) độ tan	
Tính tan (nước)	Không có.
Hệ số phân tách (n-octanol/nước)	Không có.
Nhiệt độ tự bốc cháy	Không có.
Nhiệt độ phân hủy	Không có.
Độ nhớt	Không có.
Thông tin khác	
Tỷ Trọng	0.98 - 1 g/cm³
Các tính chất nổ	Không nổ.
Các tính chất oxy hóa	Không oxy hóa.

10. Độ bền và khả năng phản ứng

Khả năng phản ứng	Sản phẩm ổn định và không phản ứng trong các điều kiện sử dụng, bảo quản và vận chuyển bình thường.
Độ bền hóa học	Vật liệu ổn định trong các điều kiện bình thường.
Khả năng gây phản ứng nguy hiểm	Không phản ứng nguy hiểm nào được biết đến trong điều kiện sử dụng thường.
Các điều kiện cần tránh	Tránh xa nhiệt, bề mặt nóng, tia lửa, ngọn lửa trần, và các nguồn gây cháy khác. Tiếp xúc với các vật liệu tương kỵ.
Các vật liệu tương kỵ	Các chất oxy hóa mạnh.
Các sản phẩm phân hủy gây nguy hiểm	Không sản phẩm phân hủy nguy hại nào được biết đến.

11. Thông tin về độc tính

Thông tin về các lộ trình tiếp xúc có khả năng xảy ra

Hít phải	Việc hít phải lâu ngày có thể có hại.
Tiếp xúc với da	Được xem là không gây các tác dụng có hại khi tiếp xúc với da.
Tiếp xúc với mắt	Gây kích ứng mắt nghiêm trọng.
Ăn phải	Được xem là có hiểm họa ăn phải thấp.
Triệu chứng liên quan đến tính chất vật lý, hóa học và độc tính.	Kích ứng mắt nghiêm trọng. Các triệu chứng có thể bao gồm xót, chảy nước mắt, đỏ, sưng, và mờ mắt.

PETROLATUM	> 6

Di chuyển trong đất Không có dữ liệu.

Các tác dụng có hại khác Không có các tác dụng bất lợi cho môi trường nào khác (ví dụ, gây suy yếu tầng ozon, khả năng tạo ozon bằng phương pháp quang hóa, rối loạn nội tiết, khả năng làm tăng nhiệt độ trái đất) được xem là sẽ gặp phải từ thành phần này.

13. Các cân nhắc khi thải bỏ

Các Hướng Dẫn Thải Bỏ Thu gom và tái chế hoặc thải bỏ trong các dụng cụ đựng kín tại các bãi rác thải được phép. Vứt bỏ vật chứa bên trong/thùng chứa tuân theo các quy định địa phương/khu vực/quốc gia/quốc tế.

Các quy định tiêu hủy của địa phương Vứt bỏ tuân theo tất cả các quy định hiện hành.

Chất thải từ cặn lắng/ sản phẩm không sử dụng Loại bỏ theo quy định của địa phương Các dụng cụ đựng hoặc túi lót rỗng có thể còn chứa các cặn dư của sản phẩm. Vật liệu này và dụng cụ đựng của nó phải được thải bỏ bằng một cách thức an toàn (xem: Hướng dẫn thải bỏ).

Bao bì bị ô nhiễm Vì các dụng cụ đựng đã cạn vẫn có thể còn lại cặn sản phẩm, thực hiện dán nhãn cảnh báo ngay cả sau khi dụng cụ đựng đã cạn. Các thùng chứa rỗng cần được đưa tới cơ sở đủ tiêu chuẩn để tái chế hoặc loại bỏ

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT SEMI-PERMANENT COLOR - GROUP 10
Synonyms	None.
SDS number	00-22-0000168
Issue date	11-28-2020
Version number	03
Revision date	02-14-2023
Supersedes date	11-28-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye irritation. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: STEARAMIDOPROPYL DIMETHYLAMINE

Hazard pictograms

Signal word Warning

Hazard statements

H319 Causes serious eye irritation.

H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P264	Wash thoroughly after handling.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 2,75% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 11,75% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
STEARAMIDOPROPYL DIMETHYLAMINE	1	7651-02-7 231-609-1	01-2119979089-19	-	
Classification:	Eye Dam. 1;H318, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				
BASIC RED 51	< 0,6	77061-58-6 278-601-4	01-2120820886-46	-	
Classification:	Acute Tox. 4;H302, Eye Irrit. 2;H319, Aquatic Acute 1;H400, Aquatic Chronic 1;H410				
BASIC YELLOW 87	< 0,3	68259-00-7 269-503-2	01-2120817619-46	-	
Classification:	Acute Tox. 4;H302, Aquatic Acute 1;H400, Aquatic Chronic 1;H410				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value	Form
PETROLATUM (CAS 8009-03-8)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
PETROLATUM (CAS 8009-03-8)	TWA	5 mg/m3	Respirable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value	Form
PETROLATUM (CAS 8009-03-8)	TWA	5 mg/m3	Inhalable fraction.

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
PETROLATUM (CAS 8009-03-8)	TWA	5 mg/m3	Inhalable fraction.
PROPYLENE GLYCOL (CAS 57-55-6)	TWA	100 mg/m3	Inhalable fraction and vapor.

Spain. Occupational Exposure Limits

Components	Type	Value	Form
PETROLATUM (CAS 8009-03-8)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Form Cream.

Color Shaded

Odor Characteristic.

Odor threshold Not available.

pH 3,8 - 4,8

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212,0 °F (> 100,0 °C) Closed Cup

Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	
Density	0,98 - 1 g/cm³

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity

Components	Species	Test Results
BASIC RED 51 (CAS 77061-58-6)		
Acute		
Dermal		
LD50	Rat	> 2000 mg/kg OECD 402
Oral		
LD50	Rat	> 1000 mg/kg
BASIC YELLOW 87 (CAS 68259-00-7)		
Acute		
Dermal		
LC50	Rat	> 2000 mg/kg OECD 402

Components	Species	Test Results
Oral		
LD50	Rat	1000 mg/kg OECD 420

STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)

Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg
Oral		
LD50	Rat	> 2000 mg/kg OECD 423

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

BASIC YELLOW 87	EPA OPPTS 870,2500 Result: Not Irriating Species: Rabbit
BASIC RED 51	OECD 404 Result: Not Irritating Species: Rabbit
STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 Result: Corrosive Species: Rabbit
BASIC RED 51	OECD 405 Result: Irritating Species: Rat
BASIC YELLOW 87	OECD 405 Result: Slightly Irritating Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

BASIC RED 51	OECD 406 Result: Not Sensitizing Species: Guinea pig
BASIC YELLOW 87	OECD 406 Result: Not Sensitizing Species: Guinea pig
STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

STEARAMIDOPROPYL DIMETHYLAMINE	Result: In vitro tests did not show mutagenic effects
BASIC RED 51	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
BASIC YELLOW 87	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

BASIC RED 51	180 mg/kg bw/d OECD 414 Result: NOEL Species: Rat
STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, No effects on development Result: NOAEL Species: Rat

Developmental effects

BASIC YELLOW 87	60 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dermal Result: NOAEL Species: Rat Test Duration: 90 d
BASIC RED 51	10 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
BASIC YELLOW 87	6,76 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
BASIC RED 51 (CAS 77061-58-6)			
Aquatic			
Acute			
Crustacea	EC50	Daphnia magna	0,44 mg/l, 48 h
Fish	LC50	Lepomis macrochirus	10 - 100 mg/l, 48 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	15 mg/l, 3 h
BASIC YELLOW 87 (CAS 68259-00-7)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0,28 - 0,31 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	1,6 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	28 - 34 mg/l, 48 h
Other	EC50	Activated sludge of a predominantly domestic sewage	46 mg/l, 3 h OECD 209
Chronic			
Algae	NOEC	Pseudokirchneriella subcapitata	0,025 mg/l, 72 h OECD 201
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0,14 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,381 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	0,1 - 1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	100 - 1000 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,2 mg/l, 21 d OECD 211

Components		Species	Test Results
Fish	NOEC	Danio rerio	0,1 mg/l, 9 d OECD 212

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

BASIC YELLOW 87	21,6 % OECD 302 B Result: Inherently biodegradable. Test Duration: 28 d
STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

BASIC RED 51	-1,97 OECD 107
BASIC YELLOW 87	-1,69

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H302 Harmful if swallowed. H318 Causes serious eye damage. H319 Causes serious eye irritation. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects.
Revision information	Product and Company Identification: Product and Company Identification - L'Oreal SECTION 2: Hazards identification: Prevention Composition / Information on Ingredients: Ingredients Physical & Chemical Properties: Multiple Properties
Training information	Follow training instructions when handling this material.

Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
This document is communicated even though this product does not legally require an SDS. The purpose of this information is to allow the operators concerned to take, if necessary, the measures they deem appropriate, with regard to the storage, handling and transport of products, in order to guarantee the protection of their employees.

PULPRIOT

FICHE DE DONNÉES DE SÉCURITÉ

RUBRIQUE 1: Identification de la substance/du mélange et de la société/l'entreprise

1.1. Identificateur de produit

Nom commercial ou désignation du mélange	PULP RIOT SEMI-PERMANENT COLOR - Groupe 10
Synonymes	Aucun(e)(s).
Numéro de la FDS	00-22-0000168
Date de publication	le 05-Août-2022
Numéro de version	02
Date de révision	le 14-Février-2023
Date de la version remplacée	le 05-Août-2022

1.2. Utilisations identifiées pertinentes de la substance ou du mélange et utilisations déconseillées

Utilisations identifiées	Produits de soins personnels destinés à un usage cosmétique.
Utilisations déconseillées	Aucun connu.

1.3. Renseignements concernant le fournisseur de la fiche de données de sécurité

Personne à contacter

Nom de la societe	L'ORÉAL SA
Adresse	14, rue royale 75008 - Paris France
Téléphone	+1 732 499 2745
adresse électronique	nacorpeuropesdsrequest@loreal.com

1.4. Numéro d'appel d'urgence

France Centre antipoison national	Numéro ORFILA (INRS) : + 33 (0) 1 45 42 59 59 (Disponible 24 heures sur 24. Les informations sur la FDS/le produit sont susceptibles d'être indisponibles auprès du Service d'urgence.)
INFOTRAC	+1 352-323-3500 (Disponible 24 heures sur 24. Les informations sur la FDS/le produit sont susceptibles d'être indisponibles auprès du Service d'urgence.)

RUBRIQUE 2: Identification des dangers

2.1. Classification de la substance ou du mélange

Les dangers physiques, sanitaires et environnementaux du mélange ont été évalués et/ou testés, et la classification suivante s'applique.

Classification selon le règlement (CE) n° 1272/2008 et ses amendements

Dangers pour la santé		
Lésions oculaires graves/irritation oculaire	Catégorie 2	H319 - Provoque une sévère irritation des yeux.
Dangers pour l'environnement		
Dangers pour le milieu aquatique, danger à long terme	Catégorie 3	H412 - Nocif pour les organismes aquatiques, entraîne des effets néfastes à long terme.

Résumé des dangers

Provoque une sévère irritation des yeux. Dangereux pour l'environnement en cas de déversement dans les cours d'eau. L'exposition professionnelle à la substance ou au mélange peut provoquer des effets sanitaires. Le produit ne présente pas de danger pour les consommateurs lorsqu'il est utilisé conformément aux instructions d'utilisation sur l'étiquette. Comme pour de nombreux produits de consommation, une faible proportion d'individus peut développer des réactions telles que rougeurs, éruption cutanée et/ou œdèmes en cas de contact cutané ou oculaire prolongé ou répété.

2.2. Éléments d'étiquetage

Étiquetage selon le règlement (CE) no 1272/2008 tel que modifié

Contient : STEARAMIDOPROPYL DIMETHYLAMINE

Pictogrammes de danger

Mention d'avertissement Attention

Mentions de danger

H319 Provoque une sévère irritation des yeux.
H412 Nocif pour les organismes aquatiques, entraîne des effets néfastes à long terme.

Mentions de mise en garde

Prévention

P102 Tenir hors de portée des enfants.
P103 Lire l'étiquette avant utilisation.
P264 Se laver soigneusement après manipulation.
P273 Éviter le rejet dans l'environnement.
P280 Porter un équipement de protection des yeux/du visage.

Intervention

P101 En cas de consultation d'un médecin, garder à disposition le récipient ou l'étiquette.
P305 + P351 + P338 EN CAS DE CONTACT AVEC LES YEUX: Rincer avec précaution à l'eau pendant plusieurs minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer.
P337 + P313 Si l'irritation oculaire persiste: consulter un médecin.

Stockage Conserver à l'écart de matières incompatibles.

Élimination

P501 Eliminer le contenu/récipient conformément aux réglementations locales/régionales/nationales/internationales.

Informations supplémentaires de l'étiquette 2,75 % du mélange sont constitués de composants dont la toxicité aiguë pour le milieu aquatique est inconnue. 11,75 % du mélange sont constitués de composants dont la toxicité à long terme pour le milieu aquatique est inconnue.

2.3. Autres dangers Cette substance ou ce mélange n'est pas classé comme PBT ou vPvB.

RUBRIQUE 3: Composition/informations sur les composants

3.2. Mélanges

Informations générales

Nom chimique	en %	N° CAS/n° CE	Numéro d'enregistrement REACH	Numéro index	Notes
STEARAMIDOPROPYL DIMETHYLAMINE	1	7651-02-7 231-609-1	01-2119979089-19	-	
Classification :	Eye Dam. 1;H318, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				
BASIC RED 51	< 0,6	77061-58-6 278-601-4	01-2120820886-46	-	
Classification :	Acute Tox. 4;H302, Eye Irrit. 2;H319, Aquatic Acute 1;H400, Aquatic Chronic 1;H410

Classification :	Acute Tox. 4;H302, Aquatic Acute 1;H400, Aquatic Chronic 1;H410				

Liste des abréviations et des symboles pouvant être utilisés ci-avant

#: des limites d'exposition sur le lieu de travail ont été fixées pour cette substance en application de la législation de l'Union.
M : facteur M
PBT : substance persistante, bioaccumulable et toxique.
vPvB : substance très persistante et très bioaccumulable.
Toutes les concentrations sont données en pourcentage massique sauf pour les ingrédients sous forme gazeuse. Les concentrations des gaz sont exprimées en pourcentage volumique.

Remarques sur la composition Le texte intégral de toutes les mentions H est présenté en section 16.

RUBRIQUE 4: Premiers secours

Informations générales Vérifier que le personnel médical est conscient des substances impliquées et prend les mesures de protection individuelles appropriées.

4.1. Description des premiers secours

Inhalation Sortir au grand air. Contacter un médecin si les symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Laver immédiatement les yeux à grande eau pendant au moins 15 minutes. Les personnes portant des lentilles de contact doivent autant que possible les enlever. Rincer continuellement. Si l'irritation oculaire persiste: consulter un médecin.

Ingestion Rincer la bouche. Consulter un médecin en cas de symptômes.

4.2. Principaux symptômes et effets, aigus et différés Irritation sévère des yeux. Les symptômes peuvent inclure des picotements, des déchirures, des rougeurs, des gonflements et une vision brouillée.

4.3. Indication des éventuels soins médicaux immédiats et traitements particuliers nécessaires

Assurer des soins généraux et traiter en fonction des symptômes. Garder la victime sous observation Les symptômes peuvent se manifester à retardement.

RUBRIQUE 5: Mesures de lutte contre l'incendie

Risques généraux d'incendie

Aucun risque exceptionnel d'incendie et d'explosion.

5.1. Moyens d'extinction

Moyens d'extinction appropriés

Brouillard d'eau. Mousse. Agent chimique sec. Dioxyde de carbone (CO_2).

Moyens d'extinction inappropriés

En cas d'incendie ne pas utiliser de jet d'eau car celà dispersera le feu.

5.2. Dangers particuliers résultant de la substance ou du mélange

En cas d'incendie, des gaz dangereux pour la santé peuvent être produits.

5.3. Conseils aux pompiers

Équipements de protection particuliers des pompiers

Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Procédures spéciales de lutte contre l'incendie

Éloigner les récipients de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention

Employer des méthodes normales de lutte contre l'incendie et tenir compte des dangers associés aux autres substances présentes.

RUBRIQUE 6: Mesures à prendre en cas de dispersion accidentelle

6.1. Précautions individuelles, équipement de protection et procédures d'urgence

Pour les non-secouristes

Tenir à l'écart le personnel superflu. Garder les personnes à l'écart de l'endroit de l'écoulement/de la fuite et contre le vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins d'être vêtu d'une tenue protectrice appropriée. Assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour plus de détails sur la protection individuelle, voir la section 8 de la FDS.

Pour les secouristes

Tenir à l'écart le personnel superflu. Porter les protections individuelles recommandées dans la section 8 de la FDS.

6.2. Précautions pour la protection de l'environnement

Éviter le rejet dans l'environnement. Informer les cadres ou superviseurs concernés de tout rejet dans l'environnement. Éviter un déversement ou une fuite supplémentaire, si cela est possible sans danger. Éviter le rejet à l'égout et dans les environnements terrestres et les cours d'eau.

6.3. Méthodes et matériel de confinement et de nettoyage

Éviter que le produit arrive dans les égouts.

Déversements importants : Arrêter le débit de matière, si ceci est sans risque. Endiguer le matériau renversé si cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements mineurs : Essuyer avec une matière absorbante (p.ex. tissu, laine). Nettoyer à fond la surface pour éliminer toute contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation.

6.4. Référence à d'autres rubriques

Pour plus de détails sur la protection individuelle, voir la section 8 de la FDS. Pour plus de détails sur l'élimination des déchets, voir la section 13 de la FDS.

RUBRIQUE 7: Manipulation et stockage

7.1. Précautions à prendre pour une manipulation sans danger

Éviter le contact avec les yeux. Éviter toute exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection approprié. Éviter le rejet dans l'environnement. Suivre les règles de bonnes pratiques chimiques.

7.2. Conditions d'un stockage sûr, y compris d'éventuelles incompatibilités

Stocker dans un récipient fermé de manière étanche. Conserver hors de la portée des enfants. Conserver à l'écart des matières incompatibles (voir la Section 10 de la FDS).

7.3. Utilisation(s) finale(s) particulière(s)

Donnée inconnue.

RUBRIQUE 8: Contrôles de l'exposition/protection individuelle

8.1. Paramètres de contrôle

Limites d’exposition professionnelle

La Belgique. Valeurs limites d'exposition

Composants	Type	Valeur	Forme
PÉTROLATUM (CAS 8009-03-8)	VLCT	10 mg/m3	Brouillard.
	VME	5 mg/m3	Brouillard.

Allemagne. Liste MAK de la DFG (VLE indicatives). Fondation allemande pour la recherche, Division des risques liés aux composés chimiques dans le travail (DFG)

Composants	Type	Valeur	Forme
PÉTROLATUM (CAS 8009-03-8)	VME	5 mg/m3	Fraction alvéolaire.

Italie. Valeurs limites d’exposition professionnelle

Composants	Type	Valeur	Forme
PÉTROLATUM (CAS 8009-03-8)	VME	5 mg/m3	Fraction inhalable.

Ordonnance du ministre du Travail et de la Politique sociale du 6 juin 2014 sur les concentrations maximales admisibles l'intensité des facteurs de santé nuisibles dans le milieu de travail, Journal des lois 2014, article 817

Composants	Type	Valeur	Forme
PÉTROLATUM (CAS 8009-03-8)	VME	5 mg/m3	Fraction inhalable.
PROPANE-1,2-DIOL (CAS 57-55-6)	VME	100 mg/m3	Fraction inhalable et vapeur.

Espagne. Limites d'exposition professionnelle

Composants	Type	Valeur	Forme
PÉTROLATUM (CAS 8009-03-8)	VLCT	10 mg/m3	Brouillard.
	VME	5 mg/m3	Brouillard.

Valeurs limites biologiques Il n'y a pas de limites d'exposition biologique pour ce ou ces ingrédients.

Procédures de suivi recommandées Suivre les procédures standard de surveillance.

Doses dérivées sans effet (DDSE) Donnée inconnue.

Concentrations prédites sans effet (PNEC) Donnée inconnue.

8.2. Contrôles de l’exposition

Contrôles techniques appropriés Assurer une bonne ventilation générale. Le taux de renouvellement d'air devrait être adapté aux conditions. Si c'est approprié, clôtures de processus d'utilisation, ventilation d'échappement locale, ou d'autres commandes de technologie pour maintenir les niveaux aéroportés au-dessous des limites recommandées d'exposition. Si des limites d'exposition n'ont pas été établies, maintenez les niveaux aéroportés à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Informations générales Utiliser l’équipement de protection individuel requis. Choisir l'équipement de protection conformément aux normes CEN en vigueur et en coopération avec le fournisseur de l'équipement de protection.

Protection des yeux/du visage Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux.

Protection de la peau

- Protection des mains Pour usage industriel seulement. Porter des gants appropriés et résistant aux produits chimiques.

- Autres Pour usage industriel seulement. Porter un vêtement de protection approprié.

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Risques thermiques Porter des équipements de protection contre la chaleur, si nécessaire.

Mesures d'hygiène Toujours adopter de bonnes pratiques d'hygiène personnelle, telles que se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Nettoyer régulièrement la tenue de travail et l'équipement de protection pour éliminer les contaminants.

Contrôles d’exposition liés à la protection de l’environnement Informer les cadres ou superviseurs concernés de tout rejet dans l’environnement.

RUBRIQUE 9: Propriétés physiques et chimiques

9.1. Informations sur les propriétés physiques et chimiques essentielles

Aspect	
État physique	Liquide.
Forme	Crème.
Couleur	Nuancé
Odeur	Caractéristique.
Seuil olfactif	Donnée inconnue.
pH	3,8 - 4,8
Point de fusion/point de congélation	Donnée inconnue.
Point initial d'ébullition et intervalle d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100,0 °C (> 212,0 °F) Coupelle fermée
Taux d'évaporation	Donnée inconnue.
Inflammabilité (solide, gaz)	Sans objet.
Limites supérieures/inférieures d'inflammabilité ou limites d'explosivité	
limite inférieure d'inflammabilité (%)	Donnée inconnue.
limite supérieure d'inflammabilité (%)	Donnée inconnue.
Pression de vapeur	Donnée inconnue.
Densité de vapeur	Donnée inconnue.
Densité relative	Donnée inconnue.
Solubilité(s)	
Solubilité (dans l'eau)	Donnée inconnue.
Coefficient de partage: n-octanol/eau	Donnée inconnue.
Température d'auto-inflammabilité	Donnée inconnue.
Température de décomposition	Donnée inconnue.
Viscosité	Donnée inconnue.
Propriétés explosives	Non explosif.
Propriétés comburantes	Non comburant.

9.2. Autres informations

Densité	0,98 - 1 g/cm³

RUBRIQUE 10: Stabilité et réactivité

10.1. Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, de stockage et de transport.
10.2. Stabilité chimique	Ce produit est stable dans des conditions normales.
10.3. Possibilité de réactions dangereuses	Pas de réactions dangereuses connues dans les conditions normales d'utilisation.
10.4. Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des substances incompatibles.
10.5. Matières incompatibles	Agents oxydants forts.
10.6. Produits de décomposition dangereux	On ne connaît pas de produits de décomposition dangereux.

RUBRIQUE 11: Informations toxicologiques

Informations générales	L'exposition professionnelle à le mélange ou au mélange peut provoquer des effets indésirables.

Informations sur les voies d'exposition probables

Inhalation	L'inhalation prolongée peut être nocive.
Contact avec la peau	Aucun effet indésirable par contact cutané n'est attendu.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Peut causer des gênes en cas d'ingestion. Cependant, l'ingestion est une voie primaire d'exposition professionnelle peu probable.

Symptômes Irritation sévère des yeux. Les symptômes peuvent inclure des picotements, des déchirures, des rougeurs, des gonflements et une vision brouillée.

11.1. Informations sur les effets toxicologiques

Toxicité aiguë

Composants	Espèce	Résultats d'essais
BASIC RED 51 (CAS 77061-58-6)		
Aiguë		
Cutané		
DL50	Rat	> 2000 mg/kg OCDE 402
Oral		
DL50	Rat	> 1000 mg/kg
BASIC YELLOW 87 (CAS 68259-00-7)		
Aiguë		
Cutané		
CL50	Rat	> 2000 mg/kg OCDE 402
Oral		
DL50	Rat	1000 mg/kg OECD 420
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)		
Aiguë		
Cutané		
DL50	Lapin	> 2000 mg/kg
Oral		
DL50	Rat	> 2000 mg/kg OCDE 423

Corrosion cutanée/irritation cutanée En raison d'un manque partiel ou complet de données, la classification est impossible. Aucun effet indésirable par contact cutané n'est attendu.

Irritation/corrosion – Peau

BASIC YELLOW 87	EPA OPPTS 870,2500 Résultat: Not Irriating Espèce: Lapin
BASIC RED 51	OCDE 404 Résultat: Non Irritant Espèce: Lapin
STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Résultat: Légèrement Irritant Espèce: Lapin

Lésions oculaires graves/irritation oculaire Provoque une sévère irritation des yeux.

Irritation/corrosion – Œil

STEARAMIDOPROPYL DIMETHYLAMINE	OCDE 405 Résultat: Corrosif Espèce: Lapin
BASIC RED 51	OCDE 405 Résultat: Irritant Espèce: Rat
BASIC YELLOW 87	OCDE 405 Résultat: Légèrement Irritant Espèce: Lapin

Sensibilisation respiratoire En raison d'un manque partiel ou complet de données, la classification est impossible.

Sensibilisation cutanée En raison d'un manque partiel ou complet de données, la classification est impossible.

Sensibilisation cutanée

BASIC RED 51	OCDE 406 Résultat: Non Sensibilisant Espèce: Cochon d'Inde
BASIC YELLOW 87	OCDE 406 Résultat: Non Sensibilisant Espèce: Cochon d'Inde
STEARAMIDOPROPYL DIMETHYLAMINE	OCDE 406 Résultat: Non Sensibilisant Espèce: Cochon d'Inde

Mutagénicité sur les cellules germinales En raison d'un manque partiel ou complet de données, la classification est impossible.

Mutagénicité

STEARAMIDOPROPYL DIMETHYLAMINE	Résultat: Les tests in vitro n'ont pas montré des effets mutagènes
BASIC RED 51	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
BASIC YELLOW 87	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.

Cancérogénicité Non classé quant à la cancérogénicité pour l'homme. En raison d'un manque partiel ou complet de données, la classification est impossible.

Hongrie. Ordonnance (hongr. EüM) n° 26/2000 relative à la protection contre les substances cancérogènes sur le lieu de travail et la prévention des risques liés à l'exposition à ces dernières [et ses modifications]

N'est pas listé.

Toxicité pour la reproduction En raison d'un manque partiel ou complet de données, la classification est impossible.

Effets sur le développement

BASIC RED 51	180 mg/kg bw/d OCDE 414 Résultat: NOEL Espèce: Rat
STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OCDE 421, Pas d'effets sur le développement Résultat: NOAEL Espèce: Rat
BASIC YELLOW 87	60 mg/kg bw/d OCDE 414 Résultat: NOAEL Espèce: Rat

Toxicité pour la reproduction

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OCDE 421 Résultat: NOAEL Espèce: Rat

Toxicité spécifique pour certains organes cibles – exposition unique En raison d'un manque partiel ou complet de données, la classification est impossible.

Toxicité spécifique pour certains organes cibles – exposition répétée En raison d'un manque partiel ou complet de données, la classification est impossible.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OCDE 411, Cutané Résultat: NOAEL Espèce: Rat Durée de l'essai: 90 d
BASIC RED 51	10 mg/kg bw/d OCDE 408 Résultat: NOAEL Espèce: Rat Durée de l'essai: 90 d
BASIC YELLOW 87	6,76 mg/kg bw/d OCDE 408, Oral Résultat: NOAEL Espèce: Rat Durée de l'essai: 90 d

Danger par aspiration En raison d'un manque partiel ou complet de données, la classification est impossible.

Informations sur les mélanges et informations sur les substances Aucune information disponible.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

RUBRIQUE 12: Informations écologiques

12.1. Toxicité Nocif pour les organismes aquatiques, entraîne des effets néfastes à long terme. D'après les données disponibles, les critères de classification dans les substances dangereuses pour les milieux aquatiques, danger aigu, ne sont pas remplis.

Composants		Espèce	Résultats d'essais
BASIC RED 51 (CAS 77061-58-6)			
Aquatique			
Aiguë			
Autre	CE50	Boues activées d'eaux usées principalement ménagères	15 mg/l, 3 h
Crustacé	CE50	Daphnia magna	0,44 mg/l, 48 h
Poisson	CL50	Lepomis macrochirus	10 - 100 mg/l, 48 h OCDE 203

Chronique			
Crustacé	NOEC (concentration sans effet observé)	Daphnia magna	0,2 mg/l, 21 d OECD 211
Poisson	NOEC (concentration sans effet observé)	Danio rerio	0,1 mg/l, 9 d OECD 212

12.2. Persistance et dégradabilité

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

BASIC YELLOW 87	21,6 en % OECD 302 B Résultat: Intrinsèquement biodégradable. Durée de l'essai: 28 d
STEARAMIDOPROPYL DIMETHYLAMINE	88 en % OCED 301 Résultat: Facilement Biodegradable Durée de l'essai: 28 d

12.3. Potentiel de bioaccumulation

Coefficient de partage n-octanol/eau (log Kow)

BASIC RED 51	-1,97 OECD 107
BASIC YELLOW 87	-1,69

12.4. Mobilité dans le sol Aucune information disponible.

12.5. Résultats des évaluations PBT et vPvB Cette substance ou ce mélange n'est pas classé comme PBT ou vPvB.

12.6. Autres effets néfastes Aucun autre effet indésirable sur l'environnement (par exemple appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement climatique) n'est attendu pour ce composant.

12.7. Informations supplémentaires La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

RUBRIQUE 13: Considérations relatives à l'élimination

13.1. Méthodes de traitement des déchets

Déchets résiduaires Eliminer le produit conformément à la réglementation locale en vigueur. Les doublures intérieures ou récipients vides peuvent conserver des résidus de produit. N'éliminer cette matière et son récipient qu'en prenant toutes les précautions nécessaires (voir : Instructions relatives à l'élimination).

Emballage contaminé	Les récipients vides peuvent contenir des résidus de produit. Respecter les avertissements de l'étiquette même quand le récipient est vide. Les conteneurs vides doivent être acheminés vers un site agréé pour le traitement des déchets à des fins de recyclage ou d'élimination.
Code des déchets UE	Le code de déchet doit être attribué en accord avec l'utilisateur, le producteur et les services d'élimination de déchets.
Informations / Méthodes d'élimination	Recueillir et réutiliser ou éliminer dans des récipients scellés en décharge agréée. Empêcher que cette substance ne s'écoule dans les égouts ou le réseau d'eau. Ne pas contaminer les étangs, les voies navigables ou les fossés avec le produit ou le récipient utilisés. Éliminer le contenu/récipient conformément aux réglementations locales/régionales/nationales/internationales.
Précautions particulières	Détruire conformément à toutes les réglementations applicables.

RUBRIQUE 14: Informations relatives au transport

ADR

FINISHED GOODS

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

BULK

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

IATA

FINISHED GOODS

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

BULK

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

IMDG

FINISHED GOODS

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

BULK

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

14.7. Transport en vrac conformément à l'annexe II de la convention Marpol et au recueil IBC	Non établi.

RUBRIQUE 15: Informations relatives à la réglementation

15.1. Réglementations/législation particulières à la substance ou au mélange en matière de sécurité, de santé et d'environnement

Réglementations de l'UE

Règlement (CE) n° 1005/2009 relatif à des substances qui appauvrissent la couche d'ozone, Annexe I et II, avec ses modifications

N'est pas listé.

Règlement (CE) n° 850/2004 concernant les polluants organiques persistants, Annexe I et ses modifications

N'est pas listé.

Règlement (UE) n° 649/2012 concernant les exportations et importations de produits chimiques dangereux, Annexe I, partie 1 et ses modifications

N'est pas listé.

Règlement (UE) n° 649/2012 concernant les exportations et importations de produits chimiques dangereux, Annexe I, partie 2 et ses modifications

N'est pas listé.

Règlement (UE) n° 649/2012 concernant les exportations et importations de produits chimiques dangereux, Annexe I, partie 3 et ses modifications

N'est pas listé.

Règlement (UE) n° 649/2012 concernant les exportations et importations de produits chimiques dangereux, Annexe V et ses modifications

N'est pas listé.

Règlement (CE) n° 166/2066 concernant la création d'un registre européen des rejets et des transferts de polluants, Annexe II, avec ses modifications

N'est pas listé.

Règlement (EC) n° 1907/2006 (REACH), Article 59, paragraphe 10, Liste des substances candidates actualisée par l'ECHA

N'est pas listé.

Autorisations

Règlement (CE) n° 1907/2006, REACH, Annexe XIV Substance soumise à autorisation, et ses amendements

N'est pas listé.

Restrictions d'utilisation

Règlement (CE) n° 1907/2006 (REACH), Annexe XVII, Substances soumises à restrictions de mise sur le marché et d'utilisation, et ses modifications

N'est pas listé.

Directive 2004/37/CE : concernant la protection des travailleurs contre les risques liés à l'exposition à des agents cancérigènes ou mutagènes au travail, avec ses modifications

N'est pas listé.

Autres réglementations UE

Directive 2012/18/UE concernant la maîtrise des dangers liés aux accidents majeurs impliquant des substances dangereuses, et ses modifications

N'est pas listé.

Autres réglementations	Le produit est classé et étiqueté conformément au Règlement (CE) 1272/2008 (Règlement CLP) et à ses amendements. La présente Fiche de données de sécurité est conforme aux exigences du Règlement (CE) n° 1907/2006, avec ses modifications.
Réglementations nationales	Respecter les réglementations nationales relatives au travail avec des agents chimiques conformément à la directive 98/24/CE et ses modifications.
15.2. Évaluation de la sécurité chimique	Aucune évaluation de sécurité chimique n'a été mise en œuvre.

RUBRIQUE 16: Autres informations

Liste des abréviations	Donnée inconnue.
Références	Donnée inconnue.
Informations sur la méthode d'évaluation utilisée pour classer le mélange	La classification au titre des risques envers la santé et l'environnement est dérivée d'une combinaison de méthodes de calcul et de données d'essai, le cas échéant.
Le texte des mentions H des sections 2 à 15 n'est reproduit que partiellement	H302 Nocif en cas d'ingestion. H318 Provoque des lésions oculaires graves. H319 Provoque une sévère irritation des yeux. H400 Très toxique pour les organismes aquatiques. H410 Très toxique pour les organismes aquatiques, entraîne des effets néfastes à long terme. H411 Toxique pour les organismes aquatiques, entraîne des effets néfastes à long terme.
Informations de révision	Identification du produit et de l'entreprise : L'Oreal Attributes RUBRIQUE 2: Identification des dangers: Prévention Composition/Renseignements sur les ingrédients : Ingrédients Caractéristiques chimiques et physiques : Propriétés multiples
Informations de formation	Suivre les instructions dispensées pendant la formation lors de la manipulation de ce matériau.
Clause de non-responsabilité	Les informations contenues dans la présente Fiche de données de sécurité sont exactes dans l'état actuel de nos connaissances et de nos informations, à la date de publication. Ces informations ne sont fournies qu'à titre indicatif pour assurer la sécurité de la manipulation, de l'utilisation, de la transformation, du stockage, du transport, de l'élimination et de la mise sur le marché de la substance, et ne sauraient être considérées comme une garantie ou une assurance-qualité. Les informations ne concernent que la matière spécifiquement décrite, et sont susceptibles d'être non valables si la matière est employée en combinaison avec toute autre matière ou dans tout autre procédé, à moins que le contraire ne soit précisé dans le texte. Ce document est communiqué alors même que le produit ne requiert pas légalement de SDS. L'objectif de ces informations est de permettre aux opérateurs concernés de prendre, le cas échéant, les mesures qu'ils jugent nécessaires, en ce qui concerne le stockage, la manutention et le transport des produits, afin de garantir la protection de leurs salariés.

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT PERMANENT COLOR - GROUP 26**

Other means of identification

SDS number 00-21-0000380

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards

Skin corrosion/irritation	Category 2
Serious eye damage/eye irritation	Category 1
Sensitization, skin	Category 1A
Specific target organ toxicity, repeated exposure	Category 2

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage. May cause damage to organs through prolonged or repeated exposure.

Precautionary statement

Prevention Do not breathe mist/vapors. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear eye protection/face protection. Wear protective gloves.

Response If on skin: Wash with plenty of water. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
LAURETH-3		68439-50-9	5
TOLUENE-2,5-DIAMINE SULFATE		615-50-9	< 4
ETHANOLAMINE		141-43-5	< 3
AMMONIUM HYDROXIDE		1336-21-6	1.8
2,4-DIAMINOPHENOXYETHANOL HCL		66422-95-5	< 2
OLEYL PHOSPHATE		37310-83-1	1.25
RESORCINOL		108-46-3	< 2
M-AMINOPHENOL		591-27-5	< 0.6
P-AMINOPHENOL		123-30-8	< 0.3
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 0.2

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash. Prolonged exposure may cause chronic effects.

Indication of immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Do not breathe mist/vapors. Do not get in eyes, on skin, or on clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	PEL	35 mg/m3
		50 ppm
ETHANOLAMINE (CAS 141-43-5)	PEL	6 mg/m3
		3 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	6 ppm
	TWA	3 ppm
RESORCINOL (CAS 108-46-3)	STEL	20 ppm
	TWA	10 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	15 mg/m3
		6 ppm
	TWA	8 mg/m3
		3 ppm
RESORCINOL (CAS 108-46-3)	STEL	90 mg/m3
		20 ppm
	TWA	45 mg/m3

US. NIOSH: Pocket Guide to Chemical Hazards Components	Type	Value
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Chemical respirator with organic vapor cartridge and full facepiece.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. Chemical respirator with organic vapor cartridge and full facepiece.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Form Cream.

Color Not available.

Odor Characteristic.

Odor threshold Not available.

pH 9.7 - 10.1

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature Not available.

Decomposition temperature Not available.

Viscosity Not available.

Other information

Explosive properties Not explosive.

Oxidizing properties Not oxidizing.

10. Stability and reactivity

Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability Material is stable under normal conditions.

Possibility of hazardous reactions No dangerous reaction known under conditions of normal use.

Conditions to avoid Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.

Incompatible materials Strong oxidizing agents.

Hazardous decomposition products No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact Causes skin irritation. May cause an allergic skin reaction.

Prolonged or repeated exposure may cause liver and kidney damage. These effects have not been observed in humans.

Eye contact Causes serious eye damage.

Ingestion Expected to be a low ingestion hazard.

Symptoms related to the physical, chemical and toxicological characteristics Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Information on toxicological effects

Acute toxicity Not known.

TOLUENE-2,5-DIAMINE SULFATE	OECD 438 Result: Irritating Species: ICE
AMMONIUM HYDROXIDE	Result: Corrosive

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization May cause an allergic skin reaction.

Skin sensitization

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	EU Method B.6 - Cat 1 Result: Sensitizing Species: Guinea pig
P-AMINOPHENOL	OECD 406 Result: Sensitizing Species: Guinea pig
OLEYL PHOSPHATE	OECD 429 Result: Not Sensitizing Species: Mouse
2,4-DIAMINOPHENOXYETHANOL HCL	OECD 429 Result: Sensitizing Species: Mouse
M-AMINOPHENOL	OECD 429 Result: Sensitizing Species: Mouse
RESORCINOL	OECD 429 Result: Sensitizing Species: Mouse
TOLUENE-2,5-DIAMINE SULFATE	OECD 429 Result: Sensitizing Species: Mouse
ETHANOLAMINE	Result: Not Sensitizing Species: Guinea pig
AMMONIUM HYDROXIDE	Result: Not Sensitzing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOLAMINE	Result: In vitro and in vivo tests did show mutagenic effects
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Result: In vitro tests did not show mutagenic effects
AMMONIUM HYDROXIDE	Result: In vitro tests did not show mutagenic effects
LAURETH-3	Result: In vitro tests did not show mutagenic effects
OLEYL PHOSPHATE	Result: In vitro tests did not show mutagenic effects
2,4-DIAMINOPHENOXYETHANOL HCL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
M-AMINOPHENOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
RESORCINOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
TOLUENE-2,5-DIAMINE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
P-AMINOPHENOL	Result: In vivo tests showed mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

RESORCINOL (CAS 108-46-3) 3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOLAMINE	>= 450 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
TOLUENE-2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 Result: NOAEL Species: Mouse
M-AMINOPHENOL	100 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
2,4-DIAMINOPHENOXYETHANOL HCL	20 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
RESORCINOL	250 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

TOLUENE-2,5-DIAMINE SULFATE	>= 45 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 412 Result: NOEAL Species: Rat
RESORCINOL	245 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OECD 415 Species: Rat
ETHANOLAMINE	300 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

AMMONIUM HYDROXIDE Result: Highly Irritating

Specific target organ toxicity - repeated exposure May cause damage to organs through prolonged or repeated exposure.

P-AMINOPHENOL	10 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
TOLUENE-2,5-DIAMINE SULFATE	10 mg/kg bw/d OECD 408, oral Result: NOAEL Species: Rat Test Duration: 90 d
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 27 d
ETHANOLAMINE	150 mg/m3 air OECD 412, Inhalation Result: NOAEC Species: Rat Test Duration: 28 d

Specific target organ toxicity - repeated exposure

2,4-DIAMINOPHENOXYETHANOL HCL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
ETHANOLAMINE	300 mg/kg bw/d OECD 416, Oral Result: NOAEL Species: Rat
RESORCINOL	80 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d 991 mg/m³ Result: NOAEC Species: Rat Test Duration: 14 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Chronic effects May cause damage to organs through prolonged or repeated exposure. May be harmful if absorbed through skin.

Prolonged or repeated exposure may cause liver and kidney damage. These effects have not been observed in humans.

Further information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

ETHANOLAMINE	-2.3 OECD 107
M-AMINOPHENOL	0.21
P-AMINOPHENOL	0.25
RESORCINOL	0.8

Bioconcentration factor (BCF)

P-AMINOPHENOL	10 - 46 OECD 305 C

Bioaccumulation

ETHANOLAMINE	Result: Bioaccumulation is unlikely.
P-AMINOPHENOL	Result: Bioaccumulation is unlikely.

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

FINISHED GOODS

Not regulated as dangerous goods.

Issue date 11-27-2020

Version # 01

NFPA ratings Health: 3
Flammability: 1
Instability: 0

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT PERMANENT COLOR - GROUP 26
Synonyms	None.
SDS number	00-21-0000380
Issue date	11-27-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards

Acute toxicity, oral	Category 4	H302 - Harmful if swallowed.
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Skin sensitization	Category 1A	H317 - May cause an allergic skin reaction.

Environmental hazards

Hazardous to the aquatic environment, long-term aquatic hazard	Category 2	H411 - Toxic to aquatic life with long lasting effects.

Hazard summary Causes serious eye damage. Harmful if swallowed. Causes skin irritation. May cause an allergic skin reaction. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-METHYLRESORCINOL, AMMONIUM HYDROXIDE, BISABOLOL, ETHANOLAMINE, LAURETH-3, M-AMINOPHENOL, OLEYL PHOSPHATE, P-AMINOPHENOL, RESORCINOL, TOLUENE-2,5-DIAMINE SULFATE

Hazard pictograms

Signal word Danger

Hazard statements

H302	Harmful if swallowed.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H411	Toxic to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P270	Do not eat, drink or smoke when using this product.
P272	Contaminated work clothing should not be allowed out of the workplace.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.
P280	Wear protective gloves.

Response

P101	If medical advice is needed, have product container or label at hand.
P301 + P312	IF SWALLOWED: Call a POISON CENTER/doctor if you feel unwell.
P330	Rinse mouth.
P302 + P352	IF ON SKIN: Wash with plenty of water.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P333 + P313	If skin irritation or rash occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.
P391	Collect spillage.

Storage Store away from incompatible materials.

Disposal

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 3,12% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 4,43% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance.
Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Get medical advice/attention if you feel unwell.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim warm. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Do not breathe vapor. Do not get this material in contact with eyes. Do not taste or swallow. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. When using, do not eat, drink or smoke. Provide adequate ventilation. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	STEL	91 mg/m3

Belgium. Exposure Limit Values.

Components	Type	Value
		20 ppm
	TWA	46 mg/m3
		10 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	VLE	14 mg/m3
Regulatory status: Regulatory binding (VRC)		
		20 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	7 mg/m3
Regulatory status: Regulatory binding (VRC)		
		10 ppm
Regulatory status: Regulatory binding (VRC)		
ETHANOLAMINE (CAS 141-43-5)	VLE	7,6 mg/m3
Regulatory status: Regulatory binding (VRC)		
		3 ppm
Regulatory status: Regulatory binding (VRC)		
	VME	2,5 mg/m3
Regulatory status: Regulatory binding (VRC)		
		1 ppm
Regulatory status: Regulatory binding (VRC)		
RESORCINOL (CAS 108-46-3)	VME	45 mg/m3
Regulatory status: Regulatory indicative (VRI)		
		10 ppm
Regulatory status: Regulatory indicative (VRI)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
ETHANOLAMINE (CAS 141-43-5)	TWA	0,51 mg/m3	Vapor and aerosol.
		0,2 ppm	Vapor and aerosol.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form

		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,5 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	46 mg/m3
		10 ppm

EU. Indicative Exposure Limit Values in Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU

Components	Type	Value
AMMONIUM HYDROXIDE (CAS 1336-21-6)	STEL	36 mg/m3
		50 ppm
	TWA	14 mg/m3
		20 ppm
ETHANOLAMINE (CAS 141-43-5)	STEL	7,6 mg/m3
		3 ppm
	TWA	2,5 mg/m3
		1 ppm
RESORCINOL (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

Exposure guidelines

EU Exposure Limit Values: Skin designation

ETHANOLAMINE (CAS 141-43-5)	Can be absorbed through the skin.
RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

Slovenia. OELs. Regulations concerning protection of workers against risks due to exposure to chemicals while working (Official Gazette of the Republic of Slovenia)

ETHANOLAMINE (CAS 141-43-5)	Can be absorbed through the skin.
RESORCINOL (CAS 108-46-3)	Can be absorbed through the skin.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Keep away from food and drink. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state	Liquid.
Form	Cream.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	9,7 - 10,1
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%)	Not available.

Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	Harmful if swallowed.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

11.1. Information on toxicological effects

Acute toxicity Harmful if swallowed.

BISABOLOL	OECD 405 Result: Not Irritating Species: Rabbit
M-AMINOPHENOL	OECD 405 Result: Not Irritating Species: Rabbit
RESORCINOL	OECD 405, (2,5%) Result: Not Irritating Species: Rabbit
COCAMIDOPROPYL BETAINE	OECD 405, (C > 10%) Result: Corrosive Species: Rabbit OECD 405, (C ≤ 10%) Result: Irritating Species: Rabbit
OLEYL PHOSPHATE	OECD 438 Result: Corrosive Species: In vitro
TOLUENE-2,5-DIAMINE SULFATE	OECD 438 Result: Irritating Species: ICE
AMMONIUM HYDROXIDE	Result: Corrosive

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization May cause an allergic skin reaction.

Skin sensitization

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	EU Method B,6 - Cat 1 Result: Sensitizing Species: Guinea pig
COCAMIDOPROPYL BETAINE	OECD 406 Result: Not Sensitizing Species: Guinea pig
P-AMINOPHENOL	OECD 406 Result: Sensitizing Species: Guinea pig
OLEYL PHOSPHATE	OECD 429 Result: Not Sensitizing Species: Mouse

Skin sensitization

2,4-DIAMINOPHENOXYETHANOL HCL	OECD 429 Result: Sensitizing Species: Mouse
2-METHYLRESORCINOL	OECD 429 Result: Sensitizing Species: Mouse
BISABOLOL	OECD 429 Result: Sensitizing Species: Mouse
M-AMINOPHENOL	OECD 429 Result: Sensitizing Species: Mouse
RESORCINOL	OECD 429 Result: Sensitizing Species: Mouse
TOLUENE-2,5-DIAMINE SULFATE	OECD 429 Result: Sensitizing Species: Mouse
ETHANOLAMINE	Result: Not Sensitizing Species: Guinea pig
AMMONIUM HYDROXIDE	Result: Not Sensitzing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

COCAMIDOPROPYL BETAINE	Result: In vitro and in vivo tests did not show mutagenic effects.
ETHANOLAMINE	Result: In vitro and in vivo tests did show mutagenic effects
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Result: In vitro tests did not show mutagenic effects
AMMONIUM HYDROXIDE	Result: In vitro tests did not show mutagenic effects
BISABOLOL	Result: In vitro tests did not show mutagenic effects
LAURETH-3	Result: In vitro tests did not show mutagenic effects
OLEYL PHOSPHATE	Result: In vitro tests did not show mutagenic effects
2,4-DIAMINOPHENOXYETHANOL HCL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
2-METHYLRESORCINOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
M-AMINOPHENOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
RESORCINOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
TOLUENE-2,5-DIAMINE SULFATE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
P-AMINOPHENOL	Result: In vivo tests showed mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

RESORCINOL (CAS 108-46-3)	3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOLAMINE	>= 450 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
TOLUENE-2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 Result: NOAEL Species: Mouse
M-AMINOPHENOL	100 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
2,4-DIAMINOPHENOXYETHANOL HCL	20 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Developmental effects

RESORCINOL	250 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
COCAMIDOPROPYL BETAINE	300 mg/kg bw/d OECD 414, No effects on development Result: NOEL Species: Rat
2-METHYLRESORCINOL	400 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

TOLUENE-2,5-DIAMINE SULFATE	>= 45 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 412 Result: NOEAL Species: Rat
RESORCINOL	245 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat
COCAMIDOPROPYL BETAINE	247 mg/kg bw/d OECD 408 Result: NOEL Species: Rat
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OECD 415 Species: Rat
ETHANOLAMINE	300 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

AMMONIUM HYDROXIDE	Result: Highly Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

P-AMINOPHENOL	10 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
TOLUENE-2,5-DIAMINE SULFATE	10 mg/kg bw/d OECD 408, oral Result: NOAEL Species: Rat Test Duration: 90 d
2-METHYLRESORCINOL	100 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 27 d
ETHANOLAMINE	150 mg/m3 air OECD 412, Inhalation Result: NOAEC Species: Rat Test Duration: 28 d
2,4-DIAMINOPHENOXYETHANOL HCL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
BISABOLOL	200 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat Test Duration: 4 weeks
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d

Specific target organ toxicity - repeated exposure

COCAMIDOPROPYL BETAINE	300 mg/kg bw/d OECD 408, Oral Result: NOEL Species: Rat Test Duration: 90 d
ETHANOLAMINE	300 mg/kg bw/d OECD 416, Oral Result: NOAEL Species: Rat
RESORCINOL	80 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d 991 mg/m³ Result: NOAEC Species: Rat Test Duration: 14 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Toxic to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Aquatic			
Acute			
Algae		Pseudokirchneriella subcapitata	5,33 mg/l, 72 h EU C.3
Crustacea	EC50	Daphnia magna	11,12 mg/l, 48 h TG 202
Fish	LC50	Danio rerio	86,2 mg/l, 96 h EU C.1
2,4-DIAMINOPHENOXYETHANOL HCL (CAS 66422-95-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	36,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	7,4 mg/l, 48 h OECD 202
2-METHYLRESORCINOL (CAS 608-25-3)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	71 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,605 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	58,1 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	131 mg/l, 3 h OECD 209
AMMONIUM HYDROXIDE (CAS 1336-21-6)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2700 mg/l, 18 d
Crustacea	EC50	Daphnia magna	101 mg/l, 48 h ASTM E729-80

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33,3 % EU C,4-E Result: Not readily biodegradable
2-METHYLRESORCINOL	64 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
BISABOLOL	70 - 80 % OECD 301 F Result: Readily Biodegradable Test Duration: 28 d
COCAMIDOPROPYL BETAINE	91,6 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
ETHANOLAMINE	> 90 % OECD 301 A Result: Readily Biodegradable Test Duration: 21 d
LAURETH-3	Result: Readily Biodegradable
OLEYL PHOSPHATE	26,1 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d
RESORCINOL	66,7 % OECD 301 C Result: Readily Biodegradable Test Duration: 14 d
TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

COCAMIDOPROPYL BETAINE	4,2
ETHANOLAMINE	-2,3 OECD 107
M-AMINOPHENOL	0,21
P-AMINOPHENOL	0,25
RESORCINOL	0,8

Bioconcentration factor (BCF)

COCAMIDOPROPYL BETAINE	71
P-AMINOPHENOL	10 - 46 OECD 305 C

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

Estonia Dangerous substances in groundwater Data

RESORCINOL (CAS 108-46-3)	RESORCINOL 0,5 UG/L RESORCINOL 50 UG/L

Estonia Dangerous substances in soil Data

RESORCINOL (CAS 108-46-3)	RESORCINOL 0,1 MG/KG RESORCINOL 1 MG/KG RESORCINOL 10 MG/KG

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. UN number UN3082

14.2. UN proper shipping name ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (TOLUENE-2,5-DIAMINE SULFATE)

14.3. Transport hazard class(es)

Class 9

Label(s) 9

Hazard No. (ADR) 90

Tunnel restriction code E

14.4. Packing group III

14.5. Environmental hazards Yes

14.6. Special precautions for user Not available.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. UN number UN3082

14.2. UN proper shipping name	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (TOLUENE-2,5-DIAMINE SULFATE)
14.3. Transport hazard class(es)	
Class	9
14.4. Packing group	III
14.5. Environmental hazards	Yes
ERG Code	9L
14.6. Special precautions for user	Not available.
Other information	
Passenger and cargo aircraft	Allowed with restrictions.
Cargo aircraft only	Allowed with restrictions.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. UN number	UN3082
14.2. UN proper shipping name	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (TOLUENE-2,5-DIAMINE SULFATE), MARINE POLLUTANT
14.3. Transport hazard class(es)	
Class	9
14.4. Packing group	III
14.5. Environmental hazards	
Marine pollutant	Yes
EmS	F-A, S-F
14.6. Special precautions for user	Not available.
14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.
General information	Packagings containing a net quantity per single package or inner packaging of 5L or less are not subject transportation restrictions except for general packing provisions.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
AMMONIUM HYDROXIDE (CAS 1336-21-6)
M-AMINOPHENOL (CAS 591-27-5)
P-AMINOPHENOL (CAS 123-30-8)
RESORCINOL (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H301 Toxic if swallowed. H302 Harmful if swallowed. H312 Harmful in contact with skin. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H335 May cause respiratory irritation. H341 Suspected of causing genetic defects. H370 Causes damage to organs by ingestion. H371 May cause damage to organs by ingestion. H373 May cause damage to organs through prolonged or repeated exposure by ingestion. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT PERMANENT COLOR - Groupe 26**

Autres moyens d'identification

Numéro de la FDS 00-21-0000380

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé

Corrosion cutanée/irritation cutanée	Catégorie 2
Lésions oculaires graves/irritation oculaire	Catégorie 1
Sensibilisation cutanée	Catégorie 1A
Toxicité pour certains organes cibles - expositions répétées	Catégorie 2

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Provoque une irritation cutanée. Peut provoquer une allergie cutanée. Provoque de graves lésions des yeux. Risque présumé d'effets graves pour les organes à la suite d'expositions répétées ou d'une exposition prolongée.

Conseil de prudence

Prévention Ne pas respirer les brouillards/vapeurs. Se laver soigneusement après manipulation. Il ne faut pas que les vêtements de travail contaminés quittent le lieu de travail. Porter un équipement de protection des yeux/du visage. Porter des gants de protection.

Intervention En contact avec la peau : Laver avec beaucoup d'eau. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation ou d'éruption cutanée : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
LAURETH-3		68439-50-9	5
TOLUÈNE -2,5-DIAMINE SULFATE		615-50-9	< 4

p-Aminophénol		123-30-8	< 0.3
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 0.2

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Enlever immédiatement les vêtements contaminés et laver la peau à l'eau et au savon. En cas d'eczéma ou d'autres problèmes cutanés : consulter un médecin et apporter cette fiche. Laver les vêtements contaminés avant réutilisation.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption. Une exposition prolongée peut causer des effets chroniques.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales En cas de malaise, demander un avis médical (montrer l'étiquette du produit lorsque possible). S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.
Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence

Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas respirer les brouillards/vapeurs. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Ne pas respirer les brouillards/vapeurs. Éviter tout contact avec les yeux, la peau ou les vêtements. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	PEL (limite d'exposition admissible)	6 mg/m3
		3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	PEL (limite d'exposition admissible)	35 mg/m3
		50 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	STEL	6 ppm
	TWA	3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	35 ppm
	TWA	25 ppm
RÉSORCINOL (CAS 108-46-3)	STEL	20 ppm
	TWA	10 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOLAMINE (CAS 141-43-5)	STEL	15 mg/m3
		6 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
	TWA	8 mg/m3
		3 ppm
HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	STEL	27 mg/m3
		35 ppm
	TWA	18 mg/m3
		25 ppm
RÉSORCINOL (CAS 108-46-3)	STEL	90 mg/m3
		20 ppm
	TWA	45 mg/m3
		10 ppm

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Respirateur chimique à cartouche contre les vapeurs organiques et masque complet.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques Il est recommandé d'utiliser un tablier imperméable.

Protection respiratoire Pour usage industriel seulement. Respirateur chimique à cartouche contre les vapeurs organiques et masque complet.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Crème.

Couleur Non disponible.

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH 9.7 - 10.1

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 100 °C (> 212 °F)

Point d'éclair > 100.0 °C (> 212.0 °F) Coupelle fermée

Taux d'évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée. Peut provoquer une allergie cutanée. L'exposition répétée ou prolongée peut causer des lésions aux reins et au foie. Ces effets n'ont pas été observés chez l'humain.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets chroniques Risque présumé d'effets graves pour les organes à la suite d'expositions répétées ou d'une exposition prolongée. Peut être nocif en cas d'absorption par la peau.

L'exposition répétée ou prolongée peut causer des lésions aux reins et au foie. Ces effets n'ont pas été observés chez l'humain.

Autres informations Peut provoquer des allergies respiratoires et cutanées. La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

ÉTHANOLAMINE	-2.3 OECD 107
M-AMINOPHÉNOL	0.21
p-Aminophénol	0.25
RÉSORCINOL	0.8

Facteur de bioconcentration

p-Aminophénol	10 - 46 OECD 305 C

Bioaccumulation

ÉTHANOLAMINE	Résultat: Une bioaccumulation est peu probable.
p-Aminophénol	Résultat: Une bioaccumulation est peu probable.

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l’élimination

Instructions pour l'élimination	Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d’élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.
Règlements locaux d’élimination	Détruire conformément àtoutes les réglementations applicables.
Déchets des résidus / produits non utilisés	Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).
Emballages contaminés	Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l’étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

HYDROXYDE D'AMMONIUM (CAS 1336-21-6)	Inscrit.
RÉSORCINOL (CAS 108-46-3)	Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Dénomination chimique	Numéro d'enregistreme	% en poids.
HYDROXYDE D'AMMONIUM	1336-21-6	1.8

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

RÉSORCINOL (CAS 108-46-3)	Faible priorité

Avis de non-responsabilité À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT PERMANENT COLOR - GRUPPO 26
Sinonimi	Nessuno.
Numero SDS	00-21-0000380
Data di pubblicazione	10-Settembre-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli per la salute

Tossicità acuta, per via orale	Categoria 4	H302 - Nocivo se ingerito.
Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.
Sensibilizzazione cutanea	Categoria 1A	H317 - Può provocare una reazione allergica cutanea.

Pericoli per l'ambiente

Pericoloso per l'ambiente acquatico, pericolo acquatico a lungo termine	Categoria 2	H411 - Tossico per gli organismi acquatici con effetti di lunga durata.

Riepilogo dei pericoli

Provoca gravi lesioni oculari. Nocivo se ingerito. Provoca irritazione cutanea. Può provocare una reazione allergica cutanea. Pericoloso per l'ambiente se scaricato nei corsi d'acqua.
L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute.
Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta.
Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-METHYLRESORCINOL, 4-Aminofenolo, AMMONIACA .... %, BISABOLOL, ETANOLAMINA, LAURETH-3, M-AMINOFENOLO, OLEYL PHOSPHATE, RESORCINOLO, TOLUENE-2,5-DIAMINE SULFATE

Pittogrammi di pericolo

Avvertenza Pericolo

Indicazioni di pericolo

H302	Nocivo se ingerito.
H315	Provoca irritazione cutanea.
H317	Può provocare una reazione allergica cutanea.
H318	Provoca gravi lesioni oculari.
H411	Tossico per gli organismi acquatici con effetti di lunga durata.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P260	Non respirare il vapore.
P264	Lavare attentamente dopo l'uso.
P270	Non mangiare, né bere, né fumare durante l'uso.
P272	Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
P273	Non disperdere nell'ambiente.
P280	Proteggere gli occhi.
P280	Indossare guanti protettivi.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P301 + P312	IN CASO DI INGESTIONE: in presenza di malessere, contattare un CENTRO ANTIVELENI/un medico/.
P330	Sciacquare la bocca.
P302 + P352	IN CASO DI CONTATTO CON LA PELLE: lavare abbondantemente con acqua.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P333 + P313	In caso di irritazione o eruzione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.
P391	Raccogliere il materiale fuoriuscito.

Immagazzinamento Conservare lontano da materiali non compatibili.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette La miscela contiene il 3,12 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico. La miscela contiene il 4,43 % di componenti di cui è ignoto il pericolo a lungo termine per l'ambiente acquatico.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi. Mostrare questa scheda di sicurezza al medico curante. Lavare gli indumenti contaminati prima di indossarli nuovamente.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea	Togliere immediatamente gli indumenti contaminati e lavare la pelle con acqua e sapone. In caso di eczema o altri disturbi alla pelle: consultare un medico e portare con sé queste istruzioni. Lavare gli indumenti contaminati prima di indossarli nuovamente.
Contatto con gli occhi	Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.
Ingestione	Sciacquare la bocca. In caso di vomito, tenere la testa in basso in modo che il contenuto dello stomaco non penetri nei polmoni. In caso di malessere, consultare un medico.
4.2. Principali sintomi ed effetti, sia acuti che ritardati	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.
4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali	Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Tenere l'infortunato al caldo. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio	Non sono indicati rischi d'incendio o di esplosione particolari.
5.1. Mezzi di estinzione	
Mezzi di estinzione idonei	Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO2).
Mezzi di estinzione non idonei	Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.
5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela	In caso d'incendio possono crearsi gas nocivi.
5.3. Raccomandazioni per gli addetti all'estinzione degli incendi	
Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi	In caso d'incendio indossare autorespiratore e indumenti protettivi completi.
Procedure speciali per l'estinzione degli incendi	Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.
Metodi specifici	Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza	
Per chi non interviene direttamente	Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Prevedere una ventilazione adeguata. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.
Per chi interviene direttamente	Allontanare il personale non necessario. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS
6.2. Precauzioni ambientali	Non disperdere nell'ambiente. Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente. Evitare sversamenti o perdite supplementari, se questo può essere fatto senza pericolo. Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.
6.3. Metodi e materiali per il contenimento e per la bonifica	Non scaricare il prodotto nelle fogne. Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Assorbire in vermiculite, sabbia o terra asciutta e riporre in contenitori. Una volta recuperato il prodotto, sciacquare l'area con acqua. Versamenti di piccole dimensioni: Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua. Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo
6.4. Riferimento ad altre sezioni	Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura	Non respirare il vapore. Non permettere che questo materiale vada a contatto con gli occhi. Non introdurre in bocca o ingoiare. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Durante l'utilizzo, non mangiare, bere o fumare. Garantire una ventilazione adeguata. Indossare attrezzature di protezione personale adeguate. Lavare accuratamente le mani dopo l'uso. Non disperdere nell'ambiente. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità Conservare in un recipiente ermeticamente chiuso. Conservare fuori della portata dei bambini. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
ETANOLAMINA (CAS 141-43-5)	8 ore	2,5 mg/m3
		1 ppm
	Breve termine	7,6 mg/m3
		3 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite d'esposizione indicativi dell'UE in Direttive 91/322/CEE, 2000/39/CE, 2006/15/CE, 2009/161/UE

Componenti	Tipo	Valore
AMMONIACA .... % (CAS 1336-21-6)	8 ore	14 mg/m3
		20 ppm
	Breve termine	36 mg/m3
		50 ppm
ETANOLAMINA (CAS 141-43-5)	8 ore	2,5 mg/m3
		1 ppm
	Breve termine	7,6 mg/m3
		3 ppm
RESORCINOLO (CAS 108-46-3)	8 ore	45 mg/m3
		10 ppm

Valori limite biologici Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate Seguire le procedure standard di monitoraggio.

Livelli derivati senza effetto (DNEL) Non conosciuto.

Prevedibili concentrazioni prive di effetti (PNEC) Non conosciuto.

Linee guida sull'esposizione

OEL Italia: Specifica cutanea

ETANOLAMINA (CAS 141-43-5)	Assorbimento attraverso la pelle
RESORCINOLO (CAS 108-46-3)	Assorbimento attraverso la pelle

8.2. Controlli dell'esposizione

Controlli tecnici idonei È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali	Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.
Protezione degli occhi/del volto	Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura). Si raccomanda l'uso di una visiera protettiva.
Protezione della pelle	
- Protezione delle mani	Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.
- Altro	Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici. Si consiglia di utilizzare un grembiule impenetrabile.
Protezione respiratoria	Applicabile soltanto per gli impianti industriali. In caso di ventilazione insufficiente, usare un apparecchio respiratorio adatto.
Pericoli termici	Indossare opportuni indumenti termoprotettivi, quando necessario.
Misure d'igiene	Mantenere lontano da alimenti e bevande. Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti. Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
Controlli dell'esposizione ambientale	Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto	
Stato fisico	Liquido.
Forma	Panna.
Colore	Non conosciuto.
Odore	Caratteristico/a.
Soglia olfattiva	Non conosciuto.
pH	9,7 - 10,1
Punto di fusione/punto di congelamento	Non conosciuto.
Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	> 100,0 °C (> 212,0 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.
Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	Non sono disponibili informazioni supplementari pertinenti.

SEZIONE 10: Stabilità e reattività

10.1. Reattività Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.

10.2. Stabilità chimica Il materiale è stabile in condizioni normali.

10.3. Possibilità di reazioni pericolose Non si conosce nessuna reazione pericolosa se usato in condizioni normali.

10.4. Condizioni da evitare Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Contatto con materiali non compatibili.

10.5. Materiali incompatibili Forti agenti ossidanti.

10.6. Prodotti di decomposizione pericolosi Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.

Informazioni sulle vie probabili di esposizione

Inalazione L'inalazione prolungata può essere nociva.

Cutanea Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.

Contatto con gli occhi Provoca gravi lesioni oculari.

Ingestione Nocivo se ingerito.

Sintomi Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta Nocivo se ingerito.

12.2. Persistenza e degradabilità

Biodegradabilità

Percentuale di degradazione (biodegradazione aerobica)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33,3 % EU C,4-E Risultato: Not readily biodegradable
2-METHYLRESORCINOL	64 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
BISABOLOL	70 - 80 % OECD 301 F Risultato: Rapidamente biodegradabile Durata del test: 28 d
COCAMIDOPROPYL BETAINE	91,6 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
ETANOLAMINA	> 90 % OECD 301 A Risultato: Rapidamente biodegradabile Durata del test: 21 d
LAURETH-3	Risultato: Rapidamente biodegradabile
OLEYL PHOSPHATE	26,1 % OECD 301 D Risultato: Rapidamente biodegradabile Durata del test: 28 d
RESORCINOLO	66,7 % OECD 301 C Risultato: Rapidamente biodegradabile Durata del test: 14 d
TOLUENE-2,5-DIAMINE SULFATE	17 % OECD 301 D Risultato: Not Readily Biodegradable Durata del test: 28 d

12.3. Potenziale di bioaccumulo

Coefficiente di partizione n-ottanolo/acqua (log Kow)

4-Aminofenolo	0,25
COCAMIDOPROPYL BETAINE	4,2
ETANOLAMINA	-2,3 OECD 107
M-AMINOFENOLO	0,21
RESORCINOLO	0,8

Fattore di bioconcentrazione (BCF)

4-Aminofenolo	10 - 46 OECD 305 C
COCAMIDOPROPYL BETAINE	71

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB	Non è una sostanza o miscela PBT o vPvB.
12.6. Altri effetti avversi	Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.
12.7. Altre informazioni	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui	Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).
Imballaggi contaminati	Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.
Codice Europeo dei Rifiuti	Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.
Metodi di smaltimento/informazioni	Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Impedire a questo prodotto di penetrare nelle fogne e nelle riserve d'acqua. Non contaminare stagni, canali o fossati con il prodotto chimico o il contenitore usato. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.
Precauzioni particolari	Smaltire secondo le norme applicabili.

SEZIONE 14: Informazioni sul trasporto

ADR

FINISHED GOODS

14.1. - 14.6.: Non è regolamentato come merci pericolose.

BULK

14.1. Numero ONU	UN3082
14.2. Nome di spedizione dell'ONU	MATERIA PERICOLOSA PER L'AMBIENTE, LIQUIDA, N.A.S. (TOLUENE-2,5-DIAMINE SULFATE)
14.3. Classi di pericolo connesso al trasporto	
Classe	9
Label(s)	9
Nr. pericolo (ADR)	90
Codice delle restrizioni nei tunnel	E
14.4. Gruppo di imballaggio	III
14.5. Pericoli per l'ambiente	Sì
14.6. Precauzioni speciali per gli utilizzatori	Non conosciuto.

IATA

FINISHED GOODS

14.1. - 14.6.: Non è regolamentato come merci pericolose.

BULK

14.1. Numero ONU	UN3082
14.2. Nome di spedizione dell'ONU	MATERIA PERICOLOSA PER L'AMBIENTE, LIQUIDA, N.A.S. (TOLUENE-2,5-DIAMINE SULFATE)
14.3. Classi di pericolo connesso al trasporto	
Classe	9
14.4. Gruppo di imballaggio	III
14.5. Pericoli per l'ambiente	Sì
Codice ERG	9L
14.6. Precauzioni speciali per gli utilizzatori	Non conosciuto.
Altre informazioni	
Aereo di linea e aereo da trasporto merci	Consentito con restrizioni.
Solo aereo merci	Consentito con restrizioni.

IMDG

FINISHED GOODS

14.1. - 14.6.: Non è regolamentato come merci pericolose.

BULK

14.1. Numero ONU	UN3082

14.2. Nome di spedizione dell'ONU	MATERIA PERICOLOSA PER L'AMBIENTE, LIQUIDA, N.A.S. (TOLUENE-2,5-DIAMINE SULFATE), INQUINANTE MARINO
14.3. Classi di pericolo connesso al trasporto	
Classe	9
14.4. Gruppo di imballaggio	III
14.5. Pericoli per l'ambiente	
Inquinante marino	Sì
EmS	F-A, S-F
14.6. Precauzioni speciali per gli utilizzatori	Non conosciuto.
14.7. Trasporto di rinfuse secondo l'allegato II di MARPOL ed il codice IBC	Non stabilito.
Informazioni generali	Packagings containing a net quantity per single package or inner packaging of 5L or less are not subject transportation restrictions except for general packing provisions.

SEZIONE 15: Informazioni sulla regolamentazione

15.1. Disposizioni legislative e regolamentari su salute, sicurezza e ambiente specifiche per la sostanza o la miscela

Regolamenti UE

Regolamento (CE) n. 1005/2009 sulle sostanze che riducono lo strato di ozono, Allegato I e II e successive modifiche

Non listato.

Regolamento (CE) n. 850/2004 relativo agli inquinanti organici persistenti, Allegato I e successivi adeguamenti

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 1 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 2 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 3 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato V e successive modifiche

Non listato.

Regolamento (CE) n. 166/2006 Allegato II Registro delle emissioni e dei trasferimenti di sostanze inquinanti e successive modifiche

Non listato.

Regolamento (CE) n. 1907/2006, REACH, Articolo 59(10), Elenco di sostanze candidate così come attualmente pubblicato dall'Agenzia europea per le sostanze chimiche (ECHA)

Non listato.

Autorizzazioni

Regolamento (CE) n. 1907/2006, REACH Allegato XIV - Sostanze soggette ad autorizzazione, modificata

Non listato.

Restrizioni d'uso

Regolamento (CE) n. 1907/2006, REACH Allegato XVII, Sostanze soggette a restrizioni in materia di immissione sul mercato e di uso e successivi adeguamenti

Non listato.

Direttiva 2004/37/CE: sulla protezione dei lavoratori contro i rischi derivanti da un'esposizione ad agenti cancerogeni e mutageni durante il lavoro e successive modifiche

Non listato.

Altri regolamenti UE

Direttiva 2012/18/UE sugli incidenti rilevanti connessi con determinate sostanze pericolose e successive modifiche

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
4-Aminofenolo (CAS 123-30-8)
AMMONIACA .... % (CAS 1336-21-6)
M-AMINOFENOLO (CAS 591-27-5)
RESORCINOLO (CAS 108-46-3)
TOLUENE-2,5-DIAMINE SULFATE (CAS 615-50-9)

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H301 Tossico se ingerito. H302 Nocivo se ingerito. H312 Nocivo per contatto con la pelle. H314 Provoca gravi ustioni cutanee e gravi lesioni oculari. H315 Provoca irritazione cutanea. H317 Può provocare una reazione allergica cutanea. H318 Provoca gravi lesioni oculari. H319 Provoca grave irritazione oculare. H332 Nocivo se inalato. H335 Può irritare le vie respiratorie. H341 Sospettato di provocare alterazioni genetiche. H370 Provoca danni agli organi per ingestione. H371 Può provocare danni agli organi per ingestione. H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta per ingestione. H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta. H400 Molto tossico per gli organismi acquatici. H410 Molto tossico per gli organismi acquatici con effetti di lunga durata. H411 Tossico per gli organismi acquatici con effetti di lunga durata. H412 Nocivo per gli organismi acquatici con effetti di lunga durata.
Informazioni di revisione	Nessuno.
Informazioni formative	Seguire le istruzioni di formazione durante la manipolazione di questo materiale.
Clausole di esclusione della responsabilità	Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT PERMANENT COLOR - 组 26

鉴别的其他方法

SDS编号 00-21-0000380

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害

皮肤腐蚀/刺激	类别 2
严重眼睛损伤/眼睛刺激性	类别 1
皮肤过敏	类别 1A
特异性靶器官系统毒性-反复接触	类别 2

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 造成皮肤刺激。 可能造成皮肤过敏反应。 造成严重眼损伤。 长期或反复接触可能损害器官。

防范说明

预防措施 不要吸入雾气。 作业后彻底清洗。 受沾染的工作服不得带出工作场地。 戴防护眼罩/防护面具。 戴防护手套。

事故响应 如皮肤沾染：用大量水清洗。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。 如发生皮肤刺激或皮疹：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。

安全储存 远离禁忌物保存。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
LAURETH-3		68439-50-9	5
甲苯 -2,5-DIAMINE SULFATE		615-50-9	< 4

化学名称	通用名称和别名	登记号(CAS号)	%
乙醇胺		141-43-5	< 3
氢氧化铵		1336-21-6	1.8
2,4-DIAMINOPHENOXYETHANOL HCL		66422-95-5	< 2
OLEYL PHOSPHATE		37310-83-1	1.25
间苯二酚		108-46-3	< 2
M-AMINOPHENOL		591-27-5	< 0.6
P-AMINOPHENOL		123-30-8	< 0.3
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 0.2

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入
移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触
立即脱掉受污染的衣服，用肥皂水冲洗皮肤。 若出现湿疹或其它皮肤疾病：就医治疗，并带上本说明书。 沾染的衣服清洗后方可重新使用。

眼睛接触
立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即就医。

经口
漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性
严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹. 长期接触可能会导致慢性的影响。

指明任何需要立即就医或特殊治疗的情况
提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息
如感觉不舒服,寻求医生的建议(可能的话出示此标签)。 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。
沾染的衣服清洗后方可重新使用。

5. 消防措施

合适的灭火剂
水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质
禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害
燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施
发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明
在不会发生危险的情况下将容器撤离火灾现场。

特定的方法
采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险
无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序
让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 不要吸入雾气。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料
大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施
防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项
不要吸入雾气。 严防进入眼中、接触皮肤或衣服。 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物
储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	PEL-常期暴露极限	6 mg/m3
		3 ppm
氢氧化铵 (CAS 1336-21-6)	PEL-常期暴露极限	35 mg/m3
		50 ppm

美国ACGIH阈限值

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	TWA	3 ppm
	短期暴露极限（STEL）	6 ppm
氢氧化铵 (CAS 1336-21-6)	TWA	25 ppm
	短期暴露极限（STEL）	35 ppm
间苯二酚 (CAS 108-46-3)	TWA	10 ppm
	短期暴露极限（STEL）	20 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
乙醇胺 (CAS 141-43-5)	TWA	8 mg/m3
		3 ppm
	短期暴露极限（STEL）	15 mg/m3
		6 ppm
氢氧化铵 (CAS 1336-21-6)	TWA	18 mg/m3
		25 ppm
	短期暴露极限（STEL）	27 mg/m3
		35 ppm
间苯二酚 (CAS 108-46-3)	TWA	45 mg/m3
		10 ppm
	短期暴露极限（STEL）	90 mg/m3
		20 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼和安全淋浴设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 带有机蒸气滤毒罐和全面罩的化学呼吸器。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。 建议使用不渗透的围裙。

呼吸系统防护 仅用於工业环境。 带有机蒸气滤毒罐和全面罩的化学呼吸器。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。 受沾染的工作服不得带出工作场地。

9. 理化特性

外观

性状 液体。

形状 奶油。

颜色	无资料。
气味	特征的。
气味阈值	无资料。
pH 值	9.7 - 10.1
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	造成皮肤刺激。 可能造成皮肤过敏反应。 长时间或是重复暴露可能导致肝脏和肾损伤。 这些影响在人体尚未被观察到。
眼睛接触	造成严重眼损伤。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

毒理学效应信息

急性毒性 未知。

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

乙醇胺	结果: In vitro and in vivo tests did show mutagenic effects
P-AMINOPHENOL	结果: 活体试验表明有诱变效应
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	结果: 离体试验未见诱变效应
LAURETH-3	结果: 离体试验未见诱变效应
OLEYL PHOSPHATE	结果: 离体试验未见诱变效应
氢氧化铵	结果: 离体试验未见诱变效应
2,4-DIAMINOPHENOXYETHANOL HCL	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
M-AMINOPHENOL	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
甲苯 -2,5-DIAMINE SULFATE	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
间苯二酚	结果: 离体试验表明有在活体试验中未观察到的诱变效应。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

间苯二酚 (CAS 108-46-3)	3 尚不能确定对人有致癌作用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

乙醇胺	>= 450 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
甲苯 -2,5-DIAMINE SULFATE	>= 64 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 小鼠
M-AMINOPHENOL	100 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
2,4-DIAMINOPHENOXYETHANOL HCL	20 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
间苯二酚	250 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

甲苯 -2,5-DIAMINE SULFATE	>= 45 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 412 结果: NOEAL 物种: 大鼠
间苯二酚	245 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OECD 415 物种: 大鼠
乙醇胺	300 mg/kg bw/d OECD 416 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

氢氧化铵	结果: 高刺激性

特定目标器官系统毒性－重复接触 长期或反复接触可能损害器官。

特定目标器官系统毒性－重复接触

P-AMINOPHENOL	10 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
甲苯 -2,5-DIAMINE SULFATE	10 mg/kg bw/d OECD 408, 口服 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
OLEYL PHOSPHATE	1000 mg/kg bw/d OECD 407 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 27 D
乙醇胺	150 mg/m3 空气 OECD 412, 吸入 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 28 D
2,4-DIAMINOPHENOXYETHANOL HCL	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
乙醇胺	300 mg/kg bw/d OECD 416, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
间苯二酚	80 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D 991 mg/m³ 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 14 D

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

慢性影响 长期或反复接触可能损害器官。 如通过皮肤吸收可能有害.

长时间或是重复暴露可能导致肝脏和肾损伤。 这些影响在人体尚未被观察到。

更多信息 可能造成皮肤和呼吸过敏性反应。 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	11.12 mg/l, 48 h TG 202

鱼	LC50	虹鳟鱼	0.89 mg/l, 96 h
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.79 mg/l, 21 D
鱼	无明显反应浓度（NOEC）	虹鳟鱼	1.2 mg/l, 61 D OECD 210
甲苯 -2,5-DIAMINE SULFATE (CAS 615-50-9)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	17.7 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.82 mg/l, 48 h OECD 202
	无明显反应浓度（NOEC）	水蚤	0.63 mg/l, 21 D OECD 211
藻类	EC50	Desmodesmus subspicatus	0.653 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	1.08 mg/l, 96 h OECD 203
间苯二酚 (CAS 108-46-3)			
水生的			
急性的			
其它的, 其它		以国内污水为主的活性污泥	79 mg/l, 3 h OECD 209
甲壳纲动物	LC50	水蚤	1 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	> 97 mg/l, 97 h OECD 201
鱼	LC50	呆鲦鱼	26.8 mg/l, 96 h EPA-660/3/75-009
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	>= 0.172 mg/l, 21 D
鱼	最低可观察效应浓度（LOEC）	虹鳟鱼	320 mg/l, 60 D

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E 结果: 不容易生物降解
LAURETH-3	结果: 易生物降解
OLEYL PHOSPHATE	26.1 % OECD 301 D 结果: 易生物降解 测试时间: 28 D
乙醇胺	> 90 % OECD 301 A 结果: 易生物降解 测试时间: 21 D
甲苯 -2,5-DIAMINE SULFATE	17 % OECD 301 D 结果: 不容易生物降解 测试时间: 28 D
间苯二酚	66.7 % OECD 301 C 结果: 易生物降解 测试时间: 14 D

潜在的生物累积性

辛醇/水分配系数 log Kow

M-AMINOPHENOL	0.21

辛醇/水分配系数 log Kow

P-AMINOPHENOL	0.25
乙醇胺	-2.3 OECD 107
间苯二酚	0.8

生物积累性

P-AMINOPHENOL	结果: 不一定是生物积累性的。
乙醇胺	结果: 不一定是生物积累性的。

生物富集因子

P-AMINOPHENOL	10 - 46 OECD 305 C

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT SEMI-PERMANENT COLOR - GROUP 8**

Other means of identification

SDS number 00-22-0000220

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 2A

Sensitization, skin Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Warning

Hazard statement May cause an allergic skin reaction. Causes serious eye irritation.

Precautionary statement

Prevention Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear eye protection/face protection. Wear protective gloves.

Response If on skin: Wash with plenty of water. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If skin irritation or rash occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. Wash contaminated clothing before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1
BASIC BLUE 124		67846-56-4	0.22

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause an allergic skin reaction. Dermatitis. Rash.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Avoid breathing mist/vapors. Avoid contact with eyes, skin, and clothing. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits	This mixture has no ingredients that have PEL, TLV, or other recommended exposure limit.
Biological limit values	No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Face shield is recommended. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.

Solubility(ies)

Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.

Other information

Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	May cause an allergic skin reaction.
Eye contact	Causes serious eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause an allergic skin reaction. Dermatitis. Rash.

Information on toxicological effects

Acute toxicity

Product	Species	Test Results
PULP RIOT SEMI-PERMANENT COLOR - GROUP 8		
Acute		
Dermal		
ATEmix		917400 mg/kg
Oral		
ATEmix		163700 mg/kg

Components	Species	Test Results

Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg
Oral		
LD50	Rat	> 2000 mg/kg OECD 423

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

BASIC BLUE 124	OECD 404 Result: Not Irritating Species: Rabbit
STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 Result: Corrosive Species: Rabbit
BASIC BLUE 124	OECD 405 Result: Irritating Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization May cause an allergic skin reaction.

Skin sensitization

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Result: Not Sensitizing Species: Guinea pig
BASIC BLUE 124	OECD 429 Result: Sensitizing Species: Mouse

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

STEARAMIDOPROPYL DIMETHYLAMINE	Result: In vitro tests did not show mutagenic effects
BASIC BLUE 124	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, No effects on development Result: NOAEL Species: Rat

Reproductivity

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dermal Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
BASIC BLUE 124 (CAS 67846-56-4)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0.1 - 1 mg/l, 72 h OECD 201

Components		Species	Test Results
Fish	LC50	Danio rerio	1 - 10 mg/l, 96 h OECD 203
Other	EC10	Activated sludge of a predominantly domestic sewage	10 - 100 mg/l, 3 h OECD 209
Chronic			
Algae	EC10	Pseudokirchneriella subcapitata	0.1 - 1 mg/l, 72 h OECD 201

STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)

Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0.14 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0.381 mg/l, 48 h OECD 202

Fish	NOEC	Danio rerio	0.1 mg/l, 9 d OECD 212

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

BASIC BLUE 124	10 - 20 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 28 d
STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

Issue date 11-28-2020

Version # 01

NFPA ratings Health: 2
Flammability: 1
Instability: 0

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT SEMI-PERMANENT COLOR - GROUP 8
Synonyms	None.
SDS number	00-22-0000220
Product code	F0000984V01
Issue date	11-28-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards

Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.

Hazard summary Causes serious eye irritation. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: STEARAMIDOPROPYL DIMETHYLAMINE

Hazard pictograms

Signal word Warning

Hazard statements

H319 Causes serious eye irritation.

Precautionary statements

Prevention

P102 Keep out of reach of children.

P103	Read label before use.
P264	Wash thoroughly after handling.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 1,4% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 10,4% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains BASIC BLUE 124. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
STEARAMIDOPROPYL DIMETHYLAMINE	1	7651-02-7 231-609-1	01-2119979089-19	-	
Classification:	Eye Dam. 1;H318, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				
BASIC BLUE 124	0,22	67846-56-4 267-370-5	-	-	
Classification:	Acute Tox. 4;H302, Skin Sens. 1;H317, Eye Irrit. 2;H319, STOT RE 2;H373, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Special fire fighting procedures	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
PROPYLENE GLYCOL (CAS 57-55-6)	TWA	100 mg/m3	Inhalable fraction and vapor.

Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	May cause an allergic skin reaction.
Eye contact	Causes serious eye irritation.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity

Components	Species	Test Results
BASIC BLUE 124 (CAS 67846-56-4)		
Acute		
Dermal		
LD50	Rat	> 2000 mg/kg OECD 402
Oral		
LD50	Rat	300 - 2000 mg/kg OECD 425
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg
Oral		
LD50	Rat	> 2000 mg/kg OECD 423

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

BASIC BLUE 124	OECD 404 Result: Not Irritating Species: Rabbit
STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 Result: Corrosive Species: Rabbit
BASIC BLUE 124	OECD 405 Result: Irritating Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Result: Not Sensitizing Species: Guinea pig
BASIC BLUE 124	OECD 429 Result: Sensitizing Species: Mouse

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

STEARAMIDOPROPYL DIMETHYLAMINE	Result: In vitro tests did not show mutagenic effects
BASIC BLUE 124	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, No effects on development Result: NOAEL Species: Rat

Reproductivity

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dermal Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
BASIC BLUE 124 (CAS 67846-56-4)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0,1 - 1 mg/l, 72 h OECD 201
Fish	LC50	Danio rerio	1 - 10 mg/l, 96 h OECD 203
Other	EC10	Activated sludge of a predominantly domestic sewage	10 - 100 mg/l, 3 h OECD 209
Chronic			
Algae	EC10	Pseudokirchneriella subcapitata	0,1 - 1 mg/l, 72 h OECD 201
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0,14 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,381 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	0,1 - 1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	100 - 1000 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,2 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0,1 mg/l, 9 d OECD 212

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

BASIC BLUE 124	10 - 20 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 28 d
STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow) Not available.

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment	Not a PBT or vPvB substance or mixture.
12.6. Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.
12.7. Additional information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H302 Harmful if swallowed. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H373 May cause damage to organs through prolonged or repeated exposure by ingestion. H400 Very toxic to aquatic life. H411 Toxic to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT SEMI-PERMANENT COLOR - Groupe 8**

Autres moyens d'identification

Numéro de la FDS 00-22-0000220

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé

Lésions oculaires graves/irritation oculaire	Catégorie 2A
Sensibilisation cutanée	Catégorie 1

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Attention

Mention de danger Peut provoquer une allergie cutanée. Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Il ne faut pas que les vêtements de travail contaminés quittent le lieu de travail. Porter un équipement de protection des yeux/du visage. Porter des gants de protection.

Intervention En contact avec la peau : Laver avec beaucoup d'eau. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. En cas d'irritation ou d'éruption cutanée : Demander un avis médical/Consulter un médecin. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin. Laver les vêtements contaminés avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1
BASIC BLUE 124		67846-56-4	0.22

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Enlever immédiatement les vêtements contaminés et laver la peau à l'eau et au savon. En cas d'eczéma ou d'autres problèmes cutanés : consulter un médecin et apporter cette fiche.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter un médecin si une irritation se développe et persiste.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.
Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Éviter de respirer les brouillards/vapeurs. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Éviter de respirer les brouillards/vapeurs. Éviter tout contact avec les yeux, la peau et les vêtements. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle	This mixture has no ingredients that have PEL, Vle , or other recommended exposure limit.
Valeurs biologiques limites	Aucune limite d'exposition biologique observée pour les ingrédients.
Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Pour usage industriel seulement. Un écran facial est recommandé. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).
Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques Il est recommandé d'utiliser un tablier imperméable.
Protection respiratoire	Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Forme	Crème.
Couleur	Nuancé
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	Non disponible.
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.

Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	On ne s'attend à aucun effet néfaste en cas d'inhalation.
Contact avec la peau	Peut provoquer une allergie cutanée.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Renseignements sur les effets toxicologiques

Toxicité aiguë

Produit	Espèces	Résultats d'épreuves
PULP RIOT SEMI-PERMANENT COLOR - Groupe 8		
Aiguë		
Cutané		
ATEmix		917400 mg/kg
Orale		
ATEmix		163700 mg/kg

Orale		
DL50	Rat	> 2000 mg/kg OECD 423

Corrosion cutanée/irritation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

BASIC BLUE 124	OCDE 404 Résultat: Non Irritant Espèces: Lapin
STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Résultat: Légèrement Irritant Espèces: Lapin

Lésions oculaires graves/irritation oculaire Provoque une sévère irritation des yeux.

Irritation- corrosion - Œil

STEARAMIDOPROPYL DIMETHYLAMINE	OCDE 405 Résultat: Corrosif Espèces: Lapin
BASIC BLUE 124	OCDE 405 Résultat: Irritant Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée Peut provoquer une allergie cutanée.

Sensibilisation cutanée

STEARAMIDOPROPYL DIMETHYLAMINE	OCDE 406 Résultat: Non Sensibilisant Espèces: Cobaye
BASIC BLUE 124	OCDE 429 Résultat: Sensibilisant Espèces: Souris

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

STEARAMIDOPROPYL DIMETHYLAMINE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
BASIC BLUE 124	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets sur le développement

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OCDE 421, Pas d'effets sur le développement Résultat: DSENO Espèces: Rat

Reproductivité

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OCDE 421 Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OCDE 411, Cutané Résultat: DSENO Espèces: Rat Durée du test: 90 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
BASIC BLUE 124 (CAS 67846-56-4)

Pourcentage de dégradation (biodégradation aérobie)

BASIC BLUE 124	10 - 20 % OCDE 301 B Résultat: Difficilement Biodégradable Durée du test: 28 d

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

STEARAMIDOPROPYL DIMETHYLAMINE	88 % OCED 301 Résultat: Facilement Biodegradable Durée du test: 28 d

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

Non inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication 28-Novembre-2020

Version n° 01

Classements NFPA Santé: 2
Inflammabilité: 1
Instabilité: 0

Avis de non-responsabilité À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT SEMI-PERMANENT COLOR - GRUPPO 8
Sinonimi	Nessuno.
Numero SDS	00-22-0000220
Codice prodotto	F0000984V01
Data di pubblicazione	08-Settembre-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli per la salute

Gravi danni oculari/irritazione oculare	Categoria 2	H319 - Provoca grave irritazione oculare.

Riepilogo dei pericoli

Provoca grave irritazione oculare. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: STEARAMIDOPROPYL DIMETHYLAMINE

Pittogrammi di pericolo

Avvertenza Attenzione

Indicazioni di pericolo

H319 Provoca grave irritazione oculare.

Consigli di prudenza

Prevenzione

P102 Tenere fuori dalla portata dei bambini.
P103 Leggere l'etichetta prima dell'uso.
P264 Lavare attentamente dopo l'uso.
P280 Proteggere gli occhi.

Reazione

P101 In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P305 + P351 + P338 IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P337 + P313 Se l'irritazione degli occhi persiste, consultare un medico.

Immagazzinamento Conservare lontano da materiali non compatibili.

Smaltimento Smaltire residui e rifiuti conformemente a quanto disposto dalle autorità locali.

Informazioni supplementari sulle etichette La miscela contiene il 1,4 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico. La miscela contiene il 10,4 % di componenti di cui è ignoto il pericolo a lungo termine per l'ambiente acquatico. EUH208 - Contiene BASIC BLUE 124. Può provocare una reazione allergica.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Informazioni generali

Denominazione chimica	%	Numero CAS / Numero CE	Numero di registrazione REACH	Numero della sostanza	Note
STEARAMIDOPROPYL DIMETHYLAMINE	1	7651-02-7 231-609-1	01-2119979089-19	-

BASIC BLUE 124	0,22	67846-56-4 267-370-5	-	-	
Classificazione:	Acute Tox. 4;H302, Skin Sens. 1;H317, Eye Irrit. 2;H319, STOT RE 2;H373, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea Lavare con sapone ed acqua. Consultare un medico se si sviluppa un'irritazione persistente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Se l'irritazione degli occhi persiste, consultare un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata.

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali

Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio

Non sono indicati rischi d'incendio o di esplosione particolari.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei

Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO2).

Mezzi di estinzione non idonei

Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela

In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi

In caso d'incendio indossare autorespiratore e indumenti protettivi completi.

Procedure speciali per l'estinzione degli incendi

Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.

Metodi specifici

Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente

Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Prevedere una ventilazione adeguata. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.

Per chi interviene direttamente

Allontanare il personale non necessario. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS

6.2. Precauzioni ambientali

Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.

6.3. Metodi e materiali per il contenimento e per la bonifica

Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Assorbire in vermiculite, sabbia o terra asciutta e riporre in contenitori. Una volta recuperato il prodotto, sciacquare l'area con acqua.

Versamenti di piccole dimensioni: Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua.

Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo

6.4. Riferimento ad altre sezioni

Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura

Evitare il contatto con gli occhi. Evitare l'esposizione prolungata. Garantire una ventilazione adeguata. Indossare attrezzature di protezione personale adeguate. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità

Conservare in un recipiente ermeticamente chiuso. Conservare fuori della portata dei bambini. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari

Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Nessun valore limite di esposizione annotato per l'ingrediente/gli ingredienti.

Valori limite biologici

Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate

Seguire le procedure standard di monitoraggio.

Livelli derivati senza effetto (DNEL)

Non conosciuto.

Prevedibili concentrazioni prive di effetti (PNEC)

Non conosciuto.

8.2. Controlli dell'esposizione

Controlli tecnici idonei	È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali	Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.
Protezione degli occhi/del volto	Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura).
Protezione della pelle	
- Protezione delle mani	Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.
- Altro	Applicabile soltanto per gli impianti industriali. Usare indumenti protettivi adatti.
Protezione respiratoria	Applicabile soltanto per gli impianti industriali. In caso di ventilazione insufficiente, usare un apparecchio respiratorio adatto.
Pericoli termici	Indossare opportuni indumenti termoprotettivi, quando necessario.
Misure d'igiene	Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti.
Controlli dell'esposizione ambientale	Non conosciuto.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto	
Stato fisico	Liquido.
Forma	Panna.
Colore	Shaded
Odore	Caratteristico/a.
Soglia olfattiva	Non conosciuto.
pH	Non conosciuto.
Punto di fusione/punto di congelamento	Non conosciuto.
Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	> 100,0 °C (> 212,0 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.
Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.

Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	Non sono disponibili informazioni supplementari pertinenti.

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Forti agenti ossidanti.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.

Informazioni sulle vie probabili di esposizione

Inalazione	L'inalazione prolungata può essere nociva.
Cutanea	Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca grave irritazione oculare.
Ingestione	In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.
Sintomi	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata.

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta

Componenti	Specie	Risultati del test
BASIC BLUE 124 (CAS 67846-56-4)		
Acuto		
Dermico		
LD50	Ratto	> 2000 mg/kg OECD 402
Orale		
LD50	Ratto	300 - 2000 mg/kg OECD 425
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)		
Acuto		
Dermico		
LD50	Coniglio	> 2000 mg/kg
Orale		
LD50	Ratto	> 2000 mg/kg OECD 423

Corrosione cutanea/irritazione cutanea	A causa della mancanza parziale o totale di dati, la classificazione non è possibile. Non sono previsti effetti nocivi dovuti al contatto con la pelle.

Irritazione/corrosione - Pelle

BASIC BLUE 124	OECD 404 Risultato: Non irritante Specie: Coniglio
STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Risultato: Leggermente irritante Specie: Coniglio

Gravi danni oculari/irritazione oculare	Provoca grave irritazione oculare.

Irritazione/corrosione - Occhi

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 Risultato: Corrosivo Specie: Coniglio
BASIC BLUE 124	OECD 405 Risultato: irritante Specie: Coniglio

Sensibilizzazione respiratoria	A causa della mancanza parziale o totale di dati, la classificazione non è possibile.
Sensibilizzazione cutanea	A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Sensibilizzazione cutanea

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Risultato: Not Sensitizing Specie: Porcellino d'india
BASIC BLUE 124	OECD 429 Risultato: sensibilizzante Specie: Topo

Mutagenicità sulle cellule germinali A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Mutagenicità

BASIC BLUE 124	Risultato: I saggi in vitro hanno rivelato effetti mutagenici, allorché i saggi in vivo non li hanno rivelati.
STEARAMIDOPROPYL DIMETHYLAMINE	Risultato: I saggi in vitro non hanno rivelato effetti mutagenici

Cancerogenicità Non classificabile in relazione alla cancerogenicità per l'uomo. A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Tossicità per la riproduzione A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Effetti sullo sviluppo

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, No effects on development Risultato: NOAEL Specie: Ratto

Riproduttività

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 Risultato: NOAEL Specie: Ratto

Tossicità specifica per organi bersaglio (STOT) — esposizione singola A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Tossicità specifica per organi bersaglio (STOT) — esposizione ripetuta A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dermico Risultato: NOAEL Specie: Ratto Durata del test: 90 d

Pericolo in caso di aspirazione A causa della mancanza parziale o totale di dati, la classificazione non è possibile.

Informazioni sulle miscele rispetto alle informazioni sulle sostanze Nessuna informazione disponibile.

Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 12: Informazioni ecologiche

12.1. Tossicità In base ai dati disponibili, i criteri di classificazione non sono soddisfatti per "pericoloso per l'ambiente acquatico".

Componenti		Specie	Risultati del test
BASIC BLUE 124 (CAS 67846-56-4)			
Acquatico			
Acuto			
Alga	EC50	Pseudokirchneriella subcapitata	0,1 - 1 mg/l, 72 h OECD 201
Altro	EC10	Fanghi attivi di acque nere prevalentemente domestiche	10 - 100 mg/l, 3 h OCSE 209
Pesci	LC50	Danio rerio	1 - 10 mg/l, 96 h OCSE 203
Cronico			
Alga	EC10	Pseudokirchneriella subcapitata	0,1 - 1 mg/l, 72 h OECD 201
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)			
Acquatico			
Acuto			
Alga	EC50	Desmodesmus subspicatus	0,14 mg/l, 72 h OECD 201
Altro	EC50	Fanghi attivi di acque nere prevalentemente domestiche	100 - 1000 mg/l, 3 h OCSE 209
Crostacei	EC50	Daphnia magna	0,381 mg/l, 48 h OECD 202
Pesci	LC50	Oncorhynchus mykiss	0,1 - 1 mg/l, 96 h OCSE 203

Componenti		Specie	Risultati del test
Cronico			
Crostacei	NOEC	Daphnia magna	0,2 mg/l, 21 d OECD 211
Pesci	NOEC	Danio rerio	0,1 mg/l, 9 d OECD 212

12.2. Persistenza e degradabilità

Biodegradabilità

Percentuale di degradazione (biodegradazione aerobica)

BASIC BLUE 124	10 - 20 % OECD 301 B Risultato: Not Readily Biodegradable Durata del test: 28 d
STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Risultato: Rapidamente biodegradabile Durata del test: 28 d

12.3. Potenziale di bioaccumulo

Coefficiente di partizione n-ottanolo/acqua (log Kow) Non conosciuto.

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.

12.7. Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).

Imballaggi contaminati Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.

Codice Europeo dei Rifiuti Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.

Metodi di smaltimento/informazioni Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Precauzioni particolari Smaltire secondo le norme applicabili.

SEZIONE 14: Informazioni sul trasporto

ADR

FINISHED GOODS

14.1. - 14.6.: Non è regolamentato come merci pericolose.

BULK

14.1. - 14.6.: Non è regolamentato come merci pericolose.

IATA

FINISHED GOODS

14.1. - 14.6.: Non è regolamentato come merci pericolose.

BULK

14.1. - 14.6.: Non è regolamentato come merci pericolose.

IMDG

FINISHED GOODS

14.1. - 14.6.: Non è regolamentato come merci pericolose.

BULK

14.1. - 14.6.: Non è regolamentato come merci pericolose.

14.7. Trasporto di rinfuse secondo l'allegato II di MARPOL ed il codice IBC Non stabilito.

SEZIONE 15: Informazioni sulla regolamentazione

15.1. Disposizioni legislative e regolamentari su salute, sicurezza e ambiente specifiche per la sostanza o la miscela

Regolamenti UE

Regolamento (CE) n. 1005/2009 sulle sostanze che riducono lo strato di ozono, Allegato I e II e successive modifiche

Non listato.

Regolamento (CE) n. 850/2004 relativo agli inquinanti organici persistenti, Allegato I e successivi adeguamenti

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 1 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 2 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 3 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato V e successive modifiche

Non listato.

Regolamento (CE) n. 166/2006 Allegato II Registro delle emissioni e dei trasferimenti di sostanze inquinanti e successive modifiche

Non listato.

Regolamento (CE) n. 1907/2006, REACH, Articolo 59(10), Elenco di sostanze candidate così come attualmente pubblicato dall'Agenzia europea per le sostanze chimiche (ECHA)

Non listato.

Autorizzazioni

Regolamento (CE) n. 1907/2006, REACH Allegato XIV - Sostanze soggette ad autorizzazione, modificata

Non listato.

Restrizioni d'uso

Regolamento (CE) n. 1907/2006, REACH Allegato XVII, Sostanze soggette a restrizioni in materia di immissione sul mercato e di uso e successivi adeguamenti

Non listato.

Direttiva 2004/37/CE: sulla protezione dei lavoratori contro i rischi derivanti da un'esposizione ad agenti cancerogeni e mutageni durante il lavoro e successive modifiche

Non listato.

Altri regolamenti UE

Direttiva 2012/18/UE sugli incidenti rilevanti connessi con determinate sostanze pericolose e successive modifiche

Non listato.

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H302 Nocivo se ingerito. H317 Può provocare una reazione allergica cutanea. H318 Provoca gravi lesioni oculari. H319 Provoca grave irritazione oculare. H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta per ingestione. H400 Molto tossico per gli organismi acquatici. H411 Tossico per gli organismi acquatici con effetti di lunga durata.

Informazioni di revisione	Nessuno.
Informazioni formative	Seguire le istruzioni di formazione durante la manipolazione di questo materiale.
Clausole di esclusione della responsabilità	Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT SEMI-PERMANENT COLOR - 组 8

鉴别的其他方法

SDS编号 00-22-0000220

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害 严重眼睛损伤/眼睛刺激性 类别 2A
皮肤过敏 类别 1

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 警告

危险性说明 可能造成皮肤过敏反应。 造成严重眼刺激。

防范说明

预防措施 作业后彻底清洗。 受沾染的工作服不得带出工作场地。 戴防护眼罩/防护面具。 戴防护手套。

事故响应 如皮肤沾染：用大量水清洗。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如发生皮肤刺激或皮疹：求医/就诊。 如仍觉眼刺激：求医/就诊。 沾染的衣服清洗后方可重新使用。

安全储存 远离禁忌物保存。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1
BASIC BLUE 124		67846-56-4	0.22

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 立即脱掉受污染的衣服，用肥皂水冲洗皮肤。 若出现湿疹或其它皮肤疾病：就医治疗，并带上本说明书。

眼睛接触 立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如果刺激症状持续或加重，应就医。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 可能造成皮肤过敏反应。 皮炎。 皮疹.

指明任何需要立即就医或特殊治疗的情况 提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。
沾染的衣服清洗后方可重新使用。

5. 消防措施

合适的灭火剂 水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质 禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施 发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明 在不会发生危险的情况下将容器撤离火灾现场。

特定的方法 采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险 无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序 让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 Avoid breathing mist/vapors. 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料 大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施 防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项 Avoid breathing mist/vapors. 避免接触眼睛、皮肤和衣物。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物 储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参數 This mixture has no ingredients that have PEL, TLV, or other recommended exposure limit.

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 建议穿戴面罩。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。 建议使用不渗透的围裙。

呼吸系统防护 仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑	始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。 受沾染的工作服不得带出工作场地。

9. 理化特性

外观	
性状	液体。
形状	奶油。
颜色	有色
气味	特征的。
气味阈值	无资料。
pH 值	无资料。
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息	
吸入	预期吸入无有害影响。
皮肤接触	可能造成皮肤过敏反应。
眼睛接触	造成严重眼刺激。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 可能造成皮肤过敏反应。 皮炎。 皮疹.
毒理学效应信息	
急性毒性	

产品	物种	试验结果
PULP RIOT SEMI-PERMANENT COLOR - 组 8		
急性的		
经口

经皮肤		
LD50	兔子	> 2000 mg/kg

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

刺激性腐蚀性 - 皮肤

BASIC BLUE 124	OECD 404 结果: 非刺激性 物种: 兔子
STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 结果: 轻微刺激性 物种: 兔子

严重眼睛损伤/眼睛刺激性 造成严重眼刺激。

刺激性腐蚀性 - 眼睛

BASIC BLUE 124	OECD 405 结果: 刺激性的 物种: 兔子
STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 结果: 腐蚀性的 物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 可能造成皮肤过敏反应。

皮肤致敏物

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 结果: Not Sensitizing 物种: 豚鼠
BASIC BLUE 124	OECD 429 结果: 致敏 物种: 小鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

STEARAMIDOPROPYL DIMETHYLAMINE	结果: 离体试验未见诱变效应
BASIC BLUE 124	结果: 离体试验表明有在活体试验中未观察到的诱变效应。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, 对发展没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, 经皮肤 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果

鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	0.1 mg/l, 9 D OECD 212

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

BASIC BLUE 124	10 - 20 % OECD 301 B 结果: 不容易生物降解 测试时间: 28 D
STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 结果: 易生物降解 测试时间: 28 D

潜在的生物累积性

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT SEMI-PERMANENT COLOR - GROUP 10**

Other means of identification

SDS number 00-22-0000164

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Warning

Hazard statement Causes serious eye irritation.

Precautionary statement

Prevention Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
GLYCERIN		56-81-5	2
STEARALKONIUM CHLORIDE		122-19-0	1.41
GLYCERYL STEARATE		31566-31-1	1.02

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	This material is classified as a water pollutant under the Clean Water Act and should be prevented from contaminating soil or from entering sewage and drainage systems which lead to waterways. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	PEL	5 mg/m3	Respirable fraction.
		15 mg/m3	Total dust.

US. OSHA Table Z-3 (29 CFR 1910.1000)

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	TWA	5 mg/m3	Respirable fraction.
		15 mg/m3	Total dust.
		50 mppcf	Total dust.
		15 mppcf	Respirable fraction.

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
GLYCERYL STEARATE (CAS 31566-31-1)	TWA	3 mg/m3	Respirable fraction.
		10 mg/m3	Inhalable fraction.

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Form Cream.

Color Shaded

Odor Characteristic.

Odor threshold Not available.

pH 3 - 4.5

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.98 - 0.999 g/cm³
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Information on toxicological effects

Acute toxicity Not known.

Not listed.

Reproductive toxicity This product is not expected to cause reproductive or developmental effects.

Developmental effects

GLYCERIN — 1310 mg/kg bw/d, No effects on development
Result: NOAEL
Species: Rat

Reproductivity

GLYCERIN — 2000 mg/kg bw/d, No effects on fertility
Result: NOAEL
Species: Rat

Specific target organ toxicity - single exposure Not classified.

Specific target organ toxicity - repeated exposure Not classified.

GLYCERIN — 8000 mg/kg bw/d, Oral
Result: NOAEL
Species: Rat
Test Duration: 2 yr

Aspiration hazard Not an aspiration hazard.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
GLYCERIN (CAS 56-81-5)			
Aquatic			
Acute			
Algae	EC0	Scenedesmus quadricauda	> 10000 mg/l, 192 h

STEARALKONIUM CHLORIDE — 64 % OECD 301 D
Result: Readily Biodegradable
Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

GLYCERIN -1.76
STEARALKONIUM CHLORIDE 3.23

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye irritation. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: STEARALKONIUM CHLORIDE

Hazard pictograms

Signal word Warning

Hazard statements

H319 Causes serious eye irritation.

H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P264	Wash thoroughly after handling.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 1,02% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. EUH208 - Contains BASIC ORANGE 31. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
STEARALKONIUM CHLORIDE	1,41	122-19-0 204-527-9	01-2120769734-41	-	
Classification:	Acute Tox. 4;H302, Acute Tox. 3;H311, Eye Dam. 1;H318, Aquatic Acute 1;H400(M=10), Aquatic Chronic 1;H410				
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	0,74	65497-29-2 613-809-4	-	-	
Classification:	Aquatic Acute 1;H400, Aquatic Chronic 1;H410

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
4.2. Most important symptoms and effects, both acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.
4.3. Indication of any immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards	No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising from the substance or mixture	During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Special fire fighting procedures	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Prevent product from entering drains. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	TWA	10 mg/m3	Mist.
GLYCERYL STEARATE (CAS 31566-31-1)	TWA	10 mg/m3	

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	VME	10 mg/m3	Aerosol.

Regulatory status: Indicative limit (VL)

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	TWA	200 mg/m3	Inhalable fraction.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	AGW	200 mg/m3	Inhalable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value	Form
GLYCERYL STEARATE (CAS 31566-31-1)	TWA	3 mg/m3	Respirable fraction.
		10 mg/m3	Inhalable fraction.

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	TWA	10 mg/m3	Inhalable fraction.
PROPYLENE GLYCOL (CAS 57-55-6)	TWA	100 mg/m3	Inhalable fraction and vapor.

Spain. Occupational Exposure Limits

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	TWA	10 mg/m3	Mist.
GLYCERYL STEARATE (CAS 31566-31-1)	TWA	10 mg/m3	

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Characteristic.
Odor threshold	Not available.
pH	3 - 4,5
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Density	0,98 - 0,999 g/cm³

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	May cause an allergic skin reaction.

Eye contact	Causes serious eye irritation.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results

HC BLUE NO. 15	Result: Not Readily Biodegradable
STEARALKONIUM CHLORIDE	64 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

BASIC ORANGE 31	-2,13 OECD 107
BASIC RED 51	-1,97 OECD 107
BASIC YELLOW 87	-1,69
HC BLUE NO. 15	3,47 OECD 117
STEARALKONIUM CHLORIDE	3,23

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. UN number UN3082

14.2. UN proper shipping name	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (STEARALKONIUM CHLORIDE)
14.3. Transport hazard class(es)	
Class	9
Label(s)	9
Hazard No. (ADR)	90
Tunnel restriction code	E
14.4. Packing group	III
14.5. Environmental hazards	Yes
14.6. Special precautions for user	Not available.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. UN number	UN3082
14.2. UN proper shipping name	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (STEARALKONIUM CHLORIDE)
14.3. Transport hazard class(es)	
Class	9
14.4. Packing group	III
14.5. Environmental hazards	Yes
ERG Code	9L
14.6. Special precautions for user	Not available.
Other information	
Passenger and cargo aircraft	Allowed with restrictions.
Cargo aircraft only	Allowed with restrictions.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. UN number	UN3082
14.2. UN proper shipping name	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (STEARALKONIUM CHLORIDE), MARINE POLLUTANT
14.3. Transport hazard class(es)	
Class	9
14.4. Packing group	III
14.5. Environmental hazards	
Marine pollutant	Yes
EmS	F-A, S-F
14.6. Special precautions for user	Not available.
14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.
General information	IMDG Regulated Marine Pollutant. Packagings containing a net quantity per single package or inner packaging of 5L or less are not subject transportation restrictions except for general packing provisions.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

DIDECYLDIMONIUM CHLORIDE (CAS 7173-51-5)

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

STEARALKONIUM CHLORIDE (CAS 122-19-0)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

STEARALKONIUM CHLORIDE (CAS 122-19-0)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H301 Toxic if swallowed. H302 Harmful if swallowed. H311 Toxic in contact with skin. H314 Causes severe skin burns and eye damage. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects.
Revision information	Product and Company Identification: Product and Company Identification - L'Oreal Composition / Information on Ingredients: Ingredients SECTION 4: First aid measures: Skin contact SECTION 7: Handling and storage: 7,2. Conditions for safe storage, including any incompatibilities SECTION 8: Exposure controls/personal protection: Eye/face protection SECTION 8: Exposure controls/personal protection: - Hand protection SECTION 10: Stability and reactivity: 10,4. Conditions to avoid SECTION 16: Other information: Disclaimer
Training information	Follow training instructions when handling this material.

Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
This document is communicated even though this product does not legally require an SDS. The purpose of this information is to allow the operators concerned to take, if necessary, the measures they deem appropriate, with regard to the storage, handling and transport of products, in order to guarantee the protection of their employees.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT SEMI-PERMANENT COLOR - Groupe 10**

Autres moyens d'identification

Numéro de la FDS 00-22-0000164

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Lésions oculaires graves/irritation oculaire Catégorie 2A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Attention

Mention de danger Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
GLYCÉRINE		56-81-5	2
STEARALKONIUM CHLORIDE		122-19-0	1.41
STÉARATE DE GLYCÉRYLE		31566-31-1	1.02

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.
Contact avec la peau	Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.
Contact avec les yeux	Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.
Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Ce produit est classé comme un polluant de l'eau en vertu de la Loi sur la qualité de l'eau (Clean Water Act) et ne doit pas contaminer les sols ni pénétrer dans les systèmes d'égouts et d'évacuation qui se déversent dans les cours d'eau. Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Éviter tout contact avec les yeux. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

États-Unis - TABLEAU Z-3 (29 CFR 1910.1000) de l'OSHA

Composants	Type	Valeur	Forme
GLYCÉRINE (CAS 56-81-5)	TWA	5 mg/m3	Fraction respirable.
		15 mg/m3	Poussières totales.
		50 mppcf	Poussières totales.
		15 mppcf	Fraction respirable.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur	Forme
GLYCÉRINE (CAS 56-81-5)	PEL (limite d'exposition admissible)	5 mg/m3	Fraction respirable.
		15 mg/m3	Poussières totales.

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur	Forme
STÉARATE DE GLYCÉRYLE (CAS 31566-31-1)	TWA	3 mg/m3	Fraction respirable.
		10 mg/m3	Fraction inhalable.

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Crème.

Couleur Nuancé

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH 3 - 4.5

Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Densité	0.98 - 0.999 g/cm3
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.

Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Produit	Espèces	Résultats d'épreuves
PULP RIOT SEMI-PERMANENT COLOR - Groupe 10		
Aiguë		
Cutané		
ATEmix		18700 mg/kg
Orale		
ATEmix		26340 mg/kg

Orale		
DL50	Rat	> 5000 mg/kg

Corrosion cutanée/irritation cutanée On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

STEARALKONIUM CHLORIDE	OCDE 439 Résultat: Non Irritant Espèces: RhE
GLYCÉRINE	Résultat: Non Irritant Espèces: Lapin

Lésions oculaires graves/irritation oculaire Provoque une sévère irritation des yeux.

Irritation- corrosion - Œil

STEARALKONIUM CHLORIDE	OCDE 492 Résultat: Peut-être irritant Espèces: RhCE
GLYCÉRINE	Résultat: Non Irritant Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire Pas un sensibilisant respiratoire.

Sensibilisation cutanée On ne s'attend pas à ce que ce produit provoque une sensibilisation cutanée.

Sensibilisation cutanée

GLYCÉRINE	167 mg/m3 air OECD 413, Inhalation Résultat: DSENO Espèces: Rat Durée du test: 90 d
STEARALKONIUM CHLORIDE	EU B.6 Résultat: Non Sensibilisant Espèces: Cobaye
GLYCÉRINE	Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales Il n'existe pas de données qui indiquent que ce produit, ou tout composant présent à des taux de plus de 0,1 %, soit mutagène ou génétoxique.

Mutagénicité

GLYCÉRINE	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.
STEARALKONIUM CHLORIDE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction On ne s'attend pas à ce que ce produit présente des effets sur la reproduction ou le développement.

Effets sur le développement

GLYCÉRINE	1310 mg/kg bw/d, Pas d'effets sur le développement Résultat: DSENO Espèces: Rat

Reproductivité

GLYCÉRINE	2000 mg/kg bw/d, Pas d'effets sur la fertilité Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique Non classé.

Toxicité pour certains organes cibles - expositions répétées Non classé.

GLYCÉRINE	8000 mg/kg bw/d, Orale Résultat: DSENO Espèces: Rat Durée du test: 2 yr

Danger par aspiration Pas un danger par aspiration.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
GLYCÉRINE (CAS 56-81-5)

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

GLYCÉRINE	OCED 301 Résultat: Facilement Biodegradable
STEARALKONIUM CHLORIDE	64 % OECD 301 D Résultat: Facilement Biodegradable Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

GLYCÉRINE	-1.76
STEARALKONIUM CHLORIDE	3.23

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

FINISHED GOODS

N'entre pas dans la réglementation des marchandises dangereuses.

BULK

PULPRIOT

化学品安全技术说明书

按照 GB/T 16483、GB/T 17519编制。

产品名称： PULP RIOT SEMI-PERMANENT COLOR - 组 10

最初编制日期：09-三月-2022
版本号：01
SDS 编号：00-22-0000164

第1部分 化学品及企业标识

化学品中文名 PULP RIOT SEMI-PERMANENT COLOR - 组 10

化学品英文名 PULP RIOT SEMI-PERMANENT COLOR - GROUP 10

生产商

企业名称 L’ ORÉAL SA

地址 14, rue royale
75008 - Paris
法国

联系电话 +1 732 499 2745

电子邮件 nacorpeuropesdsrequest@loreal.com

应急电话 +1 352 323-3500

推荐用途及限制用途

推荐用途 个人美容护理产品.

最初编制日期 09-三月-2022

SDS 编号 00-22-0000164

第2部分 危险性概述

紧急情况概述

造成严重眼刺激。 若被排入水道中，会危害环境。 这是一款消费者护理产品，按照标籤说明使用是安全的。 和许多消费品类似，长期或重复接触皮肤或进入眼中，少数人会产生发红、皮疹和 / 或肿胀等不良反应。

危险类别

物理危险	未被分类。	
健康危害	严重眼睛损伤/眼睛刺激性	类别 2A
环境危害	对水环境危害-急性危害	类别 2
	对水环境危害-长期危害	类别 3

标签要素

象形图

警示词 警告

危险性说明

H319	造成严重眼刺激。
H401	对水生生物有毒。
H412	对水生生物有害并具有长期持续影响。

防范说明

预防措施

P102	放在儿童无法触及之处。
P103	使用前请阅读标签。
P264	作业后彻底清洗。
P273	避免释放到环境中。
P280	戴防护眼罩/防护面具。

事故响应

P101	如需就医，请随身携带产品容器或标签。
P305 + P351 + P338	如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。
P337 + P313	如仍觉眼刺激：求医/就诊。

安全储存 远离禁忌物保存。

废弃处置

P501 按照地方/区域/国家/国际规章处置内装物/容器。

物理和化学危险 产品在正常的使用、储存和运输条件下是稳定的和非活性的。 无异常的火灾或爆炸危险。

健康危害 持续的吸入可能是有害的。 预计较低的食入危害。 造成严重眼刺激。

环境危害 对水生生物有毒。 对水生生物有害并具有长期持续影响。

补充信息 混合物的1.02%由对水生环境的急性危害未知的组分组成。

第3部分 成分/组成信息

物质/混合物 混合物

化学名称	浓度（%）	CAS 号
STEARALKONIUM CHLORIDE	1.41	122-19-0
硬脂酸甘油酯 GLYCERYL STEARATE	1.02	31566-31-1
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	0.74	65497-29-2
BASIC RED 51	≤ 0.4	77061-58-6
HC BLUE NO. 15	< 0.2	74578-10-2
BASIC YELLOW 87	≤ 0.2	68259-00-7
BASIC ORANGE 31	≤ 0.1	97404-02-9
DIDECYLDIMONIUM CHLORIDE	0.01	7173-51-5

第4部分 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如仍觉眼刺激：求医/就诊。

经口 漱口。 如症状出现，就医。

最重要的症状和健康影响 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。

对施救者的个体防护 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

对医生的特别提示 提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

第5部分 消防措施

灭火剂 水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不合适的灭火剂 禁止使用直流水灭火，否则会引起火势蔓延。

特别危险性 燃烧时，会产生对人体健康有害的气体。

特殊消防程序 在不会发生危险的情况下将容器撤离火灾现场。

对消防人员的防护 发生火灾时，使用自给式呼吸设备并穿全身防护服。

一般火灾危险 无异常的火灾或爆炸危险。

特定的方法 采用标准灭火程序并考虑其他涉及材料有关的危险。

第6部分 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序

非应急处理人员 让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

应急人员 让无关人员离开。 使用SDS第8部分中推荐的个人防护。

环境保护措施 避免释放到环境中。 通知相应的管理和主管人员所有发生的环境泄漏。 在确保安全的条件下，采取措施防止进一步的泄漏或溢出。 防止排入到排水系统、河道或排放到地面上。

泄漏化学品的收容、清除方法 防止产品进入下水道。

大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

防止发生次生灾害的预防措施 无资料。

第7部分 操作处置与储存

操作处置 避免接触到眼睛。 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 避免释放到环境中。 遵守良好工业卫生习惯。

安全储存 储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

第8部分 接触控制/个体防护

接触限值

没有对各成分的接触限值的说明。

生物限值 没有该成分的生物接触限值。

监测方法 依照标准监控程序。

工程控制措施 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。

个体防护装备

呼吸系统防护 仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

眼睛防护 仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤和身体防护 仅用於工业环境。 需穿上合适的防护衣服。

卫生措施 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

第9部分 理化特性

外观

性状 液体。

形状 奶油。

颜色 有色

气味 特征的。

pH 值 3 - 4.5

熔点/凝固点 无资料。

沸点，初沸点和沸程 > 100 ° C (> 212 ° F)

闪点 > 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法

燃烧限值 - 下限（%） 无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%） 无资料。

蒸气压 无资料。

蒸气密度 无资料。

相对密度 无资料。

密度 0.98 - 0.999 g/cm³

溶解性

溶解性（水） 无资料。

分配系数（辛醇/水） 无资料。

自燃温度 无资料。

分解温度 无资料。

易燃性（固体，气体） 不适用。

其他数据

爆炸特性 不具有爆炸性。

氧化特性 没有氧化性。

第10部分 稳定性和反应性

反应性 产品在正常的使用、储存和运输条件下是稳定的和非活性的。

稳定性 正常条件下物料稳定。

可能的危险反应 正常使用的条件下未见有危险反应。

避免接触的条件 远离热，热表面，火花，明火和其他点火源。 接触禁配物。

禁配物 强氧化剂。

危险的分解产物 没有已知的危险分解产物。

第11部分 毒理学信息

急性毒性 未知。

产品	物种	试验结果
PULP RIOT SEMI-PERMANENT COLOR - 组 10		
急性的		
经口		
ATEmix		28270 mg/kg
经皮肤		
ATEmix		19250 mg/kg

组分	物种	试验结果
BASIC ORANGE 31 (CAS 97404-02-9)

藻类	EC50	近头状伪蹄形藻	0.03 mg/l, 72 h OECD 201
鱼	LC50	虹鳟鱼	0.85 mg/l, 96 h OECD 203

组分		物种	试验结果
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.013 mg/l, 21 D OECD 211
藻类	EC10	近头状伪蹄形藻	0.011 mg/l, 72 h OECD 201

生态毒性 对水生生物有毒。 对水生生物有害并具有长期持续影响。

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

BASIC ORANGE 31	1 - 2 % OECD 301 B 结果: 不容易生物降解 测试时间: 28 D
BASIC YELLOW 87	21.6 % OECD 302 B 结果: 特有的生物降解。 测试时间: 28 D
DIDECYLDIMONIUM CHLORIDE	67 - 71 mg/l OECD 301 B 结果: 易生物降解 测试时间: 28 D
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	< 60 % OECD 301 结果: 不容易生物降解 测试时间: 28 D
HC BLUE NO. 15	结果: 不容易生物降解
STEARALKONIUM CHLORIDE	64 % OECD 301 D 结果: 易生物降解 测试时间: 28 D

生物积累性

潜在的生物累积性

辛醇/水分配系数 log Kow

BASIC ORANGE 31	-2.13 OECD 107
BASIC RED 51	-1.97 OECD 107
BASIC YELLOW 87	-1.69
HC BLUE NO. 15	3.47 OECD 117
STEARALKONIUM CHLORIDE	3.23

土壤中的迁移性 本产品无数据。

其它有害效应 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

第13部分 废弃处置

残余废弃物 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

地方处置法规 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 禁止物料排放到排水沟/供水系统。不得用化学品或使用过的容器去污染水池、水道和沟渠。 按照地方/区域/国家/国际规章处置内装物/容器。

第14部分 运输信息

中国：危险货物品名表

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT LIGHTENER**

Other means of identification

SDS number 50-23-0000031

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards	Oxidizing solids	Category 3
Health hazards	Acute toxicity, oral	Category 4
	Skin corrosion/irritation	Category 2
	Serious eye damage/eye irritation	Category 1
	Sensitization, respiratory	Category 1
	Sensitization, skin	Category 1
	Specific target organ toxicity, single exposure	Category 3 respiratory tract irritation

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement May intensify fire; oxidizer. Harmful if swallowed. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause respiratory irritation.

Precautionary statement

Prevention Keep away from heat. Keep/Store away from clothing/combustible materials. Take any precaution to avoid mixing with combustibles. Avoid breathing dust. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Contaminated work clothing must not be allowed out of the workplace. Wear protective gloves/eye protection/face protection. In case of inadequate ventilation wear respiratory protection.

Response If swallowed: Call a poison center/doctor if you feel unwell. Rinse mouth. If on skin: Wash with plenty of water. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. In case of fire: Use appropriate media to extinguish.

Storage Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC)	None known.
Supplemental information	None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
POTASSIUM PERSULFATE		7727-21-1	40
SODIUM SILICATE		1344-09-8	27
AMMONIUM PERSULFATE		7727-54-0	10
MINERAL OIL		8012-95-1	6.1
MAGNESIUM CARBONATE		546-93-0	4
SILICA		112945-52-5	3.05

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Oxygen or artificial respiration if needed. Do not use mouth-to-mouth method if victim inhaled the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. If experiencing respiratory symptoms: Call a poison center or doctor/physician.
Skin contact	If on clothing: Rinse immediately contaminated clothing and skin with plenty of water before removing clothes. Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.
Eye contact	Do not rub eyes. Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.
Ingestion	Rinse mouth. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Get medical advice/attention if you feel unwell.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim warm. Keep victim under observation. Symptoms may be delayed.
General information	Take off all contaminated clothing immediately. Contact with combustible material may cause fire. If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media	Water spray. Foam. Powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Greatly increases the burning rate of combustible materials. Containers may explode when heated. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk. Use water spray to cool unopened containers.
Specific methods	Cool containers exposed to flames with water until well after the fire is out.
General fire hazards	May intensify fire; oxidizer. Contact with combustible material may cause fire.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep away from clothing and other combustible materials. Wear appropriate protective equipment and clothing during clean-up. Avoid inhalation of dust. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

Keep combustibles (wood, paper, oil, etc.) away from spilled material. Ventilate the contaminated area. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Minimize dust generation and accumulation. Collect dust using a vacuum cleaner equipped with HEPA filter. Wear appropriate protective equipment and clothing during clean-up. Stop the flow of material, if this is without risk.

Large Spills: Wet down with water and dike for later disposal. Absorb in vermiculite, dry sand or earth and place into containers. Shovel the material into waste container. Following product recovery, flush area with water.

Small Spills: Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Keep away from heat. Provide appropriate exhaust ventilation at places where dust is formed. Take any precaution to avoid mixing with combustibles. Keep away from clothing and other combustible materials. Do not get this material in contact with eyes. Do not taste or swallow. Avoid breathing dust. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. When using, do not eat, drink or smoke. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Store locked up. Keep away from heat. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Do not store near combustible materials. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value	Form
MAGNESIUM CARBONATE (CAS 546-93-0)	PEL	5 mg/m3	Respirable fraction.
		15 mg/m3	Total dust.
MINERAL OIL (CAS 8012-95-1)	PEL	5 mg/m3	Mist.

US. OSHA Table Z-3 (29 CFR 1910.1000)

Components	Type	Value
SILICA (CAS 112945-52-5)	TWA	0.8 mg/m3
		20 mppcf

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0.1 mg/m3	
MINERAL OIL (CAS 8012-95-1)	TWA	5 mg/m3	Inhalable fraction.

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0.1 mg/m3	

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value	Form
MAGNESIUM CARBONATE (CAS 546-93-0)	TWA	5 mg/m3	Respirable.
		10 mg/m3	Total
MINERAL OIL (CAS 8012-95-1)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.
SILICA (CAS 112945-52-5)	TWA	6 mg/m3	

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. If engineering measures are not sufficient to maintain concentrations of dust particulates below the Occupational Exposure Limit (OEL), suitable respiratory protection must be worn. If material is ground, cut, or used in any operation which may generate dusts, use appropriate local exhaust ventilation to keep exposures below the recommended exposure limits. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves. Frequent change is advisable.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits. Dust & vapor respirator.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Keep from contact with clothing and other combustible materials. Remove and wash contaminated clothing promptly. Keep away from food and drink. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state Solid.

Form Powder.

Color Light blue.

Odor Not available.

Odor threshold Not available.

pH Not applicable.

Melting point/freezing point Not available.

Initial boiling point and boiling range Not applicable.

Flash point Not applicable.

Evaporation rate Not available.

Flammability (solid, gas) Not available.

Upper/lower flammability or explosive limits

Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	May intensify fire; oxidizer.
pH in aqueous solution	10.2 - 10.6

10. Stability and reactivity

Reactivity	Greatly increases the burning rate of combustible materials.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Combustible material. Reducing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	May cause irritation to the respiratory system. May cause allergy or asthma symptoms or breathing difficulties if inhaled. Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	Harmful if swallowed.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Information on toxicological effects

Acute toxicity Harmful if swallowed.

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

MINERAL OIL	31 % OECD 301 F Result: Not Readily Biodegradable
POTASSIUM PERSULFATE	Result: Not expected to bioaccumulate

Bioaccumulative potential

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

Not listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Chemical name	CAS number	% by wt.
AMMONIUM PERSULFATE	7727-54-0	10

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT LIGHTENER
Synonyms	None.
SDS number	50-23-0000031
Product code	F0000998V03
Issue date	12-03-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards		
Oxidizing solids	Category 3	H272 - May intensify fire; oxidizer.
Health hazards		
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Respiratory sensitization	Category 1	H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin sensitization	Category 1	H317 - May cause an allergic skin reaction.
Specific target organ toxicity - single exposure	Category 3 respiratory tract irritation	H335 - May cause respiratory irritation.

Hazard summary May intensify fire; oxidizer. Causes serious eye damage. Causes skin irritation. May cause irritation to the respiratory system. Exposure to powder or dusts may be irritating to eyes, nose and throat. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause an allergic skin reaction. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: AMMONIUM PERSULFATE, POTASSIUM PERSULFATE, SODIUM SILICATE

Hazard pictograms

Signal word Danger

Hazard statements

H272	May intensify fire; oxidizer.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335	May cause respiratory irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P220	Keep away from clothing and other combustible materials.
P260	Do not breathe dust.
P264	Wash thoroughly after handling.
P271	Use only outdoors or in a well-ventilated area.
P272	Contaminated work clothing should not be allowed out of the workplace.
P280	Wear protective gloves/protective clothing/eye protection/face protection.
P284	Wear respiratory protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P302 + P352	IF ON SKIN: Wash with plenty of water.
P304 + P340	IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P333 + P313	If skin irritation or rash occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.
P370 + P378	In case of fire: Use appropriate media to extinguish.

Storage

P403 + P233	Store in a well-ventilated place. Keep container tightly closed.
P405	Store locked up.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 59,45% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 92,45% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Take off all contaminated clothing immediately. Contact with combustible material may cause fire. If you feel unwell, seek medical advice (show the label where possible).
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing. Oxygen or artificial respiration if needed. Do not use mouth-to-mouth method if victim inhaled the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. If experiencing respiratory symptoms: Call a poison center or doctor/physician.

Skin contact If on clothing: Rinse immediately contaminated clothing and skin with plenty of water before removing clothes. Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact Do not rub eyes. Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards May intensify fire; oxidizer. Contact with combustible material may cause fire.

5.1. Extinguishing media

Suitable extinguishing media Water spray. Foam. Powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture Greatly increases the burning rate of combustible materials. Containers may explode when heated. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk. Use water spray to cool unopened containers.

Specific methods Cool containers exposed to flames with water until well after the fire is out.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep away from clothing and other combustible materials. Wear appropriate protective equipment and clothing during clean-up. Avoid inhalation of dust. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Keep combustibles (wood, paper, oil, etc.) away from spilled material. Ventilate the contaminated area. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Minimize dust generation and accumulation. Collect dust using a vacuum cleaner equipped with HEPA filter. Wear appropriate protective equipment and clothing during clean-up. Stop the flow of material, if this is without risk. Large Spills: Wet down with water and dike for later disposal. Absorb in vermiculite, dry sand or earth and place into containers. Shovel the material into waste container. Following product recovery, flush area with water. Small Spills: Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Keep away from heat. Provide appropriate exhaust ventilation at places where dust is formed. Take any precaution to avoid mixing with combustibles. Keep away from clothing and other combustible materials. Do not breathe dust. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store locked up. Keep away from heat. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Do not store near combustible materials. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MAGNESIUM CARBONATE (CAS 546-93-0)	TWA	10 mg/m3	
MINERAL OIL (CAS 8012-95-1)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	
SILICA (CAS 112945-52-5)	TWA	10 mg/m3	

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
MAGNESIUM CARBONATE (CAS 546-93-0)	VME	10 mg/m3

Regulatory status: Indicative limit (VL)

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
MINERAL OIL (CAS 8012-95-1)	TWA	5 mg/m3	Respirable fraction.
SILICA (CAS 112945-52-5)	TWA	4 mg/m3	Inhalable fraction.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
MINERAL OIL (CAS 8012-95-1)	AGW	5 mg/m3	Respirable fraction.
SILICA (CAS 112945-52-5)	AGW	4 mg/m3	Inhalable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MINERAL OIL (CAS 8012-95-1)	TWA	5 mg/m3	Inhalable fraction.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
MINERAL OIL (CAS 8012-95-1)	TWA	5 mg/m3	Inhalable fraction.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	Inhalable fraction.
SILICA (CAS 112945-52-5)	TWA	2 mg/m3	Respirable fraction.
		10 mg/m3	Inhalable fraction.

Spain. Occupational Exposure Limits

Components	Type	Value	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MINERAL OIL (CAS 8012-95-1)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. If engineering measures are not sufficient to maintain concentrations of dust particulates below the Occupational Exposure Limit (OEL), suitable respiratory protection must be worn. If material is ground, cut, or used in any operation which may generate dusts, use appropriate local exhaust ventilation to keep exposures below the recommended exposure limits. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Chemical respirator with organic vapor cartridge, full facepiece, dust and mist filter.

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves. Frequent change is advisable.

- Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection	Applicable for industrial settings only. Chemical respirator with organic vapor cartridge, full facepiece, dust and mist filter.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Keep from contact with clothing and other combustible materials. Remove and wash contaminated clothing promptly. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Solid.
Form	Powder.
Color	Light blue.
Odor	Not available.
Odor threshold	Not available.
pH	Not applicable.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not applicable.
Flash point	Not applicable.
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	May intensify fire; oxidizer.

9.2. Other information

pH in aqueous solution	10,2 - 10,6

SECTION 10: Stability and reactivity

10.1. Reactivity	Keep away from combustible material. Greatly increases the burning rate of combustible materials.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Combustible material. Reducing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation May cause irritation to the respiratory system. May cause allergy or asthma symptoms or breathing difficulties if inhaled. Prolonged inhalation may be harmful.

Skin contact Causes skin irritation. May cause an allergic skin reaction.

Eye contact Causes serious eye damage.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT LIGHTENER

Skin corrosion/irritation Causes skin irritation.

Irritation Corrosion - Skin

AMMONIUM PERSULFATE	OECD 404 Result: Irritating Species: Rabbit
SODIUM SILICATE	OECD 404 Result: Irritating Species: Rabbit
POTASSIUM PERSULFATE	Result: Irritating Species: Human

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

AMMONIUM PERSULFATE	OECD 405 Result: Irritating Species: Rabbit
SODIUM SILICATE	Result: Corrosive Species: Rabbit
POTASSIUM PERSULFATE	Result: Irritating Species: Human

Respiratory sensitization May cause allergy or asthma symptoms or breathing difficulties if inhaled.

AMMONIUM PERSULFATE	Result: Sensitizing Species: Human
POTASSIUM PERSULFATE	Result: Sensitizing Species: Human

Skin sensitization May cause an allergic skin reaction.

Sensitization

AMMONIUM PERSULFATE	OECD 406 Result: Sensitizing Species: Guinea pig
SODIUM SILICATE	OECD 429 Result: Not Sensitizing Species: Mouse
POTASSIUM PERSULFATE	OECD 429 Result: Sensitizing Species: Mouse

Skin sensitization

POTASSIUM PERSULFATE	OECD 429 Result: Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

SODIUM SILICATE	Result: In vitro and in vivo tests did not show mutagenic effects.
AMMONIUM PERSULFATE	Result: In vitro tests did not show mutagenic effects
POTASSIUM PERSULFATE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

SODIUM SILICATE	> 200 mg/kg bw/d Result: NOAEL Species: Rat
AMMONIUM PERSULFATE	> 250 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Reproductivity

SODIUM SILICATE	> 159 mg/kg bw/d, Oral Result: NOAEL Species: Rat
AMMONIUM PERSULFATE	> 250 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure May cause respiratory irritation.

SODIUM SILICATE	Result: Irritating

Specific target organ toxicity - single exposure

POTASSIUM PERSULFATE	Result: Irritating Species: Human

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

AMMONIUM PERSULFATE	10,3 mg/m³, Inhalation Result: NOAEC Species: Rat Test Duration: 90 d
POTASSIUM PERSULFATE	131,5 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 28 d
SODIUM SILICATE	2400 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 28 d
AMMONIUM PERSULFATE	41,1 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat Test Duration: 28 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
AMMONIUM PERSULFATE (CAS 7727-54-0)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	83,7 mg/l, 72 h
Crustacea	EC50	Daphnia magna	120 mg/l, 48 h
Fish	LC50	Oncorhynchus mykiss	76 mg/l, 96 h
Other	EC10	Pseudomonas putida	36 mg/l, 18 h
Chronic			
Algae	NOEC	Desmodesmus subspicatus	32 mg/l, 72 h OECD 201
AMMONIUM SULFATE (CAS 7783-20-2)			
Aquatic			
Crustacea	EC50	Water flea (Ceriodaphnia dubia)	52 - 67 mg/l, 48 hours
Fish	LC50	Rainbow trout,donaldson trout (Oncorhynchus mykiss)	35,2 - 43,8 mg/l, 96 hours
SODIUM SILICATE (CAS 1344-09-8)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	> 345,4 mg/l, 72 h DIN 38412 Part 9
Crustacea	EC50	Daphnia magna	1700 mg/l, 48 h EU C.2
Fish	LC50	Danio rerio	1108 mg/l, 96 h OECD 203
Other	EC0	Pseudomonas putida	3454 mg/l, 30 min DIN 38412 Part 27

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

POTASSIUM PERSULFATE	Result: Not expected to bioaccumulate

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow) Not available.

12.4. Mobility in soil	No data available.
12.5. Results of PBT and vPvB assessment	Not a PBT or vPvB substance or mixture.
12.6. Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.
12.7. Additional information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

SODIUM SILICATE (CAS 1344-09-8)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

AMMONIUM PERSULFATE (CAS 7727-54-0)
POTASSIUM PERSULFATE (CAS 7727-21-1)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H272 May intensify fire; oxidizer. H302 Harmful if swallowed. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled. H335 May cause respiratory irritation. H412 Harmful to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SICHERHEITSDATENBLATT

ABSCHNITT 1: Bezeichnung des Stoffs bzw. des Gemischs und des Unternehmens

1.1. Produktidentifikator

Handelsname oder Bezeichnung des Gemischs	PULP RIOT LIGHTENER
Synonyme	Keine.
SDS-Nummer	50-23-0000031
Produktcode	F0000998V03
Ausgabedatum	03-Dezember-2020
Überarbeitungsnummer	01

1.2. Relevante identifizierte Verwendungen des Stoffs oder Gemischs und Verwendungen, von denen abgeraten wird

Identifizierte Verwendungen	Körperpflegeprodukt zur kosmetischen Verwendung.
Verwendungen, von denen abgeraten wird	Unbekannt.

1.3. Einzelheiten zum Lieferanten, der das Sicherheitsdatenblatt bereitstellt

Kontaktperson

Firmenname	L'ORÉAL SA
Anschrift	14, rue royale 75008 - Paris Frankreich
Telefonnummer	+1 732 499 2745
E-Mail-Adresse	nacorpeuropesdsrequest@loreal.com

1.4. Notrufnummer

Frankreich Nationaler Giftnotruf	ORFILA Nummer (INRS): + 33 (0) 1 45 42 59 59 (24 Stunden täglich zugänglich. SDB-/Produktinformationen stehen für den Notdienst eventuell nicht zur Verfügung.)
INFOTRAC	+1 352-323-3500 (24 Stunden täglich zugänglich. SDB-/Produktinformationen stehen für den Notdienst eventuell nicht zur Verfügung.)

ABSCHNITT 2: Mögliche Gefahren

2.1. Einstufung des Stoffs oder Gemischs

Das Gemisch wurde auf seine physikalischen, gesundheitlichen und Umweltgefahren bewertet und/oder getestet. Es gilt die nachfolgende Einstufung.

Einstufung gemäß der (EG) Verordnung 1272/2008 in der geänderten Fassung

Physikalische Gefahren		
Oxidierende Feststoffe	Kategorie 3	H272 - Kann Brand verstärken; Oxidationsmittel.
Gesundheitsgefahren		
Ätz-/Reizwirkung auf die Haut	Kategorie 2	H315 - Verursacht Hautreizungen.
Schwere Augenschädigung/Augenreizung	Kategorie 1	H318 - Verursacht schwere Augenschäden.
Sensibilisierung der Atemwege	Kategorie 1	H334 - Kann bei Einatmen Allergie, asthmaartige Symptome oder Atembeschwerden verursachen.
Sensibilisierung der Haut	Kategorie 1	H317 - Kann allergische Hautreaktionen verursachen.
Spezifische Zielorgan-Toxizität bei einmaliger Exposition	Kategorie 3 Reizung der Atemwege	H335 - Kann die Atemwege reizen.

Gefahrenübersicht

Kann Brand verstärken; Oxidationsmittel. Verursacht schwere Augenschäden. Verursacht Hautreizungen. Kann die Atemwege reizen. Exposition gegenüber Pulver oder Stäuben kann Reizungen der Augen, der Nase und des Rachens hervorrufen. Kann bei Einatmen Allergie, asthmaartige Symptome oder Atembeschwerden verursachen. Kann allergische Hautreaktionen verursachen. Die Exposition am Arbeitsplatz gegenüber dem Stoff oder der Mischung kann gesundheitsschädigende Wirkungen verursachen. Dies ist ein Reinigungsprodukt, das für Konsumenten sicher ist, wenn es gemäß den auf dem Etikett angegebenen Vorschriften verwendet wird. Wie bei allen Konsumprodukten können bei einer geringen Zahl von Menschen Reaktionen wie Hautröte, Ausschlag und / oder Schwellungen nach längerem oder wiederholtem Haut- oder Augenkontakt auftreten.

2.2. Kennzeichnungselemente

Kennzeichnung gemäß der Verordnung (EG) Nr. 1272/2008 in der geänderten Fassung

Enthält: AMMONIUM PERSULFATE, KIESELSÄURE, NATRIUMSALZ, POTASSIUM PERSULFATE

Gefahrenpiktogramme

Signalwort Gefahr

Gefahrenhinweise

H272	Kann Brand verstärken; Oxidationsmittel.
H315	Verursacht Hautreizungen.
H317	Kann allergische Hautreaktionen verursachen.
H318	Verursacht schwere Augenschäden.
H334	Kann bei Einatmen Allergie, asthmaartige Symptome oder Atembeschwerden verursachen.
H335	Kann die Atemwege reizen.

Sicherheitshinweise

Prävention

P102	Darf nicht in die Hände von Kindern gelangen.
P103	Vor Gebrauch Kennzeichnungsetikett lesen.
P210	Von Hitze, heißen Oberflächen, Funken, offenen Flammen sowie anderen Zündquellenarten fernhalten. Nicht rauchen.
P220	Von Kleidung und anderen brennbaren Materialien fernhalten.
P260	Staub nicht einatmen.
P264	Nach Gebrauch gründlich waschen.
P271	Nur im Freien oder in gut belüfteten Räumen verwenden.
P272	Kontaminierte Arbeitskleidung nicht außerhalb des Arbeitsplatzes tragen.
P280	Schutzhandschuhe/Schutzkleidung/Augenschutz/Gesichtsschutz tragen.
P284	Atemschutz tragen.

Reaktion

P101	Ist ärztlicher Rat erforderlich, Verpackung oder Kennzeichnungsetikett bereithalten.
P302 + P352	BEI BERÜHRUNG MIT DER HAUT: Mit viel Wasser/waschen.
P304 + P340	BEI EINATMEN: Die Person an die frische Luft bringen und für ungehinderte Atmung sorgen.
P305 + P351 + P338	BEI KONTAKT MIT DEN AUGEN: Einige Minuten lang behutsam mit Wasser spülen. Eventuell vorhandene Kontaktlinsen nach Möglichkeit entfernen. Weiter spülen.
P310	Sofort GIFTINFORMATIONSZENTRUM/Arzt/anrufen.
P333 + P313	Bei Hautreizung oder -ausschlag: Ärztlichen Rat einholen/ärztliche Hilfe hinzuziehen.
P362 + P364	Kontaminierte Kleidung ausziehen und vor erneutem Tragen waschen.
P370 + P378	Bei Brand: Geeignetes Medium zum Löschen verwenden.

Lagerung

P403 + P233	An einem gut belüfteten Ort aufbewahren. Behälter dicht verschlossen halten.
P405	Unter Verschluss aufbewahren.

Entsorgung

P501	Inhalt/Behälter gemäß den lokalen/regionalen/nationalen/internationalen Vorschriften der Entsorgung zuführen.

Zusätzliche Angaben auf dem Etikett

59,45 % der Mischung besteht aus Komponenten mit unbekannten akuten Gefahren für die aquatische Umwelt. 92,45 % der Mischung besteht aus Komponenten mit unbekannten langfristigen Gefahren für die aquatische Umwelt.

2.3. Sonstige Gefahren

Kein PBT- oder vPvB-Gemisch oder Stoff.

ABSCHNITT 3: Zusammensetzung/Angaben zu Bestandteilen

3.2. Gemische

Allgemeine Angaben

Chemische Bezeichnung	%	CAS-Nr. / EG-Nummer	REACH-Registrierungsnummer	Index-Nr.	Hinweise
POTASSIUM PERSULFATE	40	7727-21-1 231-781-8	01-2119495676-19	016-061-00-1	
Einstufung:	Ox. Sol. 3;H272, Acute Tox. 4;H302, Skin Irrit. 2;H315, Skin Sens. 1;H317, Eye Irrit. 2;H319, Resp. Sens. 1;H334, STOT SE 3;H335

Liste mit Abkürzungen und Symbolen, die möglicherweise vorstehend verwendet wurden

#: Für diesen Stoff gibt es einen Grenzwert bzw. Grenzwerte der Union für die Exposition am Arbeitsplatz.
M: M-Faktor
PBT: Persistente, bioakkumulierbare und toxische Substanz.
vPvB: Sehr persistente und sehr bioakkumulierbare Substanz.
Alle Konzentrationen sind in Gewichtsprozent angegeben, sofern der Inhaltsstoff kein Gas ist. Gaskonzentrationen werden in Volumenprozent angegeben.

Weitere Kommentare Der volle Wortlaut für alle H-Sätze wird in Abschnitt 16 angegeben.

ABSCHNITT 4: Erste-Hilfe-Maßnahmen

Allgemeine Angaben Beschmutzte, getränkte Kleidung sofort ausziehen. Feuergefahr bei Berührung mit brennbaren Stoffen. Bei Unwohlsein ärztlichen Rat einholen (wenn möglich dieses Etikett vorzeigen). Sicherstellen, dass medizinisches Personal sich der betroffenen Materialien bewusst ist und Schutzvorkehrungen trifft. Kontaminierte Kleidung vor erneutem Tragen waschen.

4.1. Beschreibung der Erste-Hilfe-Maßnahmen

Einatmen Die betroffene Person an die frische Luft bringen und in einer Position ruhigstellen, die das Atmen erleichtert. Sauerstoff oder, falls erforderlich, künstliche Beatmung. Nicht die Mund-zu-Mund-Methode anwenden, wenn der Betroffene die Substanz eingenommen hat. Künstliche Beatmung einleiten mittels einer Taschenmaske, die mit einem Einwegventil ausgerüstet ist, oder sonstiger medizinischer Atmungsgeräte. If experiencing respiratory symptoms: Call a poison center or doctor/physician.

Hautkontakt Bei Berührung mit der Kleidung: Vor Ablegen der Kleidung kontaminierte Kleidung und Haut sofort mit reichlich Wasser abwaschen. Beschmutzte, getränkte Kleidung sofort ausziehen und die Haut mit Wasser und Seife waschen. Bei Hautausschlägen und anderen Hautbeschwerden: Ärztliche Hilfe hinzuziehen und Sicherheitsdatenblatt mitnehmen. Kontaminierte Kleidung vor erneutem Tragen waschen.

Augenkontakt Auge nicht reiben. Augen sofort für 15 Minuten mit reichlich Wasser ausspülen. Ggf. Kontaktlinsen herausnehmen, wenn dies einfach möglich ist. Mit dem Auswaschen fortfahren. Sofort ärztliche Hilfe hinzuziehen!

Verschlucken Mund ausspülen. Ärztliche Hilfe hinzuziehen, wenn Symptome auftreten.

4.2. Wichtigste akute und verzögert auftretende Symptome und Wirkungen Starke Augenreizung. Dieses Produkt kann Brennen, Tränenbildung, Rötung, Schwellung und verschwommene Sicht verursachen. Kann zu dauerhaften Augenschäden einschließlich Blindheit führen. Kann die Atemwege reizen. Atembeschwerden. Hautreizung. Kann Rötung und Schmerzen verursachen. Kann allergische Hautreaktionen verursachen. Dermatitis. Ausschlag.

4.3. Hinweise auf ärztliche Soforthilfe oder Spezialbehandlung Allgemeine Unterstützungsmaßnahmen und symptomatische Behandlung sind angezeigt. Betroffene Person unter Beobachtung halten. Die Symptome können verzögert auftreten.

ABSCHNITT 5: Maßnahmen zur Brandbekämpfung

Allgemeine Brandgefahren Kann Brand verstärken; Oxidationsmittel. Feuergefahr bei Berührung mit brennbaren Stoffen.

5.1. Löschmittel

Geeignete Löschmittel Wassersprühnebel. Schaum. Pulver. Kohlendioxid (CO_2).

Ungeeignete Löschmittel Zum Löschen keinen Wasserstrahl verwenden, da das Feuer dadurch verteilt werden kann.

5.2. Besondere vom Stoff oder Gemisch ausgehende Gefahren Erhöht den Abbrand brennbarer Materialien stark. Container können explodieren, wenn sie extremer Hitze ausgesetzt werden. Im Brandfall können sich gesundheitsschädliche Gase entwickeln.

5.3. Hinweise für die Brandbekämpfung

Besondere Schutzausrüstung für die Brandbekämpfung Im Brandfall schweres Atemschutzgerät und komplette Schutzausrüstung tragen.

Besondere Verfahren zur Brandbekämpfung Explosions- und Brandgase nicht einatmen. Behälter aus dem Brandbereich entfernen, soweit dies ohne Gefahr möglich ist. Zur Kühlung geschlossener Behälter Wassersprühnebel einsetzen.

Besondere Löschhinweise Durch Flammen erhitzte Behälter weiter mit Wasser kühlen, nachdem das Feuer gelöscht wurde.

ABSCHNITT 6: Maßnahmen bei unbeabsichtigter Freisetzung

6.1. Personenbezogene Vorsichtsmaßnahmen, Schutzausrüstungen und in Notfällen anzuwendende Verfahren

Nicht für Notfälle geschultes Personal Unnötiges Personal fernhalten. Personen fernhalten und auf windzugewandter Seite bleiben. Von Kleidung und anderen brennbaren Materialien fernhalten. Während der Entsorgung geeignete Schutzkleidung und -ausrüstung tragen. Das Einatmen von Staub vermeiden. Beschädigte Behälter oder ausgetretenes Material nur berühren, wenn geeignete Schutzkleidung getragen wird. Für angemessene Lüftung sorgen. Wenn größere Mengen verschütteten Materials nicht eingedämmt werden können, sollen die lokalen Behörden benachrichtigt werden. Für persönliche Schutzmaßnahmen, siehe Abschnitt 8 im SDB.

Einsatzkräfte Unnötiges Personal fernhalten. Empfohlenen persönlichen Schutz verwenden, wie in Abschnitt 8 im SDB empfohlen.

6.2. Umweltschutzmaßnahmen Eindringen in die Kanalisation, den Boden oder Wasserwege vermeiden.

6.3. Methoden und Material für Rückhaltung und Reinigung Brennbare Stoffe (Holz, Papier, Öl usw.) von dem ausgetreten Material fernhalten. Lüften Sie den kontaminierten Bereich. Verteilung von Staub in der Luft vermeiden (d.h. Reinigen staubiger Oberfläche mit Druckluft). Die Bildung und Ansammlung von Staub minimieren. Staub mit einem Staubsauger mit HEPA-Filter aufnehmen. Während der Entsorgung geeignete Schutzkleidung und -ausrüstung tragen. Falls nicht risikoträchtig, Materialfuss stoppen.

Bei Austritt großer Mengen: Mit Wasser durchnässen und zur späteren Entsorgung eindämmen. Mit Vermiculit, trockenem Sand oder Erde aufnehmen und in Behälter füllen. Material in Abfallbehälter schaufeln. Nach dem Entfernen des Produkts den Bereich mit Wasser spülen.

Kleine Austrittsmengen: Verschüttetes Material aufkehren oder aufsaugen und in geeigneten Behälter zur Entsorgung geben. Oberflächen gründlich reinigen, um Kontaminationsrückstände zu entfernen.

Verschüttetes Produkt nie in den Orginalbehälter zwecks Wiederverwertung geben.

6.4. Verweis auf andere Abschnitte Für persönliche Schutzmaßnahmen, siehe Abschnitt 8 im SDB. Für Abfallentsorgung siehe Abschnitt 13 im SDB.

ABSCHNITT 7: Handhabung und Lagerung

7.1. Schutzmaßnahmen zur sicheren Handhabung Die Bildung und Ansammlung von Staub minimieren. Regelmäßige Reinigung sollte eingeführt werden, um sicherzustellen, dass sich kein Staub auf den Oberflächen ansammelt. Vor Hitze schützen. Bei Staubbildung für geeignete Entlüftung sorgen. Mischen mit brennbaren Stoffen unbedingt verhindern. Von Kleidung und anderen brennbaren Materialien fernhalten. Staub nicht einatmen. Dieses Material darf nicht mit den Augen in Berührung kommen. Berührung mit den Augen, der Haut und Kleidung vermeiden. Längeren Kontakt vermeiden. Geeignete persönliche Schutzausrüstung tragen. Anerkannte industrielle Hygienemaßnahmen beachten.

7.2. Bedingungen zur sicheren Lagerung unter Berücksichtigung von Unverträglichkeiten Unter Verschluss aufbewahren. Vor Hitze schützen. An einem kühlen, trockenen Ort geschützt vor Sonnenlicht lagern. In einem dicht verschlossenen Behälter aufbewahren. An einem gut belüfteten Ort aufbewahren. Nicht in der Nähe von brennbaren Stoffen lagern. Darf nicht in die Hände von Kindern gelangen. Von unverträglichen Stoffen fernhalten (Siehe Abschnitt 10 des SDB's).

7.3. Spezifische Endanwendungen Steht nicht zur Verfügung.

ABSCHNITT 8: Begrenzung und Überwachung der Exposition/Persönliche Schutzausrüstungen

8.1. Zu überwachende Parameter

Grenzwerte für berufsbedingte Exposition

Belgien. Expositionsgrenzwerte.

Komponenten	Typ	Wert	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MAGNESIUMCARBONAT (CAS 546-93-0)	TWA	10 mg/m3	
Mineral oil (CAS 8012-95-1)	TWA	5 mg/m3	Nebel.
	Überschreitungsfaktor für Spitzenbegrenzung	10 mg/m3	Nebel.

Belgien. Expositionsgrenzwerte.

Komponenten	Typ	Wert	Form
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	
SILIKA (CAS 112945-52-5)	TWA	10 mg/m3	

Frankreich. Grenzschwellenwerte (VLEP) für berufsbedingte Exposition gegenüber Chemikalien in Frankreich, INRS ED 984

Komponenten	Typ	Wert
MAGNESIUMCARBONAT (CAS 546-93-0)	VME	10 mg/m3

Gesetzliche Regelung: Richtgrenzwert (VL)

Deutschland. DFG-MAK Liste (empfohlene Arbeitsplatzgrenzwerte). Kommission zur Untersuchung gesundheitlicher Gefahren durch chemische Verbindungen im Arbeitsbereich (DFG)

Komponenten	Typ	Wert	Form
Mineral oil (CAS 8012-95-1)	TWA	5 mg/m3	Alveolengängige Fraktion.
SILIKA (CAS 112945-52-5)	TWA	4 mg/m3	Einatembare Fraktion.

Deutschland. TRGS 900, Grenzwerte in der Luft am Arbeitsplatz

Komponenten	Typ	Wert	Form
Mineral oil (CAS 8012-95-1)	AGW	5 mg/m3	Alveolengängige Fraktion.
SILIKA (CAS 112945-52-5)	AGW	4 mg/m3	Einatembare Fraktion.

Italien. Grenzwert für die Exposition am Arbeitsplatz

Komponenten	Typ	Wert	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
Mineral oil (CAS 8012-95-1)	TWA	5 mg/m3	Einatembare Fraktion.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	

Verordnung des Ministers für Arbeit und Sozialpolitik vom 6. Juni 2014 zu den maximal erlaubten Konzentrationen und Intensitäten schädlicher Gesundheitsfaktoren am Arbeitsplatz, Gesetzblatt 2014, Punkt 817

Komponenten	Typ	Wert	Form
Mineral oil (CAS 8012-95-1)	TWA	5 mg/m3	Einatembare Fraktion.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	Einatembare Fraktion.
SILIKA (CAS 112945-52-5)	TWA	2 mg/m3	Alveolengängige Fraktion.
		10 mg/m3	Einatembare Fraktion.

Spanien. Arbeitsplatzgrenzwerte

Komponenten	Typ	Wert	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
Mineral oil (CAS 8012-95-1)	TWA	5 mg/m3	Nebel.
	Überschreitungsfaktor für Spitzenbegrenzung	10 mg/m3	Nebel.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	

Biologische Grenzwerte Für den bzw. die Inhaltsstoffe sind keine biologischen Expositionsgrenzen angegeben.

Empfohlene Überwachungsverfahren Standardüberwachungsverfahren befolgen.

Abgeleitete Expositionshöhe ohne Beeinträchtigung (Derived No Effect Level, DNEL)	Steht nicht zur Verfügung.
Abgeschätzte Nicht-Effekt-Konzentrationen (PNECs)	Steht nicht zur Verfügung.

8.2. Begrenzung und Überwachung der Exposition

Geeignete technische Steuerungseinrichtungen	Gute allgemeine Lüftung. Lüftungsgrad muss an die Bedingungen angepasst werden. Gegebenenfalls Prozesskammern, örtliche Abluftsysteme oder andere bauliche Maßnahmen zur Kontrolle der Konzentrationen in der Luft einsetzen, um diese unterhalb der empfohlenen Belastungsgrenzen zu halten. Wenn keine Expositionsgrenzen festgesetzt wurden, die Konzentrationen in der Luft auf einem akzeptierbaren Niveau halten. Wenn die technischen Maßnahmen nicht ausreichend sind, um die Konzentration der Staubpartikel unter dem MAK-Wert zu halten, ist eine geeignete Atemschutzausrüstung zu tragen. Falls das Material gemahlen, geschnitten oder anderweitigen stauberzeugenden Verarbeitungsverfahren ausgesetzt wird, so ist für geeignete örtliche Absaugung zu sorgen, um die Exposition auf einen Wert unter der Expositionsgrenzwerte zu senken. Augendusche und Sicherheitsdusche bereitstellen.

Individuelle Schutzmaßnahmen, zum Beispiel persönliche Schutzausrüstung

Allgemeine Angaben	Vorgeschriebene persönliche Schutzausrüstung verwenden. Persönliche Schutzausrüstung muss in Übereinstimmung mit den geltenden CEN-Normen und nach Absprache mit dem Lieferanten für persönliche Schutzausrüstung gewählt werden.
Augen-/Gesichtsschutz	Nur für ein industrielles Umfeld anwendbar. Atemschutzgerät mit Filterpatrone gegen organische Dämpfe, Vollmaske und Filter gegen Staub und Nebel.
Hautschutz	
- Handschutz	Nur für ein industrielles Umfeld anwendbar. Geeignete chemikalienbeständige Handschuhe tragen. Häufiges Wechseln wird empfohlen.
- Sonstige Schutzmaßnahmen	Nur für ein industrielles Umfeld anwendbar. Geeignete chemikalienbeständige Kleidung tragen.
Atemschutz	Nur für ein industrielles Umfeld anwendbar. Atemschutzgerät mit Filterpatrone gegen organische Dämpfe, Vollmaske und Filter gegen Staub und Nebel.
Thermische Gefahren	Geeignete Hitzeschutzkleidung tragen, falls nötig.
Hygienemaßnahmen	Nicht in Kontakt mit Kleidung und anderen brennbaren Materialien gelangen lassen. Beschmutzte, getränkte Kleidung sofort ablegen und waschen. Immer gute persönliche Hygiene einhalten, z. B Waschen nach der Handhabung des Materials und vor dem Essen, Trinken und/oder Rauchen. Arbeitskleidung und Schutzausrüstung regelmäßig waschen, um Kontaminationen zu entfernen. Kontaminierte Arbeitskleidung nicht außerhalb des Arbeitsplatzes tragen.
Begrenzung und Überwachung der Umweltexposition	Steht nicht zur Verfügung.

ABSCHNITT 9: Physikalische und chemische Eigenschaften

9.1. Angaben zu den grundlegenden physikalischen und chemischen Eigenschaften

Aussehen

Aggregatzustand	Feststoff.
Form	Pulver.
Farbe	Hellblau.
Geruch	Steht nicht zur Verfügung.
Geruchsschwelle	Steht nicht zur Verfügung.
pH-Wert	Nicht anwendbar.
Schmelzpunkt/Gefrierpunkt	Steht nicht zur Verfügung.
Siedebeginn und Siedebereich	Nicht anwendbar.
Flammpunkt	Nicht anwendbar.
Verdampfungsgeschwindigkeit	Steht nicht zur Verfügung.
Entzündbarkeit (fest, gasförmig)	Steht nicht zur Verfügung.

Obere/untere Entzündbarkeits- oder Explosionsgrenzen

Untere Entzündbarkeitsgrenze (%)	Steht nicht zur Verfügung.
Obere Entzündbarkeitsgrenze (%)	Steht nicht zur Verfügung.
Dampfdruck	Steht nicht zur Verfügung.

Dampfdichte	Steht nicht zur Verfügung.
Relative Dichte	Steht nicht zur Verfügung.
Löslichkeit(en)	
Löslichkeit (in Wasser)	Steht nicht zur Verfügung.
Verteilungskoeffizient: n-Octanol/Wasser	Steht nicht zur Verfügung.
Selbstentzündungstemperatur	Steht nicht zur Verfügung.
Zersetzungstemperatur	Steht nicht zur Verfügung.
Viskosität	Steht nicht zur Verfügung.
Explosive Eigenschaften	Nicht explosiv.
Oxidierende Eigenschaften	Kann Brand verstärken; Oxidationsmittel.
9.2. Sonstige Angaben	
pH in wässriger Lösung	10,2 - 10,6

ABSCHNITT 10: Stabilität und Reaktivität

10.1. Reaktivität	Von brennbaren Stoffen fernhalten. Erhöht den Abbrand brennbarer Materialien stark.
10.2. Chemische Stabilität	Das Material ist unter normalen Bedingungen stabil.
10.3. Möglichkeit gefährlicher Reaktionen	Keine gefährlichen Reaktionen bekannt bei bestimmungsgemäßem Umgang.
10.4. Zu vermeidende Bedingungen	Von Hitze, heißen Oberflächen, Funken, offenen Flammen sowie anderen Zündquellenarten fernhalten. Kontakt mit unverträglichen Materialien vermeiden.
10.5. Unverträgliche Materialien	Brennbarer Stoff. Reduktionsmittel.
10.6. Gefährliche Zersetzungsprodukte	Es sind keine gefährlichen Zersetzungsprodukte bekannt.

ABSCHNITT 11: Toxikologische Angaben

Allgemeine Angaben	Die Exposition gegenüber dem Stoff oder der Mischung kann gesundheitsschädigende Wirkungen verursachen.

Angaben zu wahrscheinlichen Expositionswegen

Einatmen	Kann die Atemwege reizen. Kann bei Einatmen Allergie, asthmaartige Symptome oder Atembeschwerden verursachen. Anhaltendes Einatmen kann schädlich sein.
Hautkontakt	Verursacht Hautreizungen. Kann allergische Hautreaktionen verursachen.
Augenkontakt	Verursacht schwere Augenschäden.
Verschlucken	Kann beim Verschlucken Unwohlsein verursachen. Verschlucken ist jedoch kein wahrscheinlicher primärer Expositionsweg am Arbeitsplatz.
Symptome	Starke Augenreizung. Dieses Produkt kann Brennen, Tränenbildung, Rötung, Schwellung und verschwommene Sicht verursachen. Kann zu dauerhaften Augenschäden einschließlich Blindheit führen. Kann die Atemwege reizen. Atembeschwerden. Hautreizung. Kann Rötung und Schmerzen verursachen. Kann allergische Hautreaktionen verursachen. Dermatitis. Ausschlag.

11.1. Angaben zu toxikologischen Wirkungen

Akute Toxizität Nicht bekannt.

Produkt	**Spezies**	**Testergebnisse**

AMMONIUM PERSULFATE	41,1 mg/kg bw/d OECD 407, Oral Ergebnis: DSENO Spezies: Ratte Testdauer: 28 d

Aspirationsgefahr Infolge des teilweisen oder vollständigen Mangels an Daten ist eine Einstufung nicht möglich.

Gemischbezogene gegenüber stoffbezogenen Angaben Keine Information verfügbar.

Sonstige Angaben Kann allergische Reaktionen der Atemwege und der Haut verursachen. Der in diesem Dokument erwähnte Hinweis auf Tierversuche für einzelne Bestandteile basiert auf bereits veröffentlichte Daten Dritter.

ABSCHNITT 12: Umweltbezogene Angaben

12.1. Toxizität Auf Basis der verfügbaren Daten sind die Kriterien für eine Einstufung als "Gewässergefährdend" nicht erfüllt.

Komponenten		Spezies	Testergebnisse
AMMONIUM PERSULFATE (CAS 7727-54-0)			
Wasser-

12.2. Persistenz und Abbaubarkeit

Biologische Abbaubarkeit

Prozentualer Abbau (aerober biologischer Abbau)

POTASSIUM PERSULFATE — Ergebnis: Not expected to bioaccumulate

12.3. Bioakkumulationspotenzial

Verteilungskoeffizient n-Oktanol/Wasser (log Kow) — Steht nicht zur Verfügung.

12.4. Mobilität im Boden — Keine Daten verfügbar.

12.5. Ergebnisse der PBT- und vPvB-Beurteilung — Kein PBT- oder vPvB-Gemisch oder Stoff.

12.6. Andere schädliche Wirkungen — Von diesem Bestandteil werden keine anderen nachteiligen Auswirkungen auf die Umwelt (z. B. Ozonabbau, photochemisches Ozonbildungspotential, endokrine Störungen, Treibhauspotential) erwartet.

12.7. Zusätzliche Angaben — Der in diesem Dokument erwähnte Hinweis auf Tierversuche für einzelne Bestandteile basiert auf bereits veröffentlichte Daten Dritter.

ABSCHNITT 13: Hinweise zur Entsorgung

13.1. Verfahren der Abfallbehandlung

Restabfall — Unter Beachtung der örtlichen behördlichen Bestimmungen beseitigen. Leere Behälter oder Einsätze können etwas Produktrückstand zurückhalten. Dieses Material und sein Behälter müssen in gesicherter Weise beseitigt werden (siehe: Entsorgungsanweisungen).

Kontaminiertes Verpackungsmaterial — Da leere Behälter Produktrückstände enthalten, die Warnbeschriftung auch nach dem Leeren des Behälters befolgen. Leere Behälter einer anerkannten Abfallentsorgungsanlage zuführen zwecks Wiedergewinnung oder Entsorgung.

EU Abfallcode — Die Abfallschlüsselnummer soll in Absprache mit dem Verbraucher, dem Hersteller und dem Entsorger festgelegt werden.

Entsorgungsmethoden / Informationen — Sammeln und rückgewinnen oder in dicht verschlossenen Behältern einer zugelassenen Abfallentsorgung zuführen. Inhalt/Behälter gemäß den lokalen/regionalen/nationalen/internationalen Vorschriften der Entsorgung zuführen.

Besondere Vorsichtsmaßnahmen — Bei der Entsorgung alle massgebenden gesetzlichen Bestimmungen beachten.

ABSCHNITT 14: Angaben zum Transport

Andere Verordnungen	Einstufung und Kennzeichnung des Produkts gemäß der (EG) Richtlinie 1272/2008 (CLP) in ihrer geänderten Fassung. Dieses Sicherheitsdatenblatt erfüllt die Anforderungen (EG) Richtlinie Nr. 1907/2006, in der geänderten Fassung.
Nationale Vorschriften	Beim Arbeiten mit Chemikalien sind die nationalen Vorschriften gemäß der Richtlinie 98/24/EWG in der geänderten Form zu befolgen.
15.2. Stoffsicherheitsbeurteilung	Es wurde keine Stoffsicherheitsbeurteilung durchgeführt.

ABSCHNITT 16: Sonstige Angaben

Liste der Abkürzungen	Steht nicht zur Verfügung.
Referenzen	Steht nicht zur Verfügung.
Informationen über Evaluierungsmethode für die Einstufung eines Gemischs	Die Einstufung für Gesundheit und Umweltgefahren wurde abgeleitet aus einer Kombination von Rechenverfahren und, falls verfügbar, Testdaten.
Jeder in den Abschnitten 2 bis 15 nicht vollständig ausgeschriebene Gefahrenhinweis ist hier in vollem Wortlaut wiederzugeben	H272 Kann Brand verstärken; Oxidationsmittel. H302 Gesundheitsschädlich bei Verschlucken. H315 Verursacht Hautreizungen. H317 Kann allergische Hautreaktionen verursachen. H318 Verursacht schwere Augenschäden. H319 Verursacht schwere Augenreizung. H332 Gesundheitsschädlich bei Einatmen. H334 Kann bei Einatmen Allergie, asthmaartige Symptome oder Atembeschwerden verursachen. H335 Kann die Atemwege reizen. H412 Schädlich für Wasserorganismen, mit langfristiger Wirkung.
Angaben zur Revision	Keine.
Schulungsinformationen	Beim Umgang mit diesem Material sind die Schulungsanweisungen zu befolgen.
Haftungsausschluss	Die in diesem Sicherheitsdatenblatt bereitgestellten Informationen sind zum Datum der Veröffentlichung nach bestem Wissen und Glauben genau und zuverlässig. Die hier gegebenen Informationen dienen nur als Hilfe für einen sicheren Umgang, Verwendung, Verarbeitung, Lagerung, Transport, Entsorgung und Freisetzung und gelten nicht als Garantie oder Produktspezifikation. Die Information bezieht sich nur auf das spezifische oben genannte Material und ist nicht gültig für dieses Material in Kombination mit irgendwelchen anderen Materialien oder in irgendeinem Verfahren, wenn dies nicht ausdrücklich im Text angegeben wurde.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

SECCIÓN 1. Identificación de la sustancia o la mezcla y de la sociedad o la empresa

1.1. Identificador del producto

Nombre comercial o denominación de la mezcla	PULP RIOT LIGHTENER
Sinónimos	Ninguno.
Número de FDS	50-23-0000031
Código de producto	F0000998V03
Fecha de publicación	03-Diciembre-2020
Número de la versión	01

1.2. Usos pertinentes identificados de la sustancia o de la mezcla y usos desaconsejados

Usos identificados	Producto de cuidado personal para uso cosmético.
Usos desaconsejados	Ninguno conocido.

1.3. Datos del proveedor de la ficha de datos de seguridad

Persona de contacto

Nombre de la compañía	L'ORÉAL SA
Dirección	14, rue royale 75008 - Paris Francia
Número de teléfono	+1 732 499 2745
dirección electrónica	nacorpeuropesdsrequest@loreal.com

1.4. Teléfono de emergencia

Francia Centro nacional de control de intoxicaciones	Número ORFILA (INRS): + 33 (0) 1 45 42 59 59 (Disponible las 24 horas del día. Durante el horario de urgencias puede no haber información sobre productos/SDS.)
INFOTRAC	+1 352-323-3500 (Disponible las 24 horas del día. Durante el horario de urgencias puede no haber información sobre productos/SDS.)

SECCIÓN 2. Identificación de los peligros

2.1. Clasificación de la sustancia o de la mezcla

La mezcla ha sido evaluada y/o sometida a ensayo para determinar sus peligros físicos y peligros para la salud y el medio ambiente, y la siguiente clasificación tiene aplicación.

Clasificación de acuerdo con el reglamento (CE) No. 1272/2008 con sus modificaciones ulteriores

Peligros físicos		
Sólidos comburentes	Categoría 3	H272 - Puede agravar un incendio; comburente.
Peligros para la salud		
Corrosión/irritación cutánea	Categoría 2	H315 - Provoca irritación cutánea.
Lesiones oculares graves/irritación ocular	Categoría 1	H318 - Provoca lesiones oculares graves.
Sensibilización respiratoria	Categoría 1	H334 - Puede provocar síntomas de alergia o asma o dificultades respiratorias en caso de inhalación.
Sensibilización cutánea	Categoría 1	H317 - Puede provocar una reacción alérgica en la piel.
Toxicidad específica en determinados órganos – exposición única	Categoría 3 irritación de las vías respiratorias	H335 - Puede irritar las vías respiratorias.

Resumen de los peligros

Puede agravar un incendio; comburente. Provoca lesiones oculares graves. Provoca irritación cutánea. Puede irritar el sistema respiratorio. La exposición a partículas o al polvo puede irritar ojos, nariz y garganta. Puede provocar síntomas de alergia o asma o dificultades respiratorias en caso de inhalación. Puede provocar una reacción alérgica en la piel. La exposición ocupacional a la sustancia o a la mezcla puede tener efectos adversos para la salud. Este es un producto de consumo para el cuidado, seguro para los consumidores si se utiliza siguiendo las instrucciones de la etiqueta. Al igual que con muchos productos de consumo, un pequeño número de personas puede sufrir reacciones como enrojecimiento, erupciones e hinchazón tras un contacto prolongado o repetido con la piel o con los ojos.

2.2. Elementos de la etiqueta

Etiquetado de conformidad con el Reglamento (CE) nº 1272/2008 tal como se modifica en el presente Reglamento

Contiene: AMMONIUM PERSULFATE, PIROSULFATO POTÁSICO, SILICATO SÓDICO

Pictogramas de peligro

Palabra de advertencia Peligro

Indicaciones de peligro

H272	Puede agravar un incendio; comburente.
H315	Provoca irritación cutánea.
H317	Puede provocar una reacción alérgica en la piel.
H318	Provoca lesiones oculares graves.
H334	Puede provocar síntomas de alergia o asma o dificultades respiratorias en caso de inhalación.
H335	Puede irritar las vías respiratorias.

Consejos de prudencia

Prevención

P102	Mantener fuera del alcance de los niños.
P103	Leer la etiqueta antes del uso.
P210	Mantener alejado del calor, superficies calientes, chispas, llamas al descubierto y otras fuentes de ignición. No fumar.
P220	Mantener alejado de la ropa y otros materiales combustibles.
P260	No respirar el polvo.
P264	Lavarse concienzudamente tras la manipulación.
P271	Utilizar únicamente en exteriores o en un lugar bien ventilado.
P272	Las prendas de trabajo contaminadas no podrán sacarse del lugar de trabajo.
P280	Llevar guantes/prendas/gafas/máscara de protección.
P284	Llevar equipo de protección respiratoria.

Respuesta

P101	Si se necesita consejo médico, tener a mano el envase o la etiqueta.
P302 + P352	EN CASO DE CONTACTO CON LA PIEL: Lavar con abundante agua.
P304 + P340	EN CASO DE INHALACION: Transportar a la persona al aire libre y mantenerla en una posición que le facilite la respiración.
P305 + P351 + P338	EN CASO DE CONTACTO CON LOS OJOS: Enjuagar con agua cuidadosamente durante varios minutos. Quitar las lentes de contacto cuando estén presentes y pueda hacerse con facilidad. Proseguir con el lavado.
P310	Llamar inmediatamente a un CENTRO DE TOXICOLOGÌA/médico.
P333 + P313	En caso de irritación o erupción cutánea: Consultar a un médico.
P362 + P364	Quitar las prendas contaminadas y lavarlas antes de volver a usarlas.
P370 + P378	En caso de incendio: Utilizar medios apropiados para apagarlo.

Almacenamiento

P403 + P233	Almacenar en un lugar bien ventilado. Mantener el recipiente cerrado herméticamente.
P405	Guardar bajo llave.

Eliminación

P501	Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Información suplementaria en la etiqueta La mezcla contiene un 59,45 % de componentes de toxicidad aguda para el medio ambiente acuático desconocida. La mezcla contiene un 92,45 % de componentes de toxicidad a largo plazo para el medio ambiente acuático desconocida.

2.3. Otros peligros No es una sustancia o mezcla PBT o MPMB.

SECCIÓN 3. Composición/información sobre los componentes

3.2. Mezclas

Información general

Denominación química	%	Número CAS / Número CE	Número de registro conforme a REACH	Número de índice	Notas
PIROSULFATO POTÁSICO	40	7727-21-1 231-781-8	01-2119495676-19	016-061-00-1	
Clasificación:	Ox. Sol. 3;H272, Acute Tox. 4;H302, Skin Irrit. 2;H315, Skin Sens. 1;H317, Eye Irrit. 2;H319, Resp. Sens. 1;H334, STOT SE 3;H335				
SILICATO SÓDICO	27	1344-09-8 215-687-4	01-2119448725-31	-	
Clasificación:	Skin Irrit. 2;H315, Eye Dam. 1;H318, STOT SE 3;H335				
AMMONIUM PERSULFATE	10	7727-54-0 231-786-5	01-2119495973-19	016-060-00-6	
Clasificación:	Ox. Sol. 3;H272, Acute Tox. 4;H302, Skin Irrit. 2;H315, Skin Sens. 1;H317, Eye Irrit. 2;H319, Acute Tox. 4;H332, Resp. Sens. 1;H334, STOT SE 3;H335				
SULFATO AMONICO	4	7783-20-2 231-984-1	01-2119455044-46	-	
Clasificación:	Aquatic Chronic 3;H412				

Lista de abreviaturas y símbolos que se pueden utilizar en lo anterior

#: A esta sustancia se aplican límites de exposición de la Unión en el lugar de trabajo.
M: Factor M
PBT: sustancia persistente, bioacumulativa y tĂłxica.
mPmB: sustancia muy persistente y muy bioacumulativa.
Todas las concentraciones están en porcentaje en peso salvo que el componente sea un gas. Las concentraciones de gas están en porcentaje en volumen.

Comentarios sobre los componentes El texto completo de todas las Frases H se ofrece en la Sección 16.

SECCIÓN 4. Primeros auxilios

Información general Quítese inmediatamente la ropa contaminada. Peligro de fuego en contacto con materias combustibles. En caso de malestar, acuda al médico (si es posible, muéstrele la etiqueta). Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse. Lavar las prendas contaminadas antes de volver a usarlas.

4.1. Descripción de los primeros auxilios

Inhalación Transportar a la víctima al exterior y mantenerla en reposo en una posición confortable para respirar. Oxígeno o respiración artificial si es preciso. No utilice el método boca a boca si la víctima ha inhalado la sustancia. Use respiración artificial con ayuda de una máscara de bolsillo equipada con válvula de una vía, o con algún otro instrumento médico de respiración que sea adecuado. If experiencing respiratory symptoms: Call a poison center or doctor/physician.

Contacto con la piel En caso de contacto con la ropa: aclarar inmediatamente con agua abundante las prendas y la piel contaminadas antes de quitarse la ropa. Quítese inmediatamente la ropa contaminada y lávese la piel con agua y jabón. En caso de eczema u otras molestias cutáneas: acuda al médico y muéstrele esta ficha de datos de seguridad. Lavar las prendas contaminadas antes de volver a usarlas.

Contacto con los ojos No frotarse los ojos. Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Conseguir atención médica inmediatamente.

Ingestión Enjuagarse la boca. Obtenga atención médica en caso de síntomas.

4.2. Principales síntomas y efectos, agudos y retardados Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Podrían producirse daños oculares permanentes, incluso ceguera. Puede irritar las vías respiratorias. Dificultades respiratorias. Irritación de la piel. Puede causar enrojecimiento y dolor. Puede provocar una reacción alérgica en la piel. Dermatitis. Sarpullido.

4.3. Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente Provea las medidas de apoyo generales y de tratamiento sintomático. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.

SECCIÓN 5. Medidas de lucha contra incendios

Riesgos generales de incendio Puede agravar un incendio; comburente. Peligro de fuego en contacto con materias combustibles.

5.1. Medios de extinción

Medios de extinción apropiados Agua pulverizada. Espuma. Polvo. Dióxido de carbono (CO2).

Medios de extinción no apropiados No utilice chorro de agua, pues extendería el fuego.

5.2. Peligros específicos derivados de la sustancia o la mezcla

Aumenta grandemente el ratio de combustión de los materiales combustibles. Los recipientes pueden explotar cuando se calientan. En caso de incendio se pueden formar gases nocivos.

5.3. Recomendaciones para el personal de lucha contra incendios

Equipos de protección especial que debe llevar el personal de lucha contra incendios

Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.

Procedimientos especiales de lucha contra incendio

En caso de incendio y/o de explosión no respire los humos. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo. El agua pulverizada puede ser utilizada para enfriar los contenedores cerrados.

Métodos específicos

Enfriar los recipientes expuestos al fuego con agua hasta mucho después de que el fuego haya cesado.

SECCIÓN 6. Medidas en caso de vertido accidental

6.1. Precauciones personales, equipo de protección y procedimientos de emergencia

Para el personal que no forma parte de los servicios de emergencia

Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Mantener alejado de la ropa y otros materiales combustibles. Use equipo y ropa de protección apropiados durante la limpieza. Evite la inhalación de polvo. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Asegúrese una ventilación apropiada. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.

Para el personal de emergencia

Mantenga el personal no necesario lejos. Utilizar las medidas de protección personal recomendadas en la sección 8 de la FDS.

6.2. Precauciones relativas al medio ambiente

No verter los residuos al desagüe, al suelo o las corrientes de agua.

6.3. Métodos y material de contención y de limpieza

Mantenga los materiales combustibles (madera, papel, petróleo, etc.) lejos del material derramado. Ventile el área contaminada. Evite la dispersión de polvo al aire (p.ej. limpiando las superficies polvorosas con aire comprimido). Minimice la generación y acumulación de polvo. Recoger el polvo usando un aspirador equipado con filtro HEPA. Use equipo y ropa de protección apropiados durante la limpieza. Detenga el flujo del material, si esto no representa un riesgo.

Derrames grandes: Empape con agua y contenga en dique para su eliminación posterior. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Palee el material en el recipiente de residuos. Después de recuperar el producto, enjuague el área con agua.

Derrames pequeños: Recoger o aspirar el derrame y ponerlo en un contenedor adecuado para la eliminación. Limpie cuidadosamente la superficie para eliminar los restos de contaminación.

Nunca devuelva el producto derramado al envase original para reutilizarlo.

6.4. Referencia a otras secciones

Consultar las medidas de protección personal en la sección 8 de la FDS. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.

SECCIÓN 7. Manipulación y almacenamiento

7.1. Precauciones para una manipulación segura

Minimice la generación y acumulación de polvo. Introduzca buenas prácticas de limpieza para que no se acumule polvo en las superficies. Conservar alejado del calor. Debe disponer de extracción adecuada en aquellos lugares en los que se forma polvo. Tomar todas las precauciones necesarias para no mezclar con materias combustibles. Mantener alejado de la ropa y otros materiales combustibles. No respirar el polvo. No poner este material en contacto con los ojos. Evítese el contacto con los ojos, la piel y la ropa. Evite la exposición prolongada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.

7.2. Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades

Guardar bajo llave. Conservar alejado del calor. Guárdese en un lugar fresco y seco sin exposición a la luz solar directa. Almacenar en un recipiente herméticamente cerrado. Almacenar en un lugar bien ventilado. No almacenar cerca de materiales combustibles. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

7.3. Usos específicos finales

No disponible.

SECCIÓN 8. Controles de exposición/protección individual

8.1. Parámetros de control

Límites de exposición profesional

Bélgica. Valores límite de exposición.

Componentes	Tipo	Valor	Forma
ACEITE MINERAL (CAS 8012-95-1)	STEL	10 mg/m³	Neblina.

Bélgica. Valores límite de exposición.

Componentes	Tipo	Valor	Forma
	TWA	5 mg/m³	Neblina.
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m³	
MAGNESITA (CAS 546-93-0)	TWA	10 mg/m³	
PIROSULFATO POTÁSICO (CAS 7727-21-1)	TWA	0,1 mg/m³	
SILICA (CAS 112945-52-5)	TWA	10 mg/m³	

Francia. Valores límite umbral (VLEP) para la exposición ocupacional a sustancias químicas en Francia, INRS ED 984

Componentes	Tipo	Valor
MAGNESITA (CAS 546-93-0)	VME	10 mg/m³

Regulación: Indicative limit (VL)

Alemania. Lista DFG MAK (límites de exposición ocupacional indicativos). Comisión Alemana de Investigación de los Peligros para la Salud de las Sustancias Químicas en el Entorno de Trabajo (DFG)

Componentes	Tipo	Valor	Forma
ACEITE MINERAL (CAS 8012-95-1)	TWA	5 mg/m³	Fracción respirable.
SILICA (CAS 112945-52-5)	TWA	4 mg/m³	Fracción inhalable.

Alemania. TRGS 900, Valores límite del aire en el lugar de trabajo

Componentes	Tipo	Valor	Forma
ACEITE MINERAL (CAS 8012-95-1)	AGW	5 mg/m³	Fracción respirable.
SILICA (CAS 112945-52-5)	AGW	4 mg/m³	Fracción inhalable.

Italia. Límites de exposición ocupacional

Componentes	Tipo	Valor	Forma
ACEITE MINERAL (CAS 8012-95-1)	TWA	5 mg/m³	Fracción inhalable.
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m³	
PIROSULFATO POTÁSICO (CAS 7727-21-1)	TWA	0,1 mg/m³	

Ordinance of the Minister of Labour and Social Policy on 6 Junio 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Componentes	Tipo	Valor	Forma
ACEITE MINERAL (CAS 8012-95-1)	TWA	5 mg/m³	Fracción inhalable.
PIROSULFATO POTÁSICO (CAS 7727-21-1)	TWA	0,1 mg/m³	Fracción inhalable.
SILICA (CAS 112945-52-5)	TWA	2 mg/m³	Fracción respirable.
		10 mg/m³	Fracción inhalable.

España. Límites de Exposición Ocupacional

Componentes	Tipo	Valor	Forma
ACEITE MINERAL (CAS 8012-95-1)	STEL	10 mg/m³	Neblina.
	TWA	5 mg/m³	Neblina.
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m³	
PIROSULFATO POTÁSICO (CAS 7727-21-1)	TWA	0,1 mg/m³	

Valores límite biológicos No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.

Métodos de seguimiento recomendados Seguir los procedimientos de monitorización estándar.

Niveles sin efecto derivado (DNEL)	No disponible.
Concentraciones previstas sin efecto (PNECs)	No disponible.

8.2. Controles de la exposición

Controles técnicos apropiados	Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Si las medidas de ingeniería no bastan para mantener la concentración de partículas de polvo por debajo del OEL (límite de exposición ocupacional), deberá llevarse protección respiratoria adecuada. Si el material se esmerila, corta o usa en una operación que pueda generar polvo, tenga una ventilación apropiada con escape local para mantener la exposición por debajo de los límites de exposición recomendados. Proveer estación de lavados de ojos y ducha de emergencia.

Medidas de protección individual, tales como equipos de protección personal

Información general	Utilizar el equipo de protección individual obligatorio. El equipo de protección personal se elegirá de acuerdo con la norma CEN vigente y en colaboración con el suministrador de equipos de protección personal.
Protección de los ojos/la cara	De aplicación solamente en entornos industriales. Equipo respiratorio con cartucho de vapor orgánico, pantalla facial y filtro polvos / neblina.
Protección de la piel	
- Protección de las manos	De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos. Es recomendable cambiarlo con frecuencia.
- Otros	De aplicación solamente en entornos industriales. Use ropa adecuada resistente a los productos químicos.
Protección respiratoria	De aplicación solamente en entornos industriales. Equipo respiratorio con cartucho de vapor orgánico, pantalla facial y filtro polvos / neblina.
Peligros térmicos	Use ropa protectora térmica adecuada si resulta necesario.
Medidas de higiene	Evite el contacto con la ropa y otros materiales combustibles. Quite y lave la ropa contaminada enseguida. Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes. Las prendas de trabajo contaminadas no podrán sacarse del lugar de trabajo.
Controles de exposición medioambiental	No disponible.

SECCIÓN 9. Propiedades físicas y químicas

9.1. Información sobre propiedades físicas y químicas básicas

Aspecto	
Estado físico	Sólido.
Forma	Polvo.
Color	Azul claro.
Olor	No disponible.
Umbral olfativo	No disponible.
pH	No es aplicable.
Punto de fusión/punto de congelación	No disponible.
Punto inicial de ebullición e intervalo de ebullición	No es aplicable.
Punto de inflamación	No es aplicable.
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No disponible.
Límites superior/inferior de inflamabilidad o de explosividad	
Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.

Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Propiedades explosivas	No es explosivo.
Propiedades comburentes	Puede agravar un incendio; comburente.
9.2. Otros datos	
pH en solución acuosa	10,2 - 10,6

SECCIÓN 10. Estabilidad y reactividad

10.1. Reactividad	Manténgase lejos de materias combustibles. Aumenta grandemente el ratio de combustión de los materiales combustibles.
10.2. Estabilidad química	El material es estable bajo condiciones normales.
10.3. Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
10.4. Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
10.5. Materiales incompatibles	Material combustible. Agentes reductores.
10.6. Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

SECCIÓN 11. Información toxicológica

Información general	La exposición ocupacional a la sustancia o a la mezcla puede tener efectos adversos.
Información sobre posibles vías de exposición	
Inhalación	Puede irritar el sistema respiratorio. Puede provocar síntomas de alergia o asma o dificultades respiratorias en caso de inhalación. La inhalación prolongada puede resultar nociva.
Contacto con la piel	Provoca irritación cutánea. Puede provocar una reacción alérgica en la piel.
Contacto con los ojos	Provoca lesiones oculares graves.
Ingestión	Si se ingiere puede causar molestias. No obstante, no es probable que la ingestión constituya una vía primaria de exposición ocupacional.
Síntomas	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Podrían producirse daños oculares permanentes, incluso ceguera. Puede irritar las vías respiratorias. Dificultades respiratorias. Irritación de la piel. Puede causar enrojecimiento y dolor. Puede provocar una reacción alérgica en la piel. Dermatitis. Sarpullido.

11.1. Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Producto	**Especies**	**Resultados de la prueba**
PULP RIOT LIGHTENER		
Agudo		
Inhalación		
Polvo		
ATEmix		29,5 mg/l
Oral		
ATEmix		2013 mg/kg

Componentes	**Especies**	**Resultados de la prueba**
AMMONIUM PERSULFATE (CAS 7727-54-0)		
Agudo		
Dérmico		
LD50	Rata	> 2000 mg/kg bw OECD 402
Inhalación		
LC50	Rata	> 2,95 mg/l, 4 h EPA OPP 81-3

Componentes	Especies	Resultados de la prueba
Oral		
LD50	Rata	700 mg/kg bw OECD 401
PIROSULFATO POTÁSICO (CAS 7727-21-1)		
Agudo		
Dérmico		
LD50	Conejo	> 10000 mg/kg
Inhalación		
LC50	Rata	> 42,9 mg/l, 1 h
Oral		
LD50	Rata	1130 mg/kg OECD 401
SILICATO SÓDICO (CAS 1344-09-8)

Toxicidad específica en determinados órganos – exposición única Puede irritar las vías respiratorias.

SILICATO SÓDICO	Resultado: Irritante
PIROSULFATO POTÁSICO	Resultado: Irritante Especies: humano

Toxicidad específica en determinados órganos – exposición repetida Debido a la falta total o parcial de datos, la clasificación no es posible.

AMMONIUM PERSULFATE	10,3 mg/m³, Inhalación Resultado: NOAEC Especies: Rata Duración de la prueba: 90 d
PIROSULFATO POTÁSICO	131,5 mg/kg bw/d OECD 407 Resultado: NOAEL Especies: Rata Duración de la prueba: 28 d
SILICATO SÓDICO	2400 mg/kg bw/d OECD 407 Resultado: NOAEL Especies: Rata Duración de la prueba: 28 d
AMMONIUM PERSULFATE	41,1 mg/kg bw/d OECD 407, Oral Resultado: NOAEL Especies: Rata Duración de la prueba: 28 d

Peligro por aspiración Debido a la falta total o parcial de datos, la clasificación no es posible.

Información sobre la mezcla en relación con la sustancia No hay información disponible.

Información adicional Puede causar reacciones alérgicas respiratorias y cutáneas. En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

SECCIÓN 12. Información ecológica

12.1. Toxicidad A la vista de los datos disponibles, no se cumplen los criterios de clasificación de peligroso para el medio ambiente acuático.

Componentes		Especies	Resultados de la prueba
AMMONIUM PERSULFATE (CAS 7727-54-0)			
Acuático (a)			
Agudo			
Algas	EC50	Pseudokirchneriella subcapitata	83,7 mg/l, 72 h
Crustáceos	EC50	Dafnia magna	120 mg/l, 48 h
Otros	EC10	Seudomonas putida	36 mg/l, 18 h
Pez	LC50	Oncorhynchus mykiss	76 mg/l, 96 h
Crónico			
Algas	NOEC	Desmodesmus subspicatus	32 mg/l, 72 h OECD 201
SILICATO SÓDICO (CAS 1344-09-8)			
Acuático (a)			
Agudo			
Algas	EC50	Desmodesmus subspicatus	> 345,4 mg/l, 72 h DIN 38412 Part 9
Crustáceos	EC50	Dafnia magna	1700 mg/l, 48 h EU C.2
Otros	CE0	Seudomonas putida	3454 mg/l, 30 mín DIN 38412 Part 27
Pez	LC50	Danio rerio	1108 mg/l, 96 h OECD 203
SULFATO AMONICO (CAS 7783-20-2)			
Acuático (a)			
Crustáceos	EC50	Dafnia (Ceriodaphnia dubia)	52 - 67 mg/l, 48 horas
Pez	LC50	Trucha arco iris, trucha Donaldson (Oncorhynchus mykiss)	35,2 - 43,8 mg/l, 96 horas

12.2. Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

PIROSULFATO POTÁSICO — Resultado: Not expected to bioaccumulate

12.3. Potencial de bioacumulación

Coeficiente de partición n-octanol/agua (log Kow) No disponible.

12.4. Movilidad en el suelo No hay datos disponibles.

12.5. Resultados de la valoración PBT y mPmB No es una sustancia o mezcla PBT o MPMB.

12.6. Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

12.7. Información adicional En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

SECCIÓN 13. Consideraciones relativas a la eliminación

13.1. Métodos para el tratamiento de residuos

Restos de productos Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

Código europeo de residuos El código de Desecho debe ser atribuído de acuerdo entre el usuario, el productor y la compañía de eliminación de desechos.

Métodos de eliminación/información Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Precauciones especiales Elimine de acuerdo con todas las reglamentaciones aplicables.

SECCIÓN 15. Información reglamentaria

15.1. Reglamentación y legislación en materia de seguridad, salud y medio ambiente específicas para la sustancia o la mezcla

Normativa de la UE

Reglamento (CE) Nº 1005/2009 sobre las sustancias que agotan la capa de ozono, Anexos I y II, con las enmiendas correspondientes

No listado.

Reglamento (CE) nº. 850/2004 sobre contaminantes orgánicos persistentes, Anexo I con las enmiendas correspondientes

No listado.

Reglamento (UE) nº 649/2012 relativo a la exportación e importación de productos químicos peligrosos, Anexo I, parte 1, con las enmiendas correspondientes

No listado.

Reglamento (UE) nº 649/2012 relativo a la exportación e importación de productos químicos peligrosos, Anexo I, parte 2, con las enmiendas correspondientes

No listado.

Reglamento (UE) nº 649/2012 relativo a la exportación e importación de productos químicos peligrosos, Anexo I, parte 3, con las enmiendas correspondientes

No listado.

Reglamento (UE) nº 649/2012 relativo a la exportación e importación de productos químicos peligrosos, Anexo V, con las enmiendas correspondientes

No listado.

Reglamento (CE) nº 166/2006, Anexo II, Registro de emisiones y transferencias de contaminantes, con las enmiendas correspondientes

No listado.

Reglamento (CE) nº. 1907/2006, REACH Artículo 59(10), Lista de candidatos en vigor publicada por la ECHA

No listado.

Autorizaciones

Reglamento (CE) no. 1907/2006 REACH, Anexo XIV Sustancias sujetas a autorización, con sus modificaciones ulteriores

No listado.

Restricciones de uso

Reglamento (CE) nº. 1907/2006, REACH Anexo XVII, Sustancias sujetas a restricciones de comercialización y uso con las enmiendas correspondientes

SILICATO SÓDICO (CAS 1344-09-8)

Directiva 2004/37/CE: relativa a la protección de los trabajadores contra los riesgos relacionados con la exposición a agentes carcinógenos o mutágenos durante el trabajo, con las enmiendas correspondientes

No listado.

Otras normas de la UE

Directiva 2012/18/UE relativa a los riesgos inherentes a los accidentes graves en los que intervengan sustancias peligrosas, con las enmiendas correspondientes

AMMONIUM PERSULFATE (CAS 7727-54-0)
PIROSULFATO POTÁSICO (CAS 7727-21-1)

Otras reglamentaciones	Este producto ha sido clasificado y etiquetado con arreglo al Reglamento (CE) nº 1272/2008 (Reglamento CLP) con sus modificaciones ulteriores y con arreglo. Esta ficha de datos de seguridad cumple los requisitos del Reglamento (CE) Nº 1907/2006, con las enmiendas correspondientes.
Normativa nacional	Observar las normativas nacionales relativas al trabajo con agentes químicos, de conformidad con la Directiva 98/24/CE con las enmiendas correspondientes.
15.2. Evaluación de la seguridad química	No se ha realizado ninguna evaluación de la seguridad química.

SECCIÓN 16. Otra información

Lista de abreviaturas	No disponible.
Referencias	No disponible.
Información sobre el método de evaluación usado para la clasificación de la mezcla	La clasificación de los peligros para la salud y el medio ambiente se ha obtenido usando una combinación de métodos de cálculo y, en su caso, datos de ensayo.
Texto completo de cualesquiera frases H para las que no se incluya el enunciado completo en las secciones 2 a 15	H272 Puede agravar un incendio; comburente. H302 Nocivo en caso de ingestión. H315 Provoca irritación cutánea. H317 Puede provocar una reacción alérgica en la piel. H318 Provoca lesiones oculares graves. H319 Provoca irritación ocular grave. H332 Nocivo en caso de inhalación. H334 Puede provocar síntomas de alergia o asma o dificultades respiratorias en caso de inhalación. H335 Puede irritar las vías respiratorias. H412 Nocivo para los organismos acuáticos, con efectos nocivos duraderos.
Información de revisión	Ninguno.
Información sobre formación	Siga las instrucciones de entrenamiento al manejar este material.
Cláusula de exención de responsabilidad	La información facilitada en esta Ficha de Datos de Seguridad es correcta, a nuestro leal saber y entender, en la fecha de su publicación. Dicha información está concebida únicamente como guía para la seguridad en la manipulación, el uso, el procesamiento, el almacenamiento, el transporte, la eliminación y la liberación, no debiendo tomarse como garantía o especificación de calidades. La información se refiere únicamente al material específico mencionado y puede no ser válida para tal material usado en combinación con cualesquiera otros materiales o en cualquier proceso salvo que se especifique expresamente en el texto.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT LIGHTENER**

Autres moyens d'identification

Numéro de la FDS 50-23-0000031

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques	Matières solides comburantes	Catégorie 3
Dangers pour la santé	Toxicité aiguë, voie orale	Catégorie 4
	Corrosion cutanée/irritation cutanée	Catégorie 2
	Lésions oculaires graves/irritation oculaire	Catégorie 1
	Sensibilisation respiratoire	Catégorie 1
	Sensibilisation cutanée	Catégorie 1
	Toxicité pour certains organes cibles - exposition unique	Irritation des voies respiratoires de catégorie 3

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Peut aggraver un incendie; comburant. Nocif en cas d'ingestion. Provoque une irritation cutanée. Peut provoquer une allergie cutanée. Provoque de graves lésions des yeux. Peut provoquer des symptômes allergiques ou d'asthme ou des difficultés respiratoires par inhalation. Peut irriter les voies respiratoires.

Conseil de prudence

Prévention Conserver à l'écart de la chaleur. Tenir et entreposer loin des vêtements/matières combustibles. Prendre toutes précautions pour éviter de mélanger avec des matières combustibles. Éviter de respirer les poussières. Se laver soigneusement après manipulation. Ne pas manger, boire ou fumer en manipulant ce produit. Utiliser seulement en plein air ou dans un endroit bien ventilé. Il ne faut pas que les vêtements de travail contaminés quittent le lieu de travail. Porter des gants de protection/un équipement de protection des yeux/du visage. Lorsque la ventilation du local est insuffisante, porter un équipement de protection respiratoire.

Intervention	En cas d'ingestion : Appelez un centre antipoison/médecin/ si vous vous sentez mal. Rincer la bouche. En contact avec la peau : Laver avec beaucoup d'eau. En cas d'inhalation : Déplacer la personne à l'air frais et la maintenir dans une position confortable pour la respiration. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation ou d'éruption cutanée : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation. En cas d'incendie : utiliser un agent d'extinction approprié.
Stockage	Stocker dans un endroit bien ventilé. Maintenir le récipient fermé de manière étanche. Garder sous clef.
Élimination	Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.
Danger(s) non classé(s) ailleurs (DNCA)	Aucun(e) connu(e).
Information supplémentaire	Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
PERSULFATE DE POTASSIUM		7727-21-1	40
SILICATE DE SODIUM		1344-09-8	27
PERSULFATE D'AMMONIUM		7727-54-0	10
HUILE MINÉRALE		8012-95-1	6.1
MAGNÉSIUM (CARBONATE DE)		546-93-0	4
silice		112945-52-5	3.05

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter la victime à l'extérieur et la maintenir au repos dans une position où elle peut confortablement respirer. Oxygène ou respiration artificielle si nécessaire. Ne pas pratiquer le bouche-à-bouche si la victime a inhalé la substance. Pratiquer la respiration artificielle à l'aide d'un masque de poche muni d'une valve antireflux ou d'un autre appareil médical respiratoire approprié. En cas de symptômes respiratoires : Appeler un centre antipoison ou un médecin.
Contact avec la peau	En cas de contact avec les vêtements : Rincer immédiatement et abondamment avec de l'eau les vêtements contaminés et la peau avant de les enlever. Enlever immédiatement les vêtements contaminés et laver la peau à l'eau et au savon. En cas d'eczéma ou d'autres problèmes cutanés : consulter un médecin et apporter cette fiche. Laver les vêtements contaminés avant réutilisation.
Contact avec les yeux	Ne pas se frotter les yeux. Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.
Ingestion	Rincer la bouche. En cas de vomissement, garder la tête basse pour éviter une pénétration du contenu de l'estomac dans les poumons. Demander un avis médical/Consulter un médecin en cas de malaise.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Peut irriter les voies respiratoires. Difficultés respiratoires. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Garder la victime au chaud. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	Enlever immédiatement tous les vêtements contaminés. Favorise l'inflammation des matières combustibles. En cas de malaise, demander un avis médical (montrer l'étiquette du produit lorsque possible). S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger. Présenter cette fiche de données de sécurité au médecin traitant. Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Eau pulvérisée. Mousse. Poudre. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Augmente grandement la vitesse de combustion des produits combustibles. Les récipients peuvent exploser sous l'effet de la chaleur. Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	En cas d'incendie et/ou d'explosion ne pas respirer les fumées. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. Utiliser une pulvérisation d'eau pour refroidir les récipients fermés.
Méthodes particulières d'intervention	Refroidir les récipients exposés aux flammes avec de l'eau et continuer même une fois le feu éteint.
Risques d'incendie généraux	Peut aggraver un incendie; comburant. Favorise l'inflammation des matières combustibles.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Tenir à l'écart des vêtements et d'autres matières combustibles. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Éviter l'inhalation de la poussière. Utiliser un appareil respiratoire homologué NIOSH/MSHA s'il existe un risque d'exposition à la poussière ou aux émanations à des concentrations qui excèdent les limites d'exposition. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Ventiler la zone contaminée. Éviter la dispersion de poussière dans l'air (c.-à-d., comme lors du nettoyage des surfaces à l'air comprimé). Minimiser la formation et l'accumulation de poussière. Récupérer la poussière en utilisant un aspirateur muni d'un filtre HEPA. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Déversements importants : Mouiller avec de l'eau et endiguer pour une élimination ultérieure. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Pelleter le matériau dans un conteneur à déchets. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Balayer ou aspirer le déversement et mettre dans un récipient approprié pour élimination. Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Minimiser la formation et l'accumulation de poussière. Un ménage et un entretien de routine doivent être mis en place pour s'assurer que la poussière ne s'accumule pas sur les surfaces. Tenir à l'écart de la chaleur. Assurer une ventilation aspirante adéquate aux endroits où la poussière se forme. Prendre toutes précautions pour éviter de mélanger avec des matières combustibles. Tenir à l'écart des vêtements et d'autres matières combustibles. Éviter tout contact de ce produit avec les yeux. Ne pas goûter ni avaler. Éviter de respirer les poussières. Éviter tout contact avec les yeux, la peau et les vêtements. Éviter une exposition prolongée. Ne pas manger, ne pas boire et ne pas fumer pendant l'utilisation. Porter un équipement de protection individuelle approprié. Se laver les mains soigneusement après manipulation. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Garder sous clef. Tenir à l'écart de la chaleur. Stocker dans un endroit frais et sec, à l'écart de la lumière solaire directe. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Ne pas stocker à proximité de matières combustibles. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

États-Unis - TABLEAU Z-3 (29 CFR 1910.1000) de l'OSHA

Composants	Type	Valeur
silice (CAS 112945-52-5)	TWA	0.8 mg/m3
		20 mppcf

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur	Forme
HUILE MINÉRALE (CAS 8012-95-1)	PEL (limite d'exposition admissible)	5 mg/m3	Brouillard.
MAGNÉSIUM (CARBONATE DE) (CAS 546-93-0)	PEL (limite d'exposition admissible)	5 mg/m3	Fraction respirable.
		15 mg/m3	Poussières totales.

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur	Forme
HUILE MINÉRALE (CAS 8012-95-1)	TWA	5 mg/m3	Fraction inhalable.
PERSULFATE D'AMMONIUM (CAS 7727-54-0)	TWA	0.1 mg/m3	
PERSULFATE DE POTASSIUM (CAS 7727-21-1)	TWA	0.1 mg/m3	

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur	Forme
HUILE MINÉRALE (CAS 8012-95-1)	STEL	10 mg/m3	Brouillard.
	TWA	5 mg/m3	Brouillard.
MAGNÉSIUM (CARBONATE DE) (CAS 546-93-0)	TWA	5 mg/m3	Respirable.
		10 mg/m3	Total
silice (CAS 112945-52-5)	TWA	6 mg/m3	

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Si des mesures techniques ne suffisent pas à maintenir les concentrations de particules de poussière sous les limites d'exposition en milieu de travail (LEMT), il faut porter une protection respiratoire appropriée. Si le matériau est moulu, coupé ou utilisé dans toute opération susceptible de créer des poussières, utiliser une ventilation locale par aspiration appropriée pour maintenir les expositions sous les limites d'exposition recommandées. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques Il est conseillé de changer souvent.

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. Utiliser un appareil respiratoire homologué NIOSH/MSHA s'il existe un risque d'exposition à la poussière ou aux émanations à des concentrations qui excèdent les limites d'exposition. Respirateur contre la poussière et les vapeurs.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale	Éviter tout contact avec des vêtements ou d'autres matières combustibles. Retirer et laver rapidement les vêtements contaminés. Tenir à l'écart des aliments et des boissons. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

9. Propriétés physiques et chimiques

Apparence	
État physique	Solide.
Forme	Poudre.
Couleur	Bleu clair.
Odeur	Non disponible.
Seuil olfactif	Non disponible.
pH	Sans objet.
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	Sans objet.
Point d'éclair	Sans objet.
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Non disponible.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Peut aggraver un incendie; comburant.
pH dans une solution aqueuse	10.2 - 10.6

10. Stabilité et réactivité

Réactivité	Augmente grandement la vitesse de combustion des produits combustibles.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.

Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Matières combustibles. Agents réducteurs.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Peut provoquer une irritation du système respiratoire. Peut provoquer des symptômes allergiques ou d'asthme ou des difficultés respiratoires par inhalation. Toute inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée. Peut provoquer une allergie cutanée.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Nocif en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Peut irriter les voies respiratoires. Difficultés respiratoires. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Renseignements sur les effets toxicologiques

Toxicité aiguë Nocif en cas d'ingestion.

silice	497 mg/kg bw/d OCDE 415 Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique Peut irriter les voies respiratoires.

SILICATE DE SODIUM	Résultat: Irritant
PERSULFATE DE POTASSIUM	Résultat: Irritant Espèces: Homme

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

HUILE MINÉRALE	> 2000 mg/kg bw/d OCDE 411, Cutané Résultat: DSENO Espèces: Rat Durée du test: 90 d > 50 mg/m3 air OCDE 412, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 28 d >= 1200 mg/kg bw/d OCDE 453, Orale Résultat: DSENO Espèces: Rat Durée du test: 2 années
silice	1.3 mg/m3 air OECD 413, Inhalation Résultat: DSENO Espèces: Rat Durée du test: 13 wk
PERSULFATE D'AMMONIUM	10.3 mg/m³, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 90 d
PERSULFATE DE POTASSIUM	131.5 mg/kg bw/d OCDE 407 Résultat: DSENO Espèces: Rat Durée du test: 28 d
SILICATE DE SODIUM	2400 mg/kg bw/d OCDE 407 Résultat: DSENO Espèces: Rat Durée du test: 28 d
PERSULFATE D'AMMONIUM	41.1 mg/kg bw/d OCDE 407, Orale Résultat: DSENO Espèces: Rat Durée du test: 28 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations Peut provoquer des allergies respiratoires et cutanées. La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

PERSULFATE DE POTASSIUM	Résultat: Not expected to bioaccumulate

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés	Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).
Emballages contaminés	Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli fisici		
Solidi comburenti	Categoria 3	H272 - Può aggravare un incendio; comburente.
Pericoli per la salute		
Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.
Sensibilizzazione respiratoria	Categoria 1	H334 - Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato.
Sensibilizzazione cutanea	Categoria 1	H317 - Può provocare una reazione allergica cutanea.

Tossicità specifica per organi bersaglio (STOT) — esposizione singola	Categoria 3 irritazione delle vie respiratorie	H335 - Può irritare le vie respiratorie.

Riepilogo dei pericoli

Può aggravare un incendio; comburente. Provoca gravi lesioni oculari. Provoca irritazione cutanea. Può causare irritazione alle vie respiratorie. L'esposizione alla polvere o pulviscolo può essere irritante per gli occhi, naso e gola. Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato. Può provocare una reazione allergica cutanea. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: AMMONIUM PERSULFATE, PEROSSODISOLFATO DI DIPOTASSIO, Sodio silicato

Pittogrammi di pericolo

Avvertenza Pericolo

Indicazioni di pericolo

H272	Può aggravare un incendio; comburente.
H315	Provoca irritazione cutanea.
H317	Può provocare una reazione allergica cutanea.
H318	Provoca gravi lesioni oculari.
H334	Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato.
H335	Può irritare le vie respiratorie.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P210	Tenere lontano da fonti di calore, superfici calde, scintille, fiamme libere o altre fonti di accensione. Non fumare.
P220	Tenere lontano da indumenti e altri materiali combustibili.
P260	Non respirare la polvere.
P264	Lavare attentamente dopo l'uso.
P271	Utilizzare soltanto all'aperto o in luogo ben ventilato.
P272	Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
P280	Indossare guanti/indumenti protettivi/Proteggere gli occhi/il viso.
P284	Utilizzare un apparecchio respiratorio.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P302 + P352	IN CASO DI CONTATTO CON LA PELLE: lavare abbondantemente con acqua.
P304 + P340	IN CASO DI INALAZIONE: trasportare l'infortunato all'aria aperta e mantenerlo a riposo in posizione che favorisca la respirazione.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P333 + P313	In caso di irritazione o eruzione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.
P370 + P378	In caso di incendio: estinguere con mezzi adeguati.

Immagazzinamento

P403 + P233	Tenere il recipiente ben chiuso e in luogo ben ventilato.
P405	Conservare sotto chiave.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette

La miscela contiene il 59,45 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico.
La miscela contiene il 92,45 % di componenti di cui è ignoto il pericolo a lungo termine per l'ambiente acquatico.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Informazioni generali

Denominazione chimica	%	Numero CAS / Numero CE	Numero di registrazione REACH	Numero della sostanza	Note
PEROSSODISOLFATO DI DIPOTASSIO	40	7727-21-1 231-781-8	01-2119495676-19	016-061-00-1	
Classificazione:	Ox. Sol. 3;H272, Acute Tox. 4;H302, Skin Irrit. 2;H315, Skin Sens. 1;H317, Eye Irrit. 2;H319, Resp. Sens. 1;H334, STOT SE 3;H335

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Togliere immediatamente tutti gli indumenti contaminati. Può provocare l'accensione di materie combustibili. In caso di malessere consultare il medico (se possibile, mostrargli l'etichetta). Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi. Lavare gli indumenti contaminati prima di indossarli nuovamente.

4.1. Descrizione delle misure di primo soccorso

Inalazione Trasportare l'infortunato all'aria aperta e mantenerlo a riposo in posizione che favorisca la respirazione. Ricorrere all'ossigeno o alla respirazione artificiale se necessario. Non praticare la respirazione bocca a bocca se la vittima ha inalato la sostanza. Praticare la respirazione artificiale con l'ausilio di una maschera portatile con valvola ad una via o altra idonea apparecchiatura medica. If experiencing respiratory symptoms: Call a poison center or doctor/physician.

Cutanea In caso di contatto con gli indumenti: sciacquare immediatamente e abbondantemente gli indumenti contaminati e la pelle prima di togliersi gli indumenti. Togliere immediatamente gli indumenti contaminati e lavare la pelle con acqua e sapone. In caso di eczema o altri disturbi alla pelle: consultare un medico e portare con sé queste istruzioni. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Non sfregare gli occhi. Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Può irritare le vie respiratorie. Difficoltà respiratorie. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio Può aggravare un incendio; comburente. Può provocare l'accensione di materie combustibili.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei Spruzzi d'acqua. Schiuma. Polvere. Anidride carbonica (CO2).

Mezzi di estinzione non idonei Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela Aumenta notevolmente la velocità di combustione dei materiali. I contenitori possono esplodere se riscaldati. In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi	In caso d'incendio indossare autorespiratore e indumenti protettivi completi.
Procedure speciali per l'estinzione degli incendi	In caso d'incendio e/o esplosione non respirare i fumi. Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi. Spruzzi d'acqua possono essere usati per raffreddare contenitori chiusi.
Metodi specifici	Raffreddare i contenitori esposti alle fiamme con acqua, anche dopo lo spegnimento delle fiamme.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente	Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Tenere lontano da indumenti e altri materiali combustibili. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Evitare l'inalazione di polvere. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Prevedere una ventilazione adeguata. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.
Per chi interviene direttamente	Allontanare il personale non necessario. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS
6.2. Precauzioni ambientali	Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.
6.3. Metodi e materiali per il contenimento e per la bonifica	Tenere i materiali combustibili (legno, carta, olio, ecc.) lontano dal materiale fuoriuscito. Ventilare l'area contaminata. Evitare la dispersione di polveri nell'aria (ossia: pulire le polveri impolverate con aria compressa). Ridurre al minimo la generazione e l'accumulo di polvere. Raccogliere la polvere utilizzando un aspirapolvere dotato di filtro HEPA. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Fermare il flusso del materiale, se ciò è possibile senza rischio. Fuoriuscite di grandi dimensioni: bagnare con acqua e arginare per il successivo smaltimento. Assorbire in vermiculite, sabbia o terra asciutta e riporre in contenitori. Spalare il materiale in un contenitore per rifiuti. Una volta recuperato il prodotto, sciacquare l'area con acqua. Versamenti di piccole dimensioni: Spazzare o aspirare quanto riversato e mettere in un contenitore adeguato previsto per l'eliminazione. Pulire completamente la superficie per rimuovere completamente la contaminazione residua. Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo
6.4. Riferimento ad altre sezioni	Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura	Ridurre al minimo la generazione e l'accumulo di polvere. Istituire procedure di pulizia di routine per impedire che le polveri si accumulino sulle superfici. Conservare lontano dal calore. Adottare un'adeguata ventilazione nei luoghi dove si sviluppano le polveri. Prendere ogni precauzione per evitare di miscelare con sostanze combustibili. Tenere lontano da indumenti e altri materiali combustibili. Non respirare la polvere. Non permettere che questo materiale vada a contatto con gli occhi. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Indossare attrezzature di protezione personale adeguate. Osservare le norme di buona igiene industriale.
7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità	Conservare sotto chiave. Conservare lontano dal calore. Conservare in un luogo fresco e asciutto, lontano dalla luce diretta del sole. Conservare in un recipiente ermeticamente chiuso. Conservare in luogo ben ventilato. Non stoccare vicino a materiali combustibili. Conservare fuori della portata dei bambini. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).
7.3. Usi finali particolari	Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore	Forma
AMMONIUM PERSULFATE (CAS 7727-54-0)	8 ore	0,1 mg/m3	
Olio minerale (CAS 8012-95-1)	8 ore	5 mg/m3	Frazione inalabile.
PEROSSODISOLFATO DI DIPOTASSIO (CAS 7727-21-1)	8 ore	0,1 mg/m3	

Valori limite biologici	Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.
Procedure di monitoraggio raccomandate	Seguire le procedure standard di monitoraggio.
Livelli derivati senza effetto (DNEL)	Non conosciuto.
Prevedibili concentrazioni prive di effetti (PNEC)	Non conosciuto.

8.2. Controlli dell'esposizione

Controlli tecnici idonei	È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Se le misure ingegneristiche non sono sufficienti a mantenere le concentrazioni di particolati di polvere inferiori al limite di esposizione professionale, indossare una protezione delle vie respiratorie adatta. In caso di molatura, taglio o utilizzo di un prodotto che può causare polvere, usare un adeguato sistema di aerazione locale onde mantenere l'esposizione al di sotto dei limiti di esposizione raccomandati. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali	Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.
Protezione degli occhi/del volto	Applicabile soltanto per gli impianti industriali. Respiratore per sostanze chimiche con filtro per vapori organici, protezione facciale completa e filtro per polveri e nebbie.
Protezione della pelle	
- Protezione delle mani	Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici. È consigliabile cambiarlo spesso.
- Altro	Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici.
Protezione respiratoria	Applicabile soltanto per gli impianti industriali. Respiratore per sostanze chimiche con filtro per vapori organici, protezione facciale completa e filtro per polveri e nebbie.
Pericoli termici	Indossare opportuni indumenti termoprotettivi, quando necessario.
Misure d'igiene	Evitare il contatto con indumenti o altri materiali combustibili. Rimuovere e lavare immediatamente gli indumenti contaminati. Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti. Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
Controlli dell'esposizione ambientale	Non conosciuto.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto	
Stato fisico	Solido.
Forma	Polvere.
Colore	Blu chiaro.
Odore	Non conosciuto.
Soglia olfattiva	Non conosciuto.
pH	Non applicabile.
Punto di fusione/punto di congelamento	Non conosciuto.
Punto di ebollizione iniziale e intervallo di ebollizione	Non applicabile.
Punto di infiammabilità	Non applicabile.
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non conosciuto.

Limiti superiori/inferiori di infiammabilità o di esplosività

Limite di infiammabilità - inferiore (%)	Non conosciuto.

Limite di infiammabilità - superiore (%)	Non conosciuto.
Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Può aggravare un incendio; comburente.

9.2. Altre informazioni

pH in soluzione acquosa	10,2 - 10,6

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Tenere lontano da sostanze combustibili. Aumenta notevolmente la velocità di combustione dei materiali.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Materiale combustibile. Agenti riduttori.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.

Informazioni sulle vie probabili di esposizione

Inalazione	Può causare irritazione alle vie respiratorie. Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato. L'inalazione prolungata può essere nociva.
Cutanea	Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca gravi lesioni oculari.
Ingestione	In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.
Sintomi	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Può irritare le vie respiratorie. Difficoltà respiratorie. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta	Non conosciuto.
