Employer des méthodes normales de lutte contre l'incendie et tenir compte des dangers associés aux autres substances présentes.

RUBRIQUE 6: Mesures à prendre en cas de dispersion accidentelle

6.1. Précautions individuelles, équipement de protection et procédures d'urgence

Pour les non-secouristes

Tenir à l'écart le personnel superflu. Garder les personnes à l'écart de l'endroit de l'écoulement/de la fuite et contre le vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins d'être vêtu d'une tenue protectrice appropriée. Assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour plus de détails sur la protection individuelle, voir la section 8 de la FDS.

Pour les secouristes

Tenir à l'écart le personnel superflu. Porter les protections individuelles recommandées dans la section 8 de la FDS.

6.2. Précautions pour la protection de l'environnement

Éviter le rejet dans l'environnement. Informer les cadres ou superviseurs concernés de tout rejet dans l'environnement. Éviter un déversement ou une fuite supplémentaire, si cela est possible sans danger. Éviter le rejet à l'égout et dans les environnements terrestres et les cours d'eau.

6.3. Méthodes et matériel de confinement et de nettoyage

Éviter que le produit arrive dans les égouts.

Déversements importants : Arrêter le débit de matière, si ceci est sans risque. Endiguer le matériau renversé si cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements mineurs : Essuyer avec une matière absorbante (p.ex. tissu, laine). Nettoyer à fond la surface pour éliminer toute contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation.

6.4. Référence à d'autres rubriques

Pour plus de détails sur la protection individuelle, voir la section 8 de la FDS. Pour plus de détails sur l'élimination des déchets, voir la section 13 de la FDS.

RUBRIQUE 7: Manipulation et stockage

7.1. Précautions à prendre pour une manipulation sans danger

Éviter le contact avec les yeux, la peau et les vêtements. Éviter toute exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection approprié. Éviter le rejet dans l'environnement. Suivre les règles de bonnes pratiques chimiques.

7.2. Conditions d'un stockage sûr, y compris d'éventuelles incompatibilités

Stocker dans un récipient fermé de manière étanche. Conserver hors de la portée des enfants. Conserver à l'écart des matières incompatibles (voir la Section 10 de la FDS).

7.3. Utilisation(s) finale(s) particulière(s)

Donnée inconnue.

RUBRIQUE 8: Contrôles de l'exposition/protection individuelle

8.1. Paramètres de contrôle

Limites d'exposition professionnelle

Allemagne. TRGS 900, Valeurs limites dans l'air ambiant sur le lieu de travail

Composants	Type	Valeur	Forme
CÉTOL (CAS 36653-82-4)	AGW	200 mg/m3	Vapeur et aérosol.

Allemagne. TRGS 900, Valeurs limites dans l'air ambiant sur le lieu de travail

Composants	Type	Valeur	Forme
		20 ppm	Vapeur et aérosol.
STÉAROL (CAS 112-92-5)	AGW	224 mg/m3	
		20 ppm	

Valeurs limites biologiques Il n'y a pas de limites d'exposition biologique pour ce ou ces ingrédients.

Procédures de suivi recommandées Suivre les procédures standard de surveillance.

Doses dérivées sans effet (DDSE) Donnée inconnue.

Concentrations prédites sans effet (PNEC) Donnée inconnue.

8.2. Contrôles de l'exposition

Contrôles techniques appropriés Assurer une bonne ventilation générale. Le taux de renouvellement d'air devrait être adapté aux conditions. Si c'est approprié, clôtures de processus d'utilisation, ventilation d'échappement locale, ou d'autres commandes de technologie pour maintenir les niveaux aéroportés au-dessous des limites recommandées d'exposition. Si des limites d'exposition n'ont pas été établies, maintenez les niveaux aéroportés à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Informations générales Utiliser l'équipement de protection individuel requis. Choisir l'équipement de protection conformément aux normes CEN en vigueur et en coopération avec le fournisseur de l'équipement de protection.

Protection des yeux/du visage Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux.

Protection de la peau

- Protection des mains Pour usage industriel seulement. Porter des gants appropriés et résistant aux produits chimiques.

- Autres Pour usage industriel seulement. Porter des vêtements appropriés résistant aux produits chimiques.

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Risques thermiques Porter des équipements de protection contre la chaleur, si nécessaire.

Mesures d'hygiène Toujours adopter de bonnes pratiques d'hygiène personnelle, telles que se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Nettoyer régulièrement la tenue de travail et l'équipement de protection pour éliminer les contaminants.

Contrôles d'exposition liés à la protection de l'environnement Informer les cadres ou superviseurs concernés de tout rejet dans l'environnement.

RUBRIQUE 9: Propriétés physiques et chimiques

9.1. Informations sur les propriétés physiques et chimiques essentielles

Aspect

État physique Liquide.

Forme Crème.

Couleur Mauve

Odeur Caractéristique.

Seuil olfactif Donnée inconnue.

pH 3 - 4,5

Point de fusion/point de congélation Donnée inconnue.

Point initial d'ébullition et intervalle d'ébullition > 100 °C (> 212 °F)

Point d'éclair > 100,0 °C (> 212,0 °F)

Taux d'évaporation Donnée inconnue.

Inflammabilité (solide, gaz) Sans objet.

Limites supérieures/inférieures d'inflammabilité ou limites d'explosivité

limite inférieure d'inflammabilité (%) Donnée inconnue.

limite supérieure d'inflammabilité (%)	Donnée inconnue.
Pression de vapeur	Donnée inconnue.
Densité de vapeur	Donnée inconnue.
Densité relative	Donnée inconnue.
Solubilité(s)	
Solubilité (dans l'eau)	Donnée inconnue.
Coefficient de partage: n-octanol/eau	Donnée inconnue.
Température d'auto-inflammabilité	Donnée inconnue.
Température de décomposition	Donnée inconnue.
Viscosité	Donnée inconnue.
Propriétés explosives	Non explosif.
Propriétés comburantes	Non comburant.

9.2. Autres informations

Densité	0,98 - 1,1 g/cm3

RUBRIQUE 10: Stabilité et réactivité

10.1. Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, de stockage et de transport.
10.2. Stabilité chimique	Ce produit est stable dans des conditions normales.
10.3. Possibilité de réactions dangereuses	Pas de réactions dangereuses connues dans les conditions normales d'utilisation.
10.4. Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des substances incompatibles.
10.5. Matières incompatibles	Agents oxydants forts.
10.6. Produits de décomposition dangereux	On ne connaît pas de produits de décomposition dangereux.

RUBRIQUE 11: Informations toxicologiques

Informations générales	L'exposition professionnelle à le mélange ou au mélange peut provoquer des effets indésirables.

Informations sur les voies d'exposition probables

Inhalation	L'inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Peut causer des gênes en cas d'ingestion. Cependant, l'ingestion est une voie primaire d'exposition professionnelle peu probable.
Symptômes	Irritation sévère des yeux. Les symptômes peuvent inclure des picotements, des déchirures, des rougeurs, des gonflements et une vision brouillée. Irritation de la peau. Peut entraîner des rougeurs et de la douleur.

11.1. Informations sur les effets toxicologiques

Toxicité aiguë Donnée inconnue.

Produit	Espèce	Résultats d'essais
PULP RIOT BELFAST TONING CONDITIONER		
Aiguë		
Cutané		
ATEmix		140800 mg/kg
Oral		
ATEmix		40340 mg/kg

Aiguë

Oral

DL50	Rat	960 mg/kg

Corrosion cutanée/irritation cutanée Provoque une irritation cutanée.

Irritation/corrosion – Peau

CETRIMONIUM CHLORIDE	OCDE 404 Résultat: Corrosif Espèce: Lapin
DICETYLDIMONIUM CHLORIDE	OCDE 404 Résultat: Corrosif Espèce: Lapin

Lésions oculaires graves/irritation oculaire Provoque une sévère irritation des yeux.

Irritation/corrosion – Œil

CETRIMONIUM CHLORIDE	OCDE 405 Résultat: Corrosif Espèce: Lapin
DICETYLDIMONIUM CHLORIDE	OCDE 405 Résultat: Corrosif Espèce: Lapin

Sensibilisation respiratoire En raison d'un manque partiel ou complet de données, la classification est impossible.

Sensibilisation cutanée En raison d'un manque partiel ou complet de données, la classification est impossible.

Sensibilisation cutanée

CETRIMONIUM CHLORIDE	OCDE 406 Résultat: Non Sensibilisant Espèce: Cochon d'Inde
DICETYLDIMONIUM CHLORIDE	OCDE 406 Résultat: Non Sensibilisant Espèce: Cochon d'Inde

Mutagénicité sur les cellules germinales En raison d'un manque partiel ou complet de données, la classification est impossible.

Mutagénicité

CETRIMONIUM CHLORIDE	Résultat: Les tests in vitro n'ont pas montré des effets mutagènes
DICETYLDIMONIUM CHLORIDE	Résultat: Les tests in vitro n'ont pas montré des effets mutagènes

Cancérogénicité Non classé quant à la cancérogénicité pour l'homme. En raison d'un manque partiel ou complet de données, la classification est impossible.

Hongrie. Ordonnance (hongr. EüM) n° 26/2000 relative à la protection contre les substances cancérogènes sur le lieu de travail et la prévention des risques liés à l'exposition à ces dernières [et ses modifications]

N'est pas listé.

Toxicité pour la reproduction En raison d'un manque partiel ou complet de données, la classification est impossible.

Effets sur le développement

DICETYLDIMONIUM CHLORIDE	12 mg/kg bw/d OCDE 414 Résultat: NOAEL Espèce: Rat

Toxicité pour la reproduction

DICETYLDIMONIUM CHLORIDE	56,3 mg/kg bw/d OCDE 416 Résultat: NOAEL Espèce: Rat

Toxicité spécifique pour certains organes cibles – exposition unique En raison d'un manque partiel ou complet de données, la classification est impossible.

Toxicité spécifique pour certains organes cibles – exposition répétée En raison d'un manque partiel ou complet de données, la classification est impossible.

Toxicité spécifique pour certains organes cibles – exposition répétée

CETRIMONIUM CHLORIDE	100 mg/kg bw/d OCDE 407 Résultat: NOEAL Espèce: Rat Durée de l'essai: 28 d
DICETYLDIMONIUM CHLORIDE	42 - 49 mg/kg bw/d OCDE 408, Oral Résultat: NOAEL Espèce: Rat Durée de l'essai: 93 d

Danger par aspiration En raison d'un manque partiel ou complet de données, la classification est impossible.

Informations sur les mélanges et informations sur les substances Aucune information disponible.

Autres informations The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

RUBRIQUE 12: Informations écologiques

12.1. Toxicité Nocif pour les organismes aquatiques, entraîne des effets néfastes à long terme. D'après les données disponibles, les critères de classification dans les substances dangereuses pour les milieux aquatiques, danger aigu, ne sont pas remplis.

Composants		Espèce	Résultats d'essais
CETRIMONIUM CHLORIDE (CAS 112-02-7)			
Aquatique			
Aiguë			
Algues	CE50	Pseudokirchneriella subcapitata	0,08 mg/l, 72 heures OCDE 201
Autre	CE50	Pseudomonas putida	0,96 mg/l, 16 heures DIN38412; Pt. 8
Crustacé	CE50	Daphnia magna	0,09 mg/l, 48 heures OCDE 202
Poisson	CL50	Danio rerio	0,19 - 0,29 mg/l, 96 heures OCDE 203
Chronique

Aiguë			
Algues	CE50	Pseudokirchneriella subcapitata	0,386 mg/l, 72 h OCDE 201
Autre	CE50	Boues activées d'eaux usées principalement ménagères	68 mg/l, 3 h OCDE 209
Crustacé	CE50	Acartia tonsa	0,295 mg/l, 48 h ISO 14669
Poisson	CL50	Danio rerio	0,26 mg/l, 96 h OCDE 203
Chronique			
Algues	NOEC (concentration sans effet observé)	Pseudokirchneriella subcapitata	0,06 mg/l, 72 h OCDE 201
Crustacé	NOEC (concentration sans effet observé)	Daphnia magna	0,5 mg/l, 21 d OCDE 202

Composants		Espèce	Résultats d'essais
Poisson	NOEC (concentration sans effet observé)	Pimephales promelas	0,23 mg/l, 35 d E.P.A. -66013-75-00

12.2. Persistance et dégradabilité

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

CETRIMONIUM CHLORIDE	93,5 en % OCDE 301 B Résultat: Facilement Biodegradable Durée de l'essai: 28 d
DICETYLDIMONIUM CHLORIDE	61 en % OCDE 301 B Résultat: Facilement Biodegradable Durée de l'essai: 28 d

12.3. Potentiel de bioaccumulation

Coefficient de partage n-octanol/eau (log Kow)

CETRIMONIUM CHLORIDE	3,23
DICETYLDIMONIUM CHLORIDE	4,7 - 4,9 OECD 123

12.4. Mobilité dans le sol Aucune information disponible.

12.5. Résultats des évaluations PBT et vPvB Cette substance ou ce mélange n'est pas classé comme PBT ou vPvB.

12.6. Autres effets néfastes Aucun autre effet indésirable sur l'environnement (par exemple appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement climatique) n'est attendu pour ce composant.

12.7. Informations supplémentaires La référence à tout tests sur les animaux pour des constituants individuels mentionnés dans ce document est basée sur des données publiques et de tiers parti.

RUBRIQUE 13: Considérations relatives à l'élimination

13.1. Méthodes de traitement des déchets

Déchets résiduaires Eliminer le produit conformément à la réglementation locale en vigueur. Les doublures intérieures ou récipients vides peuvent conserver des résidus de produit. N'éliminer cette matière et son récipient qu'en prenant toutes les précautions nécessaires (voir : Instructions relatives à l'élimination).

Emballage contaminé Les récipients vides peuvent contenir des résidus de produit. Respecter les avertissements de l'étiquette même quand le récipient est vide. Les conteneurs vides doivent être acheminés vers un site agréé pour le traitement des déchets à des fins de recyclage ou d'élimination.

Code des déchets UE Le code de déchet doit être attribué en accord avec l'utilisateur, le producteur et les services d'élimination de déchets.

Informations / Méthodes d'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés en décharge agréée. Empêcher que cette substance ne s'écoule dans les égouts ou le réseau d'eau. Ne pas contaminer les étangs, les voies navigables ou les fossés avec le produit ou le récipient utilisés. Éliminer le contenu/récipient conformément aux réglementations locales/régionales/nationales/internationales.

Précautions particulières Détruire conformément à toutes les réglementations applicables.

RUBRIQUE 14: Informations relatives au transport

ADR

FINISHED GOODS

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

BULK

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

IATA

FINISHED GOODS

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

BULK

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

IMDG

FINISHED GOODS

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

BULK

14.1. - 14.6.: Le produit n'est pas soumis à la réglementation internationale sur le transport des marchandises dangereuses.

14.7. Transport en vrac conformément à l'annexe II de la convention Marpol et au recueil IBC Non établi.

RUBRIQUE 15: Informations relatives à la réglementation

15.1. Réglementations/législation particulières à la substance ou au mélange en matière de sécurité, de santé et d'environnement

Réglementations de l'UE

Règlement (CE) n° 1005/2009 relatif à des substances qui appauvrissent la couche d'ozone, Annexe I et II, avec ses modifications

N'est pas listé.

Règlement (CE) n° 850/2004 concernant les polluants organiques persistants, Annexe I et ses modifications

N'est pas listé.

Règlement (UE) n° 649/2012 concernant les exportations et importations de produits chimiques dangereux, Annexe I, partie 1 et ses modifications

N'est pas listé.

Règlement (UE) n° 649/2012 concernant les exportations et importations de produits chimiques dangereux, Annexe I, partie 2 et ses modifications

N'est pas listé.

Règlement (UE) n° 649/2012 concernant les exportations et importations de produits chimiques dangereux, Annexe I, partie 3 et ses modifications

N'est pas listé.

Règlement (UE) n° 649/2012 concernant les exportations et importations de produits chimiques dangereux, Annexe V et ses modifications

N'est pas listé.

Règlement (CE) n° 166/2066 concernant la création d'un registre européen des rejets et des transferts de polluants, Annexe II, avec ses modifications

N'est pas listé.

Règlement (EC) n° 1907/2006 (REACH), Article 59, paragraphe 10, Liste des substances candidates actualisée par l'ECHA

N'est pas listé.

Autorisations

Règlement (CE) n° 1907/2006, REACH, Annexe XIV Substance soumise à autorisation, et ses amendements

N'est pas listé.

Restrictions d'utilisation

Règlement (CE) n° 1907/2006 (REACH), Annexe XVII, Substances soumises à restrictions de mise sur le marché et d'utilisation, et ses modifications

N'est pas listé.

Directive 2004/37/CE : concernant la protection des travailleurs contre les risques liés à l'exposition à des agents cancérigènes ou mutagènes au travail, avec ses modifications

N'est pas listé.

Autres réglementations UE

Directive 2012/18/UE concernant la maîtrise des dangers liés aux accidents majeurs impliquant des substances dangereuses, et ses modifications

N'est pas listé.

Autres réglementations Le produit est classé et étiqueté conformément au Règlement (CE) 1272/2008 (Règlement CLP) et à ses amendements. La présente Fiche de données de sécurité est conforme aux exigences du Règlement (CE) n° 1907/2006, avec ses modifications.

Réglementations nationales Respecter les réglementations nationales relatives au travail avec des agents chimiques conformément à la directive 98/24/CE et ses modifications.

15.2. Évaluation de la sécurité chimique Aucune évaluation de sécurité chimique n'a été mise en œuvre.

RUBRIQUE 16: Autres informations

Liste des abréviations Donnée inconnue.

Références Donnée inconnue.

Informations sur la méthode d'évaluation utilisée pour classer le mélange	La classification au titre des risques envers la santé et l'environnement est dérivée d'une combinaison de méthodes de calcul et de données d'essai, le cas échéant.
Le texte des mentions H des sections 2 à 15 n'est reproduit que partiellement	H302 Nocif en cas d'ingestion. H311 Toxique par contact cutané. H314 Provoque des brûlures de la peau et des lésions oculaires graves. H318 Provoque des lésions oculaires graves. H400 Très toxique pour les organismes aquatiques. H410 Très toxique pour les organismes aquatiques, entraîne des effets néfastes à long terme. H411 Toxique pour les organismes aquatiques, entraîne des effets néfastes à long terme.
Informations de révision	Aucun(e)(s).
Informations de formation	Suivre les instructions dispensées pendant la formation lors de la manipulation de ce matériau.
Clause de non-responsabilité	Les informations contenues dans la présente Fiche de données de sécurité sont exactes dans l'état actuel de nos connaissances et de nos informations, à la date de publication. Ces informations ne sont fournies qu'à titre indicatif pour assurer la sécurité de la manipulation, de l'utilisation, de la transformation, du stockage, du transport, de l'élimination et de la mise sur le marché de la substance, et ne sauraient être considérées comme une garantie ou une assurance-qualité. Les informations ne concernent que la matière spécifiquement décrite, et sont susceptibles d'être non valables si la matière est employée en combinaison avec toute autre matière ou dans tout autre procédé, à moins que le contraire ne soit précisé dans le texte.

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT THERMAL PROTECTION SPRAY**

Other means of identification

SDS number 21-91-0000096

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

US Address:
L'Oreal USA Products, Inc
133 Terminal Avenue
Clark, NJ 07066
USA

Canadian Address:
L'Oreal Canada
4895 rue Hickmore
Ville St-Laurent, H4T 1K5
Canada

Emergency Phone # :
1-800-535-5053 (International: 352-323-3500)
In Canada - 1-613-996-6666 (Canutec (*666 Cellular))

For further Information: 1-732-499-2741

Poison Control # : 412-390-3326

2. Hazard(s) identification

Physical hazards	Flammable aerosols	Category 1
	Gases under pressure	Liquefied gas
Health hazards	Serious eye damage/eye irritation	Category 2B
OSHA defined hazards	Not classified.	

Label elements

Signal word Danger

Hazard statement Extremely flammable aerosol. Contains gas under pressure; may explode if heated. Causes eye irritation.

Precautionary statement

Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use. Wash thoroughly after handling.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage Protect from sunlight. Store in a well-ventilated place. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC)	None known.
Supplemental information	None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
HYDROFLUOROCARBON 152A		75-37-6	40
ETHANOL		64-17-5	27.91

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Not likely, due to the form of the product. In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.
Most important symptoms/effects, acute and delayed	Headache. Irritation of eyes. Exposed individuals may experience eye tearing, redness, and discomfort. Coughing.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Alcohol resistant foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
Fire fighting equipment/instructions	In case of fire: Stop leak if safe to do so. Do not move cargo or vehicle if cargo has been exposed to heat. Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.
General fire hazards	Extremely flammable aerosol. Contents under pressure. Pressurized container may explode when exposed to heat or flame.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Wear appropriate protective equipment and clothing during clean-up. Emergency personnel need self-contained breathing equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Isolate area until gas has dispersed. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.

Environmental precautions Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Close valve after each use and when empty. Protect containers from physical damage; do not drag, roll, slide, or drop. When moving containers, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport containers. Suck back of water into the container must be prevented. Do not allow backfeed into the container. Purge air from system before introducing gas. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Do not re-use empty containers. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities Level 1 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Store in a well-ventilated place. Stored containers should be periodically checked for general condition and leakage. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
ETHANOL (CAS 64-17-5)	PEL	1900 mg/m3
		1000 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1000 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. If permissible levels are exceeded use NIOSH mechanical filter / organic vapor cartridge or an air-supplied respirator.

Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not applicable.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 95 °F (> 35 °C) (liquid)
Flash point	> 77.0 °F (> 25.0 °C) Closed Cup (liquid)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.797 - 0.897 g/cm³ (liquid)
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Headache. Irritation of eyes. Exposed individuals may experience eye tearing, redness, and discomfort. Coughing.

Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
ETHANOL (CAS 64-17-5)		
Acute		
Dermal		
LD50	Rabbit	> 20000 mg/kg
Inhalation		
Vapor		
LC50	Rat	124.7 mg/l, 4 h OECD 403
Oral		
LD50	Rat	10470 mg/kg OECD 401
HYDROFLUOROCARBON 152A (CAS 75-37-6)		
Acute		
Inhalation		
Gas		
ALC	Rat	> 437500 ppm, 4 h

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Serious eye damage/eye irritation Causes eye irritation.

Irritation Corrosion - Eye

ETHANOL	OECD 405 Result: Irritating Species: Rabbit
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.
HYDROFLUOROCARBON 152A	Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Possible reproductive hazard.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 Result: NOAEC Species: Rat

Reproductivity

ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm OECD 453, Inhalation Result: NOAEC Species: Rat Test Duration: 104 wk

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
ETHANOL (CAS 64-17-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustacea	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h
Fish	LC50	Pimephales promelas	15300 mg/l, 96 h
Other	IC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h
Chronic			
Crustacea	NOEC	Daphnia magna	9.6 mg/l, 9 d
Fish	NOEC	Danio rerio	250 mg/l, 120 h OECD 212
HYDROFLUOROCARBON 152A (CAS 75-37-6)			
Aquatic			
Acute			
Algae	EC50	Algae	47.755 mg/l QSAR
Crustacea	EC50	Daphnia	146.695 mg/l QSAR
Fish	LC50	Fish	295.783 mg/l QSAR

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

ETHANOL	84 % Result: Readily Biodegradable Test Duration: 20 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

ETHANOL	-0.31
HYDROFLUOROCARBON 152A	0.75

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

General information Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers: Ensure that containers are firmly secured. Ensure cylinder valve is closed and not leaking. Ensure valve outlet cap nut or plug (where provided) is correctly fitted. Ensure valve protection device (where provided) is correctly fitted. Ensure adequate ventilation. Ensure compliance with applicable regulations.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

ETHANOL (CAS 64-17-5) Listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Not regulated.

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Safe Drinking Water Act (SDWA) Not regulated.

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

ETHANOL (CAS 64-17-5) Low priority

16. Other information, including date of preparation or last revision

Issue date 11-13-2019

Version #	01
NFPA ratings	Health: 1 Flammability: 4 Instability: 0
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT THERMAL PROTECTION SPRAY
Synonyms	None.
SDS number	21-91-0000096
Product code	1241022 B
Issue date	11-13-2019
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number Orfila +33 1 45 42 59 59

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards		
Aerosols	Category 1	H222 - Extremely flammable aerosol. H229 - Pressurized container: May burst if heated.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Aerosol. CONTENTS UNDER PRESSURE.
Pressurized container may explode when exposed to heat or flame. Dangerous for the environment if discharged into watercourses. Not classified for health hazards. However, occupational exposure to the mixture or substance(s) may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms

Signal word Danger

Hazard statements

H222	Extremely flammable aerosol.
H229	Pressurized container: May burst if heated.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P211	Do not spray on an open flame or other ignition source.
P251	Do not pierce or burn, even after use.
P273	Avoid release to the environment.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage

P410 + P412	Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 13,2% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 13,2% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
ETHANOL	27,91	64-17-5 200-578-6	01-2119457610-43	603-002-00-5	
Classification:	Flam. Liq. 2;H225, Eye Irrit. 2;H319				
DISILOXANE	14,1	107-46-0 203-492-7	01-2119496108-31	-	
Classification:	Flam. Liq. 2;H225, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation If symptoms develop move victim to fresh air. Get medical attention if symptoms persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion In the unlikely event of swallowing contact a physician or poison control center.

4.2. Most important symptoms and effects, both acute and delayed Headache. Coughing.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards Extremely flammable aerosol.

5.1. Extinguishing media

Suitable extinguishing media Alcohol resistant foam. Powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
Special fire fighting procedures	Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Prevent product from entering drains. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Level 1 Aerosol. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1907 mg/m3
		1000 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
ETHANOL (CAS 64-17-5)	VLE	9500 mg/m3
Regulatory status: Indicative limit (VL)		
		5000 ppm
Regulatory status: Indicative limit (VL)		
	VME	1900 mg/m3
Regulatory status: Indicative limit (VL)		

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
		1000 ppm

Regulatory status: Indicative limit (VL)

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	380 mg/m3
		200 ppm

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value
ETHANOL (CAS 64-17-5)	AGW	380 mg/m3
		200 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1000 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1910 mg/m3
		1000 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not applicable.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 95 °F (> 35 °C) (liquid)
Flash point	> 77,0 °F (> 25,0 °C) Closed Cup (liquid)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	
Density	0,797 - 0,897 g/cm³ (liquid)

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Not available.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Headache. Coughing.
11.1. Information on toxicological effects	
Acute toxicity	Not known.

Components	Species	Test Results
DISILOXANE (CAS 107-46-0)		
Acute		
Dermal

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

ETHANOL: OECD 404
Result: Not Irritating
Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible.

Irritation Corrosion - Eye

ETHANOL: OECD 405
Result: Irritating
Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

ETHANOL: OECD 406
Result: Not Sensitizing
Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL: Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOL: > 20000 ppm OECD 414, No effects on development
Result: NOAEL
Species: Rat

Reproductivity

ETHANOL: 20700 mg/kg bw/d OECD 416, No effects on fertility
Result: NOAEL
Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure

ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results

Fish	NOEC	Danio rerio	250 mg/l, 120 h OECD 212

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

DISILOXANE	2 % OECD 301 C Result: Not Readily Biodegradable Test Duration: 28 d
ETHANOL	84 % Result: Readily Biodegradable Test Duration: 20 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

DISILOXANE	4,2
ETHANOL	-0,31

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. UN number	UN1950

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

ETHANOL (CAS 64-17-5)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H225 Highly flammable liquid and vapor. H319 Causes serious eye irritation. H400 Very toxic to aquatic life. H411 Toxic to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT THERMAL PROTECTION SPRAY**

Autres moyens d'identification

Numéro de la FDS 21-91-0000096

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

2. Identification des dangers

Dangers physiques	Aérosols inflammables	Catégorie 1
	Gaz sous pression	Gaz liquéfié
Dangers pour la santé	Lésions oculaires graves/irritation oculaire	Catégorie 2B

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Aérosol extrêmement inflammable. Contient un gaz sous pression; peut exploser sous l'effet de la chaleur. Provoque une irritation des yeux.

Conseil de prudence

Prévention Tenir à lécart de la chaleur/des étincelles/des flammes nues/des surfaces chaudes. - Ne pas fumer. Ne pas vaporiser sur une flamme nue ou sur toute autre source d'ignition Récipient sous pression : ne pas perforer ni brûler, même après usage. Se laver soigneusement après manipulation.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Stockage	Protéger du rayonnement solaire. Stocker dans un endroit bien ventilé. Ne pas exposer à une température supérieure à 50 °C/122 °F
Élimination	Éliminer les rejets et les déchets conformément aux règlements municipaux.
Danger(s) non classé(s) ailleurs (DNCA)	Aucun(e) connu(e).
Information supplémentaire	Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
HYDROFLUOROCARBON 152A		75-37-6	40
ÉTHANOL		64-17-5	27.91

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.
Contact avec la peau	Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.
Contact avec les yeux	Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.
Ingestion	Peu probable en raison de la forme du produit. Dans le cas peu probable d'une ingestion, communiquez avec un médecin ou un centre anti-poison. Rincer la bouche.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Maux de tête. Irritation des yeux. Les personnes exposées peuvent souffrir de larmoiements, de rougeurs et de malaises. Toux.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse antialcool. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme. Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Les pompiers doivent porter un équipement de protection standard, notamment des vêtements ignifuges, un casque à écran facial, des gants, des bottes en caoutchouc et, dans les espaces clos, un appareil respiratoire autonome.
Équipement/directives de lutte contre les incendies	En cas d'incendie : Obturer la fuite si cela peut se faire sans danger. Ne pas déplacer la cargaison ou le véhicule si la cargaison a été exposée à la chaleur. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. Les récipients doivent être refroidis à l'eau pour prévenir la création de pression de vapeur. Pour un important incendie dans la zone de cargaison, utiliser un support à tuyau automatique ou des lances à eau autonomes, si possible. Sinon, se retirer et laisser brûler.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. En cas d'incendie et/ou d'explosion, ne pas respirer les fumées.
Risques d'incendie généraux	Aérosol extrêmement inflammable. Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence

Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Tenir à l'écart des zones basses. De nombreux gaz sont plus que l'air. Ils se répandent au niveau du sol et s'accumulent dans des zones basses ou confinées (égouts, sous-sols, citernes). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Le personnel d'urgence doit posséder un matériel respiratoire autonome. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. Ventiler les espaces clos avant d'y entrer. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Se reporter aux fiches de données de sécurité et/ou aux instructions. Arrêter la fuite si cela peut se faire sans risque. Déplacer la bouteille vers un endroit sûr et ouvert si la fuite est irréparable. Isoler la zone jusqu'à dispersion du gaz. Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Récipient sous pression : ne pas perforer ni brûler, même après usage. Ne pas utiliser si le bouton de vaporisation est manquant ou défectueux. Ne pas pulvériser sur une flamme nue ou toute autre matière incandescente. Ne pas fumer pendant l'utilisation ou jusqu'à ce que la surface vaporisée soit complètement sèche. Ne pas couper, souder, braser, percer, broyer ou exposer les récipients à de la chaleur, à une flamme, à des étincelles ou à d'autres sources d'ignition. Tout matériel utilisé pour la manutention de ce produit doit être mis à la terre. Fermer le détendeur après chaque utilisation et lorsque la bouteille est vide. Protéger les contenants des dommages physiques; ne pas traîner, rouler, glisser ou laisser tomber. Lors du déplacement des réservoirs, même sur de courtes distances, utiliser un chariot (chariot de transport, chariot à main, etc.) conçu pour le transport de réservoirs. L'aspiration inverse de l'eau du récipient doit être évitée. Ne pas permettre le refoulement dans le récipient. Purger l'air du système avant d'introduire un gaz. Utiliser uniquement de l'équipement correctement spécifié qui est approprié pour ce produit, sa pression d'alimentation et sa température. En cas de doute, communiquez avec votre fournisseur de gaz. Ne pas réutiliser les récipients vides. Éviter tout contact avec les yeux. Éviter une exposition prolongée. Utiliser seulement dans les zones bien ventilées. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Aérosol niveau 1.
Récipient sous pression. Protéger du rayonnement solaire et ne pas exposer à une température supérieure à 50 °C/122 °F. Ne pas perforer, incinérer ou écraser. Ne pas manipuler ou stocker à proximité d'une flamme nue, d'une source de chaleur ou d'autres sources d'ignition. Ce produit peut accumuler des charges statiques qui peuvent causer des étincelles et devenir une source d'ignition. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Les contenants stockés doivent être inspectés régulièrement pour leur condition générale et des fuites. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	PEL (limite d'exposition admissible)	1900 mg/m3
		1000 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	STEL	1000 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

États-Unis. Guides WEEL (niveau d'exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. Si les niveaux admissibles sont dépassés, utiliser un filtre mécanique / une cartouche contre les vapeurs organiques NIOSH ou un respirateur à adduction d'air.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Aérosol

Couleur Non disponible.

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH Sans objet.

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 35 °C (> 95 °F) (liquide)

Point d'éclair > 25.0 °C (> 77.0 °F) Coupelle fermée (liquide)

Taux d'évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d'inflammabilité ou d'explosibilité

Limites d'inflammabilité - inférieure (%) Non disponible.

Limites d'inflammabilité - supérieure (%) Non disponible.

Limite d'explosibilité - inférieure (%) Non disponible.

Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Densité	0.797 - 0.897 g/cm3 (liquide)
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Éviter les températures supérieures au point d'éclair. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Maux de tête. Irritation des yeux. Les personnes exposées peuvent souffrir de larmoiements, de rougeurs et de malaises. Toux.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Composants	Espèces	Résultats d'épreuves

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

ÉTHANOL	1730 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat
HYDROFLUOROCARBON 152A	25000 ppm OCDE 453, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 104 wk

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
ÉTHANOL (CAS 64-17-5)

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l’élimination

Instructions pour l'élimination	Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d’élimination des déchets autorisé. Contenu sous pression. Ne pas perforer, incinérer ou écraser. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.
Règlements locaux d’élimination	Détruire conformément àtoutes les réglementations applicables.
Code des déchets dangereux	Ce produit est inflammable (D001), utilisez le RCRA matières dangereuses lors de l’élimination.
Déchets des résidus / produits non utilisés	Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).
Emballages contaminés	Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l’étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage. Ne pas réutiliser les récipients vides.

Informations générales Éviter le transport avec des véhicules où l'espace de chargement n'est pas séparé du poste de conduite. S'assurer que le chauffeur du véhicule connaît les risques potentiels liés à la cargaison et sait ce qu'il doit faire en cas d'accident ou d'urgence. Avant de transporter des contenants du produit : S'assurer que les contenants sont solidement fixés. S'assurer que le robinet de la bouteille est fermé et ne fuit pas. S'assurer que l'écrou du bouchon de vidange du robinet ou le capuchon protecteur (s'il y a lieu) est correctement installé. S'assurer que le dispositif de protection du robinet (s'il y a lieu) est correctement installé. S'assurer une ventilation adéquate. S'assurer la conformité avec la réglementation applicable.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

ÉTHANOL (CAS 64-17-5) Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

ÉTHANOL (CAS 64-17-5) Faible priorité

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication 13-Novembre-2019

Version n°	01
Classements NFPA	Santé: 1 Inflammabilité: 4 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT DEMI-PERMANENT COLOR - GROUP 1**

Other means of identification

SDS number 30-21-0000279

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards	Flammable liquids	Category 3
Health hazards	Skin corrosion/irritation	Category 2
	Serious eye damage/eye irritation	Category 1
	Sensitization, skin	Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Flammable liquid and vapor. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage.

Precautionary statement

Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear protective gloves/eye protection/face protection.

Response If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. In case of fire: Use appropriate media to extinguish.

Storage Store in a well-ventilated place. Keep cool.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
ETHANOL		64-17-5	< 9
PEG-4 RAPESEEDAMIDE		85536-23-8	< 9
DECETH-3		66455-15-0	< 7
LAURETH-5 CARBOXYLIC ACID		27306-90-7	< 5
GLYCERYL LAURYL ETHER		9022-75-7	≤ 7
HEXYLENE GLYCOL		107-41-5	≤ 3
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
TOLUENE-2,5-DIAMINE		95-70-5	< 2
OLEYL ALCOHOL		68002-94-8	< 2
4-AMINO-2-HYDROXYTOLUENE		2835-95-2	< 0.9
P-AMINOPHENOL		123-30-8	< 0.7
M-AMINOPHENOL		591-27-5	≤ 0.5
6-HYDROXYINDOLE		2380-86-1	< 0.2

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation
Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact
Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion
Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed
Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Indication of immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.

General information
Take off all contaminated clothing immediately. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions
In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.

Specific methods
Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards
Flammable liquid and vapor.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.

Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. When using do not smoke. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Do not get this material in contact with eyes. Avoid breathing mist/vapors. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Keep away from heat, sparks and open flame. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep out of the reach of children. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
ETHANOL (CAS 64-17-5)	PEL	1900 mg/m3
		1000 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	STEL	1000 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	10 mg/m3	Aerosol, inhalable.
		50 ppm	Vapor fraction
	TWA	25 ppm	Vapor fraction

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	Ceiling	125 mg/m3
		25 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value
TOLUENE-2,5-DIAMINE (CAS 95-70-5)	TWA	0.025 mg/m3
		0.005 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Exposure guidelines

US WEEL Guides: Skin designation

TOLUENE-2,5-DIAMINE (CAS 95-70-5) Can be absorbed through the skin.

Appropriate engineering controls Explosion-proof general and local exhaust ventilation. Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 6.4 - 8.6

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point 118.4 °F (48.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature Not available.

Decomposition temperature Not available.

Viscosity Not available.

Other information

Explosive properties Not explosive.

Fire point < 212.00 °F (< 100.00 °C) ISO 2592

Oxidizing properties Not oxidizing.

10. Stability and reactivity

Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability Material is stable under normal conditions.

Possibility of hazardous reactions No dangerous reaction known under conditions of normal use.

Conditions to avoid Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.

Incompatible materials Strong oxidizing agents.

Hazardous decomposition products No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact Causes skin irritation. May cause an allergic skin reaction.

Eye contact Causes serious eye damage.

Ingestion Expected to be a low ingestion hazard.

Symptoms related to the physical, chemical and toxicological characteristics Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Information on toxicological effects

Acute toxicity Not known.

HEXYLENE GLYCOL	1000 mg/kg bw/d OECD 421 Result: NOEL Species: Rat
4-AMINO-2-HYDROXYTOLUENE	200 mg/kg bw/d OECD 415 Result: NOAEL Species: Rat
OLEYL ALCOHOL	2000 mg/kg bw/d OECD 422 Result: NOAEL Species: Rat
ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	300 mg/kg bw/d OECD 415 Species: Rat
PEG-4 RAPESEEDAMIDE	500 mg/kg bw/d OECD 421, No effects on fertility Result: NOEL Species: Rat
GLYCERYL LAURYL ETHER	600 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure

P-AMINOPHENOL	10 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
TOLUENE-2,5-DIAMINE	10 mg/kg bw/d OECD 408, Oral Result: NOEAL Species: Rat Test Duration: 90 d
DECETH-3	100 mg/kg bw/d OECD 407, Based on test data for structurally similar materials. Result: NOAEL Species: Rat Test Duration: 28 d
6-HYDROXYINDOLE	100 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
GLYCERYL LAURYL ETHER	150 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 28 d
PEG-4 RAPESEEDAMIDE	150 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat
ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat
4-AMINO-2-HYDROXYTOLUENE	180 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
HEXYLENE GLYCOL	450 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Aquatic			
Acute			
Algae		Pseudokirchneriella subcapitata	5.33 mg/l, 72 h EU C.3
Crustacea	EC50	Daphnia magna	11.12 mg/l, 48 h TG 202
Fish	LC50	Danio rerio	86.2 mg/l, 96 h EU C.1
4-AMINO-2-HYDROXYTOLUENE (CAS 2835-95-2)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	41 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	2.3 mg/l, 48 h OECD 202

Components		Species	Test Results
Fish	LC50	Danio rerio	25 mg/l, 96 h OECD 236
Other	EC50	Activated sludge of a predominantly domestic sewage	> 150 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.24 mg/l, 21 d OECD 211
6-HYDROXYINDOLE (CAS 2380-86-1)			
Acute			
Aquatic			
Acute			
Algae		Desmodesmus subspicatus	9.1 mg/l, 72 h
Crustacea	EC50	Daphnia magna	1.74 mg/l, 48 h
Fish	LC50	Danio rerio	21.7 mg/l, 96 h
Other	IC50	Activated sludge of a predominantly domestic sewage	> 0.9 mg/l, 3 d
DECETH-3 (CAS 66455-15-0)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	1.8 mg/l, 72 h 92/69/EWG
Crustacea	EC50	Daphnia magna	0.39 mg/l, 48 h 92/69/EWG
Fish	LC50	Cyprinus carpio	1.2 mg/l, 96 h EU C.1
Other	EC0	Activated sludge of a predominantly domestic sewage	140 mg/l, 3 h 88/302/EG
Chronic			
Crustacea	NOEC	Daphnia magna	<= 1 mg/l, 21 d
Fish	NOEC	Lepomis macrochirus	0.16 mg/l, 10 d
ETHANOL (CAS 64-17-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustacea	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h
Fish	LC50	Pimephales promelas	15300 mg/l, 96 h
Other	IC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h
Chronic			
Crustacea	NOEC	Daphnia magna	9.6 mg/l, 9 d
Fish	NOEC	Danio rerio	250 mg/l, 120 h OECD 212
GLYCERYL LAURYL ETHER (CAS 9022-75-7)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	1.11 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0.875 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	1.61 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	31.6 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.036 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0.086 mg/l, 30 d OECD 210

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E Result: Not readily biodegradable
4-AMINO-2-HYDROXYTOLUENE	0 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 28 d
6-HYDROXYINDOLE	Result: Not Biodegradable
DECETH-3	78 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
ETHANOL	84 % Result: Readily Biodegradable Test Duration: 20 d
GLYCERYL LAURYL ETHER	88 % OECD 301 B Result: Readily Biodegradable
HEXYLENE GLYCOL	81 % OECD 301 F Result: Readily biodegradable Test Duration: 28 d
LAURETH-5 CARBOXYLIC ACID	78 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
OLEYL ALCOHOL	87 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d
PEG-4 RAPESEEDAMIDE	96 % OECD 203 Result: Readily Biodegradable Test Duration: 28 d
TOLUENE-2,5-DIAMINE	17 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

4-AMINO-2-HYDROXYTOLUENE	-0.53 EU A.8 0.53 OECD 117
6-HYDROXYINDOLE	1.46 EU A.8
ETHANOL	-0.31
GLYCERYL LAURYL ETHER	3.79 - 4.25
M-AMINOPHENOL	0.21
P-AMINOPHENOL	0.25
PEG-4 RAPESEEDAMIDE	5
TOLUENE-2,5-DIAMINE	-0.321 OECD 107

Bioconcentration factor (BCF)

P-AMINOPHENOL	10 - 46 OECD 305 C

Bioaccumulation

P-AMINOPHENOL	Result: Bioaccumulation is unlikely.
TOLUENE-2,5-DIAMINE	Result: Bioaccumulation is unlikely.

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code	This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

Materials associated with this document meet the criteria for US Department of Transportation exemption found at 49 CFR 173.150(g).

Packages containing limited quantities of retail products in volumes in accordance with the tables listed below maybe offered under the conditions of the exemption.

US Domestic Transportation

Per 49 CFR 173.150(g) exemptions:

	>70% Ethyl Alcohol (v/v) (w/w)			
	Inner Packaging	Net Contents	Gross Weight	Marking
Liquids	8 fl. oz.	192 fl. oz.	65 lbs.	None
	≤70% Ethyl Alcohol (v/v) (w/w)			
Liquids (glass)	8 fl. oz.	192 fl. oz.	65 lbs.	None
	16 fl. oz.	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
Liquids (non-glass)	16 fl. oz.	192 fl. oz.	65 lbs.	None
	1 gallon	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
	General Conditions			
	Inner packagings must be secured and cushioned within the outer package to prevent breakage, leakage and movement.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

ETHANOL (CAS 64-17-5)	Listed.
TOLUENE-2,5-DIAMINE (CAS 95-70-5)	Listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Chemical name	CAS number	% by wt.
TOLUENE-2,5-DIAMINE	95-70-5	< 2

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

ETHANOL (CAS 64-17-5)	Low priority

16. Other information, including date of preparation or last revision

Issue date	12-04-2020
Version #	01
NFPA ratings	Health: 3 Flammability: 2 Instability: 0

Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT DEMI-PERMANENT COLOR - GROUP 1
Synonyms	None.
SDS number	30-21-0000279
Issue date	12-04-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards		
Flammable liquids	Category 3	H226 - Flammable liquid and vapor.
Health hazards		
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Skin sensitization	Category 1	H317 - May cause an allergic skin reaction.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary May be ignited by heat, sparks or flames. Causes serious eye damage. Causes skin irritation. May cause an allergic skin reaction. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-METHYLRESORCINOL, 4-AMINO-2-HYDROXYTOLUENE, 6-HYDROXYINDOLE, AMMONIUM THIOLACTATE, DECETH-3, GLYCERYL LAURYL ETHER, LAURETH-5 CARBOXYLIC ACID, M-AMINOPHENOL, P-AMINOPHENOL, TOLUENE-2,5-DIAMINE

Hazard pictograms

Signal word Danger

Hazard statements

H226	Flammable liquid and vapor.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P233	Keep container tightly closed.
P240	Ground and bond container and receiving equipment.
P241	Use explosion-proof electrical/ventilating/lighting equipment.
P242	Use non-sparking tools.
P243	Take action to prevent static discharges.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P272	Contaminated work clothing should not be allowed out of the workplace.
P273	Avoid release to the environment.
P280	Wear protective gloves/protective clothing/eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P303 + P361 + P353	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P333 + P313	If skin irritation or rash occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.
P370 + P378	In case of fire: Use appropriate media to extinguish.

Storage

P403 + P235	Store in a well-ventilated place. Keep cool.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 14,52% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 22,32% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Classification:	Acute Tox. 4;H302, Skin Sens. 1;H317, Eye Dam. 1;H318, Aquatic Chronic 2;H411				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Take off all contaminated clothing immediately. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed

Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

4.3. Indication of any immediate medical attention and special treatment needed

Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards

Flammable liquid and vapor.

5.1. Extinguishing media

Suitable extinguishing media

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media

Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures

In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.

Specific methods

Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders

Keep unnecessary personnel away. Wear appropriate protective equipment and clothing during clean-up. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions

Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up

Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools. Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.

Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. When using do not smoke. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Do not breathe vapor. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Keep away from heat, sparks and open flame. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep out of the reach of children. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1907 mg/m3
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	TWA	123 mg/m3
		25 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
ETHANOL (CAS 64-17-5)	VLE	9500 mg/m3
Regulatory status: Indicative limit (VL)		
		5000 ppm
Regulatory status: Indicative limit (VL)		
	VME	1900 mg/m3
Regulatory status: Indicative limit (VL)		
		1000 ppm
Regulatory status: Indicative limit (VL)		
HEXYLENE GLYCOL (CAS 107-41-5)	VLE	125 mg/m3
Regulatory status: Indicative limit (VL)		
		25 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
DIPROPYLENE GLYCOL (CAS 110-98-5)	TWA	100 mg/m3	Vapor and aerosol, inhalable fraction.
ETHANOL (CAS 64-17-5)	TWA	380 mg/m3	
		200 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	TWA	49 mg/m3	Vapor and aerosol.
		10 ppm	Vapor and aerosol.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
DIPROPYLENE GLYCOL (CAS 110-98-5)	AGW	100 mg/m3	Inhalable fraction.
ETHANOL (CAS 64-17-5)	AGW	380 mg/m3	
		200 ppm	

Italy. Occupational Exposure Limits

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	STEL	1000 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	10 mg/m3	Aerosol, inhalable.
		50 ppm	Vapor fraction
	TWA	25 ppm	Vapor fraction

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	100 mg/m3	Inhalable fraction and vapor.

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
	TWA	50 mg/m3	Inhalable fraction and vapor.
P-AMINOPHENOL (CAS 123-30-8)	TWA	5 mg/m3	Inhalable fraction.
PROPYLENE GLYCOL (CAS 57-55-6)	TWA	100 mg/m3	Inhalable fraction and vapor.

Spain. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1910 mg/m3
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	123 mg/m3
		25 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Explosion-proof general and local exhaust ventilation. Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

Environmental exposure controls Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 6,4 - 8,6

Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	118,4 °F (48,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	
Fire point	< 212,00 °F (< 100,00 °C) ISO 2592

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT DEMI-PERMANENT COLOR - GROUP 1

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
Aquatic			
Acute			
Algae		Pseudokirchneriella subcapitata	5,33 mg/l, 72 h EU C.3
Crustacea	EC50	Daphnia magna	11,12 mg/l, 48 h TG 202
Fish	LC50	Danio rerio	86,2 mg/l, 96 h EU C.1
2,4-DIAMINOPHENOXYETHANOL HCL (CAS 66422-95-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	36,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	7,4 mg/l, 48 h OECD 202
2-METHYLRESORCINOL (CAS 608-25-3)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	71 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,605 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	58,1 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	131 mg/l, 3 h OECD 209
4-AMINO-2-HYDROXYTOLUENE (CAS 2835-95-2)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	41 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	2,3 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	25 mg/l, 96 h OECD 236
Other	EC50	Activated sludge of a predominantly domestic sewage	> 150 mg/l, 3 h OECD 209

Components		Species	Test Results
Chronic			
Crustacea	NOEC	Daphnia magna	0,24 mg/l, 21 d OECD 211
6-HYDROXYINDOLE (CAS 2380-86-1)			
Acute			
Aquatic			
Acute			
Algae		Desmodesmus subspicatus	9,1 mg/l, 72 h
Crustacea	EC50	Daphnia magna	1,74 mg/l, 48 h
Fish	LC50	Danio rerio	21,7 mg/l, 96 h
Other	IC50	Activated sludge of a predominantly domestic sewage	> 0,9 mg/l, 3 d
AMMONIUM THIOLACTATE (CAS 13419-67-5)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	200 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	> 100 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	> 100 mg/l, 96 h OECD 203
DECETH-3 (CAS 67254-71-1)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	1,8 mg/l, 72 h 92/69/EWG
Crustacea	EC50	Daphnia magna	0,39 mg/l, 48 h 92/69/EWG
Fish	LC50	Cyprinus carpio	1,2 mg/l, 96 h EU C.1
Other	EC0	Activated sludge of a predominantly domestic sewage	140 mg/l, 3 h 88/302/EG
Chronic			
Crustacea	NOEC	Daphnia magna	<= 1 mg/l, 21 d
Fish	NOEC	Lepomis macrochirus	0,16 mg/l, 10 d
ETHANOL (CAS 64-17-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustacea	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h
Fish	LC50	Pimephales promelas	15300 mg/l, 96 h
Other	IC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h
Chronic			
Crustacea	NOEC	Daphnia magna	9,6 mg/l, 9 d
Fish	NOEC	Danio rerio	250 mg/l, 120 h OECD 212
GLYCERYL LAURYL ETHER (CAS 9022-75-7)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	1,11 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,875 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	1,61 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	31,6 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,036 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0,086 mg/l, 30 d OECD 210

Components		Species	Test Results
HEXYLENE GLYCOL (CAS 107-41-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 429 mg/l, 72 hours OECD 201
Crustacea	EC50	Daphnia magna	5410 mg/l, 48 hours OECD 202
Fish	LC50	Pimephales promelas	10700 mg/l, 96 hours OECD 203
Other	NOEC	Pseudomonas aeruginosa	200 mg/l, 10 days
LAURETH-5 CARBOXYLIC ACID (CAS 27306-90-7)			
Aquatic			
Acute			
Fish	LC50	Oncorhynchus mykiss	7,5 mg/l, 96 h
M-AMINOPHENOL (CAS 591-27-5)			
Acute			
Other	IC50	Tetrahymena pyriformis	361 mg/l, 40 h
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	62 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	1,1 mg/l, 48 h DIN 38412, Pt. 11
Fish	LC50	Danio rerio	82,64 mg/l, 96 h OECD 203
Chronic			
Crustacea	NOEC	Daphnia magna	0,05 mg/l, 21 d OECD 211
Fish	NOEC	Oryzias latipes	25 mg/l, 25 d OECD 204
P-AMINOPHENOL (CAS 123-30-8)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 0,253 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,182 mg/l, 48 h OECD 202
Fish	LC50	Oryzias latipes	0,82 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	29,9 mg/l, 3 h OECD 209
PEG-4 RAPESEEDAMIDE			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	410 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	3,8 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	2,9 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,39 mg/l, 21 d OECD 211
TOLUENE-2,5-DIAMINE (CAS 95-70-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	1,02 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,491 mg/l, 48 h OECD 202
Fish	LC50	Oryzias latipes	0,05 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	3,75 mg/l, 3 h OECD 209
Chronic			
Algae	NOEC	Pseudokirchneriella subcapitata	0,11 mg/l, 72 h OECD 201

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33,3 % EU C,4-E Result: Not readily biodegradable
2-METHYLRESORCINOL	64 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
4-AMINO-2-HYDROXYTOLUENE	0 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 28 d
6-HYDROXYINDOLE	Result: Not Biodegradable
AMMONIUM THIOLACTATE	14 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 28 d
DECETH-3	78 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
ETHANOL	84 % Result: Readily Biodegradable Test Duration: 20 d
GLYCERYL LAURYL ETHER	88 % OECD 301 B Result: Readily Biodegradable
HEXYLENE GLYCOL	81 % OECD 301 F Result: Readily biodegradable Test Duration: 28 d
LAURETH-5 CARBOXYLIC ACID	78 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
PEG-4 RAPESEEDAMIDE	96 % OECD 203 Result: Readily Biodegradable Test Duration: 28 d
TOLUENE-2,5-DIAMINE	17 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

4-AMINO-2-HYDROXYTOLUENE	-0,53 EU A,8 0,53 OECD 117
6-HYDROXYINDOLE	1,46 EU A,8
AMMONIUM THIOLACTATE	1,15 OECD 117
ETHANOL	-0,31
GLYCERYL LAURYL ETHER	3,79 - 4,25
M-AMINOPHENOL	0,21
P-AMINOPHENOL	0,25
PEG-4 RAPESEEDAMIDE	5
TOLUENE-2,5-DIAMINE	-0,321 OECD 107

Bioconcentration factor (BCF)

P-AMINOPHENOL	10 - 46 OECD 305 C

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. UN number	UN1170
14.2. UN proper shipping name	ETHANOL SOLUTION, Limited Quantity
14.3. Transport hazard class(es)	
Class	3
Label(s)	Limited Quantity
Hazard No. (ADR)	30
Tunnel restriction code	D/E
14.4. Packing group	III
14.5. Environmental hazards	No
14.6. Special precautions for user	Not available.
LTD QTY Net Inner Capacity	5.0 L

BULK

14.1. UN number	UN1170
14.2. UN proper shipping name	ETHANOL SOLUTION
14.3. Transport hazard class(es)	
Class	3
Label(s)	3
Hazard No. (ADR)	30
Tunnel restriction code	D/E
14.4. Packing group	III
14.5. Environmental hazards	No.
14.6. Special precautions for user	Not available.

IATA

FINISHED GOODS

14.1. UN number	ID8000
14.2. UN proper shipping name	CONSUMER COMMODITY
14.3. Transport hazard class(es)	
Class	9
Label(s)	Class 9, Limited Quantity
14.4. Packing group	Not applicable.
14.5. Environmental hazards	No.
ERG Code	9L
14.6. Special precautions for user	Not available.
Other information	
Passenger and cargo aircraft	Allowed with restrictions.
Cargo aircraft only	Allowed with restrictions.
LTD QTY Net Inner Capacity	0.5 L

BULK

14.1. UN number	UN1170
14.2. UN proper shipping name	ETHANOL SOLUTION
14.3. Transport hazard class(es)	
Class	3
14.4. Packing group	III
14.5. Environmental hazards	No.
ERG Code	3L
14.6. Special precautions for user	Not available.

Other information

Passenger and cargo aircraft	Allowed with restrictions.
Cargo aircraft only	Allowed with restrictions.

IMDG

FINISHED GOODS

14.1. UN number	UN1170
14.2. UN proper shipping name	ETHANOL SOLUTION, Limited Quantity
14.3. Transport hazard class(es)	
Class	3
Label(s)	Limited Quantity
14.4. Packing group	III
14.5. Environmental hazards	
Marine pollutant	No.
EmS	F-E, S-D
14.6. Special precautions for user	Not available.
LTD QTY Net Inner Capacity	5.0 L

BULK

14.1. UN number	UN1170
14.2. UN proper shipping name	ETHANOL SOLUTION
14.3. Transport hazard class(es)	
Class	3
14.4. Packing group	III
14.5. Environmental hazards	
Marine pollutant	No.
EmS	F-E, S-D
14.6. Special precautions for user	Not available.
14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

TOLUENE-2,5-DIAMINE (CAS 95-70-5)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
6-HYDROXYINDOLE (CAS 2380-86-1)
ETHANOL (CAS 64-17-5)
M-AMINOPHENOL (CAS 591-27-5)
P-AMINOPHENOL (CAS 123-30-8)
TOLUENE-2,5-DIAMINE (CAS 95-70-5)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H225 Highly flammable liquid and vapor. H290 May be corrosive to metals. H301 Toxic if swallowed. H302 Harmful if swallowed. H312 Harmful in contact with skin. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H335 May cause respiratory irritation. H341 Suspected of causing genetic defects. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT DEMI-PERMANENT COLOR - GRUPO 1**

Otros medios de identificación

Número de FDS 30-21-0000279

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos	Líquidos inflamables	Categoría 3
Peligros para la salud	Corrosión/irritación cutánea	Categoría 2
	Lesiones oculares graves/irritación ocular	Categoría 1
	Sensibilización, cutánea	Categoría 1

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Peligro

Declaración de peligro Líquidos y vapores inflamables. Provoca irritación cutánea. Puede provocar una reacción alérgica en la piel. Provoca lesiones oculares graves.

Consejos de prudencia

Prevención Mantener alejado de fuentes de calor, chispas, llama abierta o superficies calientes. - No fumar. Mantener el recipiente herméticamente cerrado. Conectar a tierra/enlace equipotencial del recipiente y del equipo de recepción. Utilizar un material eléctrico, de ventilación o de iluminación antideflagrante. Utilizar únicamente herramientas que no produzcan chispas. Tomar medidas de precaución contra descargas electrostáticas. Lavarse concienzudamente tras la manipulación. Las prendas de trabajo contaminadas no deben salir del lugar de trabajo. Llevar guantes protectores / protección ocular / protección facial.

Respuesta En caso de contacto con la piel (o el pelo): Quítense inmediatamente las prendas contaminadas. Aclárese la piel con agua o una ducha. En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. Llámese inmediatamente a un centro toxicológico o a un médico. En caso de irritación o erupción cutánea: Consultar a un médico. Quitar las prendas contaminadas y lavarlas antes de volver a usarlas. En caso de incendio: Utilizar medios apropiados para apagarlo.

Almacenamiento Almacenar en un lugar bien ventilado. Mantener en lugar fresco.

Eliminación Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)]	Ninguno conocido.
Información complementaria	Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
ETANOL		64-17-5	< 9
PEG-4 RAPESEEDAMIDE		85536-23-8	< 9
DECETH-3		66455-15-0	< 7
LAURETH-5 ACIDO CARBOXILICO		27306-90-7	< 5
GLYCERYL LAURYL ETHER		9022-75-7	≤ 7
HEXYLENE GLYCOL		107-41-5	≤ 3
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
TOLUENO -2,5-DIAMINA		95-70-5	< 2
OLEYL ALCOHOL		68002-94-8	< 2
4-AMINO-2-HYDROXYTOLUENE		2835-95-2	< 0.9
4-Aminofenol		123-30-8	< 0.7
M-AMINOFENOL		591-27-5	≤ 0.5
6-HIDROXI-INDOL		2380-86-1	< 0.2

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación	Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.
Contacto con la piel	Quítese inmediatamente la ropa contaminada y lávese la piel con agua y jabón. En caso de eczema u otras molestias cutáneas: acuda al médico y muéstrele esta ficha de datos de seguridad. Lavar las prendas contaminadas antes de volver a usarlas.
Contacto con los ojos	Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Conseguir atención médica inmediatamente.
Ingestión	Enjuagarse la boca. Obtenga atención médica en caso de síntomas.
Principales síntomas y efectos, agudos y retardados	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Podrían producirse daños oculares permanentes, incluso ceguera. Irritación de la piel. Puede causar enrojecimiento y dolor. Puede provocar una reacción alérgica en la piel. Dermatitis. Sarpullido.
Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Provea las medidas de apoyo generales y de tratamiento sintomático. En caso de quemaduras térmicas: Enjuáguese inmediatamente con agua. Bajo el chorro de agua corriente, quítese la ropa que no esté pegada a la piel. Llame a una ambulancia. Continúe enjuagándose durante el transporte. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.
Información general	Quítese inmediatamente la ropa contaminada. Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse. Lavar las prendas contaminadas antes de volver a usarlas.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO_2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	Los vapores pueden formar mezclas explosivas con el aire. Los vapores pueden desplazarse una distancia bastante larga hacia una fuente de ignición y dar lugar a retroceso de la llama. En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.

Equipo/Instrucciones para la extinción de incendios	En caso de incendio y/o de explosión no respire los humos. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Líquidos y vapores inflamables.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Eliminar todas las fuentes de ignición (no fumar, teas, chispas ni llamas en los alrededores). Use equipo y ropa de protección apropiados durante la limpieza. Avoid breathing mist/vapors. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Ventilar los espacios cerrados antes de entrar. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Mantenga los materiales combustibles (madera, papel, petróleo, etc.) lejos del material derramado. Tomar medidas de precaución contra descargas electrostáticas. Utilizar únicamente herramientas que no produzcan chispas. Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Usar un material no combustible como vermiculita, arena o tierra para absorber el producto y colocarlo en un recipiente para su eliminación posterior. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Absorba con tierra, arena y otro material no combustible y transfiera a recipientes para su posterior eliminación. Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	No manipule, almacene o abra cerca de llama abierta, fuentes de calor o fuentes de ignición. Proteja el material de la luz solar directa. No fumar durante su utilización. Ventilación de escape general y local a prueba de explosiones. Evítese la acumulación de cargas electroestáticas. Todo el equipo que se utiliza al manejar el producto debe estar conectado a tierra. Use herramientas que no produzcan chispas y un equipo a prueba de explosión. No poner este material en contacto con los ojos. Avoid breathing mist/vapors. Evítese el contacto con los ojos, la piel y la ropa. Evite la exposición prolongada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.
Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Guardar lejos del calor, las chispas o llamas desnudas. Guárdese en un lugar fresco y seco sin exposición a la luz solar directa. Almacenar en un recipiente herméticamente cerrado. Almacenar en un lugar bien ventilado. Manténgase fuera del alcance de los niños. Guardar en una zona equipada con extinctores automáticos. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Límites de exposición profesional

Los constituyentes siguientes son los únicos constituyentes del producto que tienen un PEL, TLV u otro límite de exposición recomendado. En este momento, los demás constituyentes no tienen límites de exposición conocidos.

EEUU. Administración de Seguridad y Salud Ocupacional (OSHA) Tabla Z-1 Límites para los contaminantes del aire (29 CFR 1910.1000)

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	Limite de Exposición Permisible (LEP)	1900 mg/m³
		1000 ppm

EE.UU. ACGIH Valores umbrales límite

Componentes	Tipo	Valor	Forma
ETANOL (CAS 64-17-5)	STEL	1000 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	10 mg/m³	Aerosol, inhalable.
		50 ppm	Fracción de vapor

EE.UU. ACGIH Valores umbrales límite

Componentes	Tipo	Valor	Forma
	TWA	25 ppm	Fracción de vapor

EEUU. Instituto Nacional para la Seguridad y Salud Ocupacional (NIOSH): Guía de bolsillo sobre riesgos químicos

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	TWA	1900 mg/m³
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	Valor techo	125 mg/m³
		25 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Componentes	Tipo	Valor
TOLUENO -2,5-DIAMINA (CAS 95-70-5)	TWA	0.025 mg/m³
		0.005 ppm

Valores límite biológicos No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.

Pautas de exposición

US WEEL Guides: Denominación de la piel

TOLUENO -2,5-DIAMINA (CAS 95-70-5) Absorción potencial a través de la piel.

Controles técnicos apropiados Ventilación de escape general y local a prueba de explosiones. Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación de lavados de ojos y ducha de emergencia.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara De aplicación solamente en entornos industriales. Use gafas de seguridad con cubiertas laterales y pantalla facial. Se recomienda el uso de caretas protectoras.

Protección de la piel

Protección de las manos De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros De aplicación solamente en entornos industriales. Use ropa adecuada resistente a los productos químicos. Se recomienda el uso de delantal impermeable.

Protección respiratoria De aplicación solamente en entornos industriales. Si los controles de ingeniería no mantienen las concentraciones en el aire por debajo de los límites de exposición recomendados (cuando proceda) o a un nivel aceptable (en países donde no se hayan establecido límites de exposición), ha de utilizarse un respirador aprobado.

Peligros térmicos Use ropa protectora térmica adecuada si resulta necesario.

Consideraciones generales de higiene No fumar durante su utilización. Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes. Las prendas de trabajo contaminadas no podrán sacarse del lugar de trabajo.

9. Propiedades físicas y químicas

Aspecto

Estado físico Líquido.

Color No disponible.

Olor No disponible.

Umbral olfativo No disponible.

pH 6.4 - 8.6

Punto de fusión/punto de congelación No disponible.

Punto inicial de ebullición e intervalo de ebullición > 100 °C (> 212 °F)

Punto de inflamación	48.0 °C (118.4 °F) Copa Cerrada
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No aplicable.

Límites superior/inferior de inflamabilidad o de explosividad

Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.

Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.

Solubilidad(es)

Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.

Información adicional

Propiedades explosivas	No es explosivo.
Punto de incendio	< 100.00 °C (< 212.00 °F) ISO 2592
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Evitar temperaturas por encima del punto de flash. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	La inhalación prolongada puede resultar nociva.
Contacto con la piel	Provoca irritación cutánea. Puede provocar una reacción alérgica en la piel.
Contacto con los ojos	Provoca lesiones oculares graves.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Podrían producirse daños oculares permanentes, incluso ceguera. Irritación de la piel. Puede causar enrojecimiento y dolor. Puede provocar una reacción alérgica en la piel. Dermatitis. Sarpullido.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Peligro por aspiración Debido a la falta total o parcial de datos, la clasificación no es posible.

Información adicional Puede causar reacciones alérgicas respiratorias y cutáneas. En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

GLYCERYL LAURYL ETHER	3.79 - 4.25
M-AMINOFENOL	0.21
PEG-4 RAPESEEDAMIDE	5
TOLUENO -2,5-DIAMINA	-0.321 OECD 107

Factor de bioconcentración

4-Aminofenol	10 - 46 OECD 305 C

Bioacumulación

4-Aminofenol	Resultado: La bioacumulación es improbable.
TOLUENO -2,5-DIAMINA	Resultado: La bioacumulación es improbable.

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Código de residuo peligroso Este producto es un residuo peligroso inflamable (D001) de acuerdo a RCRA cuando se intenta botar o destruir.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

Materials associated with this document meet the criteria for US Department of Transportation exemption found at 49 CFR 173.150(g).

Packages containing limited quantities of retail products in volumes in accordance with the tables listed below maybe offered under the conditions of the exemption.

US Domestic Transportation

Per 49 CFR 173.150(g) exemptions:

	>70% Ethyl Alcohol (v/v) (w/w)			
	Inner Packaging	Net Contents	Gross Weight	Marking
Liquids	8 fl. oz.	192 fl. oz.	65 lbs.	None
	≤70% Ethyl Alcohol (v/v) (w/w)			
Liquids (glass)	8 fl. oz.	192 fl. oz.	65 lbs.	None
	16 fl. oz.	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
Liquids (non-glass)	16 fl. oz.	192 fl. oz.	65 lbs.	None
	1 gallon	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
	General Conditions			
	Inner packagings must be secured and cushioned within the outer package to prevent breakage, leakage and movement.

2. Identification des dangers

Dangers physiques	Liquides inflammables	Catégorie 3
Dangers pour la santé	Corrosion cutanée/irritation cutanée	Catégorie 2
	Lésions oculaires graves/irritation oculaire	Catégorie 1
	Sensibilisation cutanée	Catégorie 1

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Liquide et vapeur inflammables. Provoque une irritation cutanée. Peut provoquer une allergie cutanée. Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Tenir à lécart de la chaleur/des étincelles/des flammes nues/des surfaces chaudes. - Ne pas fumer. Maintenir le récipient fermé de manière étanche. Mettre à la terre/masse le récipient et l'équipement de réception. Utiliser du matériel électrique/de ventilation/d'éclairage antidéflagrant. Utiliser d'outils ne produisant pas des étincelles. Prendre des mesures de précaution contre les décharges électrostatiques. Se laver soigneusement après manipulation. Il ne faut pas que les vêtements de travail contaminés quittent le lieu de travail. Porter des gants de protection/un équipement de protection des yeux/du visage.

Intervention En contact avec la peau (ou les cheveux) : Retirer immédiatement tous les vêtements contaminés. Rincer la peau avec de l'eau/sous une douche. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation ou d'éruption cutanée : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation. En cas d'incendie : utiliser un agent d'extinction approprié.

Stockage Stocker dans un endroit bien ventilé. Tenir au frais.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA)	Aucun(e) connu(e).
Information supplémentaire	Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
ÉTHANOL		64-17-5	< 9
PEG-4 RAPESEEDAMIDE		85536-23-8	< 9
DECETH-3		66455-15-0	< 7
LAURETH-5 ACIDE CARBOXYLIQUE		27306-90-7	< 5
GLYCERYL LAURYL ETHER		9022-75-7	≤ 7
GLYCOL DE HEXYLENE		107-41-5	≤ 3
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
TOLUÈNE -2,5-DIAMINE		95-70-5	< 2
Alcool oléylique		68002-94-8	< 2
4-AMINO-2-HYDROXYTOLUENE		2835-95-2	< 0.9
p-Aminophénol		123-30-8	< 0.7
M-AMINOPHÉNOL		591-27-5	≤ 0.5
6-HYDROXYINDOLE		2380-86-1	< 0.2

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.
Contact avec la peau	Enlever immédiatement les vêtements contaminés et laver la peau à l'eau et au savon. En cas d'eczéma ou d'autres problèmes cutanés : consulter un médecin et apporter cette fiche. Laver les vêtements contaminés avant réutilisation.
Contact avec les yeux	Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.
Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Brûlures thermiques : Rincer immédiatement avec de l'eau. Tout en rinçant, retirer les vêtements qui ne collent pas à la zone touchée. Appeler une ambulance. Continuer à rincer pendant le transport vers l'hôpital. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	Enlever immédiatement tous les vêtements contaminés. S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger. Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Les vapeurs peuvent former des mélanges explosifs avec l'air. Les vapeurs peuvent se déplacer sur une distance considérable jusqu'à une source d'ignition et provoquer un retour de flammes. Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	En cas d'incendie et/ou d'explosion ne pas respirer les fumées. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Liquide et vapeur inflammables.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Éliminer toutes les sources d'ignition (pas de cigarettes, de torches, d'étincelles ou de flammes dans la zone immédiate). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Éviter de respirer les brouillards/vapeurs. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. Ventiler les espaces clos avant d'y entrer. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Prendre des mesures de précaution contre les décharges électrostatiques. Utiliser d'outils ne produisant pas des étincelles. Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Utiliser un matériau non combustible comme la vermiculite, le sable ou la terre pour absorber le produit et le mettre dans un récipient pour élimination ultérieure. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Absorber avec de la terre, du sable ou une autre matière non combustible et transférer dans des contenants pour une élimination ultérieure. Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Ne pas manipuler, stocker ou ouvrir près d'une flamme nue, d'une source de chaleur ou d'autres sources d'ignition. Protéger le produit du rayonnement solaire direct. Ne pas fumer pendant l'utilisation. Ventilation par aspiration antidéflagrante locale et générale. Prendre des mesures de précaution contre les décharges électrostatiques. Tout matériel utilisé pour la manutention de ce produit doit être mis à la terre. Utiliser d'outils ne produisant pas d'étincelles et du matériel antidéflagrant. Éviter tout contact de ce produit avec les yeux. Éviter de respirer les brouillards/vapeurs. Éviter tout contact avec les yeux, la peau et les vêtements. Éviter une exposition prolongée. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Tenir à l'écart de la chaleur, des étincelles et des flammes nues. Stocker dans un endroit frais et sec, à l'écart de la lumière solaire directe. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Tenir hors de la portée des enfants. Conserver dans un endroit muni de gicleurs. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	PEL (limite d'exposition admissible)	1900 mg/m3
		1000 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur	Forme
ÉTHANOL (CAS 64-17-5)	STEL	1000 ppm	
GLYCOL DE HEXYLENE (CAS 107-41-5)	STEL	10 mg/m3	Aérosol, inhalable.
		50 ppm	Fraction vapeur

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur	Forme
	TWA	25 ppm	Fraction vapeur

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm
GLYCOL DE HEXYLENE (CAS 107-41-5)	Plafond	125 mg/m3
		25 ppm

États-Unis. Guides WEEL (niveau d'exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
TOLUÈNE -2,5-DIAMINE (CAS 95-70-5)	TWA	0.025 mg/m3
		0.005 ppm

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Directives au sujet de l'exposition

États-Unis - Guides WEEL : Désignation cutanée

TOLUÈNE -2,5-DIAMINE (CAS 95-70-5) Peut être absorbé par la peau.

Contrôles d'ingénierie appropriés Ventilation par aspiration antidéflagrante locale et générale. Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial. Un écran facial est recommandé.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques Il est recommandé d'utiliser un tablier imperméable.

Protection respiratoire Pour usage industriel seulement. Si les contrôles d'ingénierie ne maintiennent pas les concentrations atmosphériques sous les limites d'exposition recommandées (lorsqu'il y a lieu) ou à un taux acceptable (dans les pays où des limites d'exposition n'ont pas été établies), un respirateur homologué doit être porté

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Couleur Non disponible.

Odeur Non disponible.

Seuil olfactif Non disponible.

pH 6.4 - 8.6

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 100 °C (> 212 °F)

Point d’éclair	48.0 °C (118.4 °F) Coupelle fermée
Taux d’évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d’inflammabilité ou d’explosibilité	
Limites d’inflammabilité - inférieure (%)	Non disponible.
Limites d’inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d’auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Point de feu	< 100.00 °C (< 212.00 °F) ISO 2592
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d’utilisation, d’entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d’utilisation.
Conditions à éviter	Tenir à l’écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d’ignition. Éviter les températures supérieures au point d’éclair. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée. Peut provoquer une allergie cutanée.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d’ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs. Peut provoquer une allergie cutanée. Dermatite. Éruption.

Renseignements sur les effets toxicologiques

Toxicité aiguë	Inconnu(e).

DECETH-3	OCDE 406, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: Non Sensibilisant Espèces: Cobaye
4-AMINO-2-HYDROXYTOLUENE	OCDE 429 Résultat: Sensibilisant Espèces: Souris
6-HYDROXYINDOLE	OCDE 429 Résultat: Sensibilisant Espèces: Souris
M-AMINOPHÉNOL	OCDE 429 Résultat: Sensibilisant Espèces: Souris
TOLUÈNE -2,5-DIAMINE	OCDE 429 Résultat: Sensibilisant Espèces: Souris
Alcool oléylique	Résultat: Non Sensibilisant Espèces: Lapin

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

Alcool oléylique	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.
ÉTHANOL	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.
PEG-4 RAPESEEDAMIDE	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.
4-AMINO-2-HYDROXYTOLUENE	Résultat: In vitro tests showed mutagenic effects which were not observed with in vivo tests.
6-HYDROXYINDOLE	Résultat: In vitro tests showed mutagenic effects which were not observed with in vivo tests.
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
DECETH-3	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
GLYCERYL LAURYL ETHER	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
GLYCOL DE HEXYLENE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
LAURETH-5 ACIDE CARBOXYLIQUE	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes
M-AMINOPHÉNOL	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
TOLUÈNE -2,5-DIAMINE	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.
p-Aminophénol	Résultat: Les tests in vivo ont montré des effets mutagènes

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

TOLUÈNE -2,5-DIAMINE (CAS 95-70-5) 3 Inclassable quant à sa cancérogénicité pour l'homme.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction Danger possible pour la reproduction.

Effets sur le développement

ÉTHANOL	> 20000 ppm OCDE 414, Pas d'effets sur le développement Résultat: DSENO Espèces: Rat
M-AMINOPHÉNOL	100 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations Peut provoquer des allergies respiratoires et cutanées. La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

M-AMINOPHÉNOL	0.21
p-Aminophénol	0.25
PEG-4 RAPESEEDAMIDE	5
TOLUÈNE -2,5-DIAMINE	-0.321 OECD 107

Facteur de bioconcentration

p-Aminophénol	10 - 46 OECD 305 C

Bioaccumulation

p-Aminophénol	Résultat: Une bioaccumulation est peu probable.
TOLUÈNE -2,5-DIAMINE	Résultat: Une bioaccumulation est peu probable.

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Code des déchets dangereux Ce produit est inflammable (D001), utilisez le RCRA matières dangereuses lors de l'élimination.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

Materials associated with this document meet the criteria for US Department of Transportation exemption found at 49 CFR 173.150(g).

Packages containing limited quantities of retail products in volumes in accordance with the tables listed below maybe offered under the conditions of the exemption.

US Domestic Transportation

Per 49 CFR 173.150(g) exemptions:

	>70% Ethyl Alcohol (v/v) (w/w)			
	Inner Packaging	Net Contents	Gross Weight	Marking
Liquids	8 fl. oz.	192 fl. oz.	65 lbs.	None
	≤70% Ethyl Alcohol (v/v) (w/w)			
Liquids (glass)	8 fl. oz.	192 fl. oz.	65 lbs.	None
	16 fl. oz.	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
Liquids (non-glass)	16 fl. oz.	192 fl. oz.	65 lbs.	None
	1 gallon	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
	General Conditions			
	Inner packagings must be secured and cushioned within the outer package to prevent breakage, leakage and movement.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

ÉTHANOL (CAS 64-17-5)	Inscrit.
TOLUÈNE -2,5-DIAMINE (CAS 95-70-5)	Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Dénomination chimique	Numéro d'enregistreme	% en poids.
TOLUÈNE -2,5-DIAMINE	95-70-5	< 2

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

ÉTHANOL (CAS 64-17-5) Faible priorité

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication 04-Décembre-2020

Version n° 01

Classements NFPA Santé: 3
Inflammabilité: 2
Instabilité: 0

Avis de non-responsabilité À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT DEMI-PERMANENT COLOR - GRUPPO 1
Sinonimi	Nessuno.
Numero SDS	30-21-0000279
Data di pubblicazione	11-Maggio-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli fisici		
Liquidi infiammabili	Categoria 3	H226 - Liquido e vapori infiammabili.
Pericoli per la salute		
Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.
Sensibilizzazione cutanea	Categoria 1	H317 - Può provocare una reazione allergica cutanea.
Pericoli per l'ambiente		
Pericoloso per l'ambiente acquatico, pericolo acquatico a lungo termine	Categoria 3	H412 - Nocivo per gli organismi acquatici con effetti di lunga durata.

Riepilogo dei pericoli

Può essere acceso con calore, scintilla o fiamma. Provoca gravi lesioni oculari. Provoca irritazione cutanea. Può provocare una reazione allergica cutanea. Pericoloso per l'ambiente se scaricato nei corsi d'acqua. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene:

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE, 2,4-DIAMINOPHENOXYETHANOL HCL, 2-METHYLRESORCINOL, 4-AMINO-2-HYDROXYTOLUENE, 4-Aminofenolo, 6-IDROSSIINDOLO, AMMONIUM THIOLACTATE, DECETH-3, GLYCERYL LAURYL ETHER, LAURETH-5 ACIDO CARBOSSILICO, M-AMINOFENOLO, TOLUENE-2,5-DIAMMINA

Pittogrammi di pericolo

Avvertenza

Pericolo

Indicazioni di pericolo

H226	Liquido e vapori infiammabili.
H315	Provoca irritazione cutanea.
H317	Può provocare una reazione allergica cutanea.
H318	Provoca gravi lesioni oculari.
H412	Nocivo per gli organismi acquatici con effetti di lunga durata.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P210	Tenere lontano da fonti di calore, superfici calde, scintille, fiamme libere o altre fonti di accensione. Non fumare.
P233	Tenere il recipiente ben chiuso.
P240	Mettere a terra e a massa il contenitore e il dispositivo ricevente.
P241	Utilizzare impianti elettrici/di ventilazione/d'illuminazione a prova di esplosione.
P242	Utilizzare utensili antiscintillamento.
P243	Fare in modo di prevenire le scariche elettrostatiche.
P260	Non respirare il vapore.
P264	Lavare attentamente dopo l'uso.
P272	Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
P273	Non disperdere nell'ambiente.
P280	Indossare guanti/indumenti protettivi/Proteggere gli occhi/il viso.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P303 + P361 + P353	IN CASO DI CONTATTO CON LA PELLE (o con i capelli): Togliere immediatamente tutti gli indumenti contaminati. Sciacquare la pelle.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P333 + P313	In caso di irritazione o eruzione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.
P370 + P378	In caso di incendio: estinguere con mezzi adeguati.

Immagazzinamento

P403 + P235	Conservare in luogo fresco e ben ventilato.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette

La miscela contiene il 14,52 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico.
La miscela contiene il 22,32 % di componenti di cui è ignoto il pericolo a lungo termine per l'ambiente acquatico.

2.3. Altri pericoli

Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Informazioni generali

Denominazione chimica	%	Numero CAS / Numero CE	Numero di registrazione REACH	Numero della sostanza	Note

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Togliere immediatamente tutti gli indumenti contaminati. Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi.
Lavare gli indumenti contaminati prima di indossarli nuovamente.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea Togliere immediatamente gli indumenti contaminati e lavare la pelle con acqua e sapone. In caso di eczema o altri disturbi alla pelle: consultare un medico e portare con sé queste istruzioni. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Ustioni: sciacquare immediatamente con acqua. Continuando a sciacquare, togliere di dosso gli indumenti che non sono attaccati alla pelle lesa. Chiamare un'ambulanza e continuare a sciacquare durante il trasporto in ospedale. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio Liquido e vapori infiammabili.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO2).

Mezzi di estinzione non idonei Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela Essi possono formare miscele explosive con l'aria. I vapori possono percorrere distanze notevoli dalla fonte di incendio e ritornare. In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi In caso d'incendio indossare autorespiratore e indumenti protettivi completi.

Procedure speciali per l'estinzione degli incendi In caso d'incendio e/o esplosione non respirare i fumi. Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.

Metodi specifici Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Eliminare tutte le fonti di accensione (non fumare, evitare scintille, razzi, torce o fiamme nelle aree circostanti). Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Ventilare gli spazi chiusi prima di entrare. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.

Per chi interviene direttamente Allontanare il personale non necessario. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS

6.2. Precauzioni ambientali Non disperdere nell'ambiente. Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente. Evitare sversamenti o perdite supplementari, se questo può essere fatto senza pericolo. Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.

6.3. Metodi e materiali per il contenimento e per la bonifica

Tenere i materiali combustibili (legno, carta, olio, ecc.) lontano dal materiale fuoriuscito. Prendere precauzioni contro le scariche elettrostatiche. Utilizzare solo utensili antiscintillamento. Non scaricare il prodotto nelle fogne.

Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Utilizzare un materiale non combustibile (ad esempio vermiculite, sabbia o terra) per assorbire il prodotto e riporlo in un contenitore per il successivo smaltimento. Una volta recuperato il prodotto, sciacquare l'area con acqua.

Versamenti di piccole dimensioni: Assorbire/raccogliere con terra, sabbia o altro materiale non infiammabile e trasferire in contenitori per il successivo smaltimento. Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua.

Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo

6.4. Riferimento ad altre sezioni

Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura

Non maneggiare, stoccare o aprire in prossimità di fiamme libere, fonti di calore o accensione. Proteggere il materiale dalla luce diretta. Non fumare durante l'impiego. Ventilazione di scarico localizzata e generale a prova di esplosione Evitare l'accumulo di cariche elettrostatiche. Tutte le apparecchiature usate durante la manipolazione del prodotto devono essere adeguatamente messe a terra. Usare strumenti che non generano scintille e apparecchiature a prova di esplosione. Non respirare il vapore. Non permettere che questo materiale vada a contatto con gli occhi. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Indossare attrezzature di protezione personale adeguate. Non disperdere nell'ambiente. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità

Conservare lontano da calore, scintille e fiamme libere. Conservare in un luogo fresco e asciutto, lontano dalla luce diretta del sole. Conservare in un recipiente ermeticamente chiuso. Conservare in luogo ben ventilato. Conservare fuori della portata dei bambini. Tenere in un'area provvista di sistemi antincendio sprinkler. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari

Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore	Forma
ETANOLO (CAS 64-17-5)	Breve termine	1000 ppm	
METIL-2,4-PENTANDIOLO (CAS 107-41-5)	8 ore	25 ppm	Frazione di vapore
	Breve termine	10 mg/m3	Aerosol, inhalable.
		50 ppm	Frazione di vapore

Valori limite biologici

Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate

Seguire le procedure standard di monitoraggio.

Livelli derivati senza effetto (DNEL)

Non conosciuto.

Prevedibili concentrazioni prive di effetti (PNEC)

Non conosciuto.

8.2. Controlli dell'esposizione

Controlli tecnici idonei

Ventilazione di scarico localizzata e generale a prova di esplosione È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali

Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.

Protezione degli occhi/del volto

Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura). Si raccomanda l'uso di una visiera protettiva.

Protezione della pelle	
- Protezione delle mani	Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.
- Altro	Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici. Si consiglia di utilizzare un grembiule impenetrabile.
Protezione respiratoria	Applicabile soltanto per gli impianti industriali. Se i controlli ingegneristici non mantengono le concentrazioni di polveri emesse nell'aria sotto i limiti di esposizione consigliati (se possibile) o sotto un livello accettabile (nei paesi in cui i limiti di esposizione non sono stati definiti), occorre un respiratore approvato.
Pericoli termici	Indossare opportuni indumenti termoprotettivi, quando necessario.
Misure d'igiene	Non fumare durante l'impiego. Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti. Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
Controlli dell'esposizione ambientale	Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto	
Stato fisico	Liquido.
Forma	Non conosciuto.
Colore	Non conosciuto.
Odore	Non conosciuto.
Soglia olfattiva	Non conosciuto.
pH	6,4 - 8,6
Punto di fusione/punto di congelamento	Non conosciuto.
Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	48,0 °C (118,4 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.
Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	
Punto incendio	< 100,00 °C (< 212,00 °F) ISO 2592

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.

10.3. Possibilità di reazioni pericolose Non si conosce nessuna reazione pericolosa se usato in condizioni normali.

10.4. Condizioni da evitare Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Evitare temperature superiori al punto di infiammabilità. Contatto con materiali non compatibili.

10.5. Materiali incompatibili Forti agenti ossidanti.

10.6. Prodotti di decomposizione pericolosi Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.

Informazioni sulle vie probabili di esposizione

Inalazione L'inalazione prolungata può essere nociva.

Cutanea Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.

Contatto con gli occhi Provoca gravi lesioni oculari.

Ingestione In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.

Sintomi Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.) Può provocare una reazione allergica cutanea. Dermatiti. Sfogo.

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta Non conosciuto.

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.

12.7. Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).

Imballaggi contaminati Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.

Codice Europeo dei Rifiuti Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.

Metodi di smaltimento/informazioni Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Impedire a questo prodotto di penetrare nelle fogne e nelle riserve d'acqua. Non contaminare stagni, canali o fossati con il prodotto chimico o il contenitore usato. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Precauzioni particolari Smaltire secondo le norme applicabili.

Regolamento (CE) n. 1907/2006, REACH, Articolo 59(10), Elenco di sostanze candidate così come attualmente pubblicato dall'Agenzia europea per le sostanze chimiche (ECHA)

Non listato.

Autorizzazioni

Regolamento (CE) n. 1907/2006, REACH Allegato XIV - Sostanze soggette ad autorizzazione, modificata

Non listato.

Restrizioni d'uso

Regolamento (CE) n. 1907/2006, REACH Allegato XVII, Sostanze soggette a restrizioni in materia di immissione sul mercato e di uso e successivi adeguamenti

TOLUENE-2,5-DIAMMINA (CAS 95-70-5)

Direttiva 2004/37/CE: sulla protezione dei lavoratori contro i rischi derivanti da un'esposizione ad agenti cancerogeni e mutageni durante il lavoro e successive modifiche

Non listato.

Altri regolamenti UE

Direttiva 2012/18/UE sugli incidenti rilevanti connessi con determinate sostanze pericolose e successive modifiche

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)
4-Aminofenolo (CAS 123-30-8)
6-IDROSSIINDOLO (CAS 2380-86-1)
ETANOLO (CAS 64-17-5)
M-AMINOFENOLO (CAS 591-27-5)
TOLUENE-2,5-DIAMMINA (CAS 95-70-5)

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H225 Liquido e vapori facilmente infiammabili. H290 Può essere corrosivo per i metalli. H301 Tossico se ingerito. H302 Nocivo se ingerito. H312 Nocivo per contatto con la pelle.

H314 Provoca gravi ustioni cutanee e gravi lesioni oculari.
H315 Provoca irritazione cutanea.
H317 Può provocare una reazione allergica cutanea.
H318 Provoca gravi lesioni oculari.
H319 Provoca grave irritazione oculare.
H332 Nocivo se inalato.
H335 Può irritare le vie respiratorie.
H341 Sospettato di provocare alterazioni genetiche.
H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta.
H400 Molto tossico per gli organismi acquatici.
H410 Molto tossico per gli organismi acquatici con effetti di lunga durata.
H411 Tossico per gli organismi acquatici con effetti di lunga durata.
H412 Nocivo per gli organismi acquatici con effetti di lunga durata.

Informazioni di revisione

Prodotto e la Società Identificazione: Tipi di materiale

16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险	易燃液体	类别 3
健康危害	皮肤腐蚀/刺激	类别 2
	严重眼睛损伤/眼睛刺激性	类别 1
	皮肤过敏	类别 1

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 易燃液体和蒸气。 造成皮肤刺激。 可能造成皮肤过敏反应。 造成严重眼损伤。

防范说明

预防措施 远离热源/火花/明火/热表面。- 禁止吸烟。 保持容器密闭。 容器和接收设备接地/等势联接。 使用防爆的电气/通风照明/设备。 只能使用不产生火花的工具。 采取防止静电放电的措施。 作业后彻底清洗。 受沾染的工作服不得带出工作场地。 戴防护手套/防护眼罩/防护面具。

事故响应 如皮肤(或头发)沾染：立即去除/脱掉所有沾染的衣服。用水清洗皮肤/淋浴。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。 如发生皮肤刺激或皮疹：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。 火灾时：使用适当的介质灭火。

安全储存 存放在通风良好的地方。保持低温。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
乙醇		64-17-5	< 9
PEG-4 RAPESEEDAMIDE		85536-23-8	< 9

化学名称	通用名称和别名	登记号(CAS号)	%
DECETH-3		66455-15-0	< 7
LAURETH-5 羧酸		27306-90-7	< 5
GLYCERYL LAURYL ETHER		9022-75-7	≤ 7
己二醇		107-41-5	≤ 3
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE		155601-30-2	< 2
甲苯 -2,5-二胺		95-70-5	< 2
OLEYL ALCOHOL		68002-94-8	< 2
4-AMINO-2-HYDROXYTOLUENE		2835-95-2	< 0.9
P-AMINOPHENOL		123-30-8	< 0.7
M-AMINOPHENOL		591-27-5	≤ 0.5
6-HYDROXYINDOLE		2380-86-1	< 0.2

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入
移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触
立即脱掉受污染的衣服，用肥皂水冲洗皮肤。 若出现湿疹或其它皮肤疾病：就医治疗，并带上本说明书。 沾染的衣服清洗后方可重新使用。

眼睛接触
立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即就医。

经口
漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性
严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

指明任何需要立即就医或特殊治疗的情况
提供一般支持措施，并根据症状进行治疗。 烧伤：立即用水冲洗。冲洗时脱掉没有粘住烧伤部位的衣服。呼叫救护车。在送往医院的途中需继续冲洗烧伤部位。 观察患者。 症状可能会延后发生。

一般信息
立即脱掉所有污染的衣服。 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。 沾染的衣服清洗后方可重新使用。

5. 消防措施

合适的灭火剂
水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质
禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害
蒸汽可能与空气形成爆炸性的混合物。 蒸气可能飘散一定距离接触点火源并导致回闪。 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施
发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明
一旦发生火灾和/或爆炸，不得吸入烟气。 在不会发生危险的情况下将容器撤离火灾现场。

特定的方法
采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险
易燃液体和蒸气。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序
让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 消除所有的点火源（在邻近区域严禁吸烟、火苗、火花或火焰）。 清洁时，戴合适防护设备和衣物。 Avoid breathing mist/vapors. 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 进入封闭空间前先通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料
使可燃物（木材、纸张、油等）远离泄漏物。 采取防止静电放电的措施。 只能使用不产生火花的工具。

大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 使用如蛭石、沙或土等非可燃性材料来吸收产品，并放入容器中以便之后进行处理。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用泥土、沙子或其它不燃材料吸收，并转移到容器内待以后处置。 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施
防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项

禁止在明火、热源或点火源附近操作、存放或打开。保护物料免受阳光直接照射。 使用时严禁吸烟。 防爆型全面通风和局部通风。 对静电采取预防措施。 在操作处置产品时，使用的所有设备必须接地。 使用不产生火花的工具和防爆设备。 不得让本材料接触眼睛。 Avoid breathing mist/vapors. 避免接触眼睛、皮肤和衣物。 避免长期暴露。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物

远离热源、火花和明火。 储存于阴凉、干燥的场所，远离直接日光光照。 储存在密闭的容器中。 存放在通风良好的地方。 避免儿童触及。 保存在装备有喷淋设备的地方。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
乙醇 (CAS 64-17-5)	PEL-常期暴露极限	1900 mg/m3
		1000 ppm

美国ACGIH阈限值

组分	类型	标准值	形状
乙醇 (CAS 64-17-5)	短期暴露极限（STEL）	1000 ppm	
己二醇 (CAS 107-41-5)	TWA	25 ppm	蒸汽馏分
	短期暴露极限（STEL）	10 mg/m3	气溶胶 , inhalable.
		50 ppm	蒸汽馏分

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
乙醇 (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm
己二醇 (CAS 107-41-5)	Ceiling	125 mg/m3
		25 ppm

美国工作场所环境暴露水平（WEEL）指南

组分	类型	标准值
甲苯 -2,5-二胺 (CAS 95-70-5)	TWA	0.025 mg/m3
		0.005 ppm

生物限值

没有该成分的生物接触限值。

暴露指南

US WEEL Guides: 皮肤标示

甲苯 -2,5-二胺 (CAS 95-70-5) 可经完整的皮肤吸收

适当的技术控制

防爆型全面通风和局部通风。 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼和安全淋浴设施。

个人防护措施，如个人防护设备

眼/面保护

仅用於工业环境。 佩戴带侧边的安全眼镜（护目镜）和面罩。 建议穿戴面罩。

皮肤防护

手防护

仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它

仅用於工业环境。 穿上合适的化学防护衣。 建议使用不渗透的围裙。

呼吸系统防护

仅用於工业环境。 如果工程工致措施不能维持空气中的浓度低于推荐的接触限值（如建立）或可接受的水平（未建立接触限值的国家），必须佩戴许可的呼吸器。

热危害

必要时，穿戴适当的热防护服。

一般的卫生考虑

使用时严禁吸烟。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。 受沾染的工作服不得带出工作场地。

9. 理化特性

外观

性状	液体。
颜色	无资料。
气味	无资料。
气味阈值	无资料。
pH 值	6.4 - 8.6
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	48.0 ° C (118.4 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
燃点	< 100.00 ° C (< 212.00 ° F) ISO 2592
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 避免温度超過閃火點温度。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	造成皮肤刺激。 可能造成皮肤过敏反应。
眼睛接触	造成严重眼损伤。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。 可能造成皮肤过敏反应。 皮炎。 皮疹.

M-AMINOPHENOL	OECD 405 结果: 非刺激性 物种: 兔子

刺激性腐蚀性 - 眼睛

4-AMINO-2-HYDROXYTOLUENE	OECD 492 结果: 非刺激性 物种: RhCE
己二醇	结果: 刺激性的 物种: 人类
GLYCERYL LAURYL ETHER	结果: 腐蚀性的
DECETH-3	结果: 腐蚀性的 物种: 兔子
OLEYL ALCOHOL	结果: 非刺激性 物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 可能造成皮肤过敏反应。

皮肤致敏物

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	EU Method B.6 - 催化剂 1 结果: 致敏 物种: 豚鼠
GLYCERYL LAURYL ETHER	OECD 406 结果: Not Sensitizing 物种: 豚鼠
LAURETH-5 羧酸	OECD 406 结果: Not Sensitizing 物种: 豚鼠
PEG-4 RAPESEEDAMIDE	OECD 406 结果: Not Sensitizing 物种: 豚鼠
乙醇	OECD 406 结果: Not Sensitizing 物种: 豚鼠
己二醇	OECD 406 结果: Not Sensitizing 物种: 豚鼠
P-AMINOPHENOL	OECD 406 结果: 致敏 物种: 豚鼠
DECETH-3	OECD 406, 根据结构相似材料的试验数据。 结果: Not Sensitizing 物种: 豚鼠
4-AMINO-2-HYDROXYTOLUENE	OECD 429 结果: 致敏 物种: 小鼠
6-HYDROXYINDOLE	OECD 429 结果: 致敏 物种: 小鼠
M-AMINOPHENOL	OECD 429 结果: 致敏 物种: 小鼠
甲苯 -2,5-二胺	OECD 429 结果: 致敏 物种: 小鼠
OLEYL ALCOHOL	结果: Not Sensitizing 物种: 兔子

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

4-AMINO-2-HYDROXYTOLUENE	结果: In vitro tests showed mutagenic effects which were not observed with in vivo tests.
6-HYDROXYINDOLE	结果: In vitro tests showed mutagenic effects which were not observed with in vivo tests.
OLEYL ALCOHOL	结果: 体外和体内试验均未见致突变作用。
PEG-4 RAPESEEDAMIDE	结果: 体外和体内试验均未见致突变作用。
乙醇	结果: 体外和体内试验均未见致突变作用。
P-AMINOPHENOL	结果: 活体试验表明有诱变效应
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	结果: 离体试验未见诱变效应
DECETH-3	结果: 离体试验未见诱变效应

突变性

GLYCERYL LAURYL ETHER	结果: 离体试验未见诱变效应
LAURETH-5 羧酸	结果: 离体试验未见诱变效应
己二醇	结果: 离体试验未见诱变效应
M-AMINOPHENOL	结果: 离体试验表明有在活体试验中未观察到的诱变效应。
甲苯 -2,5-二胺	结果: 离体试验表明有在活体试验中未观察到的诱变效应。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

甲苯 -2,5-二胺 (CAS 95-70-5)	3 尚不能确定对人有致癌作用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 是可能的生殖系统危害物。

发育效应

乙醇	> 20000 ppm OECD 414, 对发展没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

己二醇	450 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 可能造成皮肤和呼吸过敏性反应。 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE (CAS 155601-30-2)			
水生的			
急性的			
甲壳纲动物	EC50	水蚤	11.12 mg/l, 48 h TG 202
藻类		近头状伪蹄形藻	5.33 mg/l, 72 h EU C.3
鱼	LC50	斑马鱼 (Danio rerio)	86.2 mg/l, 96 h EU C.1
4-AMINO-2-HYDROXYTOLUENE (CAS 2835-95-2)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	> 150 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	2.3 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	41 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	25 mg/l, 96 h OECD 236
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.24 mg/l, 21 D OECD 211
6-HYDROXYINDOLE (CAS 2380-86-1)			
急性的			
水生的			
急性的			
其它的, 其它	IC50	以国内污水为主的活性污泥	> 0.9 mg/l, 3 D
甲壳纲动物	EC50	水蚤	1.74 mg/l, 48 h
藻类		Desmodesmus subspicatus	9.1 mg/l, 72 h
鱼	LC50	斑马鱼 (Danio rerio)	21.7 mg/l, 96 h
DECETH-3 (CAS 66455-15-0)			
水生的			
急性的			
其它的, 其它	EC0	以国内污水为主的活性污泥	140 mg/l, 3 h 88/302/EG
甲壳纲动物	EC50	水蚤	0.39 mg/l, 48 h 92/69/EWG
藻类	EC50	Desmodesmus subspicatus	1.8 mg/l, 72 h 92/69/EWG
鱼	LC50	鲤鱼	1.2 mg/l, 96 h EU C.1
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	<= 1 mg/l, 21 D
鱼	无明显反应浓度（NOEC）	蓝鳃太阳鱼	0.16 mg/l, 10 D
GLYCERYL LAURYL ETHER (CAS 9022-75-7)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	31.6 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.875 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	1.11 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	1.61 mg/l, 96 h OECD 203
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.036 mg/l, 21 D OECD 211
鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	0.086 mg/l, 30 D OECD 210

组分		物种	试验结果
LAURETH-5 羧酸 (CAS 27306-90-7)			
水生的			
急性的			
鱼	LC50	虹鳟鱼	7.5 mg/l, 96 h
M-AMINOPHENOL (CAS 591-27-5)			
急性的			
其它的, 其它	IC50	Tetrahymena pyriformis	361 mg/l, 40 h
水生的			
急性的			
甲壳纲动物	EC50	水蚤	1.1 mg/l, 48 h DIN38412, Pt. 11
藻类	EC50	近头状伪蹄形藻	62 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	82.64 mg/l, 96 h OECD 203
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.05 mg/l, 21 D OECD 211
鱼	无明显反应浓度（NOEC）	Oryzias latipes	25 mg/l, 25 D OECD 204
OLEYL ALCOHOL (CAS 68002-94-8)			
水生的			
急性的			
藻类	EC50	藻类	250 mg/l OECD 201
鱼	LC50	鱼	> 1000 mg/l OECD 203
P-AMINOPHENOL (CAS 123-30-8)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	29.9 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.182 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	> 0.253 mg/l, 72 h OECD 201
鱼	LC50	Oryzias latipes	0.82 mg/l, 96 h OECD 203
PEG-4 RAPESEEDAMIDE (CAS 85536-23-8)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	> 1000 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	3.8 mg/l, 48 h OECD 202
藻类	EC50	Desmodesmus subspicatus	410 mg/l, 72 h OECD 201
鱼	LC50	虹鳟鱼	2.9 mg/l, 96 h OECD 203
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.39 mg/l, 21 D OECD 211
乙醇 (CAS 64-17-5)			
水生的			
急性的			
其它的, 其它	IC50	以国内污水为主的活性污泥	> 1000 mg/l, 3 h
甲壳纲动物	EC50	网纹水蚤	5012 mg/l, 48 h
藻类	EC50	近头状伪蹄形藻	22200 mg/l, 96 h
鱼	LC50	呆鲦鱼	15300 mg/l, 96 h
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	9.6 mg/l, 9 D

组分		物种	试验结果
鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	250 mg/l, 120 h OECD 212

己二醇 (CAS 107-41-5)

水生的

急性的

其它的, 其它	无明显反应浓度（NOEC）	Pseudomonas aeruginosa	200 mg/l, 10 天
甲壳纲动物	EC50	水蚤	5410 mg/l, 48 小时 OECD 202
藻类	EC50	近头状伪蹄形藻	> 429 mg/l, 72 小时 OECD 201
鱼	LC50	呆鲦鱼	10700 mg/l, 96 小时 OECD 203

甲苯 -2,5-二胺 (CAS 95-70-5)

水生的

急性的

其它的, 其它	EC50	以国内污水为主的活性污泥	3.75 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.491 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	1.02 mg/l, 72 h OECD 201
鱼	LC50	Oryzias latipes	0.05 mg/l, 96 h OECD 203

慢性的

藻类	无明显反应浓度（NOEC）	近头状伪蹄形藻	0.11 mg/l, 72 h OECD 201

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE	33.3 % EU C.4-E 结果: 不容易生物降解
4-AMINO-2-HYDROXYTOLUENE	0 % OECD 301 B 结果: 不容易生物降解 测试时间: 28 D
6-HYDROXYINDOLE	结果: Not Biodegradable
DECETH-3	78 % OECD 301 B 结果: 易生物降解 测试时间: 28 D
GLYCERYL LAURYL ETHER	88 % OECD 301 B 结果: 易生物降解
LAURETH-5 羧酸	78 % OECD 301 B 结果: 易生物降解 测试时间: 28 D
OLEYL ALCOHOL	87 % OECD 301 D 结果: 不容易生物降解 测试时间: 28 D
PEG-4 RAPESEEDAMIDE	96 % OECD 203 结果: 易生物降解 测试时间: 28 D
乙醇	84 % 结果: 易生物降解 测试时间: 20 D
己二醇	81 % OECD 301 F 结果: 易生物降解 测试时间: 28 D
甲苯 -2,5-二胺	17 % OECD 301 D 结果: 不容易生物降解 测试时间: 28 D

潜在的生物累积性

辛醇/水分配系数 log Kow

4-AMINO-2-HYDROXYTOLUENE	-0.53 EU A.8 0.53 OECD 117
6-HYDROXYINDOLE	1.46 EU A.8
GLYCERYL LAURYL ETHER	3.79 - 4.25
M-AMINOPHENOL	0.21

辛醇/水分配系数 log Kow

P-AMINOPHENOL	0.25
PEG-4 RAPESEEDAMIDE	5
乙醇	-0.31
甲苯 -2,5-二胺	-0.321 OECD 107

生物积累性

P-AMINOPHENOL	结果: 不一定是生物积累性的。
甲苯 -2,5-二胺	结果: 不一定是生物积累性的。

生物富集因子

P-AMINOPHENOL	10 - 46 OECD 305 C

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

有害废物代码 本产品在处置时是可燃的（D001）RCRA危险废物.

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

DOT

Materials associated with this document meet the criteria for US Department of Transportation exemption found at 49 CFR 173.150(g).

Packages containing limited quantities of retail products in volumes in accordance with the tables listed below maybe offered under the conditions of the exemption.

US Domestic Transportation
Per 49 CFR 173.150(g) exemptions:

	>70% Ethyl Alcohol (v/v) (w/w)			
	Inner Packaging	Net Contents	Gross Weight	Marking
Liquids	8 fl. oz.	192 fl. oz.	65 lbs.	None
	≤70% Ethyl Alcohol (v/v) (w/w)			
Liquids (glass)	8 fl. oz.	192 fl. oz.	65 lbs.	None
	16 fl. oz.	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
Liquids (non-glass)	16 fl. oz.	192 fl. oz.	65 lbs.	None
	1 gallon	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
	General Conditions			
	Inner packagings must be secured and cushioned within the outer package to prevent breakage, leakage and movement.

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT DEMI-PERMANENT DEVELOPER - 6.7 VOLUME**

Other means of identification

SDS number 00-26-0000047

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

US Address:
L'Oreal USA Products, Inc
133 Terminal Avenue
Clark, NJ 07066
USA

Canadian Address:
L'Oreal Canada
4895 rue Hickmore
Ville St-Laurent, H4T 1K5
Canada

Emergency Phone # :
1-800-535-5053 (International: 352-323-3500)
In Canada - 1-613-996-6666 (Canutec (*666 Cellular))

For further Information: 1-732-499-2741

Poison Control # : 412-390-3326

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word None.

Hazard statement The mixture does not meet the criteria for classification.

Precautionary statement

Prevention Observe good industrial hygiene practices.

Response Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
HYDROGEN PEROXIDE		7722-84-1	2

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Rinse with water. Get medical attention if irritation develops and persists.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Not available.
Indication of immediate medical attention and special treatment needed	Treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Avoid prolonged exposure. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	PEL	1.4 mg/m3
		1 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1.4 mg/m3
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 2 - 2.4

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity

Product	Species	Test Results
PULP RIOT DEMI-PERMANENT DEVELOPER - 6.7 VOLUME		
Acute		
Inhalation		
Vapor		
ATEmix		550 mg/l
Oral		
ATEmix		34690 mg/kg

Components	Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg OECD 402
Inhalation		
Vapor		
LC0	Rat	170 mg/m³, 4 h OECD 403
Oral		
LD50	Rat	693.7 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE	OECD 404, 35% ≥ C < 50% Result: Irritating Species: Rabbit

Irritation Corrosion - Skin

HYDROGEN PEROXIDE	OECD 404, C ≥ 50% Result: Corrosive Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE	OECD 405, 5% ≥ C < 8% Result: Irritating Species: Rabbit OECD 405, C ≥ 8% Result: Corrosive Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1)	3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	0, C ≥ 35% Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	2.9 mg/L air OECD 412, Inhalation Result: NOAEL Species: Rat Test Duration: 28 d 26 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Mouse Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2.5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2.4 mg/l, 48 h

Components		Species	Test Results
Fish	LC50	Pimephales promelas	16.4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2.5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.63 mg/l, 21 d ASTM E 1193-97

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE — 99 % OECD 209
Result: Readily Biodegradable

Bioaccumulative potential

Mobility in soil — No data available.

Other adverse effects — No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions — Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Local disposal regulations — Dispose in accordance with all applicable regulations.

Waste from residues / unused products — Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging — Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

FINISHED GOODS

Not regulated as dangerous goods.

Issue date 01-09-2020

Version # 01

NFPA ratings Health: 0
Flammability: 1
Instability: 0

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT DEMI-PERMANENT DEVELOPER - 6.7 VOLUME
Synonyms	None.
SDS number	00-26-0000047
Product code	1212104
Issue date	01-09-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number	Orfila +33 1 45 42 59 59

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

This mixture does not meet the criteria for classification according to Regulation (EC) 1272/2008 as amended.

Hazard summary	Not classified for health hazards. However, occupational exposure to the mixture or substance(s) may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	The mixture does not meet the criteria for classification.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.
Supplemental label information	None.
2.3. Other hazards	Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
HYDROGEN PEROXIDE	2	7722-84-1 231-765-0	01-2119485845-22	008-003-00-9	
Classification:	Ox. Liq. 1;H271, Acute Tox. 4;H302, Skin Corr. 1A;H314, Acute Tox. 4;H332, STOT SE 3;H335, Aquatic Chronic 3;H412				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Avoid prolonged exposure. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	VME	1,5 mg/m3
Regulatory status: Indicative limit (VL)		
		1 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	0,71 mg/m3
		0,5 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	STEL	0,8 mg/m3
	TWA	0,4 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Not available.
Odor threshold	Not available.
pH	2 - 2,4
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.

10.6. Hazardous decomposition products No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact No adverse effects due to skin contact are expected.

Eye contact No adverse effects due to eye contact are expected.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity

Product	Species	Test Results
PULP RIOT DEMI-PERMANENT DEVELOPER - 6.7 VOLUME		
Acute		
Inhalation		
Vapor		
ATEmix		550 mg/l
Oral		
ATEmix		34690 mg/kg

Components	Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg OECD 402
Inhalation		
Vapor		
LC0	Rat	170 mg/m³, 4 h OECD 403
Oral		
LD50	Rat	693,7 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE
OECD 404, 35% ≥ C < 50%
Result: Irritating
Species: Rabbit
OECD 404, C ≥ 50%
Result: Corrosive
Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE
OECD 405, 5% ≥ C < 8%
Result: Irritating
Species: Rabbit
OECD 405, C ≥ 8%
Result: Corrosive
Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE
Result: Not Sensitizing
Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE
Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1) 3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE 0, C ≥ 35%
Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE 2,9 mg/L air OECD 412, Inhalation
Result: NOAEL
Species: Rat
Test Duration: 28 d
26 mg/kg bw/d OECD 408, Oral
Result: NOAEL
Species: Mouse
Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2,4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16,4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2,5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,63 mg/l, 21 d ASTM E 1193-97

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE 99 % OECD 209
Result: Readily Biodegradable

12.3. Bioaccumulative potential

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

HYDROGEN PEROXIDE (CAS 7722-84-1)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H271 May cause fire or explosion; strong oxidizer. H302 Harmful if swallowed. H314 Causes severe skin burns and eye damage. H332 Harmful if inhaled. H335 May cause respiratory irritation. H412 Harmful to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT SEMIPERM NEO-POP TRAGIC**

Other means of identification

SDS number 00-22-0000200

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

US Address:
L'Oreal USA Products, Inc
133 Terminal Avenue
Clark, NJ 07066
USA

Canadian Address:
L'Oreal Canada
4895 rue Hickmore
Ville St-Laurent, H4T 1K5
Canada

Emergency Phone # :
1-800-535-5053 (International: 352-323-3500)
In Canada - 1-613-996-6666 (Canutec (*666 Cellular))

For further Information: 1-732-499-2741

Poison Control # : 412-390-3326

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Warning

Hazard statement Causes serious eye irritation.

Precautionary statement

Prevention Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Indication of immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling Avoid contact with eyes. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits This mixture has no ingredients that have PEL, TLV, or other recommended exposure limit.

Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	3 - 4.5
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.98 - 0.999 g/cm³
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Information on toxicological effects

Acute toxicity

Product	Species	Test Results
PULP RIOT SEMIPERM NEO-POP TRAGIC		
Acute		
Dermal		
ATEmix		380200 mg/kg
Oral		
ATEmix		140800 mg/kg

Components	Species	Test Results
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg
Oral		
LD50	Rat	> 2000 mg/kg OECD 423

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 Result: Corrosive Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.

Skin sensitization

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

STEARAMIDOPROPYL DIMETHYLAMINE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, No effects on development Result: NOAEL Species: Rat

Reproductivity

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dermal Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0.14 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0.381 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	0.1 - 1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	100 - 1000 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.2 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0.1 mg/l, 9 d OECD 212

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT SEMIPERM NEO-POP TRAGIC
Synonyms	None.
SDS number	00-22-0000200
Product code	1245554
Issue date	03-16-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number Orfila +33 1 45 42 59 59

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards

Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.

Hazard summary Causes serious eye irritation. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: STEARAMIDOPROPYL DIMETHYLAMINE

Hazard pictograms

Signal word Warning

Hazard statements

H319	Causes serious eye irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P264	Wash thoroughly after handling.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 1,4% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 10,4% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
STEARAMIDOPROPYL DIMETHYLAMINE	1	7651-02-7 231-609-1	01-2119979089-19	-	
Classification:	Eye Dam. 1;H318, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				
LACTIC ACID	0,53	79-33-4 201-196-2	-	-	
Classification:	Acute Tox. 3;H331				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
PROPYLENE GLYCOL (CAS 57-55-6)	TWA	100 mg/m3	Inhalable fraction and vapor.

Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.

Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	3 - 4,5
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Density	0,98 - 0,999 g/cm³

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity

Product	Species	Test Results
PULP RIOT SEMIPERM NEO-POP TRAGIC		
Acute		
Inhalation

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 Result: Corrosive Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

STEARAMIDOPROPYL DIMETHYLAMINE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, No effects on development Result: NOAEL Species: Rat

Reproductivity

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dermal Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
LACTIC ACID (CAS 79-33-4)			
Aquatic			
Crustacea	EC50	Water flea (Daphnia magna)	180 - 320 mg/l, 48 hours
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0,14 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,381 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	0,1 - 1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	100 - 1000 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,2 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0,1 mg/l, 9 d OECD 212

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

LACTIC ACID	-0,72

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H318 Causes serious eye damage. H331 Toxic if inhaled. H400 Very toxic to aquatic life. H411 Toxic to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT SEMIPERM NEO-POP DECOY**

Other means of identification

SDS number 00-22-0000201

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

US Address:
L'Oreal USA Products, Inc
133 Terminal Avenue
Clark, NJ 07066
USA

Canadian Address:
L'Oreal Canada
4895 rue Hickmore
Ville St-Laurent, H4T 1K5
Canada

Emergency Phone # :
1-800-535-5053 (International: 352-323-3500)
In Canada - 1-613-996-6666 (Canutec (*666 Cellular))

For further Information: 1-732-499-2741

Poison Control # : 412-390-3326

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Warning

Hazard statement Causes serious eye irritation.

Precautionary statement

Prevention Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
STEARAMIDOPROPYL DIMETHYLAMINE		7651-02-7	1

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Indication of immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling Avoid contact with eyes. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits This mixture has no ingredients that have PEL, TLV, or other recommended exposure limit.

Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	3 - 4.5
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.98 - 0.999 g/cm³
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Information on toxicological effects

Acute toxicity

Product	Species	Test Results
PULP RIOT SEMIPERM NEO-POP DECOY		
Acute		
Dermal		
ATEmix		369000 mg/kg
Oral		
ATEmix		139700 mg/kg

Components	Species	Test Results
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg
Oral		
LD50	Rat	> 2000 mg/kg OECD 423

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 Result: Corrosive Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.

Skin sensitization

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

STEARAMIDOPROPYL DIMETHYLAMINE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, No effects on development Result: NOAEL Species: Rat

Reproductivity

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dermal Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0.14 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0.381 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	0.1 - 1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	100 - 1000 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.2 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0.1 mg/l, 9 d OECD 212

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT SEMIPERM NEO-POP DECOY
Synonyms	None.
SDS number	00-22-0000201
Product code	1245555
Issue date	03-16-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number Orfila +33 1 45 42 59 59

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards

Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.

Hazard summary Causes serious eye irritation. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: STEARAMIDOPROPYL DIMETHYLAMINE

Hazard pictograms

Signal word Warning

Hazard statements

H319 Causes serious eye irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P264	Wash thoroughly after handling.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 1,4% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 10,4% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
STEARAMIDOPROPYL DIMETHYLAMINE	1	7651-02-7 231-609-1	01-2119979089-19	-	
Classification:	Eye Dam. 1;H318, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				
LACTIC ACID	0,54	79-33-4 201-196-2	-	-	
Classification:	Acute Tox. 3;H331				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
PROPYLENE GLYCOL (CAS 57-55-6)	TWA	100 mg/m3	Inhalable fraction and vapor.

Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.

Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	3 - 4,5
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Density	0,98 - 0,999 g/cm³

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity

Product	Species	Test Results
PULP RIOT SEMIPERM NEO-POP DECOY		
Acute		
Inhalation		
Vapor		
ATEmix		1460 mg/l

Components	Species	Test Results
LACTIC ACID (CAS 79-33-4)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg, 24 Hours
Inhalation		
LC50	Rat	7,94 mg/l, 4 Hours
Oral		
LD50	Rat	3543 mg/kg
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg
Oral		
LD50	Rat	> 2000 mg/kg OECD 423

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

STEARAMIDOPROPYL DIMETHYLAMINE	OECE 404 Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 405 Result: Corrosive Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

STEARAMIDOPROPYL DIMETHYLAMINE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

STEARAMIDOPROPYL DIMETHYLAMINE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

STEARAMIDOPROPYL DIMETHYLAMINE	200 mg/kg bw/d OECD 421, No effects on development Result: NOAEL Species: Rat

Reproductivity

STEARAMIDOPROPYL DIMETHYLAMINE	70 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

STEARAMIDOPROPYL DIMETHYLAMINE	> 200 mg/kg bw/d OECD 411, Dermal Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
LACTIC ACID (CAS 79-33-4)			
Aquatic			
Crustacea	EC50	Water flea (Daphnia magna)	180 - 320 mg/l, 48 hours
STEARAMIDOPROPYL DIMETHYLAMINE (CAS 7651-02-7)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0,14 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,381 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	0,1 - 1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	100 - 1000 mg/l, 3 h OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,2 mg/l, 21 d OECD 211
Fish	NOEC	Danio rerio	0,1 mg/l, 9 d OECD 212

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

STEARAMIDOPROPYL DIMETHYLAMINE	88 % OECD 301 Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

LACTIC ACID	-0,72

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H318 Causes serious eye damage. H331 Toxic if inhaled. H400 Very toxic to aquatic life. H411 Toxic to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT SEMIPERM NEO-POP SATIRE**

Other means of identification

SDS number 00-22-0000198

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

US Address:
L'Oreal USA Products, Inc
133 Terminal Avenue
Clark, NJ 07066
USA

Canadian Address:
L'Oreal Canada
4895 rue Hickmore
Ville St-Laurent, H4T 1K5
Canada

Emergency Phone # :
1-800-535-5053 (International: 352-323-3500)
In Canada - 1-613-996-6666 (Canutec (*666 Cellular))

For further Information: 1-732-499-2741

Poison Control # : 412-390-3326

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word None.

Hazard statement The mixture does not meet the criteria for classification.

Precautionary statement

Prevention Observe good industrial hygiene practices.

Response Wash hands after handling.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Rinse with water. Get medical attention if irritation develops and persists.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Not available.
Indication of immediate medical attention and special treatment needed	Treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits	This mixture has no ingredients that have PEL, TLV, or other recommended exposure limit.
Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Not available.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	Not available.
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity	Not available.
Skin corrosion/irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.
Serious eye damage/eye irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.
Respiratory or skin sensitization	
Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.
Germ cell mutagenicity	Due to partial or complete lack of data the classification is not possible.
Carcinogenicity	Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - single exposure	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - repeated exposure	Due to partial or complete lack of data the classification is not possible.
Aspiration hazard	Due to partial or complete lack of data the classification is not possible.
Further information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity	The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.
Persistence and degradability	No data is available on the degradability of any ingredients in the mixture.
Bioaccumulative potential	No data available.
Mobility in soil	No data available.
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

16. Other information, including date of preparation or last revision

Issue date 05-05-2020

Version # 01

NFPA ratings Health: 0
Flammability: 0
Instability: 0

Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT SEMIPERM NEO-POP SATIRE
Synonyms	None.
SDS number	00-22-0000198
Issue date	05-05-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com
1.4. Emergency telephone number	INFOTRAC: +1-352-323-3500

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

This mixture does not meet the criteria for classification according to Regulation (EC) 1272/2008 as amended.

Hazard summary This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	The mixture does not meet the criteria for classification.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.
Supplemental label information	None.
2.3. Other hazards	Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

The components are not hazardous or are below required disclosure limits.

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits	No exposure limits noted for ingredient(s).
Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Cream.
Color	Shaded
Odor	Not available.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	Not available.
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.

Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity	No data available.
Skin corrosion/irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.
Serious eye damage/eye irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.
Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.
Germ cell mutagenicity	Due to partial or complete lack of data the classification is not possible.
Carcinogenicity	Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - single exposure	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - repeated exposure	Due to partial or complete lack of data the classification is not possible.
Aspiration hazard	Due to partial or complete lack of data the classification is not possible.
Mixture versus substance information	No information available.
Other information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity	Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

12.2. Persistence and degradability	No data is available on the degradability of any ingredients in the mixture.
12.3. Bioaccumulative potential	No data available.
Partition coefficient n-octanol/water (log Kow)	Not available.
Bioconcentration factor (BCF)	Not available.
12.4. Mobility in soil	No data available.
12.5. Results of PBT and vPvB assessment	Not a PBT or vPvB substance or mixture.
12.6. Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.
12.7. Additional information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	None.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Symbole de danger Aucune.

Mention d'avertissement Aucune.

Mention de danger Le mélange ne satisfait pas les critères de classification.

Conseil de prudence

Prévention Observer de bonnes pratiques d'hygiène industrielle.

Intervention Se laver les mains après utilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Le fabricant ne mentionne aucun ingrédient comme étant dangereux selon la norme 29 CFR 1910.1200 de l'OSHA.

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.
Contact avec la peau	Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.
Contact avec les yeux	Rincer avec de l'eau. Consulter un médecin si une irritation se développe et persiste.
Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Non disponible.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Traiter de manière symptomatique.
Informations générales	S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle	This mixture has no ingredients that have PEL, Vle , or other recommended exposure limit.
Valeurs biologiques limites	Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).
Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement.
Protection respiratoire	Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Forme	Crème.
Couleur	Nuancé
Odeur	Non disponible.
Seuil olfactif	Non disponible.
pH	Non disponible.
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	Non disponible.
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.

Viscosité	Non disponible.

Autres informations

Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	On ne s'attend à aucun effet néfaste en cas d'inhalation.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Aucun effet indésirable dû au contact des yeux n'est prévu.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë	Non disponible.
Corrosion cutanée/irritation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Lésions oculaires graves/irritation oculaire	La classification n'est pas possible en raison d'un manque partiel ou total de données. Aucun effet indésirable dû au contact des yeux n'est prévu.

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Sensibilisation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Mutagénicité sur les cellules germinales	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Cancérogénicité	Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Toxicité pour certains organes cibles - exposition unique	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Toxicité pour certains organes cibles - expositions répétées	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Danger par aspiration	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Autres informations	La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité	Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.
Persistance et dégradation	Aucune donnée n'est disponible sur la dégradabilité des ingrédients du mélange.
Potentiel de bioaccumulation	Aucune donnée disponible.
Mobilité dans le sol	Aucune donnée disponible.
Autres effets nocifs	On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination	Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé.
Règlements locaux d'élimination	Détruire conformément àtoutes les réglementations applicables.
Déchets des résidus / produits non utilisés	Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).
Emballages contaminés	Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis

Ce produit n'est pas connu comme un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

Non inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication 05-Mai-2020

Version n° 01

Classements NFPA Santé: 0
Inflammabilité: 0
Instabilité: 0

Avis de non-responsabilité À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT DEMI-PERMANENT COLOR - GROUP 3**

Other means of identification

SDS number 30-21-0000290

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

US Address:
L'Oreal USA Products, Inc
133 Terminal Avenue
Clark, NJ 07066
USA

Canadian Address:
L'Oreal Canada
4895 rue Hickmore
Ville St-Laurent, H4T 1K5
Canada

Emergency Phone # :
1-800-535-5053 (International: 352-323-3500)
In Canada - 1-613-996-6666 (Canutec (*666 Cellular))

For further Information: 1-732-499-2741

Poison Control # : 412-390-3326

2. Hazard(s) identification

Physical hazards	Flammable liquids	Category 3
Health hazards	Skin corrosion/irritation	Category 2
	Serious eye damage/eye irritation	Category 1
	Sensitization, skin	Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Flammable liquid and vapor. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage.

Precautionary statement

Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear protective gloves/eye protection/face protection.

Response	If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. In case of fire: Use appropriate media to extinguish.
Storage	Store in a well-ventilated place. Keep cool.
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.
Hazard(s) not otherwise classified (HNOC)	None known.
Supplemental information	None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
ETHANOL		64-17-5	8.19
PEG-4 RAPESEEDAMIDE		85536-23-8	8.13
GLYCERYL LAURYL ETHER		9022-75-7	7
DECETH-3		66455-15-0	6.93
LAURETH-5 CARBOXYLIC ACID		27306-90-7	4.5
HEXYLENE GLYCOL		107-41-5	3
OLEYL ALCOHOL		68002-94-8	1.1
4-AMINO-2-HYDROXYTOLUENE		2835-95-2	0.1
P-AMINOPHENOL		123-30-8	0.1

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.
General information	Take off all contaminated clothing immediately. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	Flammable liquid and vapor.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.

Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. When using do not smoke. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Do not get this material in contact with eyes. Avoid breathing mist/vapors. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Keep away from heat, sparks and open flame. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep out of the reach of children. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
ETHANOL (CAS 64-17-5)	PEL	1900 mg/m3
		1000 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	STEL	1000 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	10 mg/m3	Aerosol, inhalable.
		50 ppm	Vapor fraction
	TWA	25 ppm	Vapor fraction

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	Ceiling	125 mg/m3
		25 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls	Explosion-proof general and local exhaust ventilation. Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.
Respiratory protection	Applicable for industrial settings only. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	7.7 - 8.6
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 95 °F (> 35 °C)
Flash point	118.4 °F (48.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.

Fire point	< 212.00 °F (< 100.00 °C) ISO 2592
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

Information on toxicological effects

Acute toxicity Not known.

Skin corrosion/irritation Causes skin irritation.

Irritation Corrosion - Skin

GLYCERYL LAURYL ETHER	OECD 404 Result: Corrosive Species: Rabbit
PEG-4 RAPESEEDAMIDE	OECD 404 Result: Irritating Species: Rabbit

Irritation Corrosion - Skin

ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit
LAURETH-5 CARBOXYLIC ACID	OECD 404 Result: Slightly Irritating Species: Rabbit
DECETH-3	OECD 404, Based on test data for structurally similar materials. Result: Slightly Irritating Species: Rabbit
HEXYLENE GLYCOL	OECD 405 Result: Slightly irritating Species: Rabbit
4-AMINO-2-HYDROXYTOLUENE	OECD 439 Result: Not Irritating Species: RhE
OLEYL ALCOHOL	Result: Slightly Irritating Species: Rabbit
P-AMINOPHENOL	Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

P-AMINOPHENOL	EPA OPPTS 870.2400 Result: Slightly Irritating Species: Rabbit
LAURETH-5 CARBOXYLIC ACID	OECD 405 Result: Corrosive Species: Rabbit
ETHANOL	OECD 405 Result: Irritating Species: Rabbit
HEXYLENE GLYCOL	OECD 405 Result: Slightly irritating Species: Rabbit
PEG-4 RAPESEEDAMIDE	OECD 405 Result: Slightly Irritating Species: Rabbit
4-AMINO-2-HYDROXYTOLUENE	OECD 492 Result: Not Irritating Species: RhCE
GLYCERYL LAURYL ETHER	Result: Corrosive
DECETH-3	Result: Corrosive Species: Rabbit
HEXYLENE GLYCOL	Result: Irritating Species: Human
OLEYL ALCOHOL	Result: Not Irritating Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization May cause an allergic skin reaction.

Skin sensitization

ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig
GLYCERYL LAURYL ETHER	OECD 406 Result: Not Sensitizing Species: Guinea pig
HEXYLENE GLYCOL	OECD 406 Result: Not Sensitizing Species: Guinea pig
LAURETH-5 CARBOXYLIC ACID	OECD 406 Result: Not Sensitizing Species: Guinea pig

Skin sensitization

PEG-4 RAPESEEDAMIDE	OECD 406 Result: Not Sensitizing Species: Guinea pig
P-AMINOPHENOL	OECD 406 Result: Sensitizing Species: Guinea pig
DECETH-3	OECD 406, Based on test data for structurally similar materials. Result: Not Sensitizing Species: Guinea pig
4-AMINO-2-HYDROXYTOLUENE	OECD 429 Result: Sensitizing Species: Mouse
OLEYL ALCOHOL	Result: Not Sensitizing Species: Rabbit

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.
OLEYL ALCOHOL	Result: In vitro and in vivo tests did not show mutagenic effects.
PEG-4 RAPESEEDAMIDE	Result: In vitro and in vivo tests did not show mutagenic effects.
DECETH-3	Result: In vitro tests did not show mutagenic effects
GLYCERYL LAURYL ETHER	Result: In vitro tests did not show mutagenic effects
HEXYLENE GLYCOL	Result: In vitro tests did not show mutagenic effects
LAURETH-5 CARBOXYLIC ACID	Result: In vitro tests did not show mutagenic effects
4-AMINO-2-HYDROXYTOLUENE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo tests.
P-AMINOPHENOL	Result: In vivo tests showed mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Possible reproductive hazard.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat
P-AMINOPHENOL	100 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

HEXYLENE GLYCOL	450 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

P-AMINOPHENOL	10 - 46 OECD 305 C

Bioaccumulation

P-AMINOPHENOL	Result: Bioaccumulation is unlikely.

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

Materials associated with this document meet the criteria for US Department of Transportation exemption found at 49 CFR 173.150(g).

Packages containing limited quantities of retail products in volumes in accordance with the tables listed below maybe offered under the conditions of the exemption.

US Domestic Transportation

Per 49 CFR 173.150(g) exemptions:

	>70% Ethyl Alcohol (v/v) (w/w)			
	Inner Packaging	Net Contents	Gross Weight	Marking
Liquids	8 fl. oz.	192 fl. oz.	65 lbs.	None
	≤70% Ethyl Alcohol (v/v) (w/w)			
Liquids (glass)	8 fl. oz.	192 fl. oz.	65 lbs.	None
	16 fl. oz.	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
Liquids (non-glass)	16 fl. oz.	192 fl. oz.	65 lbs.	None
	1 gallon	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
	General Conditions			
	Inner packagings must be secured and cushioned within the outer package to prevent breakage, leakage and movement.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

ETHANOL (CAS 64-17-5) Listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Not regulated.

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

ETHANOL (CAS 64-17-5) Low priority

16. Other information, including date of preparation or last revision

Issue date	05-18-2020
Version #	01
NFPA ratings	Health: 3 Flammability: 2 Instability: 0
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT DEMI-PERMANENT COLOR - GROUP 3
Synonyms	None.
SDS number	30-21-0000290
Product code	1242449
Issue date	05-18-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number INFOTRAC: +1-352-323-3500

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards		
Flammable liquids	Category 3	H226 - Flammable liquid and vapor.
Health hazards		
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

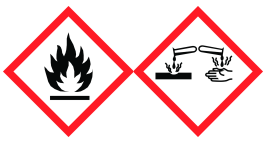
Hazard summary May be ignited by heat, sparks or flames. Causes serious eye damage. Causes skin irritation. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: DECETH-3, GLYCERYL LAURYL ETHER, LAURETH-5 CARBOXYLIC ACID

Hazard pictograms



Signal word Danger

Hazard statements

H226 Flammable liquid and vapor.

H315	Causes skin irritation.
H318	Causes serious eye damage.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P233	Keep container tightly closed.
P240	Ground and bond container and receiving equipment.
P241	Use explosion-proof electrical/ventilating/lighting equipment.
P242	Use non-sparking tools.
P243	Take action to prevent static discharges.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P273	Avoid release to the environment.
P280	Wear protective gloves/protective clothing/eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P303 + P361 + P353	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P332 + P313	If skin irritation occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.
P370 + P378	In case of fire: Use appropriate media to extinguish.

Storage

P403 + P235	Store in a well-ventilated place. Keep cool.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 11,8% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 21% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains AMMONIUM THIOLACTATE, P-AMINOPHENOL, 4-AMINO-2-HYDROXYTOLUENE. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
ETHANOL	8,19	64-17-5 200-578-6	01-2119457610-43	603-002-00-5	
Classification:	Flam. Liq. 2;H225, Eye Irrit. 2;H319				
PEG-4 RAPESEEDAMIDE	8,13	- 932-164-2	01-2119565130-50	-

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Take off all contaminated clothing immediately. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Take off immediately all contaminated clothing. Rinse skin with water/shower. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards Flammable liquid and vapor.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Wear appropriate protective equipment and clothing during clean-up. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools. Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.

Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. When using do not smoke. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Do not breathe vapor. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Keep away from heat, sparks and open flame. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep out of the reach of children. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1907 mg/m3
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	TWA	123 mg/m3
		25 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
ETHANOL (CAS 64-17-5)	VLE	9500 mg/m3
Regulatory status: Indicative limit (VL)		
		5000 ppm
Regulatory status: Indicative limit (VL)		
	VME	1900 mg/m3
Regulatory status: Indicative limit (VL)		
		1000 ppm
Regulatory status: Indicative limit (VL)		
HEXYLENE GLYCOL (CAS 107-41-5)	VLE	125 mg/m3
Regulatory status: Indicative limit (VL)		
		25 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
DIPROPYLENE GLYCOL (CAS 25265-71-8)	TWA	100 mg/m3	Vapor and aerosol, inhalable fraction.

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	TWA	380 mg/m3	
		200 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	TWA	49 mg/m3	Vapor and aerosol.
		10 ppm	Vapor and aerosol.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
DIPROPYLENE GLYCOL (CAS 25265-71-8)	AGW	100 mg/m3	Inhalable fraction.
ETHANOL (CAS 64-17-5)	AGW	380 mg/m3	
		200 ppm	

Italy. Occupational Exposure Limits

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	STEL	1000 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	10 mg/m3	Aerosol, inhalable.
		50 ppm	Vapor fraction
	TWA	25 ppm	Vapor fraction

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	100 mg/m3	Inhalable fraction and vapor.
	TWA	50 mg/m3	Inhalable fraction and vapor.
P-AMINOPHENOL (CAS 123-30-8)	TWA	5 mg/m3	Inhalable fraction.
PROPYLENE GLYCOL (CAS 57-55-6)	TWA	100 mg/m3	Inhalable fraction and vapor.

Spain. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1910 mg/m3
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	123 mg/m3
		25 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Explosion-proof general and local exhaust ventilation. Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing.
Respiratory protection	Applicable for industrial settings only. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	7,7 - 8,6
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 95 °F (> 35 °C)
Flash point	118,4 °F (48,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Fire point	< 212,00 °F (< 100,00 °C) ISO 2592

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.

10.6. Hazardous decomposition products No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact Causes skin irritation. May cause an allergic skin reaction.

Eye contact Causes serious eye damage.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
4-AMINO-2-HYDROXYTOLUENE (CAS 2835-95-2)		
Acute

P-AMINOPHENOL	10 - 46 OECD 305 C

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

ETHANOL (CAS 64-17-5)
P-AMINOPHENOL (CAS 123-30-8)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.

Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H225 Highly flammable liquid and vapor. H290 May be corrosive to metals. H302 Harmful if swallowed. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H341 Suspected of causing genetic defects. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT DEMI-PERMANENT COLOR - GRUPPO 3
Sinonimi	Nessuno.
Numero SDS	30-21-0000290
Codice prodotto	1242449
Data di pubblicazione	11-Maggio-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli fisici		
Liquidi infiammabili	Categoria 3	H226 - Liquido e vapori infiammabili.
Pericoli per la salute		
Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.
Pericoli per l'ambiente		
Pericoloso per l'ambiente acquatico, pericolo acquatico a lungo termine	Categoria 3	H412 - Nocivo per gli organismi acquatici con effetti di lunga durata.

Riepilogo dei pericoli

Può essere acceso con calore, scintilla o fiamma. Provoca gravi lesioni oculari. Provoca irritazione cutanea. Pericoloso per l'ambiente se scaricato nei corsi d'acqua. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: DECETH-3, GLYCERYL LAURYL ETHER, LAURETH-5 ACIDO CARBOSSILICO

Pittogrammi di pericolo

Avvertenza Pericolo

Indicazioni di pericolo

H226	Liquido e vapori infiammabili.
H315	Provoca irritazione cutanea.
H318	Provoca gravi lesioni oculari.
H412	Nocivo per gli organismi acquatici con effetti di lunga durata.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P210	Tenere lontano da fonti di calore, superfici calde, scintille, fiamme libere o altre fonti di accensione. Non fumare.
P233	Tenere il recipiente ben chiuso.
P240	Mettere a terra e a massa il contenitore e il dispositivo ricevente.
P241	Utilizzare impianti elettrici/di ventilazione/d'illuminazione a prova di esplosione.
P242	Utilizzare utensili antiscintillamento.
P243	Fare in modo di prevenire le scariche elettrostatiche.
P260	Non respirare il vapore.
P264	Lavare attentamente dopo l'uso.
P273	Non disperdere nell'ambiente.
P280	Indossare guanti/indumenti protettivi/Proteggere gli occhi/il viso.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P303 + P361 + P353	IN CASO DI CONTATTO CON LA PELLE (o con i capelli): Togliere immediatamente tutti gli indumenti contaminati. Sciacquare la pelle.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P332 + P313	In caso di irritazione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.
P370 + P378	In caso di incendio: estinguere con mezzi adeguati.

Immagazzinamento

P403 + P235	Conservare in luogo fresco e ben ventilato.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette La miscela contiene il 11,8 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico. La miscela contiene il 21 % di componenti di cui è ignoto il pericolo a lungo termine per l'ambiente acquatico. EUH208 - Contiene AMMONIUM THIOLACTATE, 4-Aminofenolo, 4-AMINO-2-HYDROXYTOLUENE. Può provocare una reazione allergica.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Informazioni generali

Denominazione chimica	%	Numero CAS / Numero CE	Numero di registrazione REACH	Numero della sostanza	Note

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Togliere immediatamente tutti gli indumenti contaminati. Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi.
Lavare gli indumenti contaminati prima di indossarli nuovamente.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea Togliere immediatamente tutti gli indumenti contaminati. Sciacquare la pelle/fare una doccia. In caso di irritazione della pelle: consultare un medico. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.)

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Ustioni: sciacquare immediatamente con acqua. Continuando a sciacquare, togliere di dosso gli indumenti che non sono attaccati alla pelle lesa. Chiamare un'ambulanza e continuare a sciacquare durante il trasporto in ospedale. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio Liquido e vapori infiammabili.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei	Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO_2).
Mezzi di estinzione non idonei	Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.
5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela	Essi possono formare miscele explosive con l'aria. I vapori possono percorrere distanze notevoli dalla fonte di incendio e ritornare. In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi	In caso d'incendio indossare autorespiratore e indumenti protettivi completi.
Procedure speciali per l'estinzione degli incendi	In caso d'incendio e/o esplosione non respirare i fumi. Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.
Metodi specifici	Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente	Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Eliminare tutte le fonti di accensione (non fumare, evitare scintille, razzi, torce o fiamme nelle aree circostanti). Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Ventilare gli spazi chiusi prima di entrare. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.
Per chi interviene direttamente	Allontanare il personale non necessario. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS
6.2. Precauzioni ambientali	Non disperdere nell'ambiente. Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente. Evitare sversamenti o perdite supplementari, se questo può essere fatto senza pericolo. Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.
6.3. Metodi e materiali per il contenimento e per la bonifica	Tenere i materiali combustibili (legno, carta, olio, ecc.) lontano dal materiale fuoriuscito. Prendere precauzioni contro le scariche elettrostatiche. Utilizzare solo utensili antiscintillamento. Non scaricare il prodotto nelle fogne. Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Utilizzare un materiale non combustibile (ad esempio vermiculite, sabbia o terra) per assorbire il prodotto e riporlo in un contenitore per il successivo smaltimento. Una volta recuperato il prodotto, sciacquare l'area con acqua. Versamenti di piccole dimensioni: Assorbire/raccogliere con terra, sabbia o altro materiale non infiammabile e trasferire in contenitori per il successivo smaltimento. Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua. Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo
6.4. Riferimento ad altre sezioni	Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura	Non maneggiare, stoccare o aprire in prossimità di fiamme libere, fonti di calore o accensione. Proteggere il materiale dalla luce diretta. Non fumare durante l'impiego. Ventilazione di scarico localizzata e generale a prova di esplosione Evitare l'accumulo di cariche elettrostatiche. Tutte le apparecchiature usate durante la manipolazione del prodotto devono essere adeguatamente messe a terra. Usare strumenti che non generano scintille e apparecchiature a prova di esplosione. Non respirare il vapore. Non permettere che questo materiale vada a contatto con gli occhi. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Indossare attrezzature di protezione personale adeguate. Non disperdere nell'ambiente. Osservare le norme di buona igiene industriale.
7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità	Conservare lontano da calore, scintille e fiamme libere. Conservare in un luogo fresco e asciutto, lontano dalla luce diretta del sole. Conservare in un recipiente ermeticamente chiuso. Conservare in luogo ben ventilato. Conservare fuori della portata dei bambini. Tenere in un'area provvista di sistemi antincendio sprinkler. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).
7.3. Usi finali particolari	Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore	Forma
ETANOLO (CAS 64-17-5)	Breve termine	1000 ppm	
METIL-2,4-PENTANDIOLO (CAS 107-41-5)	8 ore	25 ppm	Frazione di vapore
	Breve termine	10 mg/m3	Aerosol, inhalable.
		50 ppm	Frazione di vapore

Valori limite biologici Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate Seguire le procedure standard di monitoraggio.

Livelli derivati senza effetto (DNEL) Non conosciuto.

Prevedibili concentrazioni prive di effetti (PNEC) Non conosciuto.

8.2. Controlli dell'esposizione

Controlli tecnici idonei Ventilazione di scarico localizzata e generale a prova di esplosione È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.

Protezione degli occhi/del volto Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura).

Protezione della pelle

- Protezione delle mani Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.

- Altro Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici.

Protezione respiratoria Applicabile soltanto per gli impianti industriali. Se i controlli ingegneristici non mantengono le concentrazioni di polveri emesse nell'aria sotto i limiti di esposizione consigliati (se possibile) o sotto un livello accettabile (nei paesi in cui i limiti di esposizione non sono stati definiti), occorre un respiratore approvato.

Pericoli termici Indossare opportuni indumenti termoprotettivi, quando necessario.

Misure d'igiene Non fumare durante l'impiego. Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti.

Controlli dell'esposizione ambientale Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto

Stato fisico Liquido.

Forma Non conosciuto.

Colore Non conosciuto.

Odore Caratteristico/a.

Soglia olfattiva Non conosciuto.

pH 7,7 - 8,6

Punto di fusione/punto di congelamento Non conosciuto.

Punto di ebollizione iniziale e intervallo di ebollizione > 35 °C (> 95 °F)

Punto di infiammabilità 48,0 °C (118,4 °F) Vaso chiuso

Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.
Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	
Punto incendio	< 100,00 °C (< 212,00 °F) ISO 2592

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Evitare temperature superiori al punto di infiammabilità. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Forti agenti ossidanti.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.
Informazioni sulle vie probabili di esposizione	
Inalazione	L'inalazione prolungata può essere nociva.
Cutanea	Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca gravi lesioni oculari.
Ingestione	In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.
Sintomi	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.)

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta Non conosciuto.

PEG-4 RAPESEEDAMIDE	96 % OCSE 203 Risultato: Rapidamente biodegradabile Durata del test: 28 d

12.3. Potenziale di bioaccumulo

Coefficiente di partizione n-ottanolo/acqua (log Kow)

4-AMINO-2-HYDROXYTOLUENE	-0,53 EU A,8 0,53 OECD 117
4-Aminofenolo	0,25
AMMONIUM THIOLACTATE	1,15 OECD 117
ETANOLO	-0,31
GLYCERYL LAURYL ETHER	3,79 - 4,25
PEG-4 RAPESEEDAMIDE	5

Fattore di bioconcentrazione (BCF)

4-Aminofenolo	10 - 46 OECD 305 C

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi	Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.
12.7. Altre informazioni	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui	Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).
Imballaggi contaminati	Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.
Codice Europeo dei Rifiuti	Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.
Metodi di smaltimento/informazioni	Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Impedire a questo prodotto di penetrare nelle fogne e nelle riserve d'acqua. Non contaminare stagni, canali o fossati con il prodotto chimico o il contenitore usato. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.
Precauzioni particolari	Smaltire secondo le norme applicabili.

Inquinante marino	No.
EmS	F-E, S-D
14.6. Precauzioni speciali per gli utilizzatori	Non conosciuto.
14.7. Trasporto di rinfuse secondo l'allegato II di MARPOL ed il codice IBC	Non stabilito.

SEZIONE 15: Informazioni sulla regolamentazione

15.1. Disposizioni legislative e regolamentari su salute, sicurezza e ambiente specifiche per la sostanza o la miscela

Regolamenti UE

Regolamento (CE) n. 1005/2009 sulle sostanze che riducono lo strato di ozono, Allegato I e II e successive modifiche

Non listato.

Regolamento (CE) n. 850/2004 relativo agli inquinanti organici persistenti, Allegato I e successivi adeguamenti

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 1 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 2 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 3 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato V e successive modifiche

Non listato.

Regolamento (CE) n. 166/2006 Allegato II Registro delle emissioni e dei trasferimenti di sostanze inquinanti e successive modifiche

Non listato.

Regolamento (CE) n. 1907/2006, REACH, Articolo 59(10), Elenco di sostanze candidate così come attualmente pubblicato dall'Agenzia europea per le sostanze chimiche (ECHA)

Non listato.

Autorizzazioni

Regolamento (CE) n. 1907/2006, REACH Allegato XIV - Sostanze soggette ad autorizzazione, modificata

Non listato.

Restrizioni d'uso

Regolamento (CE) n. 1907/2006, REACH Allegato XVII, Sostanze soggette a restrizioni in materia di immissione sul mercato e di uso e successivi adeguamenti

Non listato.

Direttiva 2004/37/CE: sulla protezione dei lavoratori contro i rischi derivanti da un'esposizione ad agenti cancerogeni e mutageni durante il lavoro e successive modifiche

Non listato.

Altri regolamenti UE

Direttiva 2012/18/UE sugli incidenti rilevanti connessi con determinate sostanze pericolose e successive modifiche

4-Aminofenolo (CAS 123-30-8)
ETANOLO (CAS 64-17-5)

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H225 Liquido e vapori facilmente infiammabili. H290 Può essere corrosivo per i metalli. H302 Nocivo se ingerito. H314 Provoca gravi ustioni cutanee e gravi lesioni oculari. H315 Provoca irritazione cutanea. H317 Può provocare una reazione allergica cutanea. H318 Provoca gravi lesioni oculari. H319 Provoca grave irritazione oculare. H332 Nocivo se inalato. H341 Sospettato di provocare alterazioni genetiche. H373 Può provocare danni agli organi in caso di esposizione prolungata o ripetuta. H400 Molto tossico per gli organismi acquatici. H410 Molto tossico per gli organismi acquatici con effetti di lunga durata. H411 Tossico per gli organismi acquatici con effetti di lunga durata. H412 Nocivo per gli organismi acquatici con effetti di lunga durata.

Informazioni di revisione	Prodotto e la Società Identificazione: Tipi di materiale Proprietà fisiche e chimiche: Proprietà multiple Informazioni sul trasporto : Product Shipping Name/Packing Group GHS: Classificazione
Informazioni formative	Seguire le istruzioni di formazione durante la manipolazione di questo materiale.
Clausole di esclusione della responsabilità	Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT DEMI-PERMANENT COLOR - GROUP 5**

Other means of identification

SDS number 30-21-0000291

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards	Flammable liquids	Category 3
Health hazards	Skin corrosion/irritation	Category 2
	Serious eye damage/eye irritation	Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Flammable liquid and vapor. Causes skin irritation. Causes serious eye damage.

Precautionary statement

Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Wash thoroughly after handling. Wear protective gloves/eye protection/face protection.

Response If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. In case of fire: Use appropriate media to extinguish.

Storage Store in a well-ventilated place. Keep cool.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
ETHANOL		64-17-5	< 9
PEG-4 RAPESEEDAMIDE		85536-23-8	< 9
DECETH-3		66455-15-0	< 7
LAURETH-5 CARBOXYLIC ACID		27306-90-7	< 5
GLYCERYL LAURYL ETHER		9022-75-7	≤ 7
HEXYLENE GLYCOL		107-41-5	≤ 3
OLEYL ALCOHOL		68002-94-8	< 2
TOLUENE-2,5-DIAMINE		95-70-5	≤ 0.1

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation
Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact
Take off immediately all contaminated clothing. Rinse skin with water/shower. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion
Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed
Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

Indication of immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.

General information
Take off all contaminated clothing immediately. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions
In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.

Specific methods
Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards
Flammable liquid and vapor.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.

Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. When using do not smoke. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Keep away from heat, sparks and open flame. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep out of the reach of children. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
ETHANOL (CAS 64-17-5)	PEL	1900 mg/m3
		1000 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	STEL	1000 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	10 mg/m3	Aerosol, inhalable.
		50 ppm	Vapor fraction
	TWA	25 ppm	Vapor fraction

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	Ceiling	125 mg/m3
		25 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value
TOLUENE-2,5-DIAMINE (CAS 95-70-5)	TWA	0.025 mg/m3
		0.005 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Exposure guidelines

US WEEL Guides: Skin designation

TOLUENE-2,5-DIAMINE (CAS 95-70-5)	Can be absorbed through the skin.

Appropriate engineering controls Explosion-proof general and local exhaust ventilation. Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state	Liquid.
Color	Not available.
Odor	Not available.
Odor threshold	Not available.
pH	7.7 - 8.6
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	118.4 °F (48.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.

Solubility(ies)

Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.

Other information

Explosive properties	Not explosive.
Fire point	< 212.00 °F (< 100.00 °C) ISO 2592
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT DEMI-PERMANENT COLOR - GROUP 5

Skin corrosion/irritation Causes skin irritation.

Irritation Corrosion - Skin

GLYCERYL LAURYL ETHER	OECD 404 Result: Corrosive Species: Rabbit
PEG-4 RAPESEEDAMIDE	OECD 404 Result: Irritating Species: Rabbit
ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit

Irritation Corrosion - Skin

LAURETH-5 CARBOXYLIC ACID	OECD 404 Result: Slightly Irritating Species: Rabbit
DECETH-3	OECD 404, Based on test data for structurally similar materials. Result: Slightly Irritating Species: Rabbit
HEXYLENE GLYCOL	OECD 405 Result: Slightly irritating Species: Rabbit
TOLUENE-2,5-DIAMINE	OECD 439 Result: Not Irritating Species: In vitro
OLEYL ALCOHOL	Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

LAURETH-5 CARBOXYLIC ACID	OECD 405 Result: Corrosive Species: Rabbit
TOLUENE-2,5-DIAMINE	OECD 405 Result: Corrosive Species: Rabbit
ETHANOL	OECD 405 Result: Irritating Species: Rabbit
HEXYLENE GLYCOL	OECD 405 Result: Slightly irritating Species: Rabbit
PEG-4 RAPESEEDAMIDE	OECD 405 Result: Slightly Irritating Species: Rabbit
GLYCERYL LAURYL ETHER	Result: Corrosive
DECETH-3	Result: Corrosive Species: Rabbit
HEXYLENE GLYCOL	Result: Irritating Species: Human
OLEYL ALCOHOL	Result: Not Irritating Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig
GLYCERYL LAURYL ETHER	OECD 406 Result: Not Sensitizing Species: Guinea pig
HEXYLENE GLYCOL	OECD 406 Result: Not Sensitizing Species: Guinea pig
LAURETH-5 CARBOXYLIC ACID	OECD 406 Result: Not Sensitizing Species: Guinea pig
PEG-4 RAPESEEDAMIDE	OECD 406 Result: Not Sensitizing Species: Guinea pig
DECETH-3	OECD 406, Based on test data for structurally similar materials. Result: Not Sensitizing Species: Guinea pig

Skin sensitization

TOLUENE-2,5-DIAMINE	OECD 429 Result: Sensitizing Species: Mouse
OLEYL ALCOHOL	Result: Not Sensitizing Species: Rabbit

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.
OLEYL ALCOHOL	Result: In vitro and in vivo tests did not show mutagenic effects.
PEG-4 RAPESEEDAMIDE	Result: In vitro and in vivo tests did not show mutagenic effects.
DECETH-3	Result: In vitro tests did not show mutagenic effects
GLYCERYL LAURYL ETHER	Result: In vitro tests did not show mutagenic effects
HEXYLENE GLYCOL	Result: In vitro tests did not show mutagenic effects
LAURETH-5 CARBOXYLIC ACID	Result: In vitro tests did not show mutagenic effects
TOLUENE-2,5-DIAMINE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

TOLUENE-2,5-DIAMINE (CAS 95-70-5)	3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Possible reproductive hazard.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat
OLEYL ALCOHOL	2000 mg/kg bw/d OECD 422 Result: NOAEL Species: Rat
HEXYLENE GLYCOL	300 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
TOLUENE-2,5-DIAMINE	50 mg/kg bw/d OECD 414, Based on test data for structurally similar materials. Result: NOAEL Species: Rat
PEG-4 RAPESEEDAMIDE	500 mg/kg bw/d OECD 421, No effects on development Result: NOEL Species: Rat
GLYCERYL LAURYL ETHER	600 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Reproductivity

TOLUENE-2,5-DIAMINE	>= 45 mg/kg bw/d OECD 416, Based on test data for structurally similar materials. Result: NOAEL Species: Rat
HEXYLENE GLYCOL	1000 mg/kg bw/d OECD 421 Result: NOEL Species: Rat
OLEYL ALCOHOL	2000 mg/kg bw/d OECD 422 Result: NOAEL Species: Rat
ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat

Reproductivity

PEG-4 RAPESEEDAMIDE	500 mg/kg bw/d OECD 421, No effects on fertility Result: NOEL Species: Rat
GLYCERYL LAURYL ETHER	600 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

TOLUENE-2,5-DIAMINE	10 mg/kg bw/d OECD 408, Oral Result: NOEAL Species: Rat Test Duration: 90 d
DECETH-3	100 mg/kg bw/d OECD 407, Based on test data for structurally similar materials. Result: NOAEL Species: Rat Test Duration: 28 d
GLYCERYL LAURYL ETHER	150 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 28 d
PEG-4 RAPESEEDAMIDE	150 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat
ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat
HEXYLENE GLYCOL	450 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

PEG-4 RAPESEEDAMIDE	5
TOLUENE-2,5-DIAMINE	-0.321 OECD 107

Bioaccumulation

TOLUENE-2,5-DIAMINE	Result: Bioaccumulation is unlikely.

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

Materials associated with this document meet the criteria for US Department of Transportation exemption found at 49 CFR 173.150(g).

Packages containing limited quantities of retail products in volumes in accordance with the tables listed below maybe offered under the conditions of the exemption.

US Domestic Transportation

Per 49 CFR 173.150(g) exemptions:

	>70% Ethyl Alcohol (v/v) (w/w)			
	Inner Packaging	Net Contents	Gross Weight	Marking
Liquids	8 fl. oz.	192 fl. oz.	65 lbs.	None
	≤70% Ethyl Alcohol (v/v) (w/w)			
Liquids (glass)	8 fl. oz.	192 fl. oz.	65 lbs.	None
	16 fl. oz.	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
Liquids (non-glass)	16 fl. oz.	192 fl. oz.	65 lbs.	None
	1 gallon	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
	General Conditions			
	Inner packagings must be secured and cushioned within the outer package to prevent breakage, leakage and movement.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

ETHANOL (CAS 64-17-5)	Listed.
TOLUENE-2,5-DIAMINE (CAS 95-70-5)	Listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Chemical name	CAS number	% by wt.
TOLUENE-2,5-DIAMINE	95-70-5	≤ 0.1

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

ETHANOL (CAS 64-17-5)	Low priority

16. Other information, including date of preparation or last revision

Issue date	12-04-2020
Version #	01
NFPA ratings	Health: 3 Flammability: 2 Instability: 0
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT DEMI-PERMANENT COLOR - GROUP 5
Synonyms	None.
SDS number	30-21-0000291
Issue date	12-04-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards		
Flammable liquids	Category 3	H226 - Flammable liquid and vapor.
Health hazards		
Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary May be ignited by heat, sparks or flames. Causes serious eye damage. Causes skin irritation. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: DECETH-3, GLYCERYL LAURYL ETHER, LAURETH-5 CARBOXYLIC ACID

Hazard pictograms

Signal word Danger

Hazard statements

H226 Flammable liquid and vapor.
H315 Causes skin irritation.
H318 Causes serious eye damage.
H412 Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102 Keep out of reach of children.
P103 Read label before use.
P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P233 Keep container tightly closed.
P240 Ground and bond container and receiving equipment.
P241 Use explosion-proof electrical/ventilating/lighting equipment.
P242 Use non-sparking tools.
P243 Take action to prevent static discharges.
P260 Do not breathe vapor.
P264 Wash thoroughly after handling.
P273 Avoid release to the environment.
P280 Wear protective gloves/protective clothing/eye protection/face protection.

Response

P101 If medical advice is needed, have product container or label at hand.
P303 + P361 + P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310 Immediately call a POISON CENTER/doctor.
P332 + P313 If skin irritation occurs: Get medical advice/attention.
P362 + P364 Take off contaminated clothing and wash it before reuse.
P370 + P378 In case of fire: Use appropriate media to extinguish.

Storage

P403 + P235 Store in a well-ventilated place. Keep cool.

Disposal

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 11,8% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 21% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains AMMONIUM THIOLACTATE, TOLUENE-2,5-DIAMINE, M-AMINOPHENOL, 4-AMINO-2-HYDROXYTOLUENE. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Take off all contaminated clothing immediately. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Take off immediately all contaminated clothing. Rinse skin with water/shower. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards Flammable liquid and vapor.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders

Keep unnecessary personnel away. Wear appropriate protective equipment and clothing during clean-up. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions

Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up

Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools. Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.

Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. When using do not smoke. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Do not breathe vapor. Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Keep away from heat, sparks and open flame. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep out of the reach of children. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1907 mg/m3
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	TWA	123 mg/m3
		25 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
ETHANOL (CAS 64-17-5)	VLE	9500 mg/m3
Regulatory status: Indicative limit (VL)		
		5000 ppm
Regulatory status: Indicative limit (VL)		
	VME	1900 mg/m3
Regulatory status: Indicative limit (VL)		
		1000 ppm
Regulatory status: Indicative limit (VL)		

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
HEXYLENE GLYCOL (CAS 107-41-5)	VLE	125 mg/m3
Regulatory status: Indicative limit (VL)		
		25 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
DIPROPYLENE GLYCOL (CAS 25265-71-8)	TWA	100 mg/m3	Vapor and aerosol, inhalable fraction.
ETHANOL (CAS 64-17-5)	TWA	380 mg/m3	
		200 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	TWA	49 mg/m3	Vapor and aerosol.
		10 ppm	Vapor and aerosol.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
DIPROPYLENE GLYCOL (CAS 25265-71-8)	AGW	100 mg/m3	Inhalable fraction.
ETHANOL (CAS 64-17-5)	AGW	380 mg/m3	
		200 ppm	

Italy. Occupational Exposure Limits

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	STEL	1000 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	10 mg/m3	Aerosol, inhalable.
		50 ppm	Vapor fraction
	TWA	25 ppm	Vapor fraction

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	100 mg/m3	Inhalable fraction and vapor.
	TWA	50 mg/m3	Inhalable fraction and vapor.
PROPYLENE GLYCOL (CAS 57-55-6)	TWA	100 mg/m3	Inhalable fraction and vapor.

Spain. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1910 mg/m3
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	123 mg/m3
		25 ppm

Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Explosion-proof general and local exhaust ventilation. Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing.
Respiratory protection	Applicable for industrial settings only. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Not available.
Odor threshold	Not available.
pH	7,7 - 8,6
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	118,4 °F (48,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Fire point	< 212,00 °F (< 100,00 °C) ISO 2592

SECTION 10: Stability and reactivity

10.1. Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

10.2. Chemical stability Material is stable under normal conditions.

10.3. Possibility of hazardous reactions No dangerous reaction known under conditions of normal use.

10.4. Conditions to avoid Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.

10.5. Incompatible materials Strong oxidizing agents.

10.6. Hazardous decomposition products No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact Causes skin irritation. May cause an allergic skin reaction.

Eye contact Causes serious eye damage.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
4-AMINO-2-HYDROXYTOLUENE (CAS 2835-95-2)

Skin corrosion/irritation Causes skin irritation.

Irritation Corrosion - Skin

GLYCERYL LAURYL ETHER	OECD 404 Result: Corrosive Species: Rabbit
AMMONIUM THIOLACTATE	OECD 404 Result: Irritating Species: Rabbit
PEG-4 RAPESEEDAMIDE	OECD 404 Result: Irritating Species: Rabbit
ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit
M-AMINOPHENOL	OECD 404 Result: Not Irritating Species: Rabbit
LAURETH-5 CARBOXYLIC ACID	OECD 404 Result: Slightly Irritating Species: Rabbit

Irritation Corrosion - Skin

DECETH-3	OECD 404, Based on test data for structurally similar materials. Result: Slightly Irritating Species: Rabbit
HEXYLENE GLYCOL	OECD 405 Result: Slightly irritating Species: Rabbit
TOLUENE-2,5-DIAMINE	OECD 439 Result: Not Irritating Species: In vitro
4-AMINO-2-HYDROXYTOLUENE	OECD 439 Result: Not Irritating Species: RhE

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

LAURETH-5 CARBOXYLIC ACID	OECD 405 Result: Corrosive Species: Rabbit
TOLUENE-2,5-DIAMINE	OECD 405 Result: Corrosive Species: Rabbit
AMMONIUM THIOLACTATE	OECD 405 Result: Irritating Species: Rabbit
ETHANOL	OECD 405 Result: Irritating Species: Rabbit
M-AMINOPHENOL	OECD 405 Result: Not Irritating Species: Rabbit
HEXYLENE GLYCOL	OECD 405 Result: Slightly irritating Species: Rabbit
PEG-4 RAPESEEDAMIDE	OECD 405 Result: Slightly Irritating Species: Rabbit
4-AMINO-2-HYDROXYTOLUENE	OECD 492 Result: Not Irritating Species: RhCE
GLYCERYL LAURYL ETHER	Result: Corrosive
DECETH-3	Result: Corrosive Species: Rabbit
HEXYLENE GLYCOL	Result: Irritating Species: Human

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

AMMONIUM THIOLACTATE	OECD 406 Result: Equivocal Species: Guinea pig
ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig
GLYCERYL LAURYL ETHER	OECD 406 Result: Not Sensitizing Species: Guinea pig
HEXYLENE GLYCOL	OECD 406 Result: Not Sensitizing Species: Guinea pig
LAURETH-5 CARBOXYLIC ACID	OECD 406 Result: Not Sensitizing Species: Guinea pig
PEG-4 RAPESEEDAMIDE	OECD 406 Result: Not Sensitizing Species: Guinea pig
DECETH-3	OECD 406, Based on test data for structurally similar materials. Result: Not Sensitizing Species: Guinea pig

Skin sensitization

4-AMINO-2-HYDROXYTOLUENE	OECD 429 Result: Sensitizing Species: Mouse
M-AMINOPHENOL	OECD 429 Result: Sensitizing Species: Mouse
TOLUENE-2,5-DIAMINE	OECD 429 Result: Sensitizing Species: Mouse

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.
PEG-4 RAPESEEDAMIDE	Result: In vitro and in vivo tests did not show mutagenic effects.
AMMONIUM THIOLACTATE	Result: In vitro tests did not show mutagenic effects
DECETH-3	Result: In vitro tests did not show mutagenic effects
GLYCERYL LAURYL ETHER	Result: In vitro tests did not show mutagenic effects
HEXYLENE GLYCOL	Result: In vitro tests did not show mutagenic effects
LAURETH-5 CARBOXYLIC ACID	Result: In vitro tests did not show mutagenic effects
M-AMINOPHENOL	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
TOLUENE-2,5-DIAMINE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.
4-AMINO-2-HYDROXYTOLUENE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo tests.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

TOLUENE-2,5-DIAMINE (CAS 95-70-5)

IARC Monographs. Overall Evaluation of Carcinogenicity

TOLUENE-2,5-DIAMINE (CAS 95-70-5) 3 Not classifiable as to carcinogenicity to humans.

Slovenia. CMR. Protection of workers from exposure to carcinogen and mutagen agents (ULRS 101/2005, as amended)

TOLUENE-2,5-DIAMINE (CAS 95-70-5) Carcinogenic, Category 1B.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat
M-AMINOPHENOL	100 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
4-AMINO-2-HYDROXYTOLUENE	180 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
HEXYLENE GLYCOL	300 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
TOLUENE-2,5-DIAMINE	50 mg/kg bw/d OECD 414, Based on test data for structurally similar materials. Result: NOAEL Species: Rat
PEG-4 RAPESEEDAMIDE	500 mg/kg bw/d OECD 421, No effects on development Result: NOEL Species: Rat
GLYCERYL LAURYL ETHER	600 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Reproductivity

TOLUENE-2,5-DIAMINE	>= 45 mg/kg bw/d OECD 416, Based on test data for structurally similar materials. Result: NOAEL Species: Rat
HEXYLENE GLYCOL	1000 mg/kg bw/d OECD 421 Result: NOEL Species: Rat

Reproductivity

AMMONIUM THIOLACTATE	20 mg/kg bw/d OECD 416 Result: NOEL Species: Rat
4-AMINO-2-HYDROXYTOLUENE	200 mg/kg bw/d OECD 415 Result: NOAEL Species: Rat
ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat
PEG-4 RAPESEEDAMIDE	500 mg/kg bw/d OECD 421, No effects on fertility Result: NOEL Species: Rat
GLYCERYL LAURYL ETHER	600 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

TOLUENE-2,5-DIAMINE	10 mg/kg bw/d OECD 408, Oral Result: NOEAL Species: Rat Test Duration: 90 d
DECETH-3	100 mg/kg bw/d OECD 407, Based on test data for structurally similar materials. Result: NOAEL Species: Rat Test Duration: 28 d
GLYCERYL LAURYL ETHER	150 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 28 d
PEG-4 RAPESEEDAMIDE	150 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat
ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat
4-AMINO-2-HYDROXYTOLUENE	180 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
AMMONIUM THIOLACTATE	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 13 wk
M-AMINOPHENOL	20 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
HEXYLENE GLYCOL	450 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
4-AMINO-2-HYDROXYTOLUENE (CAS 2835-95-2)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	41 mg/l, 72 h OECD 201

Components		Species	Test Results
Crustacea	EC50	Daphnia magna	2,3 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	25 mg/l, 96 h OECD 236

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

4-AMINO-2-HYDROXYTOLUENE	0 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 28 d
AMMONIUM THIOLACTATE	14 % OECD 301 B Result: Not Readily Biodegradable Test Duration: 28 d
DECETH-3	78 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
ETHANOL	84 % Result: Readily Biodegradable Test Duration: 20 d
GLYCERYL LAURYL ETHER	88 % OECD 301 B Result: Readily Biodegradable
HEXYLENE GLYCOL	81 % OECD 301 F Result: Readily biodegradable Test Duration: 28 d
LAURETH-5 CARBOXYLIC ACID	78 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d

Biodegradability

Percent degradation (Aerobic biodegradation)

PEG-4 RAPESEEDAMIDE	96 % OECD 203 Result: Readily Biodegradable Test Duration: 28 d
TOLUENE-2,5-DIAMINE	17 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

4-AMINO-2-HYDROXYTOLUENE	-0,53 EU A,8 0,53 OECD 117
AMMONIUM THIOLACTATE	1,15 OECD 117
ETHANOL	-0,31
GLYCERYL LAURYL ETHER	3,79 - 4,25
M-AMINOPHENOL	0,21
PEG-4 RAPESEEDAMIDE	5
TOLUENE-2,5-DIAMINE	-0,321 OECD 107

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

TOLUENE-2,5-DIAMINE (CAS 95-70-5)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

ETHANOL (CAS 64-17-5)
M-AMINOPHENOL (CAS 591-27-5)
TOLUENE-2,5-DIAMINE (CAS 95-70-5)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H225 Highly flammable liquid and vapor. H290 May be corrosive to metals. H301 Toxic if swallowed. H302 Harmful if swallowed.

H312 Harmful in contact with skin.
H314 Causes severe skin burns and eye damage.
H315 Causes skin irritation.
H317 May cause an allergic skin reaction.
H318 Causes serious eye damage.
H319 Causes serious eye irritation.
H332 Harmful if inhaled.
H400 Very toxic to aquatic life.
H411 Toxic to aquatic life with long lasting effects.
H412 Harmful to aquatic life with long lasting effects.

Revision information None.

Training information Follow training instructions when handling this material.

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT DEMI-PERMANENT COLOR - GRUPO 5**

Otros medios de identificación

Número de FDS 30-21-0000291

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos	Líquidos inflamables	Categoría 3
Peligros para la salud	Corrosión/irritación cutánea	Categoría 2
	Lesiones oculares graves/irritación ocular	Categoría 1

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Peligro

Declaración de peligro Líquidos y vapores inflamables. Provoca irritación cutánea. Provoca lesiones oculares graves.

Consejos de prudencia

Prevención Mantener alejado de fuentes de calor, chispas, llama abierta o superficies calientes. - No fumar. Mantener el recipiente herméticamente cerrado. Conectar a tierra/enlace equipotencial del recipiente y del equipo de recepción. Utilizar un material eléctrico, de ventilación o de iluminación antideflagrante. Utilizar únicamente herramientas que no produzcan chispas. Tomar medidas de precaución contra descargas electrostáticas. Lavarse concienzudamente tras la manipulación. Llevar guantes protectores / protección ocular / protección facial.

Respuesta En caso de contacto con la piel (o el pelo): Quítense inmediatamente las prendas contaminadas. Aclárese la piel con agua o una ducha. En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. Llámese inmediatamente a un centro toxicológico o a un médico. En caso de irritación cutánea: Consultar a un médico. Quitar las prendas contaminadas y lavarlas antes de volver a usarlas. En caso de incendio: Utilizar medios apropiados para apagarlo.

Almacenamiento Almacenar en un lugar bien ventilado. Mantener en lugar fresco.

Eliminación Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%

4. Primeros auxilios

Inhalación
Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel
Quitar inmediatamente todas las prendas contaminadas. Aclararse la piel con agua/ducharse. En caso de irritación cutánea: Consultar a un médico. Lavar las prendas contaminadas antes de volver a usarlas.

Contacto con los ojos
Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Conseguir atención médica inmediatamente.

Ingestión
Enjuagarse la boca. Obtenga atención médica en caso de síntomas.

Principales síntomas y efectos, agudos y retardados
Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Podrían producirse daños oculares permanentes, incluso ceguera. Irritación de la piel. Puede causar enrojecimiento y dolor.

Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente
Provea las medidas de apoyo generales y de tratamiento sintomático. En caso de quemaduras térmicas: Enjuáguese inmediatamente con agua. Bajo el chorro de agua corriente, quítese la ropa que no esté pegada a la piel. Llame a una ambulancia. Continúe enjuagándose durante el transporte. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.

Información general
Quítese inmediatamente la ropa contaminada. Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.
Lavar las prendas contaminadas antes de volver a usarlas.

5. Medidas de lucha contra incendios

Medios de extinción apropiados
Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).

Medios de extinción no apropiados
No utilice chorro de agua, pues extendería el fuego.

Peligros específicos que presenta el producto químico
Los vapores pueden formar mezclas explosivas con el aire. Los vapores pueden desplazarse una distancia bastante larga hacia una fuente de ignición y dar lugar a retroceso de la llama. En caso de incendio se pueden formar gases nocivos.

Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios
Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.

Equipo/Instrucciones para la extinción de incendios
En caso de incendio y/o de explosión no respire los humos. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.

Métodos específicos
Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.

Riesgos generales de incendio
Líquidos y vapores inflamables.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia

Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Eliminar todas las fuentes de ignición (no fumar, teas, chispas ni llamas en los alrededores). Use equipo y ropa de protección apropiados durante la limpieza. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Ventilar los espacios cerrados antes de entrar. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.

Métodos y material de contención y de limpieza

Mantenga los materiales combustibles (madera, papel, petróleo, etc.) lejos del material derramado. Tomar medidas de precaución contra descargas electrostáticas. Utilizar únicamente herramientas que no produzcan chispas.

Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Usar un material no combustible como vermiculita, arena o tierra para absorber el producto y colocarlo en un recipiente para su eliminación posterior. Después de recuperar el producto, enjuague el área con agua.

Derrames pequeños: Absorba con tierra, arena y otro material no combustible y transfiera a recipientes para su posterior eliminación. Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación.

Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.

Precauciones relativas al medio ambiente

No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura

No manipule, almacene o abra cerca de llama abierta, fuentes de calor o fuentes de ignición. Proteja el material de la luz solar directa. No fumar durante su utilización. Ventilación de escape general y local a prueba de explosiones. Evítese la acumulación de cargas electroestáticas. Todo el equipo que se utiliza al manejar el producto debe estar conectado a tierra. Use herramientas que no produzcan chispas y un equipo a prueba de explosión. No poner este material en contacto con los ojos. Evítese el contacto con los ojos, la piel y la ropa. Evite la exposición prolongada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.

Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades

Guardar lejos del calor, las chispas o llamas desnudas. Guárdese en un lugar fresco y seco sin exposición a la luz solar directa. Almacenar en un recipiente herméticamente cerrado. Almacenar en un lugar bien ventilado. Manténgase fuera del alcance de los niños. Guardar en una zona equipada con extinctores automáticos. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Límites de exposición profesional

Los constituyentes siguientes son los únicos constituyentes del producto que tienen un PEL, TLV u otro límite de exposición recomendado. En este momento, los demás constituyentes no tienen límites de exposición conocidos.

EEUU. Administración de Seguridad y Salud Ocupacional (OSHA) Tabla Z-1 Límites para los contaminantes del aire (29 CFR 1910.1000)

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	Limite de Exposición Permisible (LEP)	1900 mg/m³
		1000 ppm

EE.UU. ACGIH Valores umbrales límite

Componentes	Tipo	Valor	Forma
ETANOL (CAS 64-17-5)	STEL	1000 ppm	
HEXYLENE GLYCOL (CAS 107-41-5)	STEL	10 mg/m³	Aerosol, inhalable.
		50 ppm	Fracción de vapor
	TWA	25 ppm	Fracción de vapor

EEUU. Instituto Nacional para la Seguridad y Salud Ocupacional (NIOSH): Guía de bolsillo sobre riesgos químicos

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	TWA	1900 mg/m³

EEUU. Instituto Nacional para la Seguridad y Salud Ocupacional (NIOSH): Guía de bolsillo sobre riesgos químicos

Componentes	Tipo	Valor
		1000 ppm
HEXYLENE GLYCOL (CAS 107-41-5)	Valor techo	125 mg/m³
		25 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Componentes	Tipo	Valor
TOLUENO -2,5-DIAMINA (CAS 95-70-5)	TWA	0.025 mg/m³
		0.005 ppm

Valores límite biológicos No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.

Pautas de exposición

US WEEL Guides: Denominación de la piel

TOLUENO -2,5-DIAMINA (CAS 95-70-5) Absorción potencial a través de la piel.

Controles técnicos apropiados Ventilación de escape general y local a prueba de explosiones. Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación de lavados de ojos y ducha de emergencia.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara De aplicación solamente en entornos industriales. Use gafas de seguridad con cubiertas laterales y pantalla facial.

Protección de la piel

Protección de las manos De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros De aplicación solamente en entornos industriales. Use ropa adecuada resistente a los productos químicos.

Protección respiratoria De aplicación solamente en entornos industriales. Si los controles de ingeniería no mantienen las concentraciones en el aire por debajo de los límites de exposición recomendados (cuando proceda) o a un nivel aceptable (en países donde no se hayan establecido límites de exposición), ha de utilizarse un respirador aprobado.

Peligros térmicos Use ropa protectora térmica adecuada si resulta necesario.

Consideraciones generales de higiene No fumar durante su utilización. Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto

Estado físico Líquido.

Color No disponible.

Olor No disponible.

Umbral olfativo No disponible.

pH 7.7 - 8.6

Punto de fusión/punto de congelación No disponible.

Punto inicial de ebullición e intervalo de ebullición > 100 °C (> 212 °F)

Punto de inflamación 48.0 °C (118.4 °F) Copa Cerrada

Tasa de evaporación No disponible.

Inflamabilidad (sólido, gas) No aplicable.

Límites superior/inferior de inflamabilidad o de explosividad

Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Punto de incendio	< 100.00 °C (< 212.00 °F) ISO 2592
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Evitar temperaturas por encima del punto de flash. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	La inhalación prolongada puede resultar nociva.
Contacto con la piel	Provoca irritación cutánea.
Contacto con los ojos	Provoca lesiones oculares graves.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Podrían producirse daños oculares permanentes, incluso ceguera. Irritación de la piel. Puede causar enrojecimiento y dolor.

Información sobre los efectos toxicológicos

Toxicidad aguda	Desconocido.

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

ETANOL	-0.31
GLYCERYL LAURYL ETHER	3.79 - 4.25
PEG-4 RAPESEEDAMIDE	5
TOLUENO -2,5-DIAMINA	-0.321 OECD 107

Bioacumulación

TOLUENO -2,5-DIAMINA	Resultado: La bioacumulación es improbable.

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Código de residuo peligroso Este producto es un residuo peligroso inflamable (D001) de acuerdo a RCRA cuando se intenta botar o destruir.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

Materials associated with this document meet the criteria for US Department of Transportation exemption found at 49 CFR 173.150(g).

Packages containing limited quantities of retail products in volumes in accordance with the tables listed below maybe offered under the conditions of the exemption.

US Domestic Transportation

Per 49 CFR 173.150(g) exemptions:

	>70% Ethyl Alcohol (v/v) (w/w)			
	Inner Packaging	Net Contents	Gross Weight	Marking

15. Información reglamentaria

reglamentación Federal de EE.UU. El producto es un "Producto químico peligroso" tal como lo define la Norma de comunicación de peligro OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

ETANOL (CAS 64-17-5)	Listado.
TOLUENO -2,5-DIAMINA (CAS 95-70-5)	Listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso No (Exempt)

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

Denominación química	Número CAS	% en peso.
TOLUENO -2,5-DIAMINA	95-70-5	≤ 0.1

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

No reglamentado.

Ley Safe Drinking Water Act (SDWA) No reglamentado.

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

ETANOL (CAS 64-17-5)	Low priority

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT DEMI-PERMANENT COLOR - Groupe 5**

Autres moyens d'identification

Numéro de la FDS 30-21-0000291

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques	Liquides inflammables	Catégorie 3
Dangers pour la santé	Corrosion cutanée/irritation cutanée	Catégorie 2
	Lésions oculaires graves/irritation oculaire	Catégorie 1

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Liquide et vapeur inflammables. Provoque une irritation cutanée. Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Tenir à lécart de la chaleur/des étincelles/des flammes nues/des surfaces chaudes. - Ne pas fumer. Maintenir le récipient fermé de manière étanche. Mettre à la terre/masse le récipient et l'équipement de réception. Utiliser du matériel électrique/de ventilation/d'éclairage antidéflagrant. Utiliser d'outils ne produisant pas des étincelles. Prendre des mesures de précaution contre les décharges électrostatiques. Se laver soigneusement après manipulation. Porter des gants de protection/un équipement de protection des yeux/du visage.

Intervention En contact avec la peau (ou les cheveux) : Retirer immédiatement tous les vêtements contaminés. Rincer la peau avec de l'eau/sous une douche. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation cutanée : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation. En cas d'incendie : utiliser un agent d'extinction approprié.

Stockage Stocker dans un endroit bien ventilé. Tenir au frais.

Élimination Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
ÉTHANOL		64-17-5	< 9
PEG-4 RAPESEEDAMIDE		85536-23-8	< 9
DECETH-3		66455-15-0	< 7
LAURETH-5 ACIDE CARBOXYLIQUE		27306-90-7	< 5
GLYCERYL LAURYL ETHER		9022-75-7	≤ 7
GLYCOL DE HEXYLENE		107-41-5	≤ 3
Alcool oléylique		68002-94-8	< 2
TOLUÈNE -2,5-DIAMINE		95-70-5	≤ 0.1

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Enlever immédiatement tous les vêtements contaminés. Rincer la peau à l'eau/se doucher. En cas d'irritation cutanée : Demander un avis médical/Consulter un médecin. Laver les vêtements contaminés avant réutilisation.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Brûlures thermiques : Rincer immédiatement avec de l'eau. Tout en rinçant, retirer les vêtements qui ne collent pas à la zone touchée. Appeler une ambulance. Continuer à rincer pendant le transport vers l'hôpital. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales Enlever immédiatement tous les vêtements contaminés. S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.
Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Les vapeurs peuvent former des mélanges explosifs avec l'air. Les vapeurs peuvent se déplacer sur une distance considérable jusqu'à une source d'ignition et provoquer un retour de flammes. Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies En cas d'incendie et/ou d'explosion ne pas respirer les fumées. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Liquide et vapeur inflammables.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence

Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Éliminer toutes les sources d'ignition (pas de cigarettes, de torches, d'étincelles ou de flammes dans la zone immédiate). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. Ventiler les espaces clos avant d'y entrer. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Prendre des mesures de précaution contre les décharges électrostatiques. Utiliser d'outils ne produisant pas des étincelles.

Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Utiliser un matériau non combustible comme la vermiculite, le sable ou la terre pour absorber le produit et le mettre dans un récipient pour élimination ultérieure. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Absorber avec de la terre, du sable ou une autre matière non combustible et transférer dans des contenants pour une élimination ultérieure. Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Ne pas manipuler, stocker ou ouvrir près d'une flamme nue, d'une source de chaleur ou d'autres sources d'ignition. Protéger le produit du rayonnement solaire direct. Ne pas fumer pendant l'utilisation. Ventilation par aspiration antidéflagrante locale et générale. Prendre des mesures de précaution contre les décharges électrostatiques. Tout matériel utilisé pour la manutention de ce produit doit être mis à la terre. Utiliser d'outils ne produisant pas d'étincelles et du matériel antidéflagrant. Éviter tout contact de ce produit avec les yeux. Éviter tout contact avec les yeux, la peau et les vêtements. Éviter une exposition prolongée. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Tenir à l'écart de la chaleur, des étincelles et des flammes nues. Stocker dans un endroit frais et sec, à l'écart de la lumière solaire directe. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Tenir hors de la portée des enfants. Conserver dans un endroit muni de gicleurs. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	PEL (limite d'exposition admissible)	1900 mg/m3
		1000 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur	Forme
ÉTHANOL (CAS 64-17-5)	STEL	1000 ppm	
GLYCOL DE HEXYLENE (CAS 107-41-5)	STEL	10 mg/m3	Aérosol, inhalable.
		50 ppm	Fraction vapeur
	TWA	25 ppm	Fraction vapeur

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	TWA	1900 mg/m3

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
		1000 ppm
GLYCOL DE HEXYLENE (CAS 107-41-5)	Plafond	125 mg/m3
		25 ppm

États-Unis. Guides WEEL (niveau d'exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
TOLUÈNE -2,5-DIAMINE (CAS 95-70-5)	TWA	0.025 mg/m3
		0.005 ppm

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Directives au sujet de l'exposition

États-Unis - Guides WEEL : Désignation cutanée

TOLUÈNE -2,5-DIAMINE (CAS 95-70-5) Peut être absorbé par la peau.

Contrôles d'ingénierie appropriés Ventilation par aspiration antidéflagrante locale et générale. Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. Si les contrôles d'ingénierie ne maintiennent pas les concentrations atmosphériques sous les limites d'exposition recommandées (lorsqu'il y a lieu) ou à un taux acceptable (dans les pays où des limites d'exposition n'ont pas été établies), un respirateur homologué doit être porté

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Couleur Non disponible.

Odeur Non disponible.

Seuil olfactif Non disponible.

pH 7.7 - 8.6

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 100 °C (> 212 °F)

Point d'éclair 48.0 °C (118.4 °F) Coupelle fermée

Taux d'évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d'inflammabilité ou d'explosibilité

Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Point de feu	< 100.00 °C (< 212.00 °F) ISO 2592
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Éviter les températures supérieures au point d'éclair. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	Provoque une irritation cutanée.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Irritation de la peau. Peut provoquer des rougeurs et des douleurs.

Renseignements sur les effets toxicologiques

PEG-4 RAPESEEDAMIDE	500 mg/kg bw/d OCDE 421, Pas d'effets sur la fertilité Résultat: DSEO Espèces: Rat
GLYCERYL LAURYL ETHER	600 mg/kg bw/d OCDE 421 Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

TOLUÈNE -2,5-DIAMINE	10 mg/kg bw/d OCDE 408, Orale Résultat: NOEAL Espèces: Rat Durée du test: 90 d
DECETH-3	100 mg/kg bw/d OCDE 407, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: DSENO Espèces: Rat Durée du test: 28 d
GLYCERYL LAURYL ETHER	150 mg/kg bw/d OCDE 407 Résultat: DSENO Espèces: Rat Durée du test: 28 d
PEG-4 RAPESEEDAMIDE	150 mg/kg bw/d OCDE 407, Orale Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - expositions répétées

ÉTHANOL	1730 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat
GLYCOL DE HEXYLENE	450 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

Alcool oléylique	87 % OECD 301 D Résultat: Difficilement Biodégradable Durée du test: 28 d
DECETH-3	78 % OCDE 301 B Résultat: Facilement Biodegradable Durée du test: 28 d
ÉTHANOL	84 % Résultat: Facilement Biodegradable Durée du test: 20 d
GLYCERYL LAURYL ETHER	88 % OCDE 301 B Résultat: Facilement Biodegradable
GLYCOL DE HEXYLENE	81 % OECD 301 F Résultat: Facilement Biodegradable Durée du test: 28 d
LAURETH-5 ACIDE CARBOXYLIQUE	78 % OCDE 301 B Résultat: Facilement Biodegradable Durée du test: 28 d
PEG-4 RAPESEEDAMIDE	96 % OCDE 203 Résultat: Facilement Biodegradable Durée du test: 28 d
TOLUÈNE -2,5-DIAMINE	17 % OECD 301 D Résultat: Difficilement Biodégradable Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

ÉTHANOL	-0.31
GLYCERYL LAURYL ETHER	3.79 - 4.25
PEG-4 RAPESEEDAMIDE	5
TOLUÈNE -2,5-DIAMINE	-0.321 OECD 107

Bioaccumulation

TOLUÈNE -2,5-DIAMINE	Résultat: Une bioaccumulation est peu probable.

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Code des déchets dangereux Ce produit est inflammable (D001), utilisez le RCRA matières dangereuses lors de l'élimination.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

Materials associated with this document meet the criteria for US Department of Transportation exemption found at 49 CFR 173.150(g).

Packages containing limited quantities of retail products in volumes in accordance with the tables listed below maybe offered under the conditions of the exemption.

US Domestic Transportation

Per 49 CFR 173.150(g) exemptions:

	>70% Ethyl Alcohol (v/v) (w/w)			
	Inner Packaging	Net Contents	Gross Weight	Marking
Liquids	8 fl. oz.	192 fl. oz.	65 lbs.	None
	≤70% Ethyl Alcohol (v/v) (w/w)			
Liquids (glass)	8 fl. oz.	192 fl. oz.	65 lbs.	None
	16 fl. oz.	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
Liquids (non-glass)	16 fl. oz.	192 fl. oz.	65 lbs.	None
	1 gallon	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
	General Conditions			
	Inner packagings must be secured and cushioned within the outer package to prevent breakage, leakage and movement.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

ÉTHANOL (CAS 64-17-5)	Inscrit.
TOLUÈNE -2,5-DIAMINE (CAS 95-70-5)	Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Dénomination chimique	Numéro d'enregistreme	% en poids.
TOLUÈNE -2,5-DIAMINE	95-70-5	≤ 0.1

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

ÉTHANOL (CAS 64-17-5)	Faible priorité

Avis de non-responsabilité

À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT DEMI-PERMANENT COLOR - GRUPPO 5
Sinonimi	Nessuno.
Numero SDS	30-21-0000291
Data di pubblicazione	11-Maggio-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli fisici		
Liquidi infiammabili	Categoria 3	H226 - Liquido e vapori infiammabili.
Pericoli per la salute		
Corrosione cutanea/irritazione cutanea	Categoria 2	H315 - Provoca irritazione cutanea.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.
Pericoli per l'ambiente		
Pericoloso per l'ambiente acquatico, pericolo acquatico a lungo termine	Categoria 3	H412 - Nocivo per gli organismi acquatici con effetti di lunga durata.

Riepilogo dei pericoli

Può essere acceso con calore, scintilla o fiamma. Provoca gravi lesioni oculari. Provoca irritazione cutanea. Pericoloso per l'ambiente se scaricato nei corsi d'acqua. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene: DECETH-3, GLYCERYL LAURYL ETHER, LAURETH-5 ACIDO CARBOSSILICO

Pittogrammi di pericolo

Avvertenza Pericolo

Indicazioni di pericolo

H226	Liquido e vapori infiammabili.
H315	Provoca irritazione cutanea.
H318	Provoca gravi lesioni oculari.
H412	Nocivo per gli organismi acquatici con effetti di lunga durata.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P210	Tenere lontano da fonti di calore, superfici calde, scintille, fiamme libere o altre fonti di accensione. Non fumare.
P233	Tenere il recipiente ben chiuso.
P240	Mettere a terra e a massa il contenitore e il dispositivo ricevente.
P241	Utilizzare impianti elettrici/di ventilazione/d'illuminazione a prova di esplosione.
P242	Utilizzare utensili antiscintillamento.
P243	Fare in modo di prevenire le scariche elettrostatiche.
P260	Non respirare il vapore.
P264	Lavare attentamente dopo l'uso.
P273	Non disperdere nell'ambiente.
P280	Indossare guanti/indumenti protettivi/Proteggere gli occhi/il viso.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P303 + P361 + P353	IN CASO DI CONTATTO CON LA PELLE (o con i capelli): Togliere immediatamente tutti gli indumenti contaminati. Sciacquare la pelle.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P332 + P313	In caso di irritazione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.
P370 + P378	In caso di incendio: estinguere con mezzi adeguati.

Immagazzinamento

P403 + P235	Conservare in luogo fresco e ben ventilato.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette

La miscela contiene il 11,8 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico. La miscela contiene il 21 % di componenti di cui è ignoto il pericolo a lungo termine per l'ambiente acquatico. EUH208 - Contiene AMMONIUM THIOLACTATE, TOLUENE-2,5-DIAMMINA, M-AMINOFENOLO, 4-AMINO-2-HYDROXYTOLUENE. Può provocare una reazione allergica.

2.3. Altri pericoli Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Togliere immediatamente tutti gli indumenti contaminati. Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi.
Lavare gli indumenti contaminati prima di indossarli nuovamente.

4.1. Descrizione delle misure di primo soccorso

Inalazione Muovere all'aria fresca. Chiamare un medico se i sintomi compaiono o sono persistenti.

Cutanea Togliere immediatamente tutti gli indumenti contaminati. Sciacquare la pelle/fare una doccia. In caso di irritazione della pelle: consultare un medico. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico.

Ingestione Sciacquare la bocca. Contattare un medico se si verificano dei sintomi.

4.2. Principali sintomi ed effetti, sia acuti che ritardati Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.)

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Ustioni: sciacquare immediatamente con acqua. Continuando a sciacquare, togliere di dosso gli indumenti che non sono attaccati alla pelle lesa. Chiamare un'ambulanza e continuare a sciacquare durante il trasporto in ospedale. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio Liquido e vapori infiammabili.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei Nebbia d'acqua. Schiuma. Sostanza chimica secca in polvere. Anidride carbonica (CO2).

Mezzi di estinzione non idonei Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela Essi possono formare miscele explosive con l'aria. I vapori possono percorrere distanze notevoli dalla fonte di incendio e ritornare. In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi In caso d'incendio indossare autorespiratore e indumenti protettivi completi.

Procedure speciali per l'estinzione degli incendi In caso d'incendio e/o esplosione non respirare i fumi. Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi.

Metodi specifici Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Eliminare tutte le fonti di accensione (non fumare, evitare scintille, razzi, torce o fiamme nelle aree circostanti). Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Ventilare gli spazi chiusi prima di entrare. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.

Per chi interviene direttamente Allontanare il personale non necessario. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS

6.2. Precauzioni ambientali Non disperdere nell'ambiente. Informare il personale di gestione o di supervisione di tutte le emissioni nell'ambiente. Evitare sversamenti o perdite supplementari, se questo può essere fatto senza pericolo. Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.

6.3. Metodi e materiali per il contenimento e per la bonifica Tenere i materiali combustibili (legno, carta, olio, ecc.) lontano dal materiale fuoriuscito. Prendere precauzioni contro le scariche elettrostatiche. Utilizzare solo utensili antiscintillamento. Non scaricare il prodotto nelle fogne.

Versamenti di grandi dimensioni: Fermare il flusso del materiale, se ciò è possibile senza rischio. Arginare il materiale riversato, qualora sia possibile. Utilizzare un materiale non combustibile (ad esempio vermiculite, sabbia o terra) per assorbire il prodotto e riporlo in un contenitore per il successivo smaltimento. Una volta recuperato il prodotto, sciacquare l'area con acqua.

Versamenti di piccole dimensioni: Assorbire/raccogliere con terra, sabbia o altro materiale non infiammabile e trasferire in contenitori per il successivo smaltimento. Asciugare con materiale assorbente (es. panno, strofinaccio). Pulire completamente la superficie per rimuovere completamente la contaminazione residua.

Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo

6.4. Riferimento ad altre sezioni Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura Non maneggiare, stoccare o aprire in prossimità di fiamme libere, fonti di calore o accensione. Proteggere il materiale dalla luce diretta. Non fumare durante l'impiego. Ventilazione di scarico localizzata e generale a prova di esplosione Evitare l'accumulo di cariche elettrostatiche. Tutte le apparecchiature usate durante la manipolazione del prodotto devono essere adeguatamente messe a terra. Usare strumenti che non generano scintille e apparecchiature a prova di esplosione. Non respirare il vapore. Non permettere che questo materiale vada a contatto con gli occhi. Evitare il contatto con gli occhi, con la pelle e con gli indumenti. Evitare l'esposizione prolungata. Indossare attrezzature di protezione personale adeguate. Non disperdere nell'ambiente. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità Conservare lontano da calore, scintille e fiamme libere. Conservare in un luogo fresco e asciutto, lontano dalla luce diretta del sole. Conservare in un recipiente ermeticamente chiuso. Conservare in luogo ben ventilato. Conservare fuori della portata dei bambini. Tenere in un'area provvista di sistemi antincendio sprinkler. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari Non conosciuto.

SEZIONE 8: Controllo dell’esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore	Forma
ETANOLO (CAS 64-17-5)	Breve termine	1000 ppm	
METIL-2,4-PENTANDIOLO (CAS 107-41-5)	8 ore	25 ppm	Frazione di vapore
	Breve termine	10 mg/m3	Aerosol, inhalable.
		50 ppm	Frazione di vapore

Valori limite biologici Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate Seguire le procedure standard di monitoraggio.

Livelli derivati senza effetto (DNEL) Non conosciuto.

Prevedibili concentrazioni prive di effetti (PNEC) Non conosciuto.

8.2. Controlli dell’esposizione

Controlli tecnici idonei Ventilazione di scarico localizzata e generale a prova di esplosione È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Installare un posto di lavaggio oculare e una doccia di sicurezza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali Utilizzare il dispositivo di protezione individuale richiesto. L’attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell’attrezzatura protettiva personale.

Protezione degli occhi/del volto Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura).

Protezione della pelle

- Protezione delle mani Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici.

- Altro Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici.

Protezione respiratoria Applicabile soltanto per gli impianti industriali. Se i controlli ingegneristici non mantengono le concentrazioni di polveri emesse nell'aria sotto i limiti di esposizione consigliati (se possibile) o sotto un livello accettabile (nei paesi in cui i limiti di esposizione non sono stati definiti), occorre un respiratore approvato.

Pericoli termici Indossare opportuni indumenti termoprotettivi, quando necessario.

Misure d’igiene Non fumare durante l'impiego. Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti.

Controlli dell’esposizione ambientale Informare il personale di gestione o di supervisione di tutte le emissioni nell’ambiente.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto

Stato fisico Liquido.

Forma Non conosciuto.

Colore Non conosciuto.

Odore Non conosciuto.

Soglia olfattiva Non conosciuto.

pH 7,7 - 8,6

Punto di fusione/punto di congelamento Non conosciuto.

Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	48,0 °C (118,4 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non applicabile.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.
Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Non ossidante.
9.2. Altre informazioni	
Punto incendio	< 100,00 °C (< 212,00 °F) ISO 2592

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Il prodotto è stabile e non reattivo nelle normali condizioni d'uso, conservazione e trasporto.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Evitare temperature superiori al punto di infiammabilità. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Forti agenti ossidanti.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.
Informazioni sulle vie probabili di esposizione	
Inalazione	L'inalazione prolungata può essere nociva.
Cutanea	Provoca irritazione cutanea. Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca gravi lesioni oculari.
Ingestione	In caso di ingestione può provocare malessere. Tuttavia, è improbabile che l'ingestione rappresenti una via primaria di esposizione professionale.
Sintomi	Grave irritazione agli occhi. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Irritazione cutanea. Può causare rossore e dolore.)

11.1. Informazioni sugli effetti tossicologici

Tossicità acuta Non conosciuto.

12.2. Persistenza e degradabilità

Biodegradabilità

Percentuale di degradazione (biodegradazione aerobica)

4-AMINO-2-HYDROXYTOLUENE	0 % OECD 301 B Risultato: Not Readily Biodegradable Durata del test: 28 d
AMMONIUM THIOLACTATE	14 % OECD 301 B Risultato: Not Readily Biodegradable Durata del test: 28 d
DECETH-3	78 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
ETANOLO	84 % Risultato: Rapidamente biodegradabile Durata del test: 20 d
GLYCERYL LAURYL ETHER	88 % OECD 301 B Risultato: Rapidamente biodegradabile
LAURETH-5 ACIDO CARBOSSILICO	78 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d
METIL-2,4-PENTANDIOLO	81 % OECD 301 F Risultato: Rapidamente biodegradabile Durata del test: 28 d
PEG-4 RAPESEEDAMIDE	96 % OCSE 203 Risultato: Rapidamente biodegradabile Durata del test: 28 d
TOLUENE-2,5-DIAMMINA	17 % OECD 301 D Risultato: Not Readily Biodegradable Durata del test: 28 d

12.3. Potenziale di bioaccumulo

Coefficiente di partizione n-ottanolo/acqua (log Kow)

4-AMINO-2-HYDROXYTOLUENE	-0,53 EU A,8 0,53 OECD 117
AMMONIUM THIOLACTATE	1,15 OECD 117
ETANOLO	-0,31
GLYCERYL LAURYL ETHER	3,79 - 4,25
M-AMINOFENOLO	0,21
PEG-4 RAPESEEDAMIDE	5
TOLUENE-2,5-DIAMMINA	-0,321 OECD 107

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.

12.7. Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui	Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).
Imballaggi contaminati	Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.
Codice Europeo dei Rifiuti	Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.
Metodi di smaltimento/informazioni	Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Impedire a questo prodotto di penetrare nelle fogne e nelle riserve d'acqua. Non contaminare stagni, canali o fossati con il prodotto chimico o il contenitore usato. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.
Precauzioni particolari	Smaltire secondo le norme applicabili.

SEZIONE 15: Informazioni sulla regolamentazione

15.1. Disposizioni legislative e regolamentari su salute, sicurezza e ambiente specifiche per la sostanza o la miscela

Regolamenti UE

Regolamento (CE) n. 1005/2009 sulle sostanze che riducono lo strato di ozono, Allegato I e II e successive modifiche

Non listato.

Regolamento (CE) n. 850/2004 relativo agli inquinanti organici persistenti, Allegato I e successivi adeguamenti

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 1 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 2 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 3 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato V e successive modifiche

Non listato.

Regolamento (CE) n. 166/2006 Allegato II Registro delle emissioni e dei trasferimenti di sostanze inquinanti e successive modifiche

Non listato.

Regolamento (CE) n. 1907/2006, REACH, Articolo 59(10), Elenco di sostanze candidate così come attualmente pubblicato dall'Agenzia europea per le sostanze chimiche (ECHA)

Non listato.

Autorizzazioni

Regolamento (CE) n. 1907/2006, REACH Allegato XIV - Sostanze soggette ad autorizzazione, modificata

Non listato.

Restrizioni d'uso

Regolamento (CE) n. 1907/2006, REACH Allegato XVII, Sostanze soggette a restrizioni in materia di immissione sul mercato e di uso e successivi adeguamenti

TOLUENE-2,5-DIAMMINA (CAS 95-70-5)

Direttiva 2004/37/CE: sulla protezione dei lavoratori contro i rischi derivanti da un'esposizione ad agenti cancerogeni e mutageni durante il lavoro e successive modifiche

Non listato.

Altri regolamenti UE

Direttiva 2012/18/UE sugli incidenti rilevanti connessi con determinate sostanze pericolose e successive modifiche

ETANOLO (CAS 64-17-5)
M-AMINOFENOLO (CAS 591-27-5)
TOLUENE-2,5-DIAMMINA (CAS 95-70-5)

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.
Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H225 Liquido e vapori facilmente infiammabili. H290 Può essere corrosivo per i metalli. H301 Tossico se ingerito. H302 Nocivo se ingerito. H312 Nocivo per contatto con la pelle. H314 Provoca gravi ustioni cutanee e gravi lesioni oculari. H315 Provoca irritazione cutanea. H317 Può provocare una reazione allergica cutanea. H318 Provoca gravi lesioni oculari. H319 Provoca grave irritazione oculare. H332 Nocivo se inalato. H400 Molto tossico per gli organismi acquatici. H411 Tossico per gli organismi acquatici con effetti di lunga durata. H412 Nocivo per gli organismi acquatici con effetti di lunga durata.
Informazioni di revisione	Prodotto e la Società Identificazione: Tipi di materiale COMPOSIZIONE/INFORMAZIONI SUGLI INGREDIENTI: Ingredienti Proprietà fisiche e chimiche: Proprietà multiple Informazioni sul trasporto : Product Shipping Name/Packing Group GHS: Classificazione
Informazioni formative	Seguire le istruzioni di formazione durante la manipolazione di questo materiale.

Clausole di esclusione della responsabilità

Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT DEMI-PERMANENT COLOR - 组 5

鉴别的其他方法

SDS编号 30-21-0000291

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险	易燃液体	类别 3
健康危害	皮肤腐蚀/刺激	类别 2
	严重眼睛损伤/眼睛刺激性	类别 1

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 易燃液体和蒸气。 造成皮肤刺激。 造成严重眼损伤。

防范说明

预防措施 远离热源/火花/明火/热表面。- 禁止吸烟。 保持容器密闭。 容器和接收设备接地/等势联接。 使用防爆的电气/通风照明/设备。 只能使用不产生火花的工具。 采取防止静电放电的措施。 作业后彻底清洗。 戴防护手套/防护眼罩/防护面具。

事故响应 如皮肤(或头发)沾染：立即去除/脱掉所有沾染的衣服。用水清洗皮肤/淋浴。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。 如发生皮肤刺激：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。 火灾时：使用适当的介质灭火。

安全储存 存放在通风良好的地方。保持低温。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
乙醇		64-17-5	< 9
PEG-4 RAPESEEDAMIDE		85536-23-8	< 9
DECETH-3		66455-15-0	< 7

化学名称	通用名称和别名	登记号(CAS号)	%
LAURETH-5 羧酸		27306-90-7	< 5
GLYCERYL LAURYL ETHER		9022-75-7	≤ 7
己二醇		107-41-5	≤ 3
OLEYL ALCOHOL		68002-94-8	< 2
甲苯 -2,5-二胺		95-70-5	≤ 0.1

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入
移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触
立刻脱掉所有沾染的衣服。 用水清洗皮肤/淋浴。 如发生皮肤刺激：求医/就诊。 沾染的衣服清洗后方可重新使用。

眼睛接触
立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即就医。

经口
漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性
严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。

指明任何需要立即就医或特殊治疗的情况
提供一般支持措施，并根据症状进行治疗。 烧伤：立即用水冲洗。冲洗时脱掉没有粘住烧伤部位的衣服。呼叫救护车。在送往医院的途中需继续冲洗烧伤部位。 观察患者。 症状可能会延后发生。

一般信息
立即脱掉所有污染的衣服。 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。沾染的衣服清洗后方可重新使用。

5. 消防措施

合适的灭火剂
水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质
禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害
蒸汽可能与空气形成爆炸性的混合物。 蒸气可能飘散一定距离接触点火源并导致回闪。 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施
发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明
一旦发生火灾和/或爆炸，不得吸入烟气。 在不会发生危险的情况下将容器撤离火灾现场。

特定的方法
采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险
易燃液体和蒸气。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序
让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 消除所有的点火源（在邻近区域严禁吸烟、火苗、火花或火焰）。 清洁时，戴合适防护设备和衣物。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 进入封闭空间前先通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料
使可燃物（木材、纸张、油等）远离泄漏物。 采取防止静电放电的措施。 只能使用不产生火花的工具。

大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 使用如蛭石、沙或土等非可燃性材料来吸收产品，并放入容器中以便之后进行处理。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用泥土、沙子或其它不燃材料吸收，并转移到容器内待以后处置。 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施
防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项
禁止在明火、热源或点火源附近操作、存放或打开。保护物料免受阳光直接照射。 使用时严禁吸烟。 防爆型全面通风和局部通风。 对静电采取预防措施。 在操作处置产品时，使用的所有设备必须接地。 使用不产生火花的工具和防爆设备。 不得让本材料接触眼睛。 避免接触眼睛、皮肤和衣物。 避免长期暴露。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物
远离热源、火花和明火。 储存于阴凉、干燥的场所，远离直接日光光照。 储存在密闭的容器中。存放在通风良好的地方。 避免儿童触及。 保存在装备有喷淋设备的地方。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
乙醇 (CAS 64-17-5)	PEL-常期暴露极限	1900 mg/m3
		1000 ppm

美国ACGIH阈限值

组分	类型	标准值	形状
乙醇 (CAS 64-17-5)	短期暴露极限（STEL）	1000 ppm	
己二醇 (CAS 107-41-5)	TWA	25 ppm	蒸汽馏分
	短期暴露极限（STEL）	10 mg/m3	气溶胶 , inhalable.
		50 ppm	蒸汽馏分

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
乙醇 (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm
己二醇 (CAS 107-41-5)	Ceiling	125 mg/m3
		25 ppm

美国工作场所环境暴露水平（WEEL）指南

组分	类型	标准值
甲苯 -2,5-二胺 (CAS 95-70-5)	TWA	0.025 mg/m3
		0.005 ppm

生物限值 没有该成分的生物接触限值。

暴露指南

US WEEL Guides: 皮肤标示

甲苯 -2,5-二胺 (CAS 95-70-5) 可经完整的皮肤吸收

适当的技术控制 防爆型全面通风和局部通风。 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼和安全淋浴设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 佩戴带侧边的安全眼镜（护目镜）和面罩。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。

呼吸系统防护 仅用於工业环境。 如果工程工致措施不能维持空气中的浓度低于推荐的接触限值（如建立）或可接受的水平（未建立接触限值的国家），必须佩戴许可的呼吸器。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 使用时严禁吸烟。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状 液体。

颜色 无资料。

气味 无资料。

气味阈值 无资料。

pH 值 7.7 - 8.6

熔点/凝固点 无资料。

初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	48.0 ° C (118.4 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
燃点	< 100.00 ° C (< 212.00 ° F) ISO 2592
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 避免温度超過閃火點温度。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	造成皮肤刺激。
眼睛接触	造成严重眼损伤。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 皮肤刺激。 可能导致红肿和疼痛。

毒理学效应信息

急性毒性 未知。

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

甲苯 -2,5-二胺	10 mg/kg bw/d OECD 408, 经口 结果: NOEAL 物种: 大鼠 测试时间: 90 D
DECETH-3	100 mg/kg bw/d OECD 407, 根据结构相似材料的试验数据。 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 28 D
GLYCERYL LAURYL ETHER	150 mg/kg bw/d OECD 407 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 28 D
PEG-4 RAPESEEDAMIDE	150 mg/kg bw/d OECD 407, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
乙醇	1730 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
己二醇	450 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
DECETH-3 (CAS 66455-15-0)			
水生的			
急性的			
其它的, 其它	EC0	以国内污水为主的活性污泥	140 mg/l, 3 h 88/302/EG
甲壳纲动物	EC50	水蚤	0.39 mg/l, 48 h 92/69/EWG
藻类	EC50	Desmodesmus subspicatus	1.8 mg/l, 72 h 92/69/EWG
鱼	LC50	鲤鱼	1.2 mg/l, 96 h EU C.1
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	<= 1 mg/l, 21 D

组分		物种	试验结果
鱼	无明显反应浓度（NOEC）	蓝鳃太阳鱼	0.16 mg/l, 10 D

GLYCERYL LAURYL ETHER (CAS 9022-75-7)

水生的

急性的

其它的, 其它	EC50	以国内污水为主的活性污泥	31.6 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.875 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	1.11 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	1.61 mg/l, 96 h OECD 203

慢性的

甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.036 mg/l, 21 D OECD 211
鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	0.086 mg/l, 30 D OECD 210

LAURETH-5 羧酸 (CAS 27306-90-7)

水生的

急性的

鱼	LC50	虹鳟鱼	7.5 mg/l, 96 h

OLEYL ALCOHOL (CAS 68002-94-8)

水生的

急性的

藻类	EC50	藻类	250 mg/l OECD 201
鱼	LC50	鱼	> 1000 mg/l OECD 203

PEG-4 RAPESEEDAMIDE (CAS 85536-23-8)

水生的

急性的

其它的, 其它	EC50	以国内污水为主的活性污泥	> 1000 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	3.8 mg/l, 48 h OECD 202
藻类	EC50	Desmodesmus subspicatus	410 mg/l, 72 h OECD 201
鱼	LC50	虹鳟鱼	2.9 mg/l, 96 h OECD 203

慢性的

甲壳纲动物	无明显反应浓度（NOEC）	水蚤	0.39 mg/l, 21 D OECD 211

乙醇 (CAS 64-17-5)

水生的

急性的

其它的, 其它	IC50	以国内污水为主的活性污泥	> 1000 mg/l, 3 h
甲壳纲动物	EC50	网纹水蚤	5012 mg/l, 48 h
藻类	EC50	近头状伪蹄形藻	22200 mg/l, 96 h
鱼	LC50	呆鲦鱼	15300 mg/l, 96 h

慢性的

甲壳纲动物	无明显反应浓度（NOEC）	水蚤	9.6 mg/l, 9 D
鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	250 mg/l, 120 h OECD 212

己二醇 (CAS 107-41-5)

水生的

急性的

其它的, 其它	无明显反应浓度（NOEC）	Pseudomonas aeruginosa	200 mg/l, 10 天
甲壳纲动物	EC50	水蚤	5410 mg/l, 48 小时 OECD 202

组分		物种	试验结果
藻类	EC50	近头状伪蹄形藻	> 429 mg/l, 72 小时 OECD 201
鱼	LC50	呆鲦鱼	10700 mg/l, 96 小时 OECD 203

甲苯 -2,5-二胺 (CAS 95-70-5)

水生的

急性的

其它的, 其它	EC50	以国内污水为主的活性污泥	3.75 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	0.491 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	1.02 mg/l, 72 h OECD 201
鱼	LC50	Oryzias latipes	0.05 mg/l, 96 h OECD 203

慢性的

藻类	无明显反应浓度（NOEC）	近头状伪蹄形藻	0.11 mg/l, 72 h OECD 201

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

DECETH-3	78 % OECD 301 B 结果: 易生物降解 测试时间: 28 D
GLYCERYL LAURYL ETHER	88 % OECD 301 B 结果: 易生物降解
LAURETH-5 羧酸	78 % OECD 301 B 结果: 易生物降解 测试时间: 28 D
OLEYL ALCOHOL	87 % OECD 301 D 结果: 不容易生物降解 测试时间: 28 D
PEG-4 RAPESEEDAMIDE	96 % OECD 203 结果: 易生物降解 测试时间: 28 D
乙醇	84 % 结果: 易生物降解 测试时间: 20 D
己二醇	81 % OECD 301 F 结果: 易生物降解 测试时间: 28 D
甲苯 -2,5-二胺	17 % OECD 301 D 结果: 不容易生物降解 测试时间: 28 D

潜在的生物累积性

辛醇/水分配系数 log Kow

GLYCERYL LAURYL ETHER	3.79 - 4.25
PEG-4 RAPESEEDAMIDE	5
乙醇	-0.31
甲苯 -2,5-二胺	-0.321 OECD 107

生物积累性

甲苯 -2,5-二胺	结果: 不一定是生物积累性的。

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

有害废物代码 本产品在处置时是可燃的（D001）RCRA危险废物.

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

DOT

Materials associated with this document meet the criteria for US Department of Transportation exemption found at 49 CFR 173.150(g).

Packages containing limited quantities of retail products in volumes in accordance with the tables listed below maybe offered under the conditions of the exemption.

US Domestic Transportation

Per 49 CFR 173.150(g) exemptions:

	Inner Packaging	Net Contents	Gross Weight	Marking
	>70% Ethyl Alcohol (v/v) (w/w)			
Liquids	8 fl. oz.	192 fl. oz.	65 lbs.	None
	≤70% Ethyl Alcohol (v/v) (w/w)			
Liquids (glass)	8 fl. oz.	192 fl. oz.	65 lbs.	None
	16 fl. oz.	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
Liquids (non-glass)	16 fl. oz.	192 fl. oz.	65 lbs.	None
	1 gallon	192 fl. oz.	65 lbs.	Contains Ethyl Alcohol
	General Conditions			
	Inner packagings must be secured and cushioned within the outer package to prevent breakage, leakage and movement.

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

乙醇 (CAS 64-17-5)	适用。
甲苯 -2,5-二胺 (CAS 95-70-5)	适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

化学名称	登记号(CAS号)	% by wt.
甲苯 -2,5-二胺	95-70-5	≤ 0.1

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

乙醇 (CAS 64-17-5) Low priority

16. 其他信息，包括编制日期或最新修订日期

最初编制日期	04-十二月-2020
版本号	01
NFPA分级	健康 3 可燃性 2 不稳定性: 0
免责声明	这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT 10 VOLUME DEVELOPER**

Other means of identification

SDS number 00-26-0000065

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word None.

Hazard statement The mixture does not meet the criteria for classification.

Precautionary statement

Prevention Observe good industrial hygiene practices.

Response Wash hands after handling.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
HYDROGEN PEROXIDE		7722-84-1	3

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed	Not available.
Indication of immediate medical attention and special treatment needed	Treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Avoid prolonged exposure. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	PEL	1.4 mg/m3
		1 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1.4 mg/m3

US. NIOSH: Pocket Guide to Chemical Hazards		
Components	**Type**	**Value**
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 2 - 2.4

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C)

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature Not available.

Decomposition temperature Not available.

Viscosity Not available.

Other information

Density 0.93 - 0.99 g/cm3

Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 10 VOLUME DEVELOPER		
Acute		
Inhalation		
Vapor

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE	OECD 404, 35% ≥ C < 50% Result: Irritating Species: Rabbit OECD 404, C ≥ 50% Result: Corrosive Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE

OECD 405, 5% ≥ C < 8%
Result: Irritating
Species: Rabbit
OECD 405, C ≥ 8%
Result: Corrosive
Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE

Result: Not Sensitizing
Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE

Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1) 3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE

0, C ≥ 35%
Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE

2.9 mg/L air OECD 412, Inhalation
Result: NOAEL
Species: Rat
Test Duration: 28 d
26 mg/kg bw/d OECD 408, Oral
Result: NOAEL
Species: Mouse
Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2.5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2.4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16.4 mg/l, 96 h

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE — 99 % OECD 209
Result: Readily Biodegradable

Bioaccumulative potential

Mobility in soil — No data available.

Other adverse effects — No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions — Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Local disposal regulations — Dispose in accordance with all applicable regulations.

Waste from residues / unused products — Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging — Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

15. Regulatory information

US federal regulations — This product is not known to be a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

Not listed.

SARA 304 Emergency release notification

HYDROGEN PEROXIDE (CONC.> 52%) (CAS 7722-84-1) — 1000 LBS

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Chemical name	CAS number	Reportable quantity (pounds)	Threshold planning quantity (pounds)	Threshold planning quantity, lower value (pounds)	Threshold planning quantity, upper value (pounds)
HYDROGEN PEROXIDE	7722-84-1	1000	1000		

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Not regulated.

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

16. Other information, including date of preparation or last revision

Issue date 07-24-2020

Revision date 10-08-2020

Version # 02

NFPA ratings Health: 0
Flammability: 1
Instability: 0

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Revision information Product and Company Identification: Product Codes

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT 10 VOLUME DEVELOPER
Synonyms	None.
SDS number	00-26-0000065
Product code	1260171,1260171 B
Issue date	07-24-2020
Version number	02
Revision date	10-08-2020
Supersedes date	07-24-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

This mixture does not meet the criteria for classification according to Regulation (EC) 1272/2008 as amended.

Hazard summary Not classified for health hazards. However, occupational exposure to the mixture or substance(s) may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	The mixture does not meet the criteria for classification.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 1,53% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 1,53% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
HYDROGEN PEROXIDE	3	7722-84-1 231-765-0	01-2119485845-22	008-003-00-9	
Classification:	Ox. Liq. 1;H271, Acute Tox. 4;H302, Skin Corr. 1A;H314, Acute Tox. 4;H332, STOT SE 3;H335, Aquatic Chronic 3;H412				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Avoid prolonged exposure. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	VME	1,5 mg/m3
Regulatory status: Indicative limit (VL)		
		1 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	0,71 mg/m3
		0,5 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	STEL	0,8 mg/m3
	TWA	0,4 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures

Follow standard monitoring procedures.

Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Not available.
Odor threshold	Not available.
pH	2 - 2,4
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Density 0,93 - 0,99 g/cm3

SECTION 10: Stability and reactivity

10.1. Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

10.2. Chemical stability Material is stable under normal conditions.

10.3. Possibility of hazardous reactions No dangerous reaction known under conditions of normal use.

10.4. Conditions to avoid Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.

10.5. Incompatible materials Strong oxidizing agents.

10.6. Hazardous decomposition products No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact No adverse effects due to skin contact are expected.

Eye contact No adverse effects due to eye contact are expected.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 10 VOLUME DEVELOPER		
Acute		
Inhalation		
Vapor		
ATEmix		366,7 mg/l
Oral		
ATEmix		23130 mg/kg

Components	Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg OECD 402
Inhalation		
Vapor		
LC0	Rat	170 mg/m³, 4 h OECD 403
Oral		
LD50	Rat	693,7 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE	OECD 404, 35% ≥ C < 50% Result: Irritating Species: Rabbit OECD 404, C ≥ 50% Result: Corrosive Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE	OECD 405, 5% ≥ C < 8% Result: Irritating Species: Rabbit

Irritation Corrosion - Eye

HYDROGEN PEROXIDE	OECD 405, C ≥ 8% Result: Corrosive Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1)	3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	0, C ≥ 35% Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	2,9 mg/L air OECD 412, Inhalation Result: NOAEL Species: Rat Test Duration: 28 d 26 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Mouse Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2,4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16,4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2,5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,63 mg/l, 21 d ASTM E 1193-97

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE	99 % OECD 209 Result: Readily Biodegradable

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)	Not available.
12.4. Mobility in soil	No data available.
12.5. Results of PBT and vPvB assessment	Not a PBT or vPvB substance or mixture.
12.6. Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.
12.7. Additional information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

HYDROGEN PEROXIDE (CAS 7722-84-1)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H271 May cause fire or explosion; strong oxidizer. H302 Harmful if swallowed. H314 Causes severe skin burns and eye damage. H332 Harmful if inhaled. H335 May cause respiratory irritation. H412 Harmful to aquatic life with long lasting effects.
Revision information	Product and Company Identification: Product Codes
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT 10 VOLUME DEVELOPER**

Autres moyens d'identification

Numéro de la FDS 00-26-0000065

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Symbole de danger Aucune.

Mention d'avertissement Aucune.

Mention de danger Le mélange ne satisfait pas les critères de classification.

Conseil de prudence

Prévention Observer de bonnes pratiques d'hygiène industrielle.

Intervention Se laver les mains après utilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
PEROXYDE DHYDROGENE (EAU OXYGENEE)		7722-84-1	3

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer avec de l'eau. Consulter un médecin si une irritation se développe et persiste.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Non disponible.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Traiter de manière symptomatique.
Informations générales	S’assurer que le personnel médical est averti du (des) produits(s) en cause et qu’il prend des mesures pour se protéger.

5. Mesures à prendre en cas d’incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l’incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d’incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d’incendie ou d’explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d’urgence	Tenir à l'écart le personnel non requis. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l’élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Éviter une exposition prolongée. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l’écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d’exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d’exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	PEL (limite d'exposition admissible)	1.4 mg/m3 1 ppm

ÉTATS-UNIS. Valeurs limites d’exposition de l’ACGIH

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1.4 mg/m3
		1 ppm

Valeurs biologiques limites Aucune limite d’exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Couleur Non disponible.

Odeur Non disponible.

Seuil olfactif Non disponible.

pH 2 - 2.4

Point de fusion et point de congélation Non disponible.

Point initial d’ébullition et domaine d’ébullition > 100 °C (> 212 °F)

Point d’éclair > 100.0 °C (> 212.0 °F)

Taux d’évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d’inflammabilité ou d’explosibilité

Limites d’inflammabilité - inférieure (%) Non disponible.

Limites d’inflammabilité - supérieure (%) Non disponible.

Limite d'explosibilité - inférieure (%) Non disponible.

Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Densité	0.93 - 0.99 g/cm3
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Aucun effet indésirable dû au contact des yeux n'est prévu.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Corrosion cutanée/irritation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

PEROXYDE DHYDROGENE (EAU OXYGENEE)	OCDE 404, 35% ≥ C < 50% Résultat: Irritant Espèces: Lapin OCDE 404, C ≥ 50% Résultat: Corrosif Espèces: Lapin

Lésions oculaires graves/irritation oculaire La classification n'est pas possible en raison d'un manque partiel ou total de données. Aucun effet indésirable dû au contact des yeux n'est prévu.

Irritation- corrosion - Œil

PEROXYDE DHYDROGENE (EAU OXYGENEE)	OCDE 405, 5% ≥ C < 8% Résultat: Irritant Espèces: Lapin OCDE 405, C ≥ 8% Résultat: Corrosif Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée

PEROXYDE DHYDROGENE (EAU OXYGENEE)	Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

PEROXYDE DHYDROGENE (EAU OXYGENEE)	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	3 Inclassable quant à sa cancérogénicité pour l'homme.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

PEROXYDE DHYDROGENE (EAU OXYGENEE)	0, C ≥ 35% Résultat: Irritant

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées

PEROXYDE DHYDROGENE (EAU OXYGENEE)	2.9 mg/L air OCDE 412, Inhalation Résultat: DSENO Espèces: Rat Durée du test: 28 d 26 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Souris Durée du test: 90 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)			
Aquatique			
Aiguë			
Algues	CE50	Chlorella vulgaris	2.5 mg/l, 72 h OCDE 201
Autre	CE50	Boues activées d'eaux usées d'origine principalement domestique	2.5 mg/l, 30 Min OCDE 209

Crustacés	NOEC (concentration sans effet observé)	Daphnia magna	0.63 mg/l, 21 d ASTM E 1193-97

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

PEROXYDE DHYDROGENE (EAU OXYGENEE)	99 % OCDE 209 Résultat: Facilement Biodegradable

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT 20 VOLUME DEVELOPER**

Other means of identification

SDS number 00-26-0000064

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Warning

Hazard statement Causes serious eye irritation.

Precautionary statement

Prevention Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
HYDROGEN PEROXIDE		7722-84-1	5.85

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	PEL	1.4 mg/m3
		1 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1.4 mg/m3
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 2 - 2.4

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C)

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.

Other information

Density	0.93 - 0.99 g/cm3
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 20 VOLUME DEVELOPER		
Acute		
Inhalation

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE	OECD 404, 35% ≥ C < 50% Result: Irritating Species: Rabbit OECD 404, C ≥ 50% Result: Corrosive Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE	OECD 405, 5% ≥ C < 8% Result: Irritating Species: Rabbit OECD 405, C ≥ 8% Result: Corrosive Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1)	3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	0, C ≥ 35% Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	2.9 mg/L air OECD 412, Inhalation Result: NOAEL Species: Rat Test Duration: 28 d 26 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Mouse Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2.5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2.4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16.4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2.5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.63 mg/l, 21 d ASTM E 1193-97

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE — 99 % OECD 209
Result: Readily Biodegradable

Bioaccumulative potential

Mobility in soil — No data available.

Other adverse effects — No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions — Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations — Dispose in accordance with all applicable regulations.

Waste from residues / unused products — Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging — Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards

Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.

Hazard summary Causes serious eye irritation. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: HYDROGEN PEROXIDE

Hazard pictograms

Signal word Warning

Hazard statements

H319 Causes serious eye irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P264	Wash thoroughly after handling.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 1,53% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 1,53% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
HYDROGEN PEROXIDE	5,85	7722-84-1 231-765-0	01-2119485845-22	008-003-00-9	
Classification:	Ox. Liq. 1;H271, Acute Tox. 4;H302, Skin Corr. 1A;H314, Acute Tox. 4;H332, STOT SE 3;H335, Aquatic Chronic 3;H412				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Special fire fighting procedures	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	VME	1,5 mg/m3
Regulatory status: Indicative limit (VL)		
		1 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	0,71 mg/m3
		0,5 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	STEL	0,8 mg/m3
	TWA	0,4 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 2 - 2,4

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212,0 °F (> 100,0 °C)

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Density	0,93 - 0,99 g/cm3

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 20 VOLUME DEVELOPER		
Acute		
Inhalation		
Vapor		
ATEmix		188 mg/l
Oral		
ATEmix		11860 mg/kg

Components	Species	Test Results

Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg OECD 402
Inhalation		
Vapor		
LC0	Rat	170 mg/m³, 4 h OECD 403

Components	Species	Test Results
Oral		
LD50	Rat	693,7 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE
OECD 404, 35% ≥ C < 50%
Result: Irritating
Species: Rabbit
OECD 404, C ≥ 50%
Result: Corrosive
Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE
OECD 405, 5% ≥ C < 8%
Result: Irritating
Species: Rabbit
OECD 405, C ≥ 8%
Result: Corrosive
Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE
Result: Not Sensitizing
Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE
Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1) 3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE
0, C ≥ 35%
Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE
2,9 mg/L air OECD 412, Inhalation
Result: NOAEL
Species: Rat
Test Duration: 28 d
26 mg/kg bw/d OECD 408, Oral
Result: NOAEL
Species: Mouse
Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2,4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16,4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2,5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,63 mg/l, 21 d ASTM E 1193-97

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE — 99 % OECD 209
Result: Readily Biodegradable

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow) Not available.

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

HYDROGEN PEROXIDE (CAS 7722-84-1)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H271 May cause fire or explosion; strong oxidizer. H302 Harmful if swallowed. H314 Causes severe skin burns and eye damage. H332 Harmful if inhaled. H335 May cause respiratory irritation. H412 Harmful to aquatic life with long lasting effects.
Revision information	Product and Company Identification: Product Codes
Training information	Follow training instructions when handling this material.

Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT 20 VOLUME DEVELOPER**

Autres moyens d'identification

Numéro de la FDS 00-26-0000064

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Lésions oculaires graves/irritation oculaire Catégorie 2A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Attention

Mention de danger Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
PEROXYDE DHYDROGENE (EAU OXYGENEE)		7722-84-1	5.85

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.
Contact avec la peau	Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.
Contact avec les yeux	Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.
Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Éviter tout contact avec les yeux. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d’exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d’exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	PEL (limite d'exposition admissible)	1.4 mg/m3
		1 ppm

ÉTATS-UNIS. Valeurs limites d’exposition de l’ACGIH

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1.4 mg/m3
		1 ppm

Valeurs biologiques limites Aucune limite d’exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Couleur Non disponible.

Odeur Non disponible.

Seuil olfactif Non disponible.

pH 2 - 2.4

Point de fusion et point de congélation Non disponible.

Point initial d’ébullition et domaine d’ébullition > 100 °C (> 212 °F)

Point d’éclair	> 100.0 °C (> 212.0 °F)
Taux d’évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d’inflammabilité ou d’explosibilité	
Limites d’inflammabilité - inférieure (%)	Non disponible.
Limites d’inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d’auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Densité	0.93 - 0.99 g/cm3
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d’utilisation, d’entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d’utilisation.
Conditions à éviter	Tenir à l’écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d’ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d’ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.

Renseignements sur les effets toxicologiques

Toxicité aiguë	Inconnu(e).

DL50	Rat	693.7 mg/kg OCDE 401

Corrosion cutanée/irritation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

PEROXYDE DHYDROGENE (EAU OXYGENEE)	OCDE 404, 35% ≥ C < 50% Résultat: Irritant Espèces: Lapin OCDE 404, C ≥ 50% Résultat: Corrosif Espèces: Lapin

Lésions oculaires graves/irritation oculaire Provoque une sévère irritation des yeux.

Irritation- corrosion - Œil

PEROXYDE DHYDROGENE (EAU OXYGENEE)	OCDE 405, 5% ≥ C < 8% Résultat: Irritant Espèces: Lapin OCDE 405, C ≥ 8% Résultat: Corrosif Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée

PEROXYDE DHYDROGENE (EAU OXYGENEE)	Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

PEROXYDE DHYDROGENE (EAU OXYGENEE)	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	3 Inclassable quant à sa cancérogénicité pour l'homme.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n’est pas possible en raison d’un manque partiel ou total de données.

Toxicité pour certains organes cibles - exposition unique La classification n’est pas possible en raison d’un manque partiel ou total de données.

PEROXYDE DHYDROGENE (EAU OXYGENEE) 0, C ≥ 35%
Résultat: Irritant

Toxicité pour certains organes cibles - expositions répétées La classification n’est pas possible en raison d’un manque partiel ou total de données.

PEROXYDE DHYDROGENE (EAU OXYGENEE) 2.9 mg/L air OCDE 412, Inhalation
Résultat: DSENO
Espèces: Rat
Durée du test: 28 d
26 mg/kg bw/d OCDE 408, Orale
Résultat: DSENO
Espèces: Souris
Durée du test: 90 d

Danger par aspiration La classification n’est pas possible en raison d’un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n’est pas classé comme dangereux pour l’environnement. Toutefois, ceci n’exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l’environnement.

Composants		Espèces	Résultats d'épreuves
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)			
Aquatique			
Aiguë			
Algues	CE50	Chlorella vulgaris	2.5 mg/l, 72 h OCDE 201
Autre	CE50	Boues activées d’eaux usées d’origine principalement domestique	2.5 mg/l, 30 Min OCDE 209
Crustacés	CE50	Daphnia pulex	2.4 mg/l, 48 h
Poisson	CL50	Pimephales promelas	16.4 mg/l, 96 h
Chronique			
Crustacés	NOEC (concentration sans effet observé)	Daphnia magna	0.63 mg/l, 21 d ASTM E 1193-97

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

PEROXYDE DHYDROGENE (EAU OXYGENEE) 99 % OCDE 209
Résultat: Facilement Biodegradable

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d’ozone, potentiel de formation photochimique d’ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l’élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d’élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d’élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT 30 VOLUME DEVELOPER**

Other means of identification

SDS number 00-26-0000066

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes serious eye damage.

Precautionary statement

Prevention Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
HYDROGEN PEROXIDE		7722-84-1	9

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Do not get this material in contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	PEL	1.4 mg/m3
		1 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1.4 mg/m3
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 2 - 2.4

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C)

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.93 - 0.99 g/cm3
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 30 VOLUME DEVELOPER		
Acute		
Inhalation		
Vapor		
ATEmix		122.2 mg/l
Oral		
ATEmix		7708 mg/kg

Oral		
LD50	Rat	693.7 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE	OECD 404, 35% ≥ C < 50% Result: Irritating Species: Rabbit OECD 404, C ≥ 50% Result: Corrosive Species: Rabbit

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE	OECD 405, 5% ≥ C < 8% Result: Irritating Species: Rabbit OECD 405, C ≥ 8% Result: Corrosive Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1)	3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	0, C ≥ 35% Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	2.9 mg/L air OECD 412, Inhalation Result: NOAEL Species: Rat Test Duration: 28 d 26 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Mouse Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2.5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2.4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16.4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2.5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.63 mg/l, 21 d ASTM E 1193-97

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE — 99 % OECD 209
Result: Readily Biodegradable

Bioaccumulative potential

Mobility in soil — No data available.

Other adverse effects — No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions — Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations — Dispose in accordance with all applicable regulations.

Waste from residues / unused products — Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging — Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Revision information Product and Company Identification: Product Codes

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT 30 VOLUME DEVELOPER
Synonyms	None.
SDS number	00-26-0000066
Product code	1165424 F2,1165424 F4
Issue date	07-24-2020
Version number	02
Revision date	10-08-2020
Supersedes date	07-24-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards

Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.

Hazard summary Causes serious eye damage. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: HYDROGEN PEROXIDE

Hazard pictograms

Signal word Danger

Hazard statements

H318 Causes serious eye damage.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P260	Do not breathe vapor.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 1,53% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 1,53% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
HYDROGEN PEROXIDE	9	7722-84-1 231-765-0	01-2119485845-22	008-003-00-9	

Classification: Ox. Liq. 1;H271, Acute Tox. 4;H302, Skin Corr. 1A;H314, Acute Tox. 4;H332, STOT SE 3;H335, Aquatic Chronic 3;H412

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Special fire fighting procedures	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Do not breathe vapor. Do not get this material in contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	VME	1,5 mg/m3
Regulatory status: Indicative limit (VL)		
		1 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	0,71 mg/m3
		0,5 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	STEL	0,8 mg/m3
	TWA	0,4 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 2 - 2,4

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212,0 °F (> 100,0 °C)

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	
Density	0,93 - 0,99 g/cm3

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye damage.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 30 VOLUME DEVELOPER		
Acute		
Inhalation		
Vapor		
ATEmix		122,2 mg/l
Oral		
ATEmix		7708 mg/kg

Components	Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg OECD 402
Inhalation		
Vapor		
LC0	Rat	170 mg/m³, 4 h OECD 403

Components	Species	Test Results
Oral		
LD50	Rat	693,7 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE
OECD 404, 35% ≥ C < 50%
Result: Irritating
Species: Rabbit
OECD 404, C ≥ 50%
Result: Corrosive
Species: Rabbit

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE
OECD 405, 5% ≥ C < 8%
Result: Irritating
Species: Rabbit
OECD 405, C ≥ 8%
Result: Corrosive
Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE
Result: Not Sensitizing
Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE
Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1) 3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE
0, C ≥ 35%
Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE
2,9 mg/L air OECD 412, Inhalation
Result: NOAEL
Species: Rat
Test Duration: 28 d
26 mg/kg bw/d OECD 408, Oral
Result: NOAEL
Species: Mouse
Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2,4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16,4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2,5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,63 mg/l, 21 d ASTM E 1193-97

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE — 99 % OECD 209
Result: Readily Biodegradable

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow) Not available.

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

HYDROGEN PEROXIDE (CAS 7722-84-1)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H271 May cause fire or explosion; strong oxidizer. H302 Harmful if swallowed. H314 Causes severe skin burns and eye damage. H332 Harmful if inhaled. H335 May cause respiratory irritation. H412 Harmful to aquatic life with long lasting effects.
Revision information	Product and Company Identification: Product Codes
Training information	Follow training instructions when handling this material.

Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT 30 VOLUME DEVELOPER**

Autres moyens d'identification

Numéro de la FDS 00-26-0000066

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Lésions oculaires graves/irritation oculaire Catégorie 1

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
PEROXYDE DHYDROGENE (EAU OXYGENEE)		7722-84-1	9

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.
Contact avec la peau	Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.
Contact avec les yeux	Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.
Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Éviter tout contact de ce produit avec les yeux. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d’exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d’exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	PEL (limite d'exposition admissible)	1.4 mg/m3
		1 ppm

ÉTATS-UNIS. Valeurs limites d’exposition de l’ACGIH

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1.4 mg/m3
		1 ppm

Valeurs biologiques limites Aucune limite d’exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Couleur Non disponible.

Odeur Non disponible.

Seuil olfactif Non disponible.

pH 2 - 2.4

Point de fusion et point de congélation Non disponible.

Point initial d’ébullition et domaine d’ébullition > 100 °C (> 212 °F)

Point d’éclair	> 100.0 °C (> 212.0 °F)
Taux d’évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d’inflammabilité ou d’explosibilité	
Limites d’inflammabilité - inférieure (%)	Non disponible.
Limites d’inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d’auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Densité	0.93 - 0.99 g/cm3
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d’utilisation, d’entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d’utilisation.
Conditions à éviter	Tenir à l’écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d’ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d’ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité.

Renseignements sur les effets toxicologiques

Toxicité aiguë	Inconnu(e).

Espèces: Souris
Durée du test: 90 d

Danger par aspiration La classification n’est pas possible en raison d’un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n’est pas classé comme dangereux pour l’environnement. Toutefois, ceci n’exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l’environnement.

Composants		Espèces	Résultats d'épreuves
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)			
Aquatique			
Aiguë			
Algues	CE50	Chlorella vulgaris	2.5 mg/l, 72 h OCDE 201
Autre	CE50	Boues activées d’eaux usées d’origine principalement domestique	2.5 mg/l, 30 Min OCDE 209
Crustacés	CE50	Daphnia pulex	2.4 mg/l, 48 h
Poisson	CL50	Pimephales promelas	16.4 mg/l, 96 h
Chronique			
Crustacés	NOEC (concentration sans effet observé)	Daphnia magna	0.63 mg/l, 21 d ASTM E 1193-97

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

PEROXYDE DHYDROGENE (EAU OXYGENEE) 99 % OCDE 209
Résultat: Facilement Biodegradable

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d’ozone, potentiel de formation photochimique d’ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l’élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d’élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d’élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT 6 VOLUME DEVELOPER**

Other means of identification

SDS number 00-26-0000062

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word None.

Hazard statement The mixture does not meet the criteria for classification.

Precautionary statement

Prevention Observe good industrial hygiene practices.

Response Wash hands after handling.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
HYDROGEN PEROXIDE		7722-84-1	1.8

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed	Not available.
Indication of immediate medical attention and special treatment needed	Treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Avoid prolonged exposure. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	PEL	1.4 mg/m3
		1 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1.4 mg/m3

US. NIOSH: Pocket Guide to Chemical Hazards		
Components	**Type**	**Value**
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 2 - 2.4

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C)

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature Not available.

Decomposition temperature Not available.

Viscosity Not available.

Other information

Density 0.93 - 0.99 g/cm3

Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 6 VOLUME DEVELOPER		
Acute		
Inhalation		
Vapor		
ATEmix		611.1 mg/l

Oral		
LD50	Rat	693.7 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE	OECD 404, 35% ≥ C < 50% Result: Irritating Species: Rabbit OECD 404, C ≥ 50% Result: Corrosive Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE	OECD 405, 5% ≥ C < 8% Result: Irritating Species: Rabbit OECD 405, C ≥ 8% Result: Corrosive Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1)	3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	0, C ≥ 35% Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	2.9 mg/L air OECD 412, Inhalation Result: NOAEL Species: Rat Test Duration: 28 d 26 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Mouse Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2.5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2.4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16.4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2.5 mg/l, 30 min OECD 209

Components		Species	Test Results
Chronic			
Crustacea	NOEC	Daphnia magna	0.63 mg/l, 21 d ASTM E 1193-97

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE — 99 % OECD 209
Result: Readily Biodegradable

Bioaccumulative potential

Mobility in soil — No data available.

Other adverse effects — No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions — Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Local disposal regulations — Dispose in accordance with all applicable regulations.

Waste from residues / unused products — Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging — Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Revision information Product and Company Identification: Product Codes

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT 6 VOLUME DEVELOPER
Synonyms	None.
SDS number	00-26-0000062
Product code	1260170 A,1260170 B
Issue date	07-24-2020
Version number	02
Revision date	10-07-2020
Supersedes date	07-24-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

This mixture does not meet the criteria for classification according to Regulation (EC) 1272/2008 as amended.

Hazard summary Not classified for health hazards. However, occupational exposure to the mixture or substance(s) may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	The mixture does not meet the criteria for classification.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 1,53% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 1,53% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
HYDROGEN PEROXIDE	1,8	7722-84-1 231-765-0	01-2119485845-22	008-003-00-9	
Classification:	Ox. Liq. 1;H271, Acute Tox. 4;H302, Skin Corr. 1A;H314, Acute Tox. 4;H332, STOT SE 3;H335, Aquatic Chronic 3;H412				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Avoid prolonged exposure. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	VME	1,5 mg/m3
Regulatory status: Indicative limit (VL)		
		1 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	0,71 mg/m3
		0,5 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	STEL	0,8 mg/m3
	TWA	0,4 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures

Follow standard monitoring procedures.

Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Not available.
Odor threshold	Not available.
pH	2 - 2,4
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Density 0,93 - 0,99 g/cm3

SECTION 10: Stability and reactivity

10.1. Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

10.2. Chemical stability Material is stable under normal conditions.

10.3. Possibility of hazardous reactions No dangerous reaction known under conditions of normal use.

10.4. Conditions to avoid Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.

10.5. Incompatible materials Strong oxidizing agents.

10.6. Hazardous decomposition products No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact No adverse effects due to skin contact are expected.

Eye contact No adverse effects due to eye contact are expected.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 6 VOLUME DEVELOPER		
Acute		
Inhalation		
Vapor		
ATEmix		611,1 mg/l
Oral		
ATEmix		38550 mg/kg

Components	Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg OECD 402
Inhalation		
Vapor		
LC0	Rat	170 mg/m³, 4 h OECD 403
Oral		
LD50	Rat	693,7 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE

OECD 404, 35% ≥ C < 50%
Result: Irritating
Species: Rabbit
OECD 404, C ≥ 50%
Result: Corrosive
Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE

OECD 405, 5% ≥ C < 8%
Result: Irritating
Species: Rabbit

Irritation Corrosion - Eye

HYDROGEN PEROXIDE	OECD 405, C ≥ 8% Result: Corrosive Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1)	3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	0, C ≥ 35% Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	2,9 mg/L air OECD 412, Inhalation Result: NOAEL Species: Rat Test Duration: 28 d 26 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Mouse Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2,4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16,4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2,5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,63 mg/l, 21 d ASTM E 1193-97

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE	99 % OECD 209 Result: Readily Biodegradable

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)	Not available.
12.4. Mobility in soil	No data available.
12.5. Results of PBT and vPvB assessment	Not a PBT or vPvB substance or mixture.
12.6. Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.
12.7. Additional information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

HYDROGEN PEROXIDE (CAS 7722-84-1)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H271 May cause fire or explosion; strong oxidizer. H302 Harmful if swallowed. H314 Causes severe skin burns and eye damage. H332 Harmful if inhaled. H335 May cause respiratory irritation. H412 Harmful to aquatic life with long lasting effects.
Revision information	Product and Company Identification: Product Codes
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT 6 VOLUME DEVELOPER**

Autres moyens d'identification

Numéro de la FDS 00-26-0000062

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Symbole de danger Aucune.

Mention d'avertissement Aucune.

Mention de danger Le mélange ne satisfait pas les critères de classification.

Conseil de prudence

Prévention Observer de bonnes pratiques d'hygiène industrielle.

Intervention Se laver les mains après utilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
PEROXYDE DHYDROGENE (EAU OXYGENEE)		7722-84-1	1.8

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer avec de l'eau. Consulter un médecin si une irritation se développe et persiste.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Non disponible.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Traiter de manière symptomatique.
Informations générales	S’assurer que le personnel médical est averti du (des) produits(s) en cause et qu’il prend des mesures pour se protéger.

5. Mesures à prendre en cas d’incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l’incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d’incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d’incendie ou d’explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d’urgence	Tenir à l'écart le personnel non requis. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l’élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Éviter une exposition prolongée. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l’écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d’exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d’exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	PEL (limite d'exposition admissible)	1.4 mg/m3
		1 ppm

ÉTATS-UNIS. Valeurs limites d’exposition de l’ACGIH

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1.4 mg/m3
		1 ppm

Valeurs biologiques limites Aucune limite d’exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Couleur Non disponible.

Odeur Non disponible.

Seuil olfactif Non disponible.

pH 2 - 2.4

Point de fusion et point de congélation Non disponible.

Point initial d’ébullition et domaine d’ébullition > 100 °C (> 212 °F)

Point d’éclair > 100.0 °C (> 212.0 °F)

Taux d’évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d’inflammabilité ou d’explosibilité

Limites d’inflammabilité - inférieure (%) Non disponible.

Limites d’inflammabilité - supérieure (%) Non disponible.

Limite d'explosibilité - inférieure (%) Non disponible.

Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Densité	0.93 - 0.99 g/cm3
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Aucun effet indésirable dû au contact des yeux n'est prévu.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Produit	Espèces	Résultats d'épreuves

Corrosion cutanée/irritation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

PEROXYDE DHYDROGENE (EAU OXYGENEE)	OCDE 404, 35% ≥ C < 50% Résultat: Irritant Espèces: Lapin OCDE 404, C ≥ 50% Résultat: Corrosif Espèces: Lapin

Lésions oculaires graves/irritation oculaire La classification n'est pas possible en raison d'un manque partiel ou total de données. Aucun effet indésirable dû au contact des yeux n'est prévu.

Irritation- corrosion - Œil

PEROXYDE DHYDROGENE (EAU OXYGENEE)	OCDE 405, 5% ≥ C < 8% Résultat: Irritant Espèces: Lapin OCDE 405, C ≥ 8% Résultat: Corrosif Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée

PEROXYDE DHYDROGENE (EAU OXYGENEE)	Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

PEROXYDE DHYDROGENE (EAU OXYGENEE)	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	3 Inclassable quant à sa cancérogénicité pour l'homme.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

PEROXYDE DHYDROGENE (EAU OXYGENEE)	0, C ≥ 35% Résultat: Irritant

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées

PEROXYDE DHYDROGENE (EAU OXYGENEE)	2.9 mg/L air OCDE 412, Inhalation Résultat: DSENO Espèces: Rat Durée du test: 28 d 26 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Souris Durée du test: 90 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)			
Aquatique			
Aiguë			
Algues	CE50	Chlorella vulgaris	2.5 mg/l, 72 h OCDE 201

PEROXYDE DHYDROGENE (EAU OXYGENEE)	99 % OCDE 209 Résultat: Facilement Biodegradable

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes serious eye damage.

Precautionary statement

Prevention Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
HYDROGEN PEROXIDE		7722-84-1	12

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Use water spray to reduce vapors or divert vapor cloud drift. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Do not get this material in contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	PEL	1.4 mg/m3 1 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1.4 mg/m3
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 2 - 2.4

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C)

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.93 - 0.99 g/cm3
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 40 VOLUME DEVELOPER		
Acute		
Inhalation		
Vapor		
ATEmix		91.67 mg/l
Oral		
ATEmix		5781 mg/kg

Components	Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)

Inhalation		
Vapor		
LC0	Rat	170 mg/m³, 4 h OECD 403
Oral		
LD50	Rat	693.7 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE	OECD 404, 35% ≥ C < 50% Result: Irritating Species: Rabbit OECD 404, C ≥ 50% Result: Corrosive Species: Rabbit

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE	OECD 405, 5% ≥ C < 8% Result: Irritating Species: Rabbit OECD 405, C ≥ 8% Result: Corrosive Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1)	3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	0, C ≥ 35% Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	2.9 mg/L air OECD 412, Inhalation Result: NOAEL Species: Rat Test Duration: 28 d 26 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Mouse Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2.5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2.4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16.4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2.5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0.63 mg/l, 21 d ASTM E 1193-97

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE — 99 % OECD 209
Result: Readily Biodegradable

Bioaccumulative potential

Mobility in soil — No data available.

Other adverse effects — No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions — Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations — Dispose in accordance with all applicable regulations.

Waste from residues / unused products — Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging — Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

FINISHED GOODS

Issue date 07-24-2020

Revision date 10-08-2020

Version # 02

NFPA ratings Health: 3
Flammability: 1
Instability: 0

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Revision information Product and Company Identification: Product Codes

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT 40 VOLUME DEVELOPER
Synonyms	None.
SDS number	00-26-0000063
Product code	1253030 A,1253030 E
Issue date	07-24-2020
Version number	02
Revision date	10-08-2020
Supersedes date	07-24-2020

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards

Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.

Hazard summary Causes serious eye damage. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: HYDROGEN PEROXIDE

Hazard pictograms

Signal word Danger

Hazard statements

H318 Causes serious eye damage.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P260	Do not breathe vapor.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 1,53% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 1,53% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
HYDROGEN PEROXIDE	12	7722-84-1 231-765-0	01-2119485845-22	008-003-00-9	
Classification:	Ox. Liq. 1;H271, Acute Tox. 4;H302, Skin Corr. 1A;H314, Acute Tox. 4;H332, STOT SE 3;H335, Aquatic Chronic 3;H412				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Special fire fighting procedures	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Use water spray to reduce vapors or divert vapor cloud drift. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Do not breathe vapor. Do not get this material in contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	VME	1,5 mg/m3
Regulatory status: Indicative limit (VL)		
		1 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	0,71 mg/m3
		0,5 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	STEL	0,8 mg/m3
	TWA	0,4 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
HYDROGEN PEROXIDE (CAS 7722-84-1)	TWA	1,4 mg/m3
		1 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Color Not available.

Odor Not available.

Odor threshold Not available.

pH 2 - 2,4

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212,0 °F (> 100,0 °C)

Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	
Density	0,93 - 0,99 g/cm3

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye damage.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT 40 VOLUME DEVELOPER

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HYDROGEN PEROXIDE	OECD 404, 35% ≥ C < 50% Result: Irritating Species: Rabbit OECD 404, C ≥ 50% Result: Corrosive Species: Rabbit

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

HYDROGEN PEROXIDE	OECD 405, 5% ≥ C < 8% Result: Irritating Species: Rabbit OECD 405, C ≥ 8% Result: Corrosive Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

HYDROGEN PEROXIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HYDROGEN PEROXIDE	Result: In vitro tests showed mutagenic effects which were not observed with in vivo test.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

HYDROGEN PEROXIDE (CAS 7722-84-1)	3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	0, C ≥ 35% Result: Irritating

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROGEN PEROXIDE	2,9 mg/L air OECD 412, Inhalation Result: NOAEL Species: Rat Test Duration: 28 d 26 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Mouse Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
HYDROGEN PEROXIDE (CAS 7722-84-1)			
Aquatic			
Acute			
Algae	EC50	Chlorella vulgaris	2,5 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia pulex	2,4 mg/l, 48 h
Fish	LC50	Pimephales promelas	16,4 mg/l, 96 h
Other	EC50	Activated sludge of a predominantly domestic sewage	2,5 mg/l, 30 min OECD 209
Chronic			
Crustacea	NOEC	Daphnia magna	0,63 mg/l, 21 d ASTM E 1193-97

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

HYDROGEN PEROXIDE — 99 % OECD 209
Result: Readily Biodegradable

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow) Not available.

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

HYDROGEN PEROXIDE (CAS 7722-84-1)

Other regulations The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.

National regulations Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.

15.2. Chemical safety assessment No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations Not available.

References Not available.

Information on evaluation method leading to the classification of mixture The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.

Full text of any H-statements not written out in full under Sections 2 to 15

H271 May cause fire or explosion; strong oxidizer.
H302 Harmful if swallowed.
H314 Causes severe skin burns and eye damage.

	H332 Harmful if inhaled. H335 May cause respiratory irritation. H412 Harmful to aquatic life with long lasting effects.
Revision information	Product and Company Identification: Product Codes
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT 40 VOLUME DEVELOPER**

Autres moyens d'identification

Numéro de la FDS 00-26-0000063

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Lésions oculaires graves/irritation oculaire Catégorie 1

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
PEROXYDE DHYDROGENE (EAU OXYGENEE)		7722-84-1	12

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.
Contact avec la peau	Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.
Contact avec les yeux	Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.
Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Utiliser une pulvérisation d'eau pour réduire les vapeurs ou pour détourner la direction du nuage de vapeurs. Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Éviter tout contact de ce produit avec les yeux. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d’exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d’exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	PEL (limite d'exposition admissible)	1.4 mg/m3
		1 ppm

ÉTATS-UNIS. Valeurs limites d’exposition de l’ACGIH

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	TWA	1.4 mg/m3
		1 ppm

Valeurs biologiques limites Aucune limite d’exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Couleur Non disponible.

Odeur Non disponible.

Seuil olfactif Non disponible.

pH 2 - 2.4

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F)
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Densité	0.93 - 0.99 g/cm3
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Produit	Espèces	Résultats d'épreuves
PULP RIOT 40 VOLUME DEVELOPER		
Aiguë		
Inhalation		
Vapeur

DL50	Rat	693.7 mg/kg OCDE 401

Corrosion cutanée/irritation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

PEROXYDE DHYDROGENE (EAU OXYGENEE)	OCDE 404, 35% ≥ C < 50% Résultat: Irritant Espèces: Lapin OCDE 404, C ≥ 50% Résultat: Corrosif Espèces: Lapin

Lésions oculaires graves/irritation oculaire Provoque de graves lésions des yeux.

Irritation- corrosion - Œil

PEROXYDE DHYDROGENE (EAU OXYGENEE)	OCDE 405, 5% ≥ C < 8% Résultat: Irritant Espèces: Lapin OCDE 405, C ≥ 8% Résultat: Corrosif Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée

PEROXYDE DHYDROGENE (EAU OXYGENEE)	Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

PEROXYDE DHYDROGENE (EAU OXYGENEE)	Résultat: Les tests in vitro ont montré des effets mutagènes qui n'ont pas été observés dans les tests in vivo.

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)	3 Inclassable quant à sa cancérogénicité pour l'homme.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

PEROXYDE DHYDROGENE (EAU OXYGENEE)	0, C ≥ 35% Résultat: Irritant

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

PEROXYDE DHYDROGENE (EAU OXYGENEE)	2.9 mg/L air OCDE 412, Inhalation Résultat: DSENO Espèces: Rat Durée du test: 28 d 26 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Souris Durée du test: 90 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
PEROXYDE DHYDROGENE (EAU OXYGENEE) (CAS 7722-84-1)			
Aquatique			
Aiguë			
Algues	CE50	Chlorella vulgaris	2.5 mg/l, 72 h OCDE 201
Autre	CE50	Boues activées d'eaux usées d'origine principalement domestique	2.5 mg/l, 30 Min OCDE 209
Crustacés	CE50	Daphnia pulex	2.4 mg/l, 48 h
Poisson	CL50	Pimephales promelas	16.4 mg/l, 96 h
Chronique			
Crustacés	NOEC (concentration sans effet observé)	Daphnia magna	0.63 mg/l, 21 d ASTM E 1193-97

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

PEROXYDE DHYDROGENE (EAU OXYGENEE)	99 % OCDE 209 Résultat: Facilement Biodegradable

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

2. Hazard(s) identification

Physical hazards	Oxidizing solids	Category 3
Health hazards	Acute toxicity, oral	Category 4
	Skin corrosion/irritation	Category 1C
	Serious eye damage/eye irritation	Category 1
	Sensitization, respiratory	Category 1
	Sensitization, skin	Category 1
	Specific target organ toxicity, single exposure	Category 3 respiratory tract irritation

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement May intensify fire; oxidizer. Harmful if swallowed. Causes severe skin burns and eye damage. May cause an allergic skin reaction. Causes serious eye damage. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause respiratory irritation.

Precautionary statement

Prevention Keep away from heat. Keep/Store away from clothing/combustible materials. Take any precaution to avoid mixing with combustibles. Avoid breathing dust/fume/gas/mist/vapors/spray. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Contaminated work clothing must not be allowed out of the workplace. Wear protective gloves/protective clothing/eye protection/face protection. In case of inadequate ventilation wear respiratory protection.

Response If swallowed: Rinse mouth. Do NOT induce vomiting. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse. In case of fire: Use appropriate media to extinguish.

Storage Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC)	None known.
Supplemental information	None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
MINERAL OIL		8042-47-5	32.85
POTASSIUM PERSULFATE		7727-21-1	15.41
AMMONIUM PERSULFATE		7727-54-0	14.3
SODIUM METASILICATE		6834-92-0	7.62
SODIUM PERSULFATE		7775-27-1	7.62
SODIUM SILICATE		1344-09-8	7.62
SODIUM STEARATE		822-16-2	2.07
SILICA		7631-86-9	1.91

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Oxygen or artificial respiration if needed. Do not use mouth-to-mouth method if victim inhaled the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. If experiencing respiratory symptoms: Call a poison center or doctor/physician.
Skin contact	If on clothing: Rinse immediately contaminated clothing and skin with plenty of water before removing clothes. Remove contaminated clothing immediately and wash skin with soap and water. Call a physician or poison control center immediately. Chemical burns must be treated by a physician. Wash contaminated clothing before reuse.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.
Ingestion	Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.
Most important symptoms/effects, acute and delayed	Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim warm. Keep victim under observation. Symptoms may be delayed.
General information	Take off all contaminated clothing immediately. Contact with combustible material may cause fire. If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Wash contaminated clothing before reuse.

5. Fire-fighting measures

Suitable extinguishing media	Foam. Dry chemicals. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Greatly increases the burning rate of combustible materials. Containers may explode when heated. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk. Cool containers exposed to heat with water spray and remove container, if no risk is involved.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	May intensify fire; oxidizer. Will burn if involved in a fire. Contact with combustible material may cause fire.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep away from clothing and other combustible materials. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

Keep combustibles (wood, paper, oil, etc.) away from spilled material. Ventilate the contaminated area. Minimize dust generation and accumulation. Wear appropriate protective equipment and clothing during clean-up. Stop the flow of material, if this is without risk.

Large Spills: Wet down with water and dike for later disposal. Absorb in vermiculite, dry sand or earth and place into containers. Shovel the material into waste container. Following product recovery, flush area with water.

Small Spills: Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Keep away from heat. Take any precaution to avoid mixing with combustibles. Keep away from clothing and other combustible materials. Do not get in eyes, on skin, or on clothing. Do not taste or swallow. Avoid breathing dust/fume/gas/mist/vapors/spray. Avoid prolonged or repeated contact with skin. When using, do not eat, drink or smoke. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Store locked up. Keep away from heat and sources of ignition. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Do not store near combustible materials. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value	Form
MINERAL OIL (CAS 8042-47-5)	PEL	5 mg/m3	Mist.

US. OSHA Table Z-3 (29 CFR 1910.1000)

Components	Type	Value
SILICA (CAS 7631-86-9)	TWA	0.8 mg/m3
		20 mppcf

US. ACGIH Threshold Limit Values

Components	Type	Value	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0.1 mg/m3	
MINERAL OIL (CAS 8042-47-5)	TWA	5 mg/m3	Inhalable fraction.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0.1 mg/m3	
SODIUM PERSULFATE (CAS 7775-27-1)	TWA	0.1 mg/m3	
SODIUM STEARATE (CAS 822-16-2)	TWA	3 mg/m3	Respirable fraction.
		10 mg/m3	Inhalable fraction.

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value	Form
MINERAL OIL (CAS 8042-47-5)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.
SILICA (CAS 7631-86-9)	TWA	6 mg/m3	

Biological limit values No biological exposure limits noted for the ingredient(s).

Exposure guidelines Occupational Exposure Limits are not relevant to the current physical form of the product.

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. General ventilation normally adequate. Eye wash facilities and emergency shower must be available when handling this product.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves. Frequent change is advisable.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection Applicable for industrial settings only. Wear positive pressure self-contained breathing apparatus (SCBA). Chemical respirator with organic vapor cartridge.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Keep from contact with clothing and other combustible materials. Remove and wash contaminated clothing promptly. Keep away from food and drink. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state Solid.

Form Cream.

Color White.

Odor Not available.

Odor threshold Not available.

pH 9.7 - 10.1

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not available.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	May intensify fire; oxidizer.

10. Stability and reactivity

Reactivity	Greatly increases the burning rate of combustible materials.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents. Combustible material. Reducing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	May cause irritation to the respiratory system. May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin contact	Causes severe skin burns. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	Causes digestive tract burns. Harmful if swallowed.
Symptoms related to the physical, chemical and toxicological characteristics	Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing. None expected

Information on toxicological effects

Acute toxicity In high concentrations, vapors are anesthetic and may cause headache, fatigue, dizziness and central nervous system effects. Harmful if swallowed.

Aspiration hazard Based on available data, the classification criteria are not met.

Further information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

MINERAL OIL	31 % OECD 301 F Result: Not Readily Biodegradable
POTASSIUM PERSULFATE	Result: Not expected to bioaccumulate

Bioaccumulative potential

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT CREAM BLEACH
Synonyms	None.
SDS number	58-25-0000002
Product code	1253029
Issue date	10-20-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards		
Oxidizing solids	Category 3	H272 - May intensify fire; oxidizer.
Health hazards		
Skin corrosion/irritation	Category 1C	H314 - Causes severe skin burns and eye damage.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Respiratory sensitization	Category 1	H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin sensitization	Category 1	H317 - May cause an allergic skin reaction.
Specific target organ toxicity - single exposure	Category 3 respiratory tract irritation	H335 - May cause respiratory irritation.

Hazard summary May intensify fire; oxidizer. Causes severe skin burns and eye damage. May cause irritation to the respiratory system. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause an allergic skin reaction. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: AMMONIUM PERSULFATE, CHENOPODIUM QUINOA SEED EXTRACT, MINERAL OIL, POTASSIUM PERSULFATE, SODIUM METASILICATE, SODIUM PERSULFATE, SODIUM SILICATE

Hazard pictograms

Signal word Danger

Hazard statements

H272	May intensify fire; oxidizer.
H314	Causes severe skin burns and eye damage.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335	May cause respiratory irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P220	Keep away from clothing and other combustible materials.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P271	Use only outdoors or in a well-ventilated area.
P272	Contaminated work clothing should not be allowed out of the workplace.
P280	Wear protective gloves/protective clothing/eye protection/face protection.
P284	Wear respiratory protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P301 + P330 + P331	IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
P303 + P361 + P353	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.
P304 + P340	IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P333 + P313	If skin irritation or rash occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.
P370 + P378	In case of fire: Use appropriate media to extinguish.

Storage

P403 + P233	Store in a well-ventilated place. Keep container tightly closed.
P405	Store locked up.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 60,02% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 89,56% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Take off all contaminated clothing immediately. Contact with combustible material may cause fire. If you feel unwell, seek medical advice (show the label where possible).
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing. Oxygen or artificial respiration if needed. Do not use mouth-to-mouth method if victim inhaled the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. If experiencing respiratory symptoms: Call a poison center or doctor/physician.

Skin contact If on clothing: Rinse immediately contaminated clothing and skin with plenty of water before removing clothes. Remove contaminated clothing immediately and wash skin with soap and water. Call a physician or poison control center immediately. Chemical burns must be treated by a physician. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.

Ingestion Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.

4.2. Most important symptoms and effects, both acute and delayed Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards May intensify fire; oxidizer. Will burn if involved in a fire. Contact with combustible material may cause fire.

5.1. Extinguishing media

Suitable extinguishing media Foam. Dry chemicals. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Greatly increases the burning rate of combustible materials. Containers may explode when heated. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures

In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk. Cool containers exposed to heat with water spray and remove container, if no risk is involved.

Specific methods

Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep away from clothing and other combustible materials. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders

Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up

Keep combustibles (wood, paper, oil, etc.) away from spilled material. Ventilate the contaminated area. Minimize dust generation and accumulation. Wear appropriate protective equipment and clothing during clean-up. Stop the flow of material, if this is without risk.

Large Spills: Wet down with water and dike for later disposal. Absorb in vermiculite, dry sand or earth and place into containers. Shovel the material into waste container. Following product recovery, flush area with water.

Small Spills: Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Keep away from heat. Take any precaution to avoid mixing with combustibles. Keep away from clothing and other combustible materials. Do not breathe vapor. Do not get in eyes, on skin, or on clothing. Avoid prolonged or repeated contact with skin. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Store locked up. Keep away from heat and sources of ignition. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Do not store near combustible materials. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value	Form
ALUMINUM DISTEARATE (CAS 300-92-5)	TWA	10 mg/m3	
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MINERAL OIL (CAS 8042-47-5)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	
SILICA (CAS 7631-86-9)	TWA	10 mg/m3	

Belgium. Exposure Limit Values.

Components	Type	Value	Form
SODIUM PERSULFATE (CAS 7775-27-1)	TWA	0,1 mg/m3	
SODIUM STEARATE (CAS 822-16-2)	TWA	10 mg/m3	

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
MINERAL OIL (CAS 8042-47-5)	TWA	5 mg/m3	Respirable fraction.
SILICA (CAS 7631-86-9)	TWA	4 mg/m3	Inhalable fraction.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
MINERAL OIL (CAS 8042-47-5)	AGW	5 mg/m3	Respirable fraction.
SILICA (CAS 7631-86-9)	AGW	4 mg/m3	Inhalable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MINERAL OIL (CAS 8042-47-5)	TWA	5 mg/m3	Inhalable fraction.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	
SODIUM PERSULFATE (CAS 7775-27-1)	TWA	0,1 mg/m3	
SODIUM STEARATE (CAS 822-16-2)	TWA	3 mg/m3	Respirable fraction.
		10 mg/m3	Inhalable fraction.

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
MINERAL OIL (CAS 8042-47-5)	TWA	5 mg/m3	Inhalable fraction.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	Inhalable fraction.
SILICA (CAS 7631-86-9)	TWA	2 mg/m3	Respirable fraction.
		10 mg/m3	Inhalable fraction.

Spain. Occupational Exposure Limits

Components	Type	Value	Form
ALUMINUM DISTEARATE (CAS 300-92-5)	TWA	10 mg/m3	
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MINERAL OIL (CAS 8042-47-5)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	
SODIUM PERSULFATE (CAS 7775-27-1)	TWA	0,1 mg/m3	
SODIUM STEARATE (CAS 822-16-2)	TWA	10 mg/m3	

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.
Exposure guidelines	Occupational Exposure Limits are not relevant to the current physical form of the product.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. General ventilation normally adequate. Eye wash facilities and emergency shower must be available when handling this product.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves. Frequent change is advisable.
- Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing.
Respiratory protection	Applicable for industrial settings only. Wear positive pressure self-contained breathing apparatus (SCBA).
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Keep from contact with clothing and other combustible materials. Remove and wash contaminated clothing promptly. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Solid.
Form	Cream.
Color	White.
Odor	Not available.
Odor threshold	Not available.
pH	9,7 - 10,1
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.

Solubility(ies)

Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	May intensify fire; oxidizer.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	Keep away from combustible material. Greatly increases the burning rate of combustible materials.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents. Combustible material. Reducing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	May cause irritation to the respiratory system. May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin contact	Causes severe skin burns. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	Causes digestive tract burns.
Symptoms	Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing. None expected

11.1. Information on toxicological effects

Acute toxicity Not known.

Algae	EC50	Desmodesmus subspicatus	> 345,4 mg/l, 72 h DIN 38412 Part 9
Crustacea	EC50	Daphnia magna	1700 mg/l, 48 h EU C.2
Fish	LC50	Danio rerio	1108 mg/l, 96 h OECD 203
Other	EC0	Pseudomonas putida	3454 mg/l, 30 min DIN 38412 Part 27

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

CHENOPODIUM QUINOA SEED EXTRACT	84 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
MINERAL OIL	31 % OECD 301 F Result: Not Readily Biodegradable
POTASSIUM PERSULFATE	Result: Not expected to bioaccumulate

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

CHENOPODIUM QUINOA SEED EXTRACT	>= -3,87 OECD 117

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

SODIUM METASILICATE (CAS 6834-92-0)
SODIUM SILICATE (CAS 1344-09-8)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

AMMONIUM PERSULFATE (CAS 7727-54-0)
POTASSIUM PERSULFATE (CAS 7727-21-1)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Young people under 18 years old are not allowed to work with this product according to EU Directive 94/33/EC on the protection of young people at work, as amended. Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H272 May intensify fire; oxidizer. H290 May be corrosive to metals. H302 Harmful if swallowed. H304 May be fatal if swallowed and enters airways. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled. H335 May cause respiratory irritation.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT CREAM BLEACH
Synonyms	None.
SDS number	58-25-0000002
Product code	1253029
Issue date	10-20-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards		
Oxidizing solids	Category 3	H272 - May intensify fire; oxidizer.
Health hazards		
Skin corrosion/irritation	Category 1C	H314 - Causes severe skin burns and eye damage.
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Respiratory sensitization	Category 1	H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin sensitization	Category 1	H317 - May cause an allergic skin reaction.
Specific target organ toxicity - single exposure	Category 3 respiratory tract irritation	H335 - May cause respiratory irritation.

Hazard summary May intensify fire; oxidizer. Causes severe skin burns and eye damage. May cause irritation to the respiratory system. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause an allergic skin reaction. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: AMMONIUM PERSULFATE, CHENOPODIUM QUINOA SEED EXTRACT, MINERAL OIL, POTASSIUM PERSULFATE, SODIUM METASILICATE, SODIUM PERSULFATE, SODIUM SILICATE

Hazard pictograms

Signal word Danger

Hazard statements

H272	May intensify fire; oxidizer.
H314	Causes severe skin burns and eye damage.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335	May cause respiratory irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P220	Keep away from clothing and other combustible materials.
P260	Do not breathe vapor.
P264	Wash thoroughly after handling.
P271	Use only outdoors or in a well-ventilated area.
P272	Contaminated work clothing should not be allowed out of the workplace.
P280	Wear protective gloves/protective clothing/eye protection/face protection.
P284	Wear respiratory protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P301 + P330 + P331	IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
P303 + P361 + P353	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.
P304 + P340	IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P333 + P313	If skin irritation or rash occurs: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.
P370 + P378	In case of fire: Use appropriate media to extinguish.

Storage

P403 + P233	Store in a well-ventilated place. Keep container tightly closed.
P405	Store locked up.

Disposal

P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 60,02% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 89,56% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
MINERAL OIL	32,85	8042-47-5 232-455-8	01-2119487078-27	-	
Classification: Asp. Tox. 1;H304

Classification:	Skin Sens. 1B;H317, Eye Dam. 1;H318				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Take off all contaminated clothing immediately. Contact with combustible material may cause fire. If you feel unwell, seek medical advice (show the label where possible).
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.

4.1. Description of first aid measures

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing. Oxygen or artificial respiration if needed. Do not use mouth-to-mouth method if victim inhaled the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. If experiencing respiratory symptoms: Call a poison center or doctor/physician.

Skin contact If on clothing: Rinse immediately contaminated clothing and skin with plenty of water before removing clothes. Remove contaminated clothing immediately and wash skin with soap and water. Call a physician or poison control center immediately. Chemical burns must be treated by a physician. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.

Ingestion Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.

4.2. Most important symptoms and effects, both acute and delayed Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards May intensify fire; oxidizer. Will burn if involved in a fire. Contact with combustible material may cause fire.

5.1. Extinguishing media

Suitable extinguishing media Foam. Dry chemicals. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Greatly increases the burning rate of combustible materials. Containers may explode when heated. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures

In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk. Cool containers exposed to heat with water spray and remove container, if no risk is involved.

Specific methods

Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep away from clothing and other combustible materials. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders

Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up

Keep combustibles (wood, paper, oil, etc.) away from spilled material. Ventilate the contaminated area. Minimize dust generation and accumulation. Wear appropriate protective equipment and clothing during clean-up. Stop the flow of material, if this is without risk.

Large Spills: Wet down with water and dike for later disposal. Absorb in vermiculite, dry sand or earth and place into containers. Shovel the material into waste container. Following product recovery, flush area with water.

Small Spills: Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Keep away from heat. Take any precaution to avoid mixing with combustibles. Keep away from clothing and other combustible materials. Do not breathe vapor. Do not get in eyes, on skin, or on clothing. Avoid prolonged or repeated contact with skin. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Store locked up. Keep away from heat and sources of ignition. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Do not store near combustible materials. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s)

Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value	Form
ALUMINUM DISTEARATE (CAS 300-92-5)	TWA	10 mg/m3	
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MINERAL OIL (CAS 8042-47-5)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	
SILICA (CAS 7631-86-9)	TWA	10 mg/m3	

Belgium. Exposure Limit Values.

Components	Type	Value	Form
SODIUM PERSULFATE (CAS 7775-27-1)	TWA	0,1 mg/m3	
SODIUM STEARATE (CAS 822-16-2)	TWA	10 mg/m3	

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
MINERAL OIL (CAS 8042-47-5)	TWA	5 mg/m3	Respirable fraction.
SILICA (CAS 7631-86-9)	TWA	4 mg/m3	Inhalable fraction.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
MINERAL OIL (CAS 8042-47-5)	AGW	5 mg/m3	Respirable fraction.
SILICA (CAS 7631-86-9)	AGW	4 mg/m3	Inhalable fraction.

Italy. Occupational Exposure Limits

Components	Type	Value	Form
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MINERAL OIL (CAS 8042-47-5)	TWA	5 mg/m3	Inhalable fraction.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	
SODIUM PERSULFATE (CAS 7775-27-1)	TWA	0,1 mg/m3	
SODIUM STEARATE (CAS 822-16-2)	TWA	3 mg/m3	Respirable fraction.
		10 mg/m3	Inhalable fraction.

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
MINERAL OIL (CAS 8042-47-5)	TWA	5 mg/m3	Inhalable fraction.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	Inhalable fraction.
SILICA (CAS 7631-86-9)	TWA	2 mg/m3	Respirable fraction.
		10 mg/m3	Inhalable fraction.

Spain. Occupational Exposure Limits

Components	Type	Value	Form
ALUMINUM DISTEARATE (CAS 300-92-5)	TWA	10 mg/m3	
AMMONIUM PERSULFATE (CAS 7727-54-0)	TWA	0,1 mg/m3	
MINERAL OIL (CAS 8042-47-5)	STEL	10 mg/m3	Mist.
	TWA	5 mg/m3	Mist.
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0,1 mg/m3	
SODIUM PERSULFATE (CAS 7775-27-1)	TWA	0,1 mg/m3	
SODIUM STEARATE (CAS 822-16-2)	TWA	10 mg/m3	

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.
Exposure guidelines	Occupational Exposure Limits are not relevant to the current physical form of the product.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. General ventilation normally adequate. Eye wash facilities and emergency shower must be available when handling this product.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves. Frequent change is advisable.
- Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing.
Respiratory protection	Applicable for industrial settings only. Wear positive pressure self-contained breathing apparatus (SCBA).
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Keep from contact with clothing and other combustible materials. Remove and wash contaminated clothing promptly. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Solid.
Form	Cream.
Color	White.
Odor	Not available.
Odor threshold	Not available.
pH	9,7 - 10,1
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.

Solubility(ies)

Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	May intensify fire; oxidizer.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	Keep away from combustible material. Greatly increases the burning rate of combustible materials.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents. Combustible material. Reducing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	May cause irritation to the respiratory system. May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin contact	Causes severe skin burns. May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	Causes digestive tract burns.
Symptoms	Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Difficulty in breathing. None expected

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT CREAM BLEACH		
Acute		
Inhalation		
Dust		
ATEmix		20,63 mg/l
Oral		
ATEmix		2043 mg/kg

Components	Species	Test Results

Oral		
LD50	Rat	3400 mg/kg bw OECD 401

Skin corrosion/irritation Causes severe skin burns and eye damage.

Irritation Corrosion - Skin

SODIUM METASILICATE	OECD 404 Result: Corrosive Species: Rabbit
AMMONIUM PERSULFATE	OECD 404 Result: Irritating Species: Rabbit
SODIUM SILICATE	OECD 404 Result: Irritating Species: Rabbit
MINERAL OIL	OECD 404 Result: Not Irritating Species: Rabbit
CHENOPODIUM QUINOA SEED EXTRACT	OECD 439 Result: Not Irritating Species: RhE

Irritation Corrosion - Skin

POTASSIUM PERSULFATE	Result: Irritating Species: Human
SODIUM PERSULFATE	Result: Irritating Species: Human

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

SODIUM METASILICATE	IRE Result: Corrosive Species: In vitro
AMMONIUM PERSULFATE	OECD 405 Result: Irritating Species: Rabbit
MINERAL OIL	OECD 405 Result: Not Irritating Species: Rabbit
CHENOPODIUM QUINOA SEED EXTRACT	OECD 437 Result: Corrosive Species: BCOP
SODIUM SILICATE	Result: Corrosive Species: Rabbit
POTASSIUM PERSULFATE	Result: Irritating Species: Human
SODIUM PERSULFATE	Result: Irritating Species: Human

Respiratory sensitization May cause allergy or asthma symptoms or breathing difficulties if inhaled.

AMMONIUM PERSULFATE	Result: Sensitizing Species: Human
POTASSIUM PERSULFATE	Result: Sensitizing Species: Human
SODIUM PERSULFATE	Result: Sensitizing Species: Human

Skin sensitization May cause an allergic skin reaction.

Sensitization

AMMONIUM PERSULFATE	OECD 406 Result: Sensitizing Species: Guinea pig
SODIUM PERSULFATE	OECD 406 Result: Sensitizing Species: Guinea pig
SODIUM SILICATE	OECD 429 Result: Not Sensitizing Species: Mouse
POTASSIUM PERSULFATE	OECD 429 Result: Sensitizing Species: Mouse

Skin sensitization

MINERAL OIL	OECD 406 Result: Not Sensitizing Species: Guinea pig
SODIUM PERSULFATE	OECD 406 Result: Sensitizing Species: Guinea pig
SODIUM METASILICATE	OECD 429 Result: Not Sensitizing Species: Mouse
POTASSIUM PERSULFATE	OECD 429 Result: Sensitizing Species: Guinea pig
CHENOPODIUM QUINOA SEED EXTRACT	OECD 429 Result: Sensitizing Species: Mouse

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

SODIUM METASILICATE	Result: In vitro and in vivo tests did not show mutagenic effects.
SODIUM PERSULFATE	Result: In vitro and in vivo tests did not show mutagenic effects.

Mutagenicity

SODIUM SILICATE	Result: In vitro and in vivo tests did not show mutagenic effects.
AMMONIUM PERSULFATE	Result: In vitro tests did not show mutagenic effects
CHENOPODIUM QUINOA SEED EXTRACT	Result: In vitro tests did not show mutagenic effects
MINERAL OIL	Result: In vitro tests did not show mutagenic effects
POTASSIUM PERSULFATE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

IARC Monographs. Overall Evaluation of Carcinogenicity

MINERAL OIL (CAS 8042-47-5)	3 Not classifiable as to carcinogenicity to humans.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

SODIUM METASILICATE	> 200 mg/kg bw/d Result: NOAEL Species: Mouse
SODIUM SILICATE	> 200 mg/kg bw/d Result: NOAEL Species: Rat
AMMONIUM PERSULFATE	> 250 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
MINERAL OIL	> 5000 mg/kg bw/d OECD 414, No effects on development Result: NOAEL Species: Rat

Reproductivity

SODIUM METASILICATE	> 159 mg/kg bw/d Result: NOAEL Species: Rat
SODIUM SILICATE	> 159 mg/kg bw/d, Oral Result: NOAEL Species: Rat
AMMONIUM PERSULFATE	> 250 mg/kg bw/d OECD 421 Result: NOAEL Species: Rat
MINERAL OIL	>= 2000 mg/kg bw/d OECD 415, No effects on fertility Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure May cause respiratory irritation.

SODIUM METASILICATE	Result: Irritating
SODIUM SILICATE	Result: Irritating
POTASSIUM PERSULFATE	Result: Irritating Species: Human
SODIUM PERSULFATE	Result: Irritating Species: Human

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

MINERAL OIL	> 2000 mg/kg bw/d OECD 411, Dermal Result: NOAEL Species: Rat Test Duration: 90 d
SODIUM METASILICATE	> 227 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
MINERAL OIL	> 50 mg/m3 air OECD 412, Inhalation Result: NOAEC Species: Rat Test Duration: 28 d >= 1200 mg/kg bw/d OECD 453, Oral Result: NOAEL Species: Rat Test Duration: 2 years

Specific target organ toxicity - repeated exposure

AMMONIUM PERSULFATE	10,3 mg/m³, Inhalation Result: NOAEC Species: Rat Test Duration: 90 d
CHENOPODIUM QUINOA SEED EXTRACT	1000 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d
POTASSIUM PERSULFATE	131,5 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 28 d
SODIUM PERSULFATE	200 mg/kg bw/d OECD 408 Result: LOAEL Species: Rat
SODIUM SILICATE	2400 mg/kg bw/d OECD 407 Result: NOAEL Species: Rat Test Duration: 28 d
AMMONIUM PERSULFATE	41,1 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat Test Duration: 28 d

Aspiration hazard Based on available data, the classification criteria are not met.

Mixture versus substance information No information available.

Other information May cause allergic respiratory and skin reactions. The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
AMMONIUM PERSULFATE (CAS 7727-54-0)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	83,7 mg/l, 72 h
Crustacea	EC50	Daphnia magna	120 mg/l, 48 h
Fish	LC50	Oncorhynchus mykiss	76 mg/l, 96 h
Other	EC10	Pseudomonas putida	36 mg/l, 18 h
Chronic			
Algae	NOEC	Desmodesmus subspicatus	32 mg/l, 72 h OECD 201
CHENOPODIUM QUINOA SEED EXTRACT (CAS 223749-71-1)			
Acute			
Other	EC50	Activated sludge, industrial	> 1000 mg/l, 3 h OECD 209
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 220 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	> 220 mg/l, 48 h OECD 202
Chronic			
Algae	NOEC	Pseudokirchneriella subcapitata	220 mg/l, 72 h OECD 201
MINERAL OIL (CAS 8042-47-5)			
Aquatic			
Acute			
Algae	NOEL	Pseudokirchneriella subcapitata	> 100 mg/l, 72 h OECD 201
Crustacea	EL50	Daphnia magna	> 100 mg/l, 48 h OECD 202
Fish	LL50	Oncorhynchus mykiss	> 100 mg/l, 96 h OECD 203
Chronic			
Crustacea	NOEC	Daphnia magna	10 mg/l, 21 d OECD 211

Components		Species	Test Results
SODIUM METASILICATE (CAS 6834-92-0)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	> 207 mg/l, 72 h DIN 38412, Pt. 9
Crustacea	EC50	Daphnia magna	> 1700 mg/l, 48 h EU C.2
Fish	LC50	Danio rerio	> 210 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	100 mg/l, 3 h OECD 209
SODIUM PERSULFATE (CAS 7775-27-1)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	116 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	133 mg/l, 48 h EPA OPP 72-2
Fish	LC50	Oncorhynchus mykiss	163 mg/l, 96 h EPA OPP 72-1
SODIUM SILICATE (CAS 1344-09-8)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	> 345,4 mg/l, 72 h DIN 38412 Part 9
Crustacea	EC50	Daphnia magna	1700 mg/l, 48 h EU C.2
Fish	LC50	Danio rerio	1108 mg/l, 96 h OECD 203
Other	EC0	Pseudomonas putida	3454 mg/l, 30 min DIN 38412 Part 27

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

CHENOPODIUM QUINOA SEED EXTRACT	84 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
MINERAL OIL	31 % OECD 301 F Result: Not Readily Biodegradable
POTASSIUM PERSULFATE	Result: Not expected to bioaccumulate

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

CHENOPODIUM QUINOA SEED EXTRACT	>= -3,87 OECD 117

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. UN number	UN3085

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

SODIUM METASILICATE (CAS 6834-92-0)
SODIUM SILICATE (CAS 1344-09-8)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

AMMONIUM PERSULFATE (CAS 7727-54-0)
POTASSIUM PERSULFATE (CAS 7727-21-1)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Young people under 18 years old are not allowed to work with this product according to EU Directive 94/33/EC on the protection of young people at work, as amended. Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H272 May intensify fire; oxidizer. H290 May be corrosive to metals. H302 Harmful if swallowed. H304 May be fatal if swallowed and enters airways. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled. H335 May cause respiratory irritation.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT CREAM BLEACH**

Autres moyens d'identification

Numéro de la FDS 58-25-0000002

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques	Matières solides comburantes	Catégorie 3
Dangers pour la santé	Toxicité aiguë, voie orale	Catégorie 4
	Corrosion cutanée/irritation cutanée	Catégorie 1C
	Lésions oculaires graves/irritation oculaire	Catégorie 1
	Sensibilisation respiratoire	Catégorie 1
	Sensibilisation cutanée	Catégorie 1
	Toxicité pour certains organes cibles - exposition unique	Irritation des voies respiratoires de catégorie 3

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Peut aggraver un incendie; comburant. Nocif en cas d'ingestion. Provoque de graves brûlures de la peau et de graves lésions des yeux. Peut provoquer une allergie cutanée. Provoque de graves lésions des yeux. Peut provoquer des symptômes allergiques ou d'asthme ou des difficultés respiratoires par inhalation. Peut irriter les voies respiratoires.

Conseil de prudence

Prévention Conserver à l'écart de la chaleur. Tenir et entreposer loin des vêtements/matières combustibles. Prendre toutes précautions pour éviter de mélanger avec des matières combustibles. Éviter de respirer les poussières/fumées/gaz/brouillards/vapeurs/aérosols. Se laver soigneusement après manipulation. Ne pas manger, boire ou fumer en manipulant ce produit. Utiliser seulement en plein air ou dans un endroit bien ventilé. Il ne faut pas que les vêtements de travail contaminés quittent le lieu de travail. Porter des gants de protection/des vêtements de protection/un équipement de protection des yeux/du visage. Lorsque la ventilation du local est insuffisante, porter un équipement de protection respiratoire.

Intervention	En cas d'ingestion : Rincer la bouche. NE PAS provoquer de vomissements. En contact avec la peau (ou les cheveux) : Retirer immédiatement tous les vêtements contaminés. Rincer la peau avec de l'eau/sous une douche. En cas d'inhalation : Déplacer la personne à l'air frais et la maintenir dans une position confortable pour la respiration. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin. En cas d'irritation ou d'éruption cutanée : Demander un avis médical/Consulter un médecin. Laver les vêtements contaminés avant réutilisation. En cas d'incendie : utiliser un agent d'extinction approprié.
Stockage	Stocker dans un endroit bien ventilé. Maintenir le récipient fermé de manière étanche. Garder sous clef.
Élimination	Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.
Danger(s) non classé(s) ailleurs (DNCA)	Aucun(e) connu(e).
Information supplémentaire	Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
HUILE MINÉRALE		8042-47-5	32.85
PERSULFATE DE POTASSIUM		7727-21-1	15.41
PERSULFATE D'AMMONIUM		7727-54-0	14.3
MÉTASILICATE DE SODIUM		6834-92-0	7.62
PERSULFATE DE SODIUM		7775-27-1	7.62
SILICATE DE SODIUM		1344-09-8	7.62
Stéarate de sodium		822-16-2	2.07
silice		7631-86-9	1.91

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter la victime à l'extérieur et la maintenir au repos dans une position où elle peut confortablement respirer. Oxygène ou respiration artificielle si nécessaire. Ne pas pratiquer le bouche-à-bouche si la victime a inhalé la substance. Pratiquer la respiration artificielle à l'aide d'un masque de poche muni d'une valve antireflux ou d'un autre appareil médical respiratoire approprié. En cas de symptômes respiratoires : Appeler un centre antipoison ou un médecin.
Contact avec la peau	En cas de contact avec les vêtements : Rincer immédiatement et abondamment avec de l'eau les vêtements contaminés et la peau avant de les enlever. Enlever immédiatement les vêtements contaminés et laver la peau à l'eau et au savon. Appeler immédiatement un médecin ou un centre antipoison. Les brûlures chimiques doivent être traitées par un médecin. Laver les vêtements contaminés avant réutilisation.
Contact avec les yeux	Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Appeler immédiatement un médecin ou un centre antipoison.
Ingestion	Appeler immédiatement un médecin ou un centre antipoison. Rincer la bouche. Ne pas faire vomir. En cas de vomissement, garder la tête basse pour éviter une pénétration du contenu de l'estomac dans les poumons.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Douleur brûlante et lésions corrosives graves de la peau. Provoque de graves lésions des yeux. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Peut irriter les voies respiratoires. Difficultés respiratoires.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Brûlures chimiques : Rincer immédiatement avec de l'eau. Tout en rinçant, retirer les vêtements qui ne collent pas à la zone touchée. Appeler une ambulance. Continuer à rincer pendant le transport vers l'hôpital. Garder la victime au chaud. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	Enlever immédiatement tous les vêtements contaminés. Favorise l'inflammation des matières combustibles. En cas de malaise, demander un avis médical (montrer l'étiquette du produit lorsque possible). S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger. Présenter cette fiche de données de sécurité au médecin traitant. Laver les vêtements contaminés avant réutilisation.

5. Mesures à prendre en cas d’incendie

Agents extincteurs appropriés	Mousse. Poudres chimiques. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Augmente grandement la vitesse de combustion des produits combustibles. Les récipients peuvent exploser sous l'effet de la chaleur. Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	En cas d'incendie et/ou d'explosion ne pas respirer les fumées. Éloigner les récipients du lieu de l’incendie si cela peut se faire sans risque. Refroidir les récipients exposés à la chaleur avec de l'eau et les retirer du lieu d'incendie si ceci ne fait courir aucun risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d’incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Peut aggraver un incendie; comburant. Brûle en cas d'incendie. Favorise l'inflammation des matières combustibles.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d’urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Tenir à l’écart des vêtements et d’autres matières combustibles. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Ventiler la zone contaminée. Minimiser la formation et l’accumulation de poussière. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Déversements importants : Mouiller avec de l’eau et endiguer pour une élimination ultérieure. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Pelleter le matériau dans un conteneur à déchets. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Balayer ou aspirer le déversement et mettre dans un récipient approprié pour élimination. Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l’élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Minimiser la formation et l’accumulation de poussière. Un ménage et un entretien de routine doivent être mis en place pour s’assurer que la poussière ne s'accumule pas sur les surfaces. Tenir à l’écart de la chaleur. Prendre toutes précautions pour éviter de mélanger avec des matières combustibles. Tenir à l’écart des vêtements et d’autres matières combustibles. Éviter tout contact avec les yeux, la peau ou les vêtements. Ne pas goûter ni avaler. Éviter de respirer les poussières/fumées/gaz/brouillards/vapeurs/aérosols. Éviter tout contact prolongé ou répété avec la peau. Ne pas manger, ne pas boire et ne pas fumer pendant l’utilisation. Utiliser seulement dans les zones bien ventilées. Porter un équipement de protection individuelle approprié. Se laver les mains soigneusement après manipulation. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Garder sous clef. Tenir à l'écart de la chaleur et des sources d'ignition. Stocker dans un endroit frais et sec, à l'écart de la lumière solaire directe. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Ne pas stocker à proximité de matières combustibles. Tenir hors de la portée des enfants. Entreposer à l’écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d’exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d’exposition connues.

États-Unis - TABLEAU Z-3 (29 CFR 1910.1000) de l'OSHA

Composants	Type	Valeur
silice (CAS 7631-86-9)	TWA	0.8 mg/m3
		20 mppcf

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur	Forme
HUILE MINÉRALE (CAS 8042-47-5)	PEL (limite d'exposition admissible)	5 mg/m3	Brouillard.

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur	Forme
HUILE MINÉRALE (CAS 8042-47-5)	TWA	5 mg/m3	Fraction inhalable.
PERSULFATE D'AMMONIUM (CAS 7727-54-0)	TWA	0.1 mg/m3	
PERSULFATE DE POTASSIUM (CAS 7727-21-1)	TWA	0.1 mg/m3	
PERSULFATE DE SODIUM (CAS 7775-27-1)	TWA	0.1 mg/m3	
Stéarate de sodium (CAS 822-16-2)	TWA	3 mg/m3	Fraction respirable.
		10 mg/m3	Fraction inhalable.

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur	Forme
HUILE MINÉRALE (CAS 8042-47-5)	STEL	10 mg/m3	Brouillard.
	TWA	5 mg/m3	Brouillard.
silice (CAS 7631-86-9)	TWA	6 mg/m3	

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Directives au sujet de l'exposition Les limites d'exposition professionnelle ne sont pas adéquates pour la forme physique actuelle du produit.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Ventilation générale normalement adéquate. Des douches oculaires et des douches d'urgence doivent être disponibles sur le lieu de travail pendant la manipulation de ce produit.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques Il est conseillé de changer souvent.

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques Il est recommandé d'utiliser un tablier imperméable.

Protection respiratoire Pour usage industriel seulement. Porter un appareil respiratoire autonome (ARA) à pression positive. Respirateur chimique à cartouche contre les vapeurs organiques.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale	Éviter tout contact avec des vêtements ou d'autres matières combustibles. Retirer et laver rapidement les vêtements contaminés. Tenir à l'écart des aliments et des boissons. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants Les vêtements de travail contaminés ne devraient pas sortir du lieu de travail.

9. Propriétés physiques et chimiques

Apparence	
État physique	Solide.
Forme	Crème.
Couleur	Blanc.
Odeur	Non disponible.
Seuil olfactif	Non disponible.
pH	9.7 - 10.1
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Non disponible.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Peut aggraver un incendie; comburant.

10. Stabilité et réactivité

Réactivité	Augmente grandement la vitesse de combustion des produits combustibles.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts. Matières combustibles. Agents réducteurs.

Produits de décomposition dangereux Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation Peut provoquer une irritation du système respiratoire. Peut provoquer des symptômes allergiques ou d'asthme ou des difficultés respiratoires par inhalation.

Contact avec la peau Provoque de graves brûlures de la peau. Peut provoquer une allergie cutanée.

Contact avec les yeux Provoque de graves lésions des yeux.

Ingestion Provoque des brûlures du tube digestif. Nocif en cas d'ingestion.

Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques Douleur brûlante et lésions corrosives graves de la peau. Provoque de graves lésions des yeux. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité. Peut irriter les voies respiratoires. Difficultés respiratoires. AUCUN

Renseignements sur les effets toxicologiques

Toxicité aiguë À des concentrations élevées, les vapeurs sont anesthésiques et peuvent provoquer des maux de tête, de la fatigue, des vertiges et avoir des effets sur le système nerveux central. Nocif en cas d'ingestion.

Danger par aspiration Compte tenu des données disponibles, les critères de classification ne sont pas remplis.

Autres informations Peut provoquer des allergies respiratoires et cutanées. La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

HUILE MINÉRALE	31 % OECD 301 F Résultat: Difficilement Biodégradable
PERSULFATE DE POTASSIUM	Résultat: Not expected to bioaccumulate

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs	On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination	Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.
Règlements locaux d'élimination	Détruire conformément àtoutes les réglementations applicables.
Code des déchets dangereux	Ce produit est inflammable (D001), utilisez le RCRA matières dangereuses lors de l'élimination.
Déchets des résidus / produits non utilisés	Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).
Emballages contaminés	Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

BULK

Numéro ONU	UN3085
Désignation officielle de transport de l'ONU	SOLIDE COMBURANT CORROSIF, N.S.A. (PERSULFATE D'AMMONIUM, MÉTASILICATE DE SODIUM)
Classe	5.1
Danger subsidiaire	8
Groupe d'emballage	III
Dangers environnementaux	
Polluant marin	Non.
EmS	F-A, S-Q

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

Non inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Dénomination chimique	Numéro d'enregistreme	% en poids.
PERSULFATE D'AMMONIUM	7727-54-0	14.3

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	20-Octobre-2020
Version n°	01
Classements NFPA	Santé: 3 Inflammabilité: 1 Instabilité: 0 Risques particuliers: OX
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

SCHEDA DI DATI DI SICUREZZA

SEZIONE 1: identificazione della sostanza/miscela e della società/impresa

1.1. Identificatore del prodotto

Nome commerciale o designazione della miscela	PULP RIOT CREAM BLEACH
Sinonimi	Nessuno.
Numero SDS	58-25-0000002
Codice prodotto	1253029
Data di pubblicazione	10-Settembre-2021
Numero della versione	01

1.2. Usi identificati pertinenti della sostanza o della miscela e usi sconsigliati

Usi identificati	Prodotto per la cura personale utilizzato come effetto cosmetico.
Usi sconsigliati	Non noto.

1.3. Informazioni sul fornitore della scheda di dati di sicurezza

Persona di contatto

Nome della Società	L'ORÉAL SA
Indirizzo	14, rue royale 75008 - Paris Francia
Numero di telefono	+1 732 499 2745
indirizzo di posta elettronica	nacorpeuropesdsrequest@loreal.com

1.4. Numero telefonico di emergenza

CAV "Osp. Pediatrico Bambino Gesù" - 06 68593726

Az. Osp. Univ. Foggia - 0881-732326

Az. Osp. "a. Cardarelli" - 081-7472870

CAV Policlinico "Umberto I" - 06-49978000

CAV Policlinio "A. Gemelli" - 06-3054343

Az. Osp. "Careggi" U.O. Tossicologia - 055-7947819

CAV C.N.I.T. di Pavia - 0382-24444

Osp. Niguarda Ca' Granda - 02-66101029

Azienda Ospedaliera Papa Giovanni XXII - 800883300

(Disponibile 24 ore su 24. Le schede dei dati di sicurezza o le informazioni sul prodotto potrebbero non essere disponibili per il servizio di emergenza).

SEZIONE 2: Identificazione dei pericoli

2.1. Classificazione della sostanza o della miscela

La miscela è stata valutata e/o sottoposta a test per verificare l'assenza di pericoli fisici, per la salute e per l'ambiente e a essa si applica la seguente classificazione.

Classificazione a norma del regolamento (CE) n. 1272/2008 modificato

Pericoli fisici		
Solidi comburenti	Categoria 3	H272 - Può aggravare un incendio; comburente.
Pericoli per la salute		
Corrosione cutanea/irritazione cutanea	Categoria 1C	H314 - Provoca gravi ustioni cutanee e gravi lesioni oculari.
Gravi danni oculari/irritazione oculare	Categoria 1	H318 - Provoca gravi lesioni oculari.
Sensibilizzazione respiratoria	Categoria 1	H334 - Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato.

Sensibilizzazione cutanea	Categoria 1	H317 - Può provocare una reazione allergica cutanea.
Tossicità specifica per organi bersaglio (STOT) — esposizione singola	Categoria 3 irritazione delle vie respiratorie	H335 - Può irritare le vie respiratorie.

Riepilogo dei pericoli

Può aggravare un incendio; comburente. Provoca gravi ustioni cutanee e gravi lesioni oculari. Può causare irritazione alle vie respiratorie. Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato. Può provocare una reazione allergica cutanea. L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi sulla salute. Questo prodotto è sicuro per i consumatori se usato secondo le indicazioni riportate sull'etichetta. Come accade per molti prodotti di consumo, un numero limitato di individui potrebbe manifestare reazioni quali rossore, eruzioni cutanee e/o gonfiori in seguito a contatto ripetuto o prolungato con pelle/occhi.

2.2. Elementi dell'etichetta

Etichetta secondo il regolamento (CE) n. 1272/2008 modificato

Contiene:

AMMONIUM PERSULFATE, CHENOPODIUM QUINOA SEED EXTRACT, Olio minerale, PEROSSODISOLFATO DI DIPOTASSIO, PERSOLFATO DI SODIO, Sodio metasilicato, Sodio silicato

Pittogrammi di pericolo

Avvertenza

Pericolo

Indicazioni di pericolo

H272	Può aggravare un incendio; comburente.
H314	Provoca gravi ustioni cutanee e gravi lesioni oculari.
H317	Può provocare una reazione allergica cutanea.
H318	Provoca gravi lesioni oculari.
H334	Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato.
H335	Può irritare le vie respiratorie.

Consigli di prudenza

Prevenzione

P102	Tenere fuori dalla portata dei bambini.
P103	Leggere l'etichetta prima dell'uso.
P210	Tenere lontano da fonti di calore, superfici calde, scintille, fiamme libere o altre fonti di accensione. Non fumare.
P220	Tenere lontano da indumenti e altri materiali combustibili.
P260	Non respirare il vapore.
P264	Lavare attentamente dopo l'uso.
P271	Utilizzare soltanto all'aperto o in luogo ben ventilato.
P272	Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.
P280	Indossare guanti/indumenti protettivi/Proteggere gli occhi/il viso.
P284	Utilizzare un apparecchio respiratorio.

Reazione

P101	In caso di consultazione di un medico, tenere a disposizione il contenitore o l'etichetta del prodotto.
P301 + P330 + P331	IN CASO DI INGESTIONE: sciacquare la bocca. NON provocare il vomito.
P303 + P361 + P353	IN CASO DI CONTATTO CON LA PELLE (o con i capelli): Togliere immediatamente tutti gli indumenti contaminati. Sciacquare la pelle.
P304 + P340	IN CASO DI INALAZIONE: trasportare l'infortunato all'aria aperta e mantenerlo a riposo in posizione che favorisca la respirazione.
P305 + P351 + P338	IN CASO DI CONTATTO CON GLI OCCHI: sciacquare accuratamente per parecchi minuti. Togliere le eventuali lenti a contatto se è agevole farlo. Continuare a sciacquare.
P310	Contattare immediatamente un CENTRO ANTIVELENI/un medico.
P333 + P313	In caso di irritazione o eruzione della pelle: consultare un medico.
P362 + P364	Togliere tutti gli indumenti contaminati e lavarli prima di indossarli nuovamente.
P370 + P378	In caso di incendio: estinguere con mezzi adeguati.

Immagazzinamento

P403 + P233	Tenere il recipiente ben chiuso e in luogo ben ventilato.
P405	Conservare sotto chiave.

Smaltimento

P501	Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Informazioni supplementari sulle etichette

La miscela contiene il 60,02 % di componenti di cui è ignoto il pericolo per l'ambiente acquatico.
La miscela contiene il 89,56 % di componenti di cui è ignoto il pericolo a lungo termine per l'ambiente acquatico.

2.3. Altri pericoli

Non è una sostanza o miscela PBT o vPvB.

SEZIONE 3: Composizione/informazioni sugli ingredienti

3.2. Miscele

Informazioni generali

Denominazione chimica	%	Numero CAS / Numero CE	Numero di registrazione REACH	Numero della sostanza	Note
Olio minerale	32,85	8042-47-5 232-455-8	01-2119487078-27	-	
Classificazione:	Asp. Tox. 1;H304

CHENOPODIUM QUINOA SEED EXTRACT	0,1	223749-71-1 942-403-2	01-2120116645-59	-	
Classificazione:	Skin Sens. 1B;H317, Eye Dam. 1;H318				

Elenco di eventuali abbreviazioni e simboli usati sopra

#: Per questa sostanza sono stati fissati a livello dell'Unione limiti d'esposizione sul luogo di lavoro.
M: Fattore moltiplicatore
PBT: sostanza persistente, bioaccumulabile e tossica.
vPvB: sostanza molto persistente e molto bioaccumulabile.
Tutte le concentrazioni sono espresse come percentuale in peso a meno che l'ingrediente non sia un gas. Le concentrazioni dei gas sono espresse in percentuale in volume.

Commenti sulla composizione Il testo completo di tutte le indicazioni H è visualizzato nella sezione 16.

SEZIONE 4: Misure di primo soccorso

Informazioni generali Togliere immediatamente tutti gli indumenti contaminati. Può provocare l'accensione di materie combustibili. In caso di malessere consultare il medico (se possibile, mostrargli l'etichetta). Assicurarsi che il personale medico sia al corrente dei materiali coinvolti, e prenda le necessarie precauzioni per proteggersi. Lavare gli indumenti contaminati prima di indossarli nuovamente.

4.1. Descrizione delle misure di primo soccorso

Inalazione Trasportare l'infortunato all'aria aperta e mantenerlo a riposo in posizione che favorisca la respirazione. Ricorrere all'ossigeno o alla respirazione artificiale se necessario. Non praticare la respirazione bocca a bocca se la vittima ha inalato la sostanza. Praticare la respirazione artificiale con l'ausilio di una maschera portatile con valvola ad una via o altra idonea apparecchiatura medica. If experiencing respiratory symptoms: Call a poison center or doctor/physician.

Cutanea In caso di contatto con gli indumenti: sciacquare immediatamente e abbondantemente gli indumenti contaminati e la pelle prima di togliersi gli indumenti. Togliere immediatamente gli indumenti contaminati e lavare la pelle con acqua e sapone. Consultare immediatamente un medico o un centro antiveleni In caso di ustioni chimiche consultare un medico. Lavare gli indumenti contaminati prima di indossarli nuovamente.

Contatto con gli occhi Sciacquare immediatamente gli occhi con acqua abbondante per almeno 15 minuti. Togliere le lenti a contatto, se presenti e facili da togliere. Continuare a risciacquare. Consultare immediatamente un medico o un centro antiveleni

Ingestione Consultare immediatamente un medico o un centro antiveleni Sciacquare la bocca. NON provocare il vomito. In caso di vomito, tenere la testa in basso in modo che il contenuto dello stomaco non penetri nei polmoni.

4.2. Principali sintomi ed effetti, sia acuti che ritardati

Bruciore doloroso e grave corrosione della pelle. Provoca gravi lesioni oculari. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Può irritare le vie respiratorie. Difficoltà respiratorie.

4.3. Indicazione dell'eventuale necessità di consultare immediatamente un medico e di trattamenti speciali

Prendere tutte le misure generali di supporto e curare in funzione dei sintomi. Ustioni chimiche: sciacquare immediatamente con acqua. Continuando a sciacquare, togliere di dosso gli indumenti che non sono attaccati alla pelle lesa. Chiamare un'ambulanza e continuare a sciacquare durante il trasporto in ospedale. Mantenere la vittima sotto osservazione. I sintomi possono essere ritardati.

SEZIONE 5: Misure antincendio

Pericolo generale d'incendio

Può aggravare un incendio; comburente. Brucia in caso di incendio. Può provocare l'accensione di materie combustibili.

5.1. Mezzi di estinzione

Mezzi di estinzione idonei

Schiuma. Prodotti chimici secchi. Anidride carbonica (CO2).

Mezzi di estinzione non idonei

Non usare un getto d'acqua come mezzo di estinzione perché estenderebbe l'incendio.

5.2. Pericoli speciali derivanti dalla sostanza o dalla miscela

Aumenta notevolmente la velocità di combustione dei materiali. I contenitori possono esplodere se riscaldati. In caso d'incendio possono crearsi gas nocivi.

5.3. Raccomandazioni per gli addetti all'estinzione degli incendi

Dispositivi di protezione speciali per gli addetti all'estinzione degli incendi

In caso d'incendio indossare autorespiratore e indumenti protettivi completi.

Procedure speciali per l'estinzione degli incendi

In caso d'incendio e/o esplosione non respirare i fumi. Spostare i contenitori dall'area dell'incendio se tale spostamento può essere compiuto senza rischi. Raffreddare con acqua gli imballaggi esposti al calore e allontanarli dal luogo dell'incendio se ciò non comporta rischi.

Metodi specifici

Usare procedure antincendio standard e considerare i pericoli degli altri materiali coinvolti.

SEZIONE 6: Misure in caso di rilascio accidentale

6.1. Precauzioni personali, dispositivi di protezione e procedure in caso di emergenza

Per chi non interviene direttamente

Allontanare il personale non necessario. Tenere le persone lontane dalla perdita, sopravento. Tenere lontano da indumenti e altri materiali combustibili. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Non respirare il vapore. Non toccare contenitori danneggiati o materiali accidentalmente fuoriusciti se non dopo aver indossato indumenti protettivi appropriati. Prevedere una ventilazione adeguata. Le autorità locali devono essere informate se le perdite non possono essere circoscritte. Per la protezione individuale, vedere la sezione 8 della SDS.

Per chi interviene direttamente

Allontanare il personale non necessario. Usare le protezioni individuali raccomandate nella Sezione 8 della SDS

6.2. Precauzioni ambientali

Vietato scaricare in fognature, nei corsi d'acqua o nel terreno.

6.3. Metodi e materiali per il contenimento e per la bonifica

Tenere i materiali combustibili (legno, carta, olio, ecc.) lontano dal materiale fuoriuscito. Ventilare l'area contaminata. Ridurre al minimo la generazione e l'accumulo di polvere. Indossare un equipaggiamento protettivo adeguato e indumenti adeguati durante la rimozione. Fermare il flusso del materiale, se ciò è possibile senza rischio.

Fuoriuscite di grandi dimensioni: bagnare con acqua e arginare per il successivo smaltimento. Assorbire in vermiculite, sabbia o terra asciutta e riporre in contenitori. Spalare il materiale in un contenitore per rifiuti. Una volta recuperato il prodotto, sciacquare l'area con acqua.

Versamenti di piccole dimensioni: Spazzare o aspirare quanto riversato e mettere in un contenitore adeguato previsto per l'eliminazione. Pulire completamente la superficie per rimuovere completamente la contaminazione residua.

Non immettere prodotti fuoriusciti nei contenitori originali per il loro riutilizzo

6.4. Riferimento ad altre sezioni

Per la protezione individuale, vedere la sezione 8 della SDS. Per lo smaltimento dei rifiuti, vedere la sezione 13 della SDS.

SEZIONE 7: Manipolazione e immagazzinamento

7.1. Precauzioni per la manipolazione sicura

Ridurre al minimo la generazione e l'accumulo di polvere. Istituire procedure di pulizia di routine per impedire che le polveri si accumulino sulle superfici. Conservare lontano dal calore. Prendere ogni precauzione per evitare di miscelare con sostanze combustibili. Tenere lontano da indumenti e altri materiali combustibili. Non respirare il vapore. Evitare il contatto con gli occhi, la pelle o gli indumenti. Evitare il contatto prolungato o ripetuto con la pelle. Usare soltanto in luogo ben ventilato. Indossare attrezzature di protezione personale adeguate. Osservare le norme di buona igiene industriale.

7.2. Condizioni per lo stoccaggio sicuro, comprese eventuali incompatibilità

Conservare sotto chiave. Tenere lontano da fonti di calore e altre cause d'incendio. Conservare in un luogo fresco e asciutto, lontano dalla luce diretta del sole. Conservare in un recipiente ermeticamente chiuso. Conservare in luogo ben ventilato. Non stoccare vicino a materiali combustibili. Conservare fuori della portata dei bambini. Conservare lontano da materiali incompatibili (vedere la sezione 10 della SDS).

7.3. Usi finali particolari

Non conosciuto.

SEZIONE 8: Controllo dell'esposizione/protezione individuale

8.1. Parametri di controllo

Valori limite di esposizione professionale

Italia. Limiti di esposizione professionale

Componenti	Tipo	Valore	Forma
AMMONIUM PERSULFATE (CAS 7727-54-0)	8 ore	0,1 mg/m3	
Olio minerale (CAS 8042-47-5)	8 ore	5 mg/m3	Frazione inalabile.
PEROSSODISOLFATO DI DIPOTASSIO (CAS 7727-21-1)	8 ore	0,1 mg/m3	
PERSOLFATO DI SODIO (CAS 7775-27-1)	8 ore	0,1 mg/m3	
STEARATO DI SODIO (CAS 822-16-2)	8 ore	3 mg/m3	Frazione respirabile.
		10 mg/m3	Frazione inalabile.

Valori limite biologici

Nessun valore limite biologico di esposizione annotato per l'ingrediente/gli ingredienti.

Procedure di monitoraggio raccomandate

Seguire le procedure standard di monitoraggio.

Livelli derivati senza effetto (DNEL)

Non conosciuto.

Prevedibili concentrazioni prive di effetti (PNEC)

Non conosciuto.

Linee guida sull'esposizione

I Limiti di esposizione professionale non sono pertinenti per la forma fisica corrente del prodotto.

8.2. Controlli dell'esposizione

Controlli tecnici idonei

È consigliabile adottare una buona ventilazione generale. Le velocità di ventilazione devono corrispondere alle condizioni operative. Se applicabile, utilizzare recinzioni per il processo, ventilazione di scarico locale o altri controlli ingegneristici per mantenere i livelli delle polveri in aria al di sotto dei limiti di esposizione consigliati. Se non sono stati stabiliti limiti di esposizione, mantenere i livelli di polvere emessa nell'aria un livello accettabile. Aerazione generale di norma adeguata. Quando si manipola questo prodotto devono essere a disposizione attrezzature per lavaggio oculare e doccia di emergenza.

Misure di protezione individuale, quali dispositivi di protezione individuale

Informazioni generali

Utilizzare il dispositivo di protezione individuale richiesto. L'attrezzatura protettiva personale deve essere scelta conformemente alle norme CEN e insieme al fornitore dell'attrezzatura protettiva personale.

Protezione degli occhi/del volto

Applicabile soltanto per gli impianti industriali. Indossare occhiali di protezione con schermi laterali (o occhiali di copertura).

Protezione della pelle

- Protezione delle mani

Applicabile soltanto per gli impianti industriali. Indossare appositi guanti resistenti agli agenti chimici. È consigliabile cambiarlo spesso.

- Altro

Applicabile soltanto per gli impianti industriali. Indossare appositi indumenti resistenti agli agenti chimici.

Protezione respiratoria

Applicabile soltanto per gli impianti industriali. Indossare bombole ad ossigeno a pressione positiva (SCBA)

Pericoli termici

Indossare opportuni indumenti termoprotettivi, quando necessario.

Misure d'igiene

Evitare il contatto con indumenti o altri materiali combustibili. Rimuovere e lavare immediatamente gli indumenti contaminati. Osservare sempre le misure standard di igiene personale, come per esempio il lavaggio delle mani dopo aver maneggiato il materiale e prima di mangiare, bere e/o fumare. Lavare regolarmente gli indumenti da lavoro e l'equipaggiamento di protezione per rimuovere agenti contaminanti. Gli indumenti da lavoro contaminati non devono essere portati fuori dal luogo di lavoro.

Controlli dell'esposizione ambientale

Non conosciuto.

SEZIONE 9: Proprietà fisiche e chimiche

9.1. Informazioni sulle proprietà fisiche e chimiche fondamentali

Aspetto	
Stato fisico	Solido.
Forma	Panna.
Colore	Bianco.
Odore	Non conosciuto.
Soglia olfattiva	Non conosciuto.
pH	9,7 - 10,1
Punto di fusione/punto di congelamento	Non conosciuto.
Punto di ebollizione iniziale e intervallo di ebollizione	> 100 °C (> 212 °F)
Punto di infiammabilità	> 100,0 °C (> 212,0 °F) Vaso chiuso
Velocità di evaporazione	Non conosciuto.
Infiammabilità (solidi, gas)	Non conosciuto.
Limiti superiori/inferiori di infiammabilità o di esplosività	
Limite di infiammabilità - inferiore (%)	Non conosciuto.
Limite di infiammabilità - superiore (%)	Non conosciuto.
Tensione di vapore	Non conosciuto.
Densità di vapore	Non conosciuto.
Densità relativa	Non conosciuto.
Solubilità (le solubilità)	
Solubilità (in acqua)	Non conosciuto.
Coefficiente di ripartizione: n-ottanolo/acqua	Non conosciuto.
Temperatura di autoaccensione	Non conosciuto.
Temperatura di decomposizione	Non conosciuto.
Viscosità	Non conosciuto.
Proprietà esplosive	Non esplosivo.
Proprietà ossidanti	Può aggravare un incendio; comburente.
9.2. Altre informazioni	Non sono disponibili informazioni supplementari pertinenti.

SEZIONE 10: Stabilità e reattività

10.1. Reattività	Tenere lontano da sostanze combustibili. Aumenta notevolmente la velocità di combustione dei materiali.
10.2. Stabilità chimica	Il materiale è stabile in condizioni normali.
10.3. Possibilità di reazioni pericolose	Non si conosce nessuna reazione pericolosa se usato in condizioni normali.
10.4. Condizioni da evitare	Tenere lontano da calore, superfici calde, scintille, fiamme libere e altre fonti di accensione. Contatto con materiali non compatibili.
10.5. Materiali incompatibili	Forti agenti ossidanti. Materiale combustibile. Agenti riduttori.
10.6. Prodotti di decomposizione pericolosi	Non si conoscono composti di decomposizione pericolosi.

SEZIONE 11: Informazioni tossicologiche

Informazioni generali	L'esposizione professionale alla sostanza o alla miscela può provocare effetti nocivi.
Informazioni sulle vie probabili di esposizione	
Inalazione	Può causare irritazione alle vie respiratorie. Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato.
Cutanea	Provoca gravi ustioni cutanee. Può provocare una reazione allergica cutanea.
Contatto con gli occhi	Provoca gravi lesioni oculari.
Ingestione	Causa scottature al tratto digerente.

Sintomi Bruciore doloroso e grave corrosione della pelle. Provoca gravi lesioni oculari. I sintomi possono includere bruciore, lacerazione, rossore, gonfiore e visione offuscata. Può provocare lesioni oculari permanenti, incluso la cecità. Può irritare le vie respiratorie. Difficoltà respiratorie. None expected

Pesci	LC50	Danio rerio	1108 mg/l, 96 h OCSE 203

12.2. Persistenza e degradabilità

Biodegradabilità

Percentuale di degradazione (biodegradazione aerobica)

CHENOPODIUM QUINOA SEED EXTRACT	84 % OECD 301 B Risultato: Rapidamente biodegradabile Durata del test: 28 d

Biodegradabilità

Percentuale di degradazione (biodegradazione aerobica)

Olio minerale	31 % OECD 301 F Risultato: Not Readily Biodegradable
PEROSSODISOLFATO DI DIPOTASSIO	Risultato: Not expected to bioaccumulate

12.3. Potenziale di bioaccumulo

Coefficiente di partizione n-ottanolo/acqua (log Kow)

CHENOPODIUM QUINOA SEED EXTRACT	>= -3,87 OECD 117

12.4. Mobilità nel suolo Nessun dato disponibile.

12.5. Risultati della valutazione PBT e vPvB Non è una sostanza o miscela PBT o vPvB.

12.6. Altri effetti avversi Nessun effetto nocivo per l'ambiente (ad esempio, riduzione dello strato di ozono, potenziale creazione fotochimica di ozono, distruzione endocrina, potenziale riscaldamento globale) è previsto per questo componente.

12.7. Altre informazioni The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SEZIONE 13: Considerazioni sullo smaltimento

13.1. Metodi di trattamento dei rifiuti

Rifiuti residui Eliminare nel rispetto della normativa vigente in materia. I contenitori o i rivestimenti di contenitori vuoti potrebbero contenere residui di prodotto. Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni (consultare le: Istruzioni per lo smaltimento).

Imballaggi contaminati Poiché i contenitori vuoti possono conservare residui di prodotto, seguire le avvertenze riportate sull'etichetta anche dopo avere svuotato il contenitore. I contenitori vuoti dovrebbero essere trasportati in un sito autorizzato per il riciclaggio o l'eliminazione.

Codice Europeo dei Rifiuti Il codice rifiuto dovrebbe essere assegnato seguito a discussione tra l'utilizzatore, il produttore e la compagnia di smaltimento dei rifiuti.

Metodi di smaltimento/informazioni Raccogliere, contenere o smaltire in contenitori sigillati in discariche autorizzate. Smaltire il prodotto/recipiente in ottemperanza alle norme locali/regionali/nazionali/internazionali.

Precauzioni particolari Smaltire secondo le norme applicabili.

SEZIONE 15: Informazioni sulla regolamentazione

15.1. Disposizioni legislative e regolamentari su salute, sicurezza e ambiente specifiche per la sostanza o la miscela

Regolamenti UE

Regolamento (CE) n. 1005/2009 sulle sostanze che riducono lo strato di ozono, Allegato I e II e successive modifiche

Non listato.

Regolamento (CE) n. 850/2004 relativo agli inquinanti organici persistenti, Allegato I e successivi adeguamenti

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 1 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 2 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato I, Parte 3 e successive modifiche

Non listato.

Regolamento (UE) n. 649/2012 riguardante l'esportazione e l'importazione di sostanze chimiche pericolose, Allegato V e successive modifiche

Non listato.

Regolamento (CE) n. 166/2006 Allegato II Registro delle emissioni e dei trasferimenti di sostanze inquinanti e successive modifiche

Non listato.

Regolamento (CE) n. 1907/2006, REACH, Articolo 59(10), Elenco di sostanze candidate così come attualmente pubblicato dall'Agenzia europea per le sostanze chimiche (ECHA)

Non listato.

Autorizzazioni

Regolamento (CE) n. 1907/2006, REACH Allegato XIV - Sostanze soggette ad autorizzazione, modificata

Non listato.

Restrizioni d'uso

Regolamento (CE) n. 1907/2006, REACH Allegato XVII, Sostanze soggette a restrizioni in materia di immissione sul mercato e di uso e successivi adeguamenti

Sodio metasilicato (CAS 6834-92-0)
Sodio silicato (CAS 1344-09-8)

Direttiva 2004/37/CE: sulla protezione dei lavoratori contro i rischi derivanti da un'esposizione ad agenti cancerogeni e mutageni durante il lavoro e successive modifiche

Non listato.

Altri regolamenti UE

Direttiva 2012/18/UE sugli incidenti rilevanti connessi con determinate sostanze pericolose e successive modifiche

AMMONIUM PERSULFATE (CAS 7727-54-0)
PEROSSODISOLFATO DI DIPOTASSIO (CAS 7727-21-1)

Altri regolamenti	Il prodotto è classificato ed etichettato in accordo con il regolamento (CE) n. 1272/2008 (regolamento CLP) e successivi adeguamenti. Questa scheda di dati di sicurezza è conforme ai requisiti del Regolamento (CE) n. 1907/2006 e successive modifiche.
Regolamenti nazionali	Ai minori di 18 anni non è consentito lavorare con questo prodotto conformemente alla Direttiva UE 94/33/CE relativa alla protezione dei giovani sul lavoro e successive modifiche. Attenersi alla normativa nazionale in materia di agenti chimici sul luogo di lavoro, in conformità con la Direttiva 98/24/CE e successive modifiche.
15.2. Valutazione della sicurezza chimica	Non è stata effettuata alcuna valutazione della sicurezza chimica.

SEZIONE 16: Altre informazioni

Elenco delle abbreviazioni	Non conosciuto.
Riferimenti	Non conosciuto.

Informazioni sul metodo di valutazione che consente di classificare le miscele	La classificazione per i pericoli per la salute e per l'ambiente è ottenuta mediante una combinazione di metodi di calcolo e dati sperimentali delle prove, se disponibili.
Testo completo delle eventuali indicazioni H non riportate per esteso nelle sezioni dalla 2 alla 15	H272 Può aggravare un incendio; comburente. H290 Può essere corrosivo per i metalli. H302 Nocivo se ingerito. H304 Può essere letale in caso di ingestione e di penetrazione nelle vie respiratorie. H314 Provoca gravi ustioni cutanee e gravi lesioni oculari. H315 Provoca irritazione cutanea. H317 Può provocare una reazione allergica cutanea. H318 Provoca gravi lesioni oculari. H319 Provoca grave irritazione oculare. H332 Nocivo se inalato. H334 Può provocare sintomi allergici o asmatici o difficoltà respiratorie se inalato. H335 Può irritare le vie respiratorie.
Informazioni di revisione	Nessuno.
Informazioni formative	Seguire le istruzioni di formazione durante la manipolazione di questo materiale.
Clausole di esclusione della responsabilità	Le informazioni contenute in questa scheda di sicurezza sono corrette in base alle nostre conoscenze, informazioni e opinioni alla data della loro pubblicazione. Le informazioni fornite intendono servire esclusivamente da guida alla manipolazione, impiego, lavorazione, immagazzinamento, trasporto, smaltimento e rilascio in condizioni di sicurezza e non costituiscono una garanzia o una prescrizione della qualità. Le informazioni si riferiscono unicamente allo specifico materiale indicato e potrebbero non essere valide per il medesimo materiale ove venga impiegato in combinazione con altri materiali o in qualsiasi processo, a meno che ciò sia specificato nel testo.

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 可能加剧燃烧；氧化剂。 吞咽有害。 造成严重皮肤灼伤和眼损伤。 可能造成皮肤过敏反应。 造成严重眼损伤。 吸入可能导致过敏或哮喘病症状或呼吸困难。 可能造成呼吸道刺激。

防范说明

预防措施 远离热源。 避开/贮存处远离服装/可燃材料。 采取一切防范措施，避免与可燃物混合。 避免吸入粉尘/烟/气体/烟雾/蒸气/喷雾。 作业后彻底清洗。 使用本产品时不要进食、饮水或吸烟。 只能在室外或通风良好之处使用。 受沾染的工作服不得带出工作场地。 戴防护手套/穿防护服/戴防护眼罩/戴防护面具。 如通风不足，戴呼吸防护装置。

事故响应 如误吞咽：漱口。不要诱导呕吐。 如皮肤(或头发)沾染：立即去除/脱掉所有沾染的衣服。用水清洗皮肤/淋浴。 如误吸入：将受害人转移到空气新鲜处，保持呼吸舒适的休息姿势。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。 如发生皮肤刺激或皮疹：求医/就诊。 沾染的衣服清洗后方可重新使用。 火灾时：使用适当的介质灭火。

安全储存 存放在通风良好的地方。保持容器密闭。 存放处须加锁。

废弃处置 按照地方/区域/国家/国际规章处置内装物/容器。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
矿物油		8042-47-5	32.85
POTASSIUM PERSULFATE		7727-21-1	15.41
过硫酸铵		7727-54-0	14.3
偏硅酸钠		6834-92-0	7.62
过硫酸钠		7775-27-1	7.62
硅酸钠		1344-09-8	7.62
硬脂酸钠		822-16-2	2.07
二氧化硅		7631-86-9	1.91

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入

将受害人转移到空气新鲜处，保持呼吸舒适的休息姿势。 如果需要，吸氧或进行人工呼吸。 勿用嘴对嘴的方法，如果受害者已吸入该物质。 借助於设有一单向阀的小型面具或其它适当的呼吸医疗装置，施以诱导式人工呼吸。 If experiencing respiratory symptoms: Call a poison center or doctor/physician.

皮肤接触

如沾染衣服：立即用水充分冲洗沾染的衣服和皮肤，然后脱掉衣服。 立即脱掉受污染的衣服，用肥皂水冲洗皮肤。 立即呼叫医生或毒物控制中心。 化学烧伤必须由医生治疗。 沾染的衣服清洗后方可重新使用。

眼睛接触

立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即呼叫医生或毒物控制中心。

经口

立即呼叫医生或毒物控制中心。 漱口。 禁止催吐。 若发生呕吐，保持头低位，使胃容物不会进入肺部。

最重要的症状/影响，急性和延迟性

烧痛感，并严重腐蚀皮肤。 造成严重眼损伤。 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 可能造成呼吸道刺激。 呼吸困难。

指明任何需要立即就医或特殊治疗的情况

提供一般支持措施，并根据症状进行治疗。 化学烧伤：立即用水冲洗。冲洗时脱掉没有粘住烧伤部位的衣服。呼叫救护车。在送往医院的途中需继续冲洗烧伤部位。 给受害者保暖。 观察患者。 症状可能会延后发生。

一般信息

立即脱掉所有污染的衣服。 与可燃物接触会引起火灾。 如感觉不舒服,寻求医生的建议(可能的话出示此标签)。
务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。 出示此安全技术说明书给到现场的医生看。 沾染的衣服清洗后方可重新使用。

5. 消防措施

合适的灭火剂

泡沫。 干式化学灭火剂。 二氧化碳 (CO2)。

不当的灭火介质

禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害

大大增加可燃物料的燃烧速率。 当被加热时，容器可能会爆炸。 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施

发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明

一旦发生火灾和/或爆炸，不得吸入烟气。 在不会发生危险的情况下将容器撤离火灾现场。 在不会发生危险的前提下，喷雾状水以冷却受热的容器，并将容器移走。

特定的方法

采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险

可能加剧燃烧；氧化剂。 遇火燃烧。 与可燃物接触会引起火灾。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序

让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 避开服装和其他可燃材料。 清洁时，戴合适防护设备和衣物。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料

使可燃物（木材、纸张、油等）远离泄漏物。 使受污染区域通风。 将粉尘的产生和积聚减到最少。 清洁时，戴合适防护设备和衣物。 如果没有风险，阻止物质流动。

大量泄漏：用水润湿并筑堤以便稍后废弃处置。 用蛭石、干沙或干土吸收后装在容器中。 将材料铲入废料容器。 产品回收后，用水冲洗泄漏区。

小量泄漏： 扫起或真空收集泄漏物，并置于适当的容器中以待处置。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施

防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项

将粉尘的产生和积聚减到最少。 应定期清理以确保粉尘不会在表面积聚。 远离热源。 采取一切防范措施，避免与可燃物混合。 避开服装和其他可燃材料。 严防进入眼中、接触皮肤或衣服。 不得品尝或食入。 避免吸入粉尘/烟/气体/烟雾/蒸气/喷雾。 避免长期或重复接触皮肤。 使用时不要吃、喝或吸烟。 只能在通风良好的场所使用。 穿戴合适的个人防护设备。 作业后彻底洗手。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物

存放处须加锁。 远离热源和点火源。 储存于阴凉、干燥的场所，远离直接日光光照。 储存在密闭的容器中。 存放在通风良好的地方。 不要贮存在易燃物附近。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值	形状
矿物油 (CAS 8042-47-5)	PEL-常期暴露极限	5 mg/m3	雾气。

美国职业安全和健康署表Z-3（29 CFR 1910.1000）

组分	类型	标准值
二氧化硅 (CAS 7631-86-9)	TWA	0.8 mg/m3
		20 Mppcf

美国ACGIH阈限值

组分	类型	标准值	形状
POTASSIUM PERSULFATE (CAS 7727-21-1)	TWA	0.1 mg/m3	
矿物油 (CAS 8042-47-5)	TWA	5 mg/m3	可吸入组分。
硬脂酸钠 (CAS 822-16-2)	TWA	3 mg/m3	可呼吸部分。
		10 mg/m3	可吸入组分。
过硫酸钠 (CAS 7775-27-1)	TWA	0.1 mg/m3	
过硫酸铵 (CAS 7727-54-0)	TWA	0.1 mg/m3	

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值	形状
二氧化硅 (CAS 7631-86-9)	TWA	6 mg/m3	
矿物油 (CAS 8042-47-5)	TWA	5 mg/m3	雾气。
	短期暴露极限（STEL）	10 mg/m3	雾气。

生物限值

没有该成分的生物接触限值。

暴露指南

职业接触限值与产品的当前物理形态无关。

适当的技术控制

应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 一般通风通常足够。 处理本品时，应有洗眼设施和应急冲淋设施。

个人防护措施，如个人防护设备

眼/面保护

仅用於工业环境。 佩戴带侧边的安全眼镜（护目镜）和面罩。

皮肤防护

手防护

仅用於工业环境。 佩戴适当的抗化学手套。 建议经常更换。

其它的，其它	仅用於工业环境。 穿上合适的化学防护衣。 建议使用不渗透的围裙。
呼吸系统防护	仅用於工业环境。 佩戴正压自携式呼吸器具(SCBA) 。 带有机蒸气滤毒罐的化学呼吸器。
热危害	必要时，穿戴适当的热防护服。
一般的卫生考虑	防止接触衣物和其他可燃物料。立即脱除并清洗污染的衣物。 远离食品和饮料。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。 受沾染的工作服不得带出工作场地。

9. 理化特性

外观

性状	固体。
形状	奶油。
颜色	白色。
气味	无资料。
气味阈值	无资料。
pH 值	9.7 - 10.1
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	无资料。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	可能加剧燃烧；氧化剂。

10. 稳定性和反应性

反应性	大大增加可燃物料的燃烧速率。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。 易燃材料。 还原剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	可能会刺激呼吸系统。 吸入可能导致过敏或哮喘病症状或呼吸困难。
皮肤接触	导致严重的皮肤灼伤。 可能造成皮肤过敏反应。
眼睛接触	造成严重眼损伤。
经口	导致消化系统灼伤。 吞咽有害。

与物理,化学和毒物学特性有关的症状 烧痛感，并严重腐蚀皮肤。 造成严重眼损伤。 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。 可能造成呼吸道刺激。 呼吸困难。 没有预期

毒理学效应信息

急性毒性 高浓度蒸气具有麻醉作用，会引起头痛、疲劳和头晕，并影响中枢神经系统的机能。 吞咽有害。

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

二氧化硅	结果: 体外和体内试验均未见致突变作用。
偏硅酸钠	结果: 体外和体内试验均未见致突变作用。
硅酸钠	结果: 体外和体内试验均未见致突变作用。
过硫酸钠	结果: 体外和体内试验均未见致突变作用。
POTASSIUM PERSULFATE	结果: 离体试验未见诱变效应
矿物油	结果: 离体试验未见诱变效应
过硫酸铵	结果: 离体试验未见诱变效应

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

二氧化硅 (CAS 7631-86-9)	3 尚不能确定对人有致癌作用。
矿物油 (CAS 8042-47-5)	3 尚不能确定对人有致癌作用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

硅酸钠	> 200 mg/kg bw/d 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
偏硅酸钠	> 200 mg/kg bw/d 结果: NOAEL (未观察到有害效果的水平) 物种: 小鼠
过硫酸铵	> 250 mg/kg bw/d OECD 421 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
矿物油	> 5000 mg/kg bw/d OECD 414, 对发展没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
二氧化硅	1350 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

偏硅酸钠	> 159 mg/kg bw/d 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
硅酸钠	> 159 mg/kg bw/d, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
过硫酸铵	> 250 mg/kg bw/d OECD 421 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
矿物油	>= 2000 mg/kg bw/d OECD 415, 对生育力没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
二氧化硅	497 mg/kg bw/d OECD 415 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

特定目标器官系统毒性－单次接触 可能造成呼吸道刺激。

偏硅酸钠	结果: 刺激性的
硅酸钠	结果: 刺激性的
POTASSIUM PERSULFATE	结果: 刺激性的 物种: 人类
过硫酸钠	结果: 刺激性的 物种: 人类

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

矿物油	> 2000 mg/kg bw/d OECD 411, 经皮肤 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
偏硅酸钠	> 227 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
矿物油	> 50 mg/m3 空气 OECD 412, 吸入 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 28 D >= 1200 mg/kg bw/d OECD 453, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 2 年
二氧化硅	1.3 mg/m3 空气 OECD 413, 吸入 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 13 wk

特定目标器官系统毒性－重复接触

过硫酸铵	10.3 mg/m³, 吸入 结果: 无可观察到的不利影响浓度（NOAEC） 物种: 大鼠 测试时间: 90 D
POTASSIUM PERSULFATE	131.5 mg/kg bw/d OECD 407 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 28 D
过硫酸钠	200 mg/kg bw/d OECD 408 结果: LOAEL(观察到有害效果的最低水平) 物种: 大鼠
硅酸钠	2400 mg/kg bw/d OECD 407 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 28 D
过硫酸铵	41.1 mg/kg bw/d OECD 407, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 28 D

吸入危害 根据现有数据，分类标准不符合。

更多信息 可能造成皮肤和呼吸过敏性反应。 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

POTASSIUM PERSULFATE	结果: Not expected to bioaccumulate
矿物油	31 % OECD 301 F 结果: 不容易生物降解

潜在的生物累积性

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

有害废物代码 本产品在处置时是可燃的（D001）RCRA危险废物.

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

2. Hazard(s) identification

Physical hazards	Flammable aerosols	Category 1
	Gases under pressure	Liquefied gas
Health hazards	Not classified.	
OSHA defined hazards	Not classified.	

Label elements

Signal word Danger

Hazard statement Extremely flammable aerosol. Contains gas under pressure; may explode if heated.

Precautionary statement

Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use.

Response Wash hands after handling.

Storage Protect from sunlight. Store in a well-ventilated place. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
HYDROFLUOROCARBON 152A		75-37-6	18
DIMETHYL ETHER		115-10-6	4.99
BUTANE		106-97-8	1.01

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No specific first aid measures noted.
Ingestion	Not likely, due to the form of the product. In the unlikely event of swallowing contact a physician or poison control center.
Most important symptoms/effects, acute and delayed	Not available.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
Fire fighting equipment/instructions	In case of fire: Stop leak if safe to do so. Do not move cargo or vehicle if cargo has been exposed to heat. Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.
General fire hazards	Extremely flammable aerosol. Contents under pressure. Pressurized container may explode when exposed to heat or flame.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Wear appropriate protective equipment and clothing during clean-up. Emergency personnel need self-contained breathing equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Isolate area until gas has dispersed. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Close valve after each use and when empty. Protect containers from physical damage; do not drag, roll, slide, or drop. When moving containers, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport containers. Suck back of water into the container must be prevented. Do not allow backfeed into the container. Purge air from system before introducing gas. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Do not re-use empty containers. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Level 1 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Store in a well-ventilated place. Stored containers should be periodically checked for general condition and leakage. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. ACGIH Threshold Limit Values

Components	Type	Value
BUTANE (CAS 106-97-8)	STEL	1000 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
BUTANE (CAS 106-97-8)	TWA	1900 mg/m3
		800 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	TWA	1880 mg/m3
		1000 ppm
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection

Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection

Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other

Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection

Applicable for industrial settings only. If permissible levels are exceeded use NIOSH mechanical filter / organic vapor cartridge or an air-supplied respirator.

Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Heat of combustion (NFPA 30B)	4.4 kJ/g
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
BUTANE (CAS 106-97-8)		
Acute		
Inhalation

Gas		
ALC	Rat	> 437500 ppm, 4 h

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

BUTANE	Result: Contact with liquid form may cause frostbite.
DIMETHYL ETHER	Result: Contact with liquid form may cause frostbite.
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

BUTANE	Result: Contact with liquid form may cause frostbite.
DIMETHYL ETHER	Result: Contact with liquid form may cause frostbite.
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Respiratory or skin sensitization

Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

BUTANE	Result: In vitro and in vivo tests did not show mutagenic effects.
DIMETHYL ETHER	Result: In vitro and in vivo tests did not show mutagenic effects.
HYDROFLUOROCARBON 152A	Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

BUTANE	19678 mg/m³ OECD 422 Result: NOAEC Species: Rat
DIMETHYL ETHER	40000 ppm OECD 414 Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 Result: NOAEC Species: Rat

Reproductivity

DIMETHYL ETHER	2.5 % OECD 452, No effects on fertility Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm Result: NOAEL Species: Rat
BUTANE	7131 mg/m³ OECD 422 Result: NOAEC Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROFLUOROCARBON 152A	25000 ppm OECD 453, Inhalation Result: NOAEC Species: Rat Test Duration: 104 wk
DIMETHYL ETHER	47106 mg/m3 air OECD 452, Inhalation Result: NOAEC Species: Rat Test Duration: 2 yr
BUTANE	7214 mg/m³ OECD 422 Result: NOAEC Species: Rat Test Duration: 28 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
DIMETHYL ETHER (CAS 115-10-6)			
Aquatic			
Acute			
Algae	EC50	Green algae	154.917 mg/l, 96 h QSAR
Crustacea	EC50	Daphnia magna	> 4400 mg/l, 48 h

Aquatic			
Acute			
Algae	EC50	Algae	47.755 mg/l QSAR

Components		Species	Test Results
Crustacea	EC50	Daphnia	146.695 mg/l QSAR
Fish	LC50	Fish	295.783 mg/l QSAR

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

BUTANE	100 % Result: Readily Biodegradable Test Duration: 385.5 Hours
DIMETHYL ETHER	5 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

BUTANE	2.89
DIMETHYL ETHER	0.1
HYDROFLUOROCARBON 152A	0.75

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

14. Transport information

General information Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers: Ensure that containers are firmly secured. Ensure cylinder valve is closed and not leaking. Ensure valve outlet cap nut or plug (where provided) is correctly fitted. Ensure valve protection device (where provided) is correctly fitted. Ensure adequate ventilation. Ensure compliance with applicable regulations.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

BUTANE (CAS 106-97-8)	Listed.
DIMETHYL ETHER (CAS 115-10-6)	Listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Not regulated.

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

BUTANE (CAS 106-97-8)
DIMETHYL ETHER (CAS 115-10-6)
HYDROFLUOROCARBON 152A (CAS 75-37-6)

Safe Drinking Water Act (SDWA) Not regulated.

Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT LIVERPOOL ROOT LIFTER
Synonyms	None.
SDS number	21-91-0000150
Product code	1241006
Issue date	11-09-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards

Aerosols	Category 1	H222 - Extremely flammable aerosol. H229 - Pressurized container: May burst if heated.

Hazard summary

Aerosol. CONTENTS UNDER PRESSURE.
Pressurized container may explode when exposed to heat or flame. Not classified for health hazards. However, occupational exposure to the mixture or substance(s) may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: BUTANE, DIMETHYL ETHER, HYDROFLUOROCARBON 152A

Hazard pictograms

Signal word Danger

Hazard statements

H222 Extremely flammable aerosol.

H229	Pressurized container: May burst if heated.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P211	Do not spray on an open flame or other ignition source.
P251	Do not pierce or burn, even after use.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage

P410 + P412	Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 4,81% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 12,08% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
HYDROFLUOROCARBON 152A	18	75-37-6 200-866-1	01-2119474440-43	-	
Classification:	Flam. Gas 1;H220, Press. Gas;H280				
DIMETHYL ETHER	4,99	115-10-6 204-065-8	01-2119472128-37	603-019-00-8	#
Classification:	Flam. Gas 1;H220, Press. Gas;H280				
BUTANE	1,01	106-97-8 203-448-7	01-2119474691-32	601-004-00-0	
Classification:	Flam. Gas 1;H220, Press. Gas;H280				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation If symptoms develop move victim to fresh air. Get medical attention if symptoms persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion In the unlikely event of swallowing contact a physician or poison control center.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards Extremely flammable aerosol.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising from the substance or mixture	Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
Special fire fighting procedures	Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Level 1 Aerosol. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

Components	Type	Value
DIMETHYL ETHER (CAS 115-10-6)	TWA	1920 mg/m3
		1000 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.

Oxidizing properties Not oxidizing.

9.2. Other information

Heat of combustion (NFPA 30B) 4,4 kJ/g

SECTION 10: Stability and reactivity

10.1. Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

10.2. Chemical stability Material is stable under normal conditions.

10.3. Possibility of hazardous reactions No dangerous reaction known under conditions of normal use.

10.4. Conditions to avoid Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.

10.5. Incompatible materials Strong oxidizing agents.

10.6. Hazardous decomposition products No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact No adverse effects due to skin contact are expected.

Eye contact No adverse effects due to eye contact are expected.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
BUTANE (CAS 106-97-8)		
Acute		
Inhalation		
Gas		
LC50	Mouse	1237 mg/l, 2 Hours
DIMETHYL ETHER (CAS 115-10-6)		
Acute		
Inhalation		
Gas		
LC50	Rat	164000 ppm, 4 h
HYDROFLUOROCARBON 152A (CAS 75-37-6)		
Acute		
Inhalation		
Gas		
ALC	Rat	> 437500 ppm, 4 h

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

BUTANE	Result: Contact with liquid form may cause frostbite.
DIMETHYL ETHER	Result: Contact with liquid form may cause frostbite.
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

BUTANE	Result: Contact with liquid form may cause frostbite.
DIMETHYL ETHER	Result: Contact with liquid form may cause frostbite.
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

BUTANE	Result: In vitro and in vivo tests did not show mutagenic effects.
DIMETHYL ETHER	Result: In vitro and in vivo tests did not show mutagenic effects.
HYDROFLUOROCARBON 152A	Result: In vitro and in vivo tests did not show mutagenic effects.

Slovenia. CMR. Protection of workers from exposure to carcinogen and mutagen agents (ULRS 101/2005, as amended)

BUTANE (CAS 106-97-8)	Mutagenic, Category 1B.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

BUTANE (CAS 106-97-8)

Slovenia. CMR. Protection of workers from exposure to carcinogen and mutagen agents (ULRS 101/2005, as amended)

BUTANE (CAS 106-97-8)	Carcinogenic, Category 1A

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

BUTANE	19678 mg/m³ OECD 422 Result: NOAEC Species: Rat
DIMETHYL ETHER	40000 ppm OECD 414 Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 Result: NOAEC Species: Rat

Reproductivity

DIMETHYL ETHER	2,5 % OECD 452, No effects on fertility Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm Result: NOAEL Species: Rat
BUTANE	7131 mg/m³ OECD 422 Result: NOAEC Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

HYDROFLUOROCARBON 152A	25000 ppm OECD 453, Inhalation Result: NOAEC Species: Rat Test Duration: 104 wk
DIMETHYL ETHER	47106 mg/m3 air OECD 452, Inhalation Result: NOAEC Species: Rat Test Duration: 2 yr
BUTANE	7214 mg/m³ OECD 422 Result: NOAEC Species: Rat Test Duration: 28 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
DIMETHYL ETHER (CAS 115-10-6)			
Aquatic			
Acute			
Algae	EC50	Green algae	154,917 mg/l, 96 h QSAR
Crustacea	EC50	Daphnia magna	> 4400 mg/l, 48 h
Fish	LC50	Poecilia reticulata	> 4100 mg/l, 96 h
Other	EC10	Pseudomonas putida	> 1600 mg/l
HYDROFLUOROCARBON 152A (CAS 75-37-6)			
Aquatic			
Acute			
Algae	EC50	Algae	47,755 mg/l QSAR
Crustacea	EC50	Daphnia	146,695 mg/l QSAR
Fish	LC50	Fish	295,783 mg/l QSAR

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

BUTANE	100 % Result: Readily Biodegradable Test Duration: 385,5 Hours
DIMETHYL ETHER	5 % OECD 301 D Result: Not Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

BUTANE	2,89
DIMETHYL ETHER	0,1
HYDROFLUOROCARBON 152A	0,75

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

Substance Global Warming Potential per (Annex IV), Regulation 517/2014/EU on fluorinated greenhouse gases, as amended

BUTANE (CAS 106-97-8)	4
DIMETHYL ETHER (CAS 115-10-6)	1

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. UN number UN1950

14.2. UN proper shipping name AEROSOLS, FLAMMABLE, Limited Quantity

14.3. Transport hazard class(es)

Class 2.1

Label(s) Limited Quantity

Hazard No. (ADR) Not available.

Tunnel restriction code D

14.4. Packing group Not applicable.

14.5. Environmental hazards No

14.6. Special precautions for user Not available.

LTD QTY Net Inner Capacity 1.0 L

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. UN number ID8000

14.2. UN proper shipping name CONSUMER COMMODITY

14.3. Transport hazard class(es)

Class 9 - Class 9

14.4. Packing group Not applicable.

14.5. Environmental hazards No.

ERG Code 9L

14.6. Special precautions for user Not available.

Other information

Passenger and cargo aircraft Allowed with restrictions.

Cargo aircraft only Allowed with restrictions.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. UN number UN1950

14.2. UN proper shipping name AEROSOLS, FLAMMABLE, Limited Quantity

14.3. Transport hazard class(es)

Class 2.1

Label(s) Limited Quantity

14.4. Packing group Not applicable.

14.5. Environmental hazards

Marine pollutant No.

EmS F-D, S-U

14.6. Special precautions for user Not available.

LTD QTY Net Inner Capacity 1.0 L

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

DIMETHYL ETHER (CAS 115-10-6)
BUTANE (CAS 106-97-8)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

BUTANE (CAS 106-97-8)

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

BUTANE (CAS 106-97-8)
DIMETHYL ETHER (CAS 115-10-6)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H220 Extremely flammable gas. H280 Contains gas under pressure; may explode if heated.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT LIVERPOOL ROOT LIFTER**

Autres moyens d'identification

Numéro de la FDS 21-91-0000150

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques

Aérosols inflammables	Catégorie 1
Gaz sous pression	Gaz liquéfié

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Aérosol extrêmement inflammable. Contient un gaz sous pression; peut exploser sous l'effet de la chaleur.

Conseil de prudence

Prévention Tenir à lécart de la chaleur/des étincelles/des flammes nues/des surfaces chaudes. - Ne pas fumer. Ne pas vaporiser sur une flamme nue ou sur toute autre source d'ignition Récipient sous pression : ne pas perforer ni brûler, même après usage.

Intervention Se laver les mains après utilisation.

Stockage Protéger du rayonnement solaire. Stocker dans un endroit bien ventilé. Ne pas exposer à une température supérieure à 50 °C/122 °F

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
HYDROFLUOROCARBON 152A		75-37-6	18
ÉTHER MÉTHYLIQUE		115-10-6	4.99

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
BUTANE		106-97-8	1.01

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Contact avec les yeux Aucune mesure de premiers soins observée.

Ingestion Peu probable en raison de la forme du produit. Dans le cas peu probable d'une ingestion, communiquez avec un médecin ou un centre anti-poison.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Non disponible.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme. Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Les pompiers doivent porter un équipement de protection standard, notamment des vêtements ignifuges, un casque à écran facial, des gants, des bottes en caoutchouc et, dans les espaces clos, un appareil respiratoire autonome.

Équipement/directives de lutte contre les incendies En cas d'incendie : Obturer la fuite si cela peut se faire sans danger. Ne pas déplacer la cargaison ou le véhicule si la cargaison a été exposée à la chaleur. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. Les récipients doivent être refroidis à l'eau pour prévenir la création de pression de vapeur. Pour un important incendie dans la zone de cargaison, utiliser un support à tuyau automatique ou des lances à eau autonomes, si possible. Sinon, se retirer et laisser brûler.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. En cas d'incendie et/ou d'explosion, ne pas respirer les fumées.

Risques d'incendie généraux Aérosol extrêmement inflammable. Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Tenir à l'écart des zones basses. De nombreux gaz sont plus que l'air. Ils se répandent au niveau du sol et s'accumulent dans des zones basses ou confinées (égouts, sous-sols, citernes). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Le personnel d'urgence doit posséder un matériel respiratoire autonome. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. Ventiler les espaces clos avant d'y entrer. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage Se reporter aux fiches de données de sécurité et/ou aux instructions. Arrêter la fuite si cela peut se faire sans risque. Déplacer la bouteille vers un endroit sûr et ouvert si la fuite est irréparable. Isoler la zone jusqu'à dispersion du gaz. Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention Récipient sous pression : ne pas perforer ni brûler, même après usage. Ne pas utiliser si le bouton de vaporisation est manquant ou défectueux. Ne pas pulvériser sur une flamme nue ou toute autre matière incandescente. Ne pas fumer pendant l'utilisation ou jusqu'à ce que la surface vaporisée soit complètement sèche. Ne pas couper, souder, braser, percer, broyer ou exposer les récipients à de la chaleur, à une flamme, à des étincelles ou à d'autres sources d'ignition. Tout matériel utilisé pour la manutention de ce produit doit être mis à la terre. Fermer le détendeur après chaque utilisation et lorsque la bouteille est vide. Protéger les contenants des dommages physiques; ne pas traîner, rouler, glisser ou laisser tomber. Lors du déplacement des réservoirs, même sur de courtes distances, utiliser un chariot (chariot de transport, chariot à main, etc.) conçu pour le transport de réservoirs. L'aspiration inverse de l'eau du récipient doit être évitée. Ne pas permettre le refoulement dans le récipient. Purger l'air du système avant d'introduire un gaz. Utiliser uniquement de l'équipement correctement spécifié qui est approprié pour ce produit, sa pression d'alimentation et sa température. En cas de doute, communiquez avec votre fournisseur de gaz. Ne pas réutiliser les récipients vides. Éviter une exposition prolongée. Utiliser seulement dans les zones bien ventilées. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités Aérosol niveau 1.
Récipient sous pression. Protéger du rayonnement solaire et ne pas exposer à une température supérieure à 50 °C/122 °F. Ne pas perforer, incinérer ou écraser. Ne pas manipuler ou stocker à proximité d'une flamme nue, d'une source de chaleur ou d'autres sources d'ignition. Ce produit peut accumuler des charges statiques qui peuvent causer des étincelles et devenir une source d'ignition. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Les contenants stockés doivent être inspectés régulièrement pour leur condition générale et des fuites. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
BUTANE (CAS 106-97-8)	STEL	1000 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
BUTANE (CAS 106-97-8)	TWA	1900 mg/m3
		800 ppm

États-Unis. Guides WEEL (niveau d'exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
ÉTHER MÉTHYLIQUE (CAS 115-10-6)	TWA	1880 mg/m3
		1000 ppm
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement. Porter un vêtement de protection approprié.
Protection respiratoire	Pour usage industriel seulement. Si les niveaux admissibles sont dépassés, utiliser un filtre mécanique / une cartouche contre les vapeurs organiques NIOSH ou un respirateur à adduction d'air.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Forme	Aérosol
Couleur	Non disponible.
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	Non disponible.
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Chaleur de combustion (NFPA 30B)	4.4 kJ/g
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.

Stabilité chimique La substance est stable dans des conditions normales.

Risque de réactions dangereuses Aucune réaction dangereuse connue dans des conditions normales d'utilisation.

Conditions à éviter Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.

Matériaux incompatibles Agents comburants forts.

Produits de décomposition dangereux Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation Toute inhalation prolongée peut être nocive.

Contact avec la peau On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Contact avec les yeux Aucun effet indésirable dû au contact des yeux n'est prévu.

Ingestion Faible danger présumé en cas d'ingestion.

Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Composants	Espèces	Résultats d'épreuves

BUTANE	7131 mg/m³ OECD 422 Résultat: CSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

HYDROFLUOROCARBON 152A	25000 ppm OCDE 453, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 104 wk
ÉTHER MÉTHYLIQUE	47106 mg/m3 air OCDE 452, Inhalation Résultat: CSENO Espèces: Rat Durée du test: 2 yr
BUTANE	7214 mg/m³ OECD 422 Résultat: CSENO Espèces: Rat Durée du test: 28 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
ÉTHER MÉTHYLIQUE (CAS 115-10-6)			
Aquatique			
Aiguë			
Algues	CE50	Algue verte	154.917 mg/l, 96 h QSAR
Autre	CE10	Pseudomonas putida	> 1600 mg/l
Crustacés	CE50	Daphnia magna	> 4400 mg/l, 48 h
Poisson	CL50	Poecilia reticulata	> 4100 mg/l, 96 h
HYDROFLUOROCARBON 152A (CAS 75-37-6)			
Aquatique			
Aiguë			
Algues	CE50	Algues	47.755 mg/l QSAR
Crustacés	CE50	Daphnia	146.695 mg/l QSAR
Poisson	CL50	Poisson	295.783 mg/l QSAR

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

BUTANE	100 % Résultat: Facilement Biodegradable Durée du test: 385.5 heures
ÉTHER MÉTHYLIQUE	5 % OECD 301 D Résultat: Difficilement Biodégradable Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

BUTANE	2.89
ÉTHER MÉTHYLIQUE	0.1
HYDROFLUOROCARBON 152A	0.75

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Contenu sous pression. Ne pas perforer, incinérer ou écraser. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Code des déchets dangereux Ce produit est inflammable (D001), utilisez le RCRA matières dangereuses lors de l'élimination.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage. Ne pas réutiliser les récipients vides.

14. Informations relatives au transport

DOT

FINISHED GOODS

Numéro ONU	UN1950
Désignation officielle de transport de l'ONU	AÉROSOLS, inflammables, Limited Quantity

Informations générales Éviter le transport avec des véhicules où l'espace de chargement n'est pas séparé du poste de conduite. S'assurer que le chauffeur du véhicule connaît les risques potentiels liés à la cargaison et sait ce qu'il doit faire en cas d'accident ou d'urgence. Avant de transporter des contenants du produit : S'assurer que les contenants sont solidement fixés. S'assurer que le robinet de la bouteille est fermé et ne fuit pas. S'assurer que l'écrou du bouchon de vidange du robinet ou le capuchon protecteur (s'il y a lieu) est correctement installé. S'assurer que le dispositif de protection du robinet (s'il y a lieu) est correctement installé. S'assurer une ventilation adéquate. S'assurer la conformité avec la réglementation applicable.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

BUTANE (CAS 106-97-8)	Inscrit.
ÉTHER MÉTHYLIQUE (CAS 115-10-6)	Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

BUTANE (CAS 106-97-8)
ÉTHER MÉTHYLIQUE (CAS 115-10-6)
HYDROFLUOROCARBON 152A (CAS 75-37-6)

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	09-Novembre-2020
Version n°	01
Classements NFPA	Santé: 0 Inflammabilité: 4 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT LIVERPOOL ROOT LIFTER

鉴别的其他方法

SDS编号 21-91-0000150

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 易燃气溶胶 类别 1
加压气体 液化气体

健康危害 未被分类。

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 极易燃气溶胶。 内装高压气体；遇热可能爆炸。

防范说明

预防措施 远离热源/火花/明火/热表面。- 禁止吸烟。 切勿喷洒在明火或其他点火源上。 压力容器：切勿穿孔或焚烧，即使不再使用。

事故响应 操作后洗手。

安全储存 防日晒。存放在通风良好的地方。 不可暴露在超过50° C/122° F的温度下。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
HYDROFLUOROCARBON 152A		75-37-6	18
二甲醚		115-10-6	4.99
丁烷		106-97-8	1.01

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入	移至空气新鲜处。 如果症状持续或恶化，联络医生。
皮肤接触	预计没有因皮肤接触导致的任何有害影响。
眼睛接触	没有特定的急救措施。
经口	由于产品形状的缘故，不大可能。 若吞噬困难，联络医生或是毒物控制中心。
最重要的症状/影响，急性和延迟性	无资料。
指明任何需要立即就医或特殊治疗的情况	提供一般支持措施，并根据症状进行治疗。
一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	内容物受压。 压力罐若接触热量或火焰，可能会爆炸。 燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	消防员必须使用标准的防护设备，包括防火外套、带面罩的头盔、手套、橡胶靴及在密闭的空间中、SCBA。
消防设备/使用说明	火灾时：如能保证安全，设法堵塞泄漏。 若货物已受热，禁止移动货物或车辆。 在不会发生危险的情况下将容器撤离火灾现场。 应使用冷水冷却容器，以防止蒸汽压力增强。 如果货物区发生大火，应尽可能使用无人操作的固定喷水管或监控喷嘴来灭火。如果没有这些灭火设备，应撤离现场，使火烧尽。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。 在不会发生危险的情况下将容器撤离火灾现场。 一旦发生火灾和/或爆炸，不得吸入烟气。
一般火灾危险	极易燃气溶胶。 内容物受压。 压力罐若接触热量或火焰，可能会爆炸。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 远离低洼区域。 许多气体比空气重，可能在低洼或狭小空间中（下水道、地下室、储罐）在地面蔓延。 清洁时，戴合适防护设备和衣物。 应急人员需要自给式呼吸设备。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 进入封闭空间前先通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	参考所附的安全技术说明和/或使用说明。 在不会发生危险的情况下阻止泄漏。 如果泄漏不能回收，将容器移至安全和开放区域。 隔离区域，直至气体散尽。 使可燃物（木材、纸张、油等）远离泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	压力容器：切勿穿孔或焚烧，即使不再使用。 若缺少喷雾按钮或是损坏则不可使用。 不要喷洒在明火或任何其它炽热的材料上。 在使用时或是在被喷表面完全干燥之前不可吸烟。 禁止切割、焊接、焊缝、钻、磨容器，或将其与热、火焰、火花或其他燃烧源接触。 在操作处置产品时，使用的所有设备必须接地。 每次使用后和放空时关闭阀门。 保护容器免受物理损坏；不要拖，拉，滚，或降落。 当移动容器时，即使是短距离，也要使用专门运输容器的拖车（推车，手推车等）。 水会吸进入容器必须被阻止。 不允许反向进入容器。 系统引入气体前净化空气。 只能使用适合该产品供压和温度的正确指定的设备。如有疑问请联系您的气体供应商。 禁止重复使用倒空的容器。 避免长期暴露。 只能在通风良好的场所使用。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	类别1 悬浮颗粒。 高压储气罐。防止阳光并且不要暴露在高于50摄氏度 / 122华氏度的温度中。 不可刺，焚化或挤压。 禁止在明火、热源或其他燃烧源边操作或储存。 本材料会积聚静电，从而导致火花并且演变为点火源。 储存在密闭的容器中。 存放在通风良好的地方。 储存容器应定期检查一般情况和泄漏。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国ACGIH阈限值

组分	类型	标准值
丁烷 (CAS 106-97-8)	短期暴露极限（STEL）	1000 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
丁烷 (CAS 106-97-8)	TWA	1900 mg/m3
		800 ppm

美国工作场所环境暴露水平（WEEL）指南

组分	类型	标准值
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm
二甲醚 (CAS 115-10-6)	TWA	1880 mg/m3
		1000 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 需穿上合适的防护衣服。

呼吸系统防护 仅用於工业环境。 如果程度超过允许值，用NIOSH 机械过滤/有机蒸气筒或可提供空气的呼吸器。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 使用时严禁吸烟。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状 液体。

形状 气溶胶

颜色 无资料。

气味 特征的。

气味阈值 无资料。

pH 值 无资料。

熔点/凝固点 无资料。

初始沸点和沸程 > 100 ° C (> 212 ° F)

闪点 > 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法

蒸发速率 无资料。

易燃性（固体，气体） 不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%） 无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%） 无资料。

蒸气压 无资料。

蒸气密度 无资料。

相对密度 无资料。

溶解性

溶解性（水） 无资料。

分配系数（辛醇/水） 无资料。

自燃温度 无资料。

分解温度 无资料。

黏度 无资料。

其他信息

爆炸特性 不具有爆炸性。

燃烧热（NFPA 30B） 4.4 kJ/g

氧化特性 没有氧化性。

10. 稳定性和反应性

反应性 产品在正常的使用、储存和运输条件下是稳定的和非活性的。

化学稳定性 正常条件下物料稳定。

可能的危险反应 正常使用的条件下未见有危险反应。

避免接触的条件 远离热，热表面，火花，明火和其他点火源。 接触禁配物。

禁配物 强氧化剂。

危险的分解产物 没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入 持续的吸入可能是有害的。

皮肤接触 预计没有因皮肤接触导致的任何有害影响。

眼睛接触 预计不会因眼神接触而产生不良影响.

经口 预计较低的食入危害。

与物理,化学和毒物学特性有关的症状 无资料。

毒理学效应信息

急性毒性 未知。

组分	物种	试验结果
HYDROFLUOROCARBON 152A (CAS 75-37-6)		
急性的

二甲醚	5 % OECD 301 D 结果: 不容易生物降解 测试时间: 28 D

潜在的生物累积性

辛醇/水分配系数 log Kow

HYDROFLUOROCARBON 152A	0.75
丁烷	2.89
二甲醚	0.1

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 内容物受压。 不可刺，焚化或挤压。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

有害废物代码 本产品在处置时是可燃的（D001）RCRA危险废物.

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。 禁止重复使用倒空的容器。

不作为危险货物运输

一般信息

避免使用装载室与驾驶室未分离的车辆进行运输。 确保车辆司机了解装载货物的潜在危险并知道发生事故或紧急情况时怎么做。 运输前产品容器： 确保容器摆放平稳。 确保气瓶阀紧闭不泄漏。 确保阀门出口螺帽或活塞（如有）已正确安装。 确保阀门保护装置（若有）已正确安装。 确保充分的通风。 确保符合适用的法规。

15. 法规信息

美国联邦法规

本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

丁烷 (CAS 106-97-8)	适用。
二甲醚 (CAS 115-10-6)	适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

HYDROFLUOROCARBON 152A (CAS 75-37-6)
丁烷 (CAS 106-97-8)
二甲醚 (CAS 115-10-6)

饮用水安全法（SDWA） 未受管制。

16. 其他信息，包括编制日期或最新修订日期

最初编制日期	09-十一月-2020

NFPA分级	健康 0 可燃性 4 不稳定性: 0
免责声明	这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT BERLIN DRY SHAMPOO**

Other means of identification

SDS number 21-93-0000124

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards	Flammable aerosols	Category 1
	Gases under pressure	Liquefied gas
Health hazards	Serious eye damage/eye irritation	Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Extremely flammable aerosol. Contains gas under pressure; may explode if heated. Causes serious eye irritation.

Precautionary statement

Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use. Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage Protect from sunlight. Store in a well-ventilated place. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
ISOBUTANE		75-28-5	48.45
PROPANE		74-98-6	36.55
ETHANOL		64-17-5	< 9

Chemical name	Common name and synonyms	CAS number	%
ORYZA SATIVA (RICE) STARCH		9005-25-8	6.74

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation
Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact
Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion
Not likely, due to the form of the product. In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.

Most important symptoms/effects, acute and delayed
Dizziness. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Indication of immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

Fire fighting equipment/instructions
In case of fire: Stop leak if safe to do so. Do not move cargo or vehicle if cargo has been exposed to heat. Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.

Specific methods
Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.

General fire hazards
Extremely flammable aerosol. Contents under pressure. Pressurized container may explode when exposed to heat or flame.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Wear appropriate protective equipment and clothing during clean-up. Emergency personnel need self-contained breathing equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up
Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Use water spray to reduce vapors or divert vapor cloud drift. Isolate area until gas has dispersed. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.

Environmental precautions
Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Close valve after each use and when empty. Protect containers from physical damage; do not drag, roll, slide, or drop. When moving containers, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport containers. Suck back of water into the container must be prevented. Do not allow backfeed into the container. Purge air from system before introducing gas. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Do not re-use empty containers. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Level 3 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Store in a well-ventilated place. Stored containers should be periodically checked for general condition and leakage. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	PEL	1900 mg/m3	
		1000 ppm	
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	PEL	5 mg/m3	Respirable fraction.
		15 mg/m3	Total dust.
PROPANE (CAS 74-98-6)	PEL	1800 mg/m3	
		1000 ppm	

US. ACGIH Threshold Limit Values

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1000 ppm
ISOBUTANE (CAS 75-28-5)	STEL	1000 ppm
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	TWA	10 mg/m3

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value	Form
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3	
		1000 ppm	
ISOBUTANE (CAS 75-28-5)	TWA	1900 mg/m3	
		800 ppm	
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	TWA	5 mg/m3	Respirable.
		10 mg/m3	Total
PROPANE (CAS 74-98-6)	TWA	1800 mg/m3	
		1000 ppm	

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing.
Respiratory protection	Applicable for industrial settings only. If permissible levels are exceeded use NIOSH mechanical filter / organic vapor cartridge or an air-supplied respirator.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 95 °F (> 35 °C) (Liquid)
Flash point	55.4 °F (13.0 °C) Closed Cup (Liquid)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.

Solubility(ies)

Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.

Other information

Explosive properties	Not explosive.
Heat of combustion (NFPA 30B)	41.83 kJ/g
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Acids. Strong oxidizing agents. Chlorine. Fluorine. Nitrates.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Dizziness. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT BERLIN DRY SHAMPOO		
Acute		
Oral		
ATEmix		2.059e+006 mg/kg

Components	Species	Test Results
ETHANOL (CAS 64-17-5)		
Acute		
Dermal		
LD50	Rabbit	> 20000 mg/kg
Inhalation		
Vapor		
LC50	Rat	124.7 mg/l, 4 h OECD 403
Oral		
LD50	Rat	10470 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

ETHANOL	OECD 405 Result: Irritating Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.

Skin sensitization

ETHANOL — OECD 406
Result: Not Sensitizing
Species: Guinea pig

Germ cell mutagenicity — Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL — Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity — Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity — Possible reproductive hazard.

Developmental effects

ETHANOL — > 20000 ppm OECD 414, No effects on development
Result: NOAEL
Species: Rat

Reproductivity

ETHANOL — 20700 mg/kg bw/d OECD 416, No effects on fertility
Result: NOAEL
Species: Rat

Specific target organ toxicity - single exposure — Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure — Due to partial or complete lack of data the classification is not possible.

ETHANOL — 1730 mg/kg bw/d OECD 408, Oral
Result: NOAEL
Species: Rat

Aspiration hazard — Due to partial or complete lack of data the classification is not possible.

Further information — The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity — The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
ETHANOL (CAS 64-17-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustacea	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h
Fish	LC50	Pimephales promelas	15300 mg/l, 96 h
Other	IC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h
Chronic			
Crustacea	NOEC	Daphnia magna	9.6 mg/l, 9 d
Fish	NOEC	Danio rerio	250 mg/l, 120 h OECD 212

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

ETHANOL — 84 %
Result: Readily Biodegradable
Test Duration: 20 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

ETHANOL	-0.31
ISOBUTANE	2.76
PROPANE	2.36

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

General information Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers: Ensure that containers are firmly secured. Ensure cylinder valve is closed and not leaking. Ensure valve outlet cap nut or plug (where provided) is correctly fitted. Ensure valve protection device (where provided) is correctly fitted. Ensure adequate ventilation. Ensure compliance with applicable regulations.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT BERLIN DRY SHAMPOO
Synonyms	None.
SDS number	21-93-0000124
Product code	1241000,1241000 A
Issue date	11-12-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards

Aerosols	Category 1	H222 - Extremely flammable aerosol. H229 - Pressurized container: May burst if heated.

Health hazards

Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.

Hazard summary

Aerosol. CONTENTS UNDER PRESSURE.
Pressurized container may explode when exposed to heat or flame. Causes serious eye irritation. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: ISOBUTANE, PROPANE

Hazard pictograms

Signal word Danger

Hazard statements

H222	Extremely flammable aerosol.
H229	Pressurized container: May burst if heated.
H319	Causes serious eye irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P211	Do not spray on an open flame or other ignition source.
P251	Do not pierce or burn, even after use.
P264	Wash thoroughly after handling.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage

P410 + P412	Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 91,74% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 91,74% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.

4.2. Most important symptoms and effects, both acute and delayed	Dizziness. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.
4.3. Indication of any immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards	Extremely flammable aerosol.
5.1. Extinguishing media	
Suitable extinguishing media	Powder. Carbon dioxide (CO_2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising from the substance or mixture	Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.
5.3. Advice for firefighters	
Special protective equipment for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
Special fire fighting procedures	Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Use water spray to reduce vapors or divert vapor cloud drift. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Level 3 Aerosol. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values

Components	Type	Value
ISOBUTANE (CAS 75-28-5)	TWA	1000 ppm
PROPANE (CAS 74-98-6)	TWA	1000 ppm

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1907 mg/m3
		1000 ppm
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	TWA	10 mg/m3

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
ETHANOL (CAS 64-17-5)	VLE	9500 mg/m3
Regulatory status: Indicative limit (VL)		
		5000 ppm
Regulatory status: Indicative limit (VL)		
	VME	1900 mg/m3
Regulatory status: Indicative limit (VL)		
		1000 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	380 mg/m3
		200 ppm
ISOBUTANE (CAS 75-28-5)	TWA	2400 mg/m3
		1000 ppm
PROPANE (CAS 74-98-6)	TWA	1800 mg/m3
		1000 ppm

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value
ETHANOL (CAS 64-17-5)	AGW	380 mg/m3
		200 ppm
ISOBUTANE (CAS 75-28-5)	AGW	2400 mg/m3
		1000 ppm
PROPANE (CAS 74-98-6)	AGW	1800 mg/m3
		1000 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1000 ppm
ISOBUTANE (CAS 75-28-5)	STEL	1000 ppm
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	TWA	10 mg/m3

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3
PROPANE (CAS 74-98-6)	TWA	1800 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1910 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
		1000 ppm
ISOBUTANE (CAS 75-28-5)	TWA	1000 ppm
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	TWA	10 mg/m3
PROPANE (CAS 74-98-6)	TWA	1000 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Form Aerosol.

Color Not available.

Odor Characteristic.

Odor threshold Not available.

pH Not available.

Melting point/freezing point Not available.

Initial boiling point and boiling range > 95 °F (> 35 °C) (Liquid)

Flash point 55,4 °F (13,0 °C) Closed Cup (Liquid)

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Heat of combustion (NFPA 30B)	41,83 kJ/g

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
10.5. Incompatible materials	Acids. Strong oxidizing agents. Chlorine. Fluorine. Nitrates.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Dizziness. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
CETRIMONIUM CHLORIDE (CAS 112-02-7)		
Acute		
Dermal		
LD50	Rabbit	528 mg/kg OECD 402
Oral		
LD50	Rat	699 mg/kg OECD 401
ETHANOL (CAS 64-17-5)		
Acute		
Dermal		
LD50	Rabbit	> 20000 mg/kg
Inhalation		
Vapor		
LC50	Rat	124,7 mg/l, 4 h OECD 403
Oral		
LD50	Rat	10470 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

CETRIMONIUM CHLORIDE	OECD 404 Result: Corrosive Species: Rabbit
ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

CETRIMONIUM CHLORIDE	OECD 405 Result: Corrosive Species: Rabbit
ETHANOL	OECD 405 Result: Irritating Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

CETRIMONIUM CHLORIDE	OECD 406 Result: Not Sensitizing Species: Guinea pig
ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.
CETRIMONIUM CHLORIDE	Result: In vitro tests did not show mutagenic effects

Slovenia. CMR. Protection of workers from exposure to carcinogen and mutagen agents (ULRS 101/2005, as amended)

ISOBUTANE (CAS 75-28-5)	Mutagenic, Category 1B.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

ISOBUTANE (CAS 75-28-5)

Slovenia. CMR. Protection of workers from exposure to carcinogen and mutagen agents (ULRS 101/2005, as amended)

ISOBUTANE (CAS 75-28-5)	Carcinogenic, Category 1A

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat

Reproductivity

ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

CETRIMONIUM CHLORIDE	100 mg/kg bw/d OECD 407 Result: NOEAL Species: Rat Test Duration: 28 d
ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
CETRIMONIUM CHLORIDE (CAS 112-02-7)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0,08 mg/l, 72 hours OECD 201
Crustacea	EC50	Daphnia magna	0,09 mg/l, 48 hours OECD 202
Fish	LC50	Danio rerio	0,19 - 0,29 mg/l, 96 hours OECD 203
Other	EC50	Pseudomonas putida	0,96 mg/l, 16 hours DIN 38412; Pt. 8
Chronic			
Algae	NOEC	Pseudokirchneriella subcapitata	0,04 mg/l, 72 hours OECD 201
Crustacea	NOEC	Daphnia magna	0,0068 mg/l, 21 day OECD 211
Fish	NOEC	Pimephales promelas	0,032 mg/l, 28 day US FIFRA 72-4(a)
ETHANOL (CAS 64-17-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustacea	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h
Fish	LC50	Pimephales promelas	15300 mg/l, 96 h
Other	IC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h
Chronic			
Crustacea	NOEC	Daphnia magna	9,6 mg/l, 9 d
Fish	NOEC	Danio rerio	250 mg/l, 120 h OECD 212

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

CETRIMONIUM CHLORIDE	93,5 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
ETHANOL	84 % Result: Readily Biodegradable Test Duration: 20 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

CETRIMONIUM CHLORIDE	3,23
ETHANOL	-0,31
ISOBUTANE	2,76
PROPANE	2,36

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

Substance Global Warming Potential per (Annex IV), Regulation 517/2014/EU on fluorinated greenhouse gases, as amended

ISOBUTANE (CAS 75-28-5)	3
PROPANE (CAS 74-98-6)	3

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. UN number	UN1950
14.2. UN proper shipping name	AEROSOLS, FLAMMABLE, Limited Quantity
14.3. Transport hazard class(es)	
Class	2.1
Label(s)	Limited Quantity
Hazard No. (ADR)	Not available.
Tunnel restriction code	D

14.5. Environmental hazards	No
14.6. Special precautions for user	Not available.
LTD QTY Net Inner Capacity	1.0 L

BULK

14.1. UN number	UN1170
14.2. UN proper shipping name	ETHANOL SOLUTION
14.3. Transport hazard class(es)	
Class	3
Label(s)	3
Hazard No. (ADR)	33
Tunnel restriction code	D/E
14.4. Packing group	II
14.5. Environmental hazards	No.
14.6. Special precautions for user	Not available.

IATA

FINISHED GOODS

14.1. UN number	ID8000
14.2. UN proper shipping name	CONSUMER COMMODITY
14.3. Transport hazard class(es)	
Class	9 - Class 9
Label(s)	Class 9, Limited Quantity
14.4. Packing group	Not applicable.
14.5. Environmental hazards	No.
ERG Code	9L
14.6. Special precautions for user	Not available.
Other information	
Passenger and cargo aircraft	Allowed with restrictions.
Cargo aircraft only	Allowed with restrictions.
LTD QTY Net Inner Capacity	0.5 L

BULK

14.1. UN number	UN1170
14.2. UN proper shipping name	ETHANOL SOLUTION

14.3. Transport hazard class(es)

Class	3
14.4. Packing group	II
14.5. Environmental hazards	No.
ERG Code	3L
14.6. Special precautions for user	Not available.
Other information	
Passenger and cargo aircraft	Allowed with restrictions.
Cargo aircraft only	Allowed with restrictions.

IMDG

FINISHED GOODS

14.1. UN number	UN1950
14.2. UN proper shipping name	AEROSOLS, FLAMMABLE, Limited Quantity
14.3. Transport hazard class(es)	
Class	2.1
Label(s)	Limited Quantity
14.4. Packing group	Not applicable.
14.5. Environmental hazards	
Marine pollutant	No.
EmS	F-D, S-U
14.6. Special precautions for user	Not available.
LTD QTY Net Inner Capacity	1.0 L

BULK

14.1. UN number	UN1170
14.2. UN proper shipping name	ETHANOL SOLUTION
14.3. Transport hazard class(es)	
Class	3
14.4. Packing group	II
14.5. Environmental hazards	
Marine pollutant	No.
EmS	F-E, S-D
14.6. Special precautions for user	Not available.
14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

ISOBUTANE (CAS 75-28-5)

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

ISOBUTANE (CAS 75-28-5)

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

ETHANOL (CAS 64-17-5)
ISOBUTANE (CAS 75-28-5)
PROPANE (CAS 74-98-6)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H220 Extremely flammable gas. H225 Highly flammable liquid and vapor. H302 Harmful if swallowed. H311 Toxic in contact with skin. H314 Causes severe skin burns and eye damage. H318 Causes serious eye damage. H319 Causes serious eye irritation. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT BERLIN DRY SHAMPOO**

Autres moyens d'identification

Numéro de la FDS 21-93-0000124

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques	Aérosols inflammables	Catégorie 1
	Gaz sous pression	Gaz liquéfié
Dangers pour la santé	Lésions oculaires graves/irritation oculaire	Catégorie 2A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Aérosol extrêmement inflammable. Contient un gaz sous pression; peut exploser sous l'effet de la chaleur. Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Tenir à lécart de la chaleur/des étincelles/des flammes nues/des surfaces chaudes. - Ne pas fumer. Ne pas vaporiser sur une flamme nue ou sur toute autre source d'ignition Récipient sous pression : ne pas perforer ni brûler, même après usage. Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Stockage Protéger du rayonnement solaire. Stocker dans un endroit bien ventilé. Ne pas exposer à une température supérieure à 50 °C/122 °F

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
ISOBUTANE		75-28-5	48.45
PROPANE		74-98-6	36.55
ÉTHANOL		64-17-5	< 9
ORYZA SATIVA (RICE) STARCH		9005-25-8	6.74

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Ingestion Peu probable en raison de la forme du produit. Dans le cas peu probable d'une ingestion, communiquez avec un médecin ou un centre anti-poison. Rincer la bouche.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Vertiges. Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme. Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Les pompiers doivent porter un équipement de protection standard, notamment des vêtements ignifuges, un casque à écran facial, des gants, des bottes en caoutchouc et, dans les espaces clos, un appareil respiratoire autonome.

Équipement/directives de lutte contre les incendies En cas d'incendie : Obturer la fuite si cela peut se faire sans danger. Ne pas déplacer la cargaison ou le véhicule si la cargaison a été exposée à la chaleur. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. Les récipients doivent être refroidis à l'eau pour prévenir la création de pression de vapeur. Pour un important incendie dans la zone de cargaison, utiliser un support à tuyau automatique ou des lances à eau autonomes, si possible. Sinon, se retirer et laisser brûler.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. En cas d'incendie et/ou d'explosion, ne pas respirer les fumées.

Risques d'incendie généraux Aérosol extrêmement inflammable. Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Tenir à l'écart des zones basses. De nombreux gaz sont plus que l'air. Ils se répandent au niveau du sol et s'accumulent dans des zones basses ou confinées (égouts, sous-sols, citernes). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Le personnel d'urgence doit posséder un matériel respiratoire autonome. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. Ventiler les espaces clos avant d'y entrer. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Se reporter aux fiches de données de sécurité et/ou aux instructions. Arrêter la fuite si cela peut se faire sans risque. Déplacer la bouteille vers un endroit sûr et ouvert si la fuite est irréparable. Utiliser une pulvérisation d'eau pour réduire les vapeurs ou pour détourner la direction du nuage de vapeurs. Isoler la zone jusqu'à dispersion du gaz. Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Récipient sous pression : ne pas perforer ni brûler, même après usage. Ne pas utiliser si le bouton de vaporisation est manquant ou défectueux. Ne pas pulvériser sur une flamme nue ou toute autre matière incandescente. Ne pas fumer pendant l'utilisation ou jusqu'à ce que la surface vaporisée soit complètement sèche. Ne pas couper, souder, braser, percer, broyer ou exposer les récipients à de la chaleur, à une flamme, à des étincelles ou à d'autres sources d'ignition. Tout matériel utilisé pour la manutention de ce produit doit être mis à la terre. Fermer le détendeur après chaque utilisation et lorsque la bouteille est vide. Protéger les contenants des dommages physiques; ne pas traîner, rouler, glisser ou laisser tomber. Lors du déplacement des réservoirs, même sur de courtes distances, utiliser un chariot (chariot de transport, chariot à main, etc.) conçu pour le transport de réservoirs. L'aspiration inverse de l'eau du récipient doit être évitée. Ne pas permettre le refoulement dans le récipient. Purger l'air du système avant d'introduire un gaz. Utiliser uniquement de l'équipement correctement spécifié qui est approprié pour ce produit, sa pression d'alimentation et sa température. En cas de doute, communiquez avec votre fournisseur de gaz. Ne pas réutiliser les récipients vides. Éviter tout contact avec les yeux. Éviter une exposition prolongée. Utiliser seulement dans les zones bien ventilées. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Aérosol niveau 3.
Récipient sous pression. Protéger du rayonnement solaire et ne pas exposer à une température supérieure à 50 °C/122 °F. Ne pas perforer, incinérer ou écraser. Ne pas manipuler ou stocker à proximité d'une flamme nue, d'une source de chaleur ou d'autres sources d'ignition. Ce produit peut accumuler des charges statiques qui peuvent causer des étincelles et devenir une source d'ignition. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Les contenants stockés doivent être inspectés régulièrement pour leur condition générale et des fuites. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur	Forme
ÉTHANOL (CAS 64-17-5)	PEL (limite d'exposition admissible)	1900 mg/m3	
		1000 ppm	
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	PEL (limite d'exposition admissible)	5 mg/m3	Fraction respirable.
		15 mg/m3	Poussières totales.
PROPANE (CAS 74-98-6)	PEL (limite d'exposition admissible)	1800 mg/m3	
		1000 ppm	

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	STEL	1000 ppm
ISOBUTANE (CAS 75-28-5)	STEL	1000 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	TWA	10 mg/m3

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur	Forme
ÉTHANOL (CAS 64-17-5)	TWA	1900 mg/m3	
		1000 ppm	
ISOBUTANE (CAS 75-28-5)	TWA	1900 mg/m3	
		800 ppm	
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	TWA	5 mg/m3	Respirable.
		10 mg/m3	Total
PROPANE (CAS 74-98-6)	TWA	1800 mg/m3	
		1000 ppm	

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. Si les niveaux admissibles sont dépassés, utiliser un filtre mécanique / une cartouche contre les vapeurs organiques NIOSH ou un respirateur à adduction d'air.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Aérosol

Couleur Non disponible.

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH Non disponible.

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 35 °C (> 95 °F) (liquide)

Point d'éclair 13.0 °C (55.4 °F) Coupelle fermée (liquide)

Taux d'évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Chaleur de combustion (NFPA 30B)	41.83 kJ/g
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Éviter les températures supérieures au point d'éclair. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Acides. Agents comburants forts. Chlore Fluor Nitrates.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables	
Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Vertiges. Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.
Renseignements sur les effets toxicologiques	
Toxicité aiguë	Inconnu(e).

ÉTHANOL	-0.31
ISOBUTANE	2.76
PROPANE	2.36

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Contenu sous pression. Ne pas perforer, incinérer ou écraser. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Code des déchets dangereux Ce produit est inflammable (D001), utilisez le RCRA matières dangereuses lors de l'élimination.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage. Ne pas réutiliser les récipients vides.

Informations générales	Éviter le transport avec des véhicules où l'espace de chargement n'est pas séparé du poste de conduite. S'assurer que le chauffeur du véhicule connaît les risques potentiels liés à la cargaison et sait ce qu'il doit faire en cas d'accident ou d'urgence. Avant de transporter des contenants du produit : S'assurer que les contenants sont solidement fixés. S'assurer que le robinet de la bouteille est fermé et ne fuit pas. S'assurer que l'écrou du bouchon de vidange du robinet ou le capuchon protecteur (s'il y a lieu) est correctement installé. S'assurer que le dispositif de protection du robinet (s'il y a lieu) est correctement installé. S'assurer une ventilation adéquate. S'assurer la conformité avec la réglementation applicable.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

ÉTHANOL (CAS 64-17-5)	Inscrit.
ISOBUTANE (CAS 75-28-5)	Inscrit.
PROPANE (CAS 74-98-6)	Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

ISOBUTANE (CAS 75-28-5)
PROPANE (CAS 74-98-6)

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

ÉTHANOL (CAS 64-17-5)	Faible priorité

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	12-Novembre-2020
Version n°	01

鉴别的其他方法

SDS编号 21-93-0000124

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 易燃气溶胶 类别 1
加压气体 液化气体

健康危害 严重眼睛损伤/眼睛刺激性 类别 2A

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 极易燃气溶胶。 内装高压气体；遇热可能爆炸。 造成严重眼刺激。

防范说明

预防措施 远离热源/火花/明火/热表面。- 禁止吸烟。 切勿喷洒在明火或其他点火源上。 压力容器：切勿穿孔或焚烧，即使不再使用。 作业后彻底清洗。 戴防护眼罩/防护面具。

事故响应 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如仍觉眼刺激：求医/就诊。

安全储存 防日晒。存放在通风良好的地方。 不可暴露在超过50° C/122° F的温度下。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
异丁烷		75-28-5	48.45
丙烷		74-98-6	36.55
乙醇		64-17-5	< 9
ORYZA SATIVA (RICE) STARCH		9005-25-8	6.74

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入
移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触
用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触
立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如仍觉眼刺激：求医/就诊。

经口
由于产品形状的缘故，不大可能。 若吞噬困难，联络医生或是毒物控制中心。 漱口。

最重要的症状/影响，急性和延迟性
头晕。 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。

指明任何需要立即就医或特殊治疗的情况
提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息
务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂
水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质
禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害
内容物受压。 压力罐若接触热量或火焰，可能会爆炸。 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施
消防员必须使用标准的防护设备，包括防火外套、带面罩的头盔、手套、橡胶靴及在密闭的空间中、SCBA。

消防设备/使用说明
火灾时：如能保证安全，设法堵塞泄漏。 若货物已受热，禁止移动货物或车辆。 在不会发生危险的情况下将容器撤离火灾现场。 应使用冷水冷却容器，以防止蒸汽压力增强。 如果货物区发生大火，应尽可能使用无人操作的固定喷水管或监控喷嘴来灭火。如果没有这些灭火设备，应撤离现场，使火烧尽。

特定的方法
采用标准灭火程序并考虑其他涉及材料有关的危险。 在不会发生危险的情况下将容器撤离火灾现场。 一旦发生火灾和/或爆炸，不得吸入烟气。

一般火灾危险
极易燃气溶胶。 内容物受压。 压力罐若接触热量或火焰，可能会爆炸。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序
让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 远离低洼区域。 许多气体比空气重，可能在低洼或狭小空间中（下水道、地下室、储罐）在地面蔓延。 清洁时，戴合适防护设备和衣物。 应急人员需要自给式呼吸设备。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 进入封闭空间前先通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料
参考所附的安全技术说明和/或使用说明。 在不会发生危险的情况下阻止泄漏。 如果泄漏不能回收，将容器移至安全和开放区域。 喷雾状水来减少蒸气或转移蒸气云漂移。 隔离区域，直至气体散尽。 使可燃物（木材、纸张、油等）远离泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 参见SDS第13部分废弃处理的说明。

环境保护措施
防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项
压力容器：切勿穿孔或焚烧，即使不再使用。 若缺少喷雾按钮或是损坏则不可使用。 不要喷洒在明火或任何其它炽热的材料上。 在使用时或是在被喷表面完全干燥之前不可吸烟。 禁止切割、焊接、焊缝、钻、磨容器，或将其与热、火焰、火花或其他燃烧源接触。 在操作处置产品时，使用的所有设备必须接地。 每次使用后和放空时关闭阀门。 保护容器免受物理损坏；不要拖，拉，滚，或降落。 当移动容器时，即使是短距离，也要使用专门运输容器的拖车（推车，手推车等）。 水会吸进入容器必须被阻止。 不允许反向进入容器。 系统引入气体前净化空气。 只能使用适合该产品供压和温度的正确指定的设备。如有疑问请联系您的气体供应商。 禁止重复使用倒空的容器。 避免接触到眼睛。 避免长期暴露。 只能在通风良好的场所使用。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物
类别3 悬浮颗粒。

高压储气罐。防止阳光并且不要暴露在高于50摄氏度 / 122华氏度的温度中。 不可刺，焚化或挤压。 禁止在明火、热源或其他燃烧源边操作或储存。 本材料会积聚静电，从而导致火花并且演变为点火源。 储存在密闭的容器中。 存放在通风良好的地方。 储存容器应定期检查一般情况和泄漏。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值	形状
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	PEL-常期暴露极限	5 mg/m3	可呼吸部分。
		15 mg/m3	总尘。
丙烷 (CAS 74-98-6)	PEL-常期暴露极限	1800 mg/m3	
		1000 ppm	
乙醇 (CAS 64-17-5)	PEL-常期暴露极限	1900 mg/m3	
		1000 ppm	

美国ACGIH阈限值

组分	类型	标准值
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	TWA	10 mg/m3
乙醇 (CAS 64-17-5)	短期暴露极限（STEL）	1000 ppm
异丁烷 (CAS 75-28-5)	短期暴露极限（STEL）	1000 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值	形状
ORYZA SATIVA (RICE) STARCH (CAS 9005-25-8)	TWA	5 mg/m3	可呼吸的。
		10 mg/m3	总量
丙烷 (CAS 74-98-6)	TWA	1800 mg/m3	
		1000 ppm	
乙醇 (CAS 64-17-5)	TWA	1900 mg/m3	
		1000 ppm	
异丁烷 (CAS 75-28-5)	TWA	1900 mg/m3	
		800 ppm	

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。

呼吸系统防护 仅用於工业环境。 如果程度超过允许值，用NIOSH 机械过滤/有机蒸气筒或可提供空气的呼吸器。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 使用时严禁吸烟。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状 液体。

形状 气溶胶

颜色 无资料。

气味 特征的。

气味阈值 无资料。

pH 值 无资料。

熔点/凝固点 无资料。

初始沸点和沸程 > 35 ° C (> 95 ° F) (液体)

闪点	13.0 ° C (55.4 ° F) 闭杯闪点测定法 (液体)
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
燃烧热（NFPA 30B）	41.83 kJ/g
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 避免温度超過閃火點温度。 接触禁配物。
禁配物	酸类。 强氧化剂。 氯。 氟。 硝酸盐。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息	
吸入	持续的吸入可能是有害的。
皮肤接触	预计没有因皮肤接触导致的任何有害影响。
眼睛接触	造成严重眼刺激。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	头晕。 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。
毒理学效应信息	
急性毒性	未知。

产品	**物种**	**试验结果**
PULP RIOT BERLIN DRY SHAMPOO		
急性的

经皮肤		
LD50	兔子	> 20000 mg/kg

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

刺激性腐蚀性 - 皮肤

乙醇 OECD 404
结果: 非刺激性
物种: 兔子

严重眼睛损伤/眼睛刺激性 造成严重眼刺激。

刺激性腐蚀性 - 眼睛

乙醇 OECD 405
结果: 刺激性的
物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物

乙醇 OECD 406
结果: Not Sensitizing
物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

乙醇 结果: 体外和体内试验均未见致突变作用。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 是可能的生殖系统危害物。

发育效应

乙醇 > 20000 ppm OECD 414, 对发展没有影响
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

生殖能力

乙醇 20700 mg/kg bw/d OECD 416, 对生育力没有影响
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

乙醇 1730 mg/kg bw/d OECD 408, 经口
结果: NOAEL (未观察到有害效果的水平)
物种: 大鼠

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
乙醇 (CAS 64-17-5)			
水生的			
急性的			
其它的, 其它	IC50	以国内污水为主的活性污泥	> 1000 mg/l, 3 h
甲壳纲动物	EC50	网纹水蚤	5012 mg/l, 48 h
藻类	EC50	近头状伪蹄形藻	22200 mg/l, 96 h
鱼	LC50	呆鲦鱼	15300 mg/l, 96 h
慢性的			
甲壳纲动物	无明显反应浓度（NOEC）	水蚤	9.6 mg/l, 9 D
鱼	无明显反应浓度（NOEC）	斑马鱼 (Danio rerio)	250 mg/l, 120 h OECD 212

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

乙醇	84 % 结果: 易生物降解 测试时间: 20 D

潜在的生物累积性

辛醇/水分配系数 log Kow

丙烷	2.36
乙醇	-0.31
异丁烷	2.76

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 内容物受压。 不可刺，焚化或挤压。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

有害废物代码 本产品在处置时是可燃的（D001）RCRA危险废物.

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。 禁止重复使用倒空的容器。

14. 运输信息

美国运输部（DOT）

FINISHED GOODS

联合国危险货物编号(UN No.)	UN1950
联合国正式运输名称	气雾剂, 易燃, Limited Quantity
类别	2.1

一般信息 避免使用装载室与驾驶室未分离的车辆进行运输。 确保车辆司机了解装载货物的潜在危险并知道发生事故或紧急情况时怎么做。 运输前产品容器： 确保容器摆放平稳。 确保气瓶阀紧闭不泄漏。 确保阀门出口螺帽或活塞（如有）已正确安装。 确保阀门保护装置（若有）已正确安装。 确保充分的通风。 确保符合适用的法规。

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

丙烷 (CAS 74-98-6)	适用。
乙醇 (CAS 64-17-5)	适用。
异丁烷 (CAS 75-28-5)	适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

丙烷 (CAS 74-98-6)
异丁烷 (CAS 75-28-5)

饮用水安全法（SDWA） 未受管制。

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

乙醇 (CAS 64-17-5)	Low priority

16. 其他信息，包括编制日期或最新修订日期

最初编制日期	12-十一月-2020
版本号	01
NFPA分级	健康 2 可燃性 4 不稳定性: 0
免责声明	这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT BANGKOK COLOR SAFE SHAMPOO**

Other means of identification

SDS number 00-11-0000632

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 2

OSHA defined hazards Not classified.

Label elements

Signal word Warning

Hazard statement Causes serious eye irritation.

Precautionary statement

Prevention Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
SODIUM COCOYL ISETHIONATE		61789-32-0	8.4
SODIUM LAUROYL SARCOSINATE		137-16-6	6
COCONUT ACID		61788-47-4	1.3

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Avoid contact with eyes. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Viscous Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.

Hazardous decomposition products No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation No adverse effects due to inhalation are expected.

Skin contact No adverse effects due to skin contact are expected.

Eye contact Causes serious eye irritation.

Ingestion Expected to be a low ingestion hazard.

Symptoms related to the physical, chemical and toxicological characteristics Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT BANGKOK COLOR SAFE SHAMPOO

LD50	Rat	> 5000 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

SODIUM COCOYL ISETHIONATE	OECD 404 Result: Slightly Irritating Species: Rabbit
SODIUM LAUROYL SARCOSINATE	OECD 404, 30% Sol. Result: Slightly Irritating Species: Rabbit
COCONUT ACID	Result: Not Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

SODIUM COCOYL ISETHIONATE	OECD 405 Result: Irritating Species: Rabbit
SODIUM LAUROYL SARCOSINATE	OECD 405, 30% Sol. Result: Irritating Species: Rabbit
COCONUT ACID	Result: Irritating Species: Rabbit

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

SODIUM LAUROYL SARCOSINATE	EU B.6 Result: Not Sensitizing Species: Guinea pig
SODIUM COCOYL ISETHIONATE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

SODIUM COCOYL ISETHIONATE	Result: In vitro tests did not show mutagenic effect
SODIUM LAUROYL SARCOSINATE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

SODIUM LAUROYL SARCOSINATE	>= 250 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 414, Based on test data for structurally similar materials. Result: NOEL Species: Rat

Reproductivity

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 421, Based on test data for structurally similar materials. Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

SODIUM COCOYL ISETHIONATE	>= 1000 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat Test Duration: 28 d >= 2070 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat Test Duration: 28 d
SODIUM LAUROYL SARCOSINATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
SODIUM COCOYL ISETHIONATE (CAS 61789-32-0)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	1 - 10 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	10 - 100 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	10 - 100 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h OECD 209
Chronic			
Algae	EC10	Pseudokirchneriella subcapitata	0.1 - 1 mg/l, 72 h OECD 201

Acute			
Algae	EC50	Desmodesmus subspicatus	23.7 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	8.91 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	32.1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h OECD 209

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

SODIUM COCOYL ISETHIONATE	78 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d
SODIUM LAUROYL SARCOSINATE	82 % ISO 14593 Result: Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

SODIUM COCOYL ISETHIONATE	-0.41

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT BANGKOK COLOR SAFE SHAMPOO
Synonyms	None.
SDS number	00-11-0000632
Product code	1241001
Issue date	11-13-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye irritation. Dangerous for the environment if discharged into watercourses. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: SODIUM LAUROYL SARCOSINATE

Hazard pictograms

Signal word Warning

Hazard statements

H319	Causes serious eye irritation.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P264	Wash thoroughly after handling.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage Store away from incompatible materials.

Disposal

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 7,8% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 13,8% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains HEXYL SALICYLATE. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
SODIUM COCOYL ISETHIONATE	8,4	61789-32-0 263-052-5	01-2119974104-40	-	
Classification:	Eye Irrit. 2;H319, Aquatic Chronic 3;H412				
SODIUM LAUROYL SARCOSINATE	6	137-16-6 205-281-5	01-2119527780-39	-	
Classification:	Skin Irrit. 2;H315, Eye Dam. 1;H318, Acute Tox. 2;H330				
COCONUT ACID	1,3	61788-47-4 262-978-7	-	-	
Classification:	Eye Irrit. 2;H319				
CETRIMONIUM CHLORIDE	0,3	112-02-7 203-928-6	01-2119970558-23	-	
Classification:	Acute Tox. 4;H302, Acute Tox. 3;H311, Skin Corr. 1C;H314, Eye Dam. 1;H318, Aquatic Acute 1;H400(M=10), Aquatic Chronic 1;H410

Classification:	Skin Irrit. 2;H315, Skin Sens. 1A;H317, Aquatic Acute 1;H400				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
4.2. Most important symptoms and effects, both acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.
4.3. Indication of any immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards	No unusual fire or explosion hazards noted.
5.1. Extinguishing media	
Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising from the substance or mixture	During fire, gases hazardous to health may be formed.
5.3. Advice for firefighters	
Special protective equipment for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Special fire fighting procedures	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
For emergency responders	Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.
6.2. Environmental precautions	Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.
6.3. Methods and material for containment and cleaning up	Prevent product from entering drains. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Avoid contact with eyes. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits	No exposure limits noted for ingredient(s).
Biological limit values	No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only. Wear suitable protective clothing.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Viscous Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.

Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Not available.
Skin contact	May cause an allergic skin reaction.
Eye contact	Causes serious eye irritation.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT BANGKOK COLOR SAFE SHAMPOO		
Acute		
Dermal		
ATEmix		141100 mg/kg
Oral		
ATEmix		66670 mg/kg

Components	Species	Test Results
CETRIMONIUM CHLORIDE (CAS 112-02-7)		
Acute		
Dermal		
LD50	Rabbit	528 mg/kg OECD 402
Oral		
LD50	Rat	699 mg/kg OECD 401
COCAMIDOPROPYL DIMETHYLAMINE (CAS 68140-01-2)		
Acute		
Oral		
LD50	Rat	200 - 2000 mg/kg
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE (CAS 65497-29-2)

HEXYL SALICYLATE (CAS 6259-76-3)		
Acute		
Dermal		
LD50	Rabbit	> 5000 mg/kg
Oral		
LD50	Rat	> 5000 mg/kg OECD 401

Components	Species	Test Results
SODIUM COCOYL ISETHIONATE (CAS 61789-32-0)		
Acute		
Oral		
LD50	Rat	> 2000 mg/kg OECD 201
SODIUM LAUROYL SARCOSINATE (CAS 137-16-6)		
Acute		
Inhalation		
Aerosol		
LC50	Rat	0,05 - 0,5 mg/l, 4 h OECD 403
Oral		
LD50	Rat	> 5000 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

CETRIMONIUM CHLORIDE	OECD 404 Result: Corrosive Species: Rabbit
HEXYL SALICYLATE	OECD 404 Result: Irritating Species: Rabbit
SODIUM COCOYL ISETHIONATE	OECD 404 Result: Slightly Irritating Species: Rabbit
SODIUM LAUROYL SARCOSINATE	OECD 404, 30% Sol. Result: Slightly Irritating Species: Rabbit
COCONUT ACID	Result: Not Irritating Species: Rabbit
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	Result: Slightly Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

CETRIMONIUM CHLORIDE	OECD 405 Result: Corrosive Species: Rabbit
SODIUM COCOYL ISETHIONATE	OECD 405 Result: Irritating Species: Rabbit
HEXYL SALICYLATE	OECD 405 Result: Not Irritating Species: Rabbit
SODIUM LAUROYL SARCOSINATE	OECD 405, 30% Sol. Result: Irritating Species: Rabbit
COCONUT ACID	Result: Irritating Species: Rabbit
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	Result: Slightly Irritating Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

SODIUM LAUROYL SARCOSINATE	EU B,6 Result: Not Sensitizing Species: Guinea pig
CETRIMONIUM CHLORIDE	OECD 406 Result: Not Sensitizing Species: Guinea pig
SODIUM COCOYL ISETHIONATE	OECD 406 Result: Not Sensitizing Species: Guinea pig
HEXYL SALICYLATE	OECD 429 Result: Sensitizing Species: Mouse
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

HEXYL SALICYLATE	Result: In vitro and in vivo tests did not show mutagenic effects.
SODIUM COCOYL ISETHIONATE	Result: In vitro tests did not show mutagenic effect
CETRIMONIUM CHLORIDE	Result: In vitro tests did not show mutagenic effects
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	Result: In vitro tests did not show mutagenic effects
SODIUM LAUROYL SARCOSINATE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

SODIUM LAUROYL SARCOSINATE	>= 250 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 414, Based on test data for structurally similar materials. Result: NOEL Species: Rat
HEXYL SALICYLATE	360 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 421, Based on test data for structurally similar materials. Result: NOAEL Species: Rat
HEXYL SALICYLATE	714 mg/kg bw/d OECD 416 Result: NOAEL Species: Mouse

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

SODIUM COCOYL ISETHIONATE	>= 1000 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat Test Duration: 28 d >= 2070 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat Test Duration: 28 d
CETRIMONIUM CHLORIDE	100 mg/kg bw/d OECD 407 Result: NOEAL Species: Rat Test Duration: 28 d
HEXYL SALICYLATE	249 mg/m3 air OECD 412, Inhalation Result: NOAEC Species: Rat Test Duration: 28 d
SODIUM LAUROYL SARCOSINATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
HEXYL SALICYLATE	46,9 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
CETRIMONIUM CHLORIDE (CAS 112-02-7)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0,08 mg/l, 72 hours OECD 201
Crustacea	EC50	Daphnia magna	0,09 mg/l, 48 hours OECD 202
Fish	LC50	Danio rerio	0,19 - 0,29 mg/l, 96 hours OECD 203
Other	EC50	Pseudomonas putida	0,96 mg/l, 16 hours DIN 38412; Pt. 8
Chronic			
Algae	NOEC	Pseudokirchneriella subcapitata	0,04 mg/l, 72 hours OECD 201
Crustacea	NOEC	Daphnia magna	0,0068 mg/l, 21 day OECD 211
Fish	NOEC	Pimephales promelas	0,032 mg/l, 28 day US FIFRA 72-4(a)
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE (CAS 65497-29-2)			
Aquatic			
Acute			
Crustacea	EC50	Daphnia magna	100 mg/l, 48 h
Fish	LC50	Oncorhynchus mykiss	0,39 - 1,22 mg/l, 96 h
HEXYL SALICYLATE (CAS 6259-76-3)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0,61 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,357 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	1,34 mg/l, 96 h EU C.1
SODIUM COCOYL ISETHIONATE (CAS 61789-32-0)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	1 - 10 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	10 - 100 mg/l, 48 h OECD 202
Fish	LC50	Oncorhynchus mykiss	10 - 100 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h OECD 209
Chronic			
Algae	EC10	Pseudokirchneriella subcapitata	0,1 - 1 mg/l, 72 h OECD 201
SODIUM LAUROYL SARCOSINATE (CAS 137-16-6)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	23,7 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	8,91 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	32,1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h OECD 209

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

CETRIMONIUM CHLORIDE	93,5 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d
GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE	< 60 % OECD 301 Result: Not Readily Biodegradable Test Duration: 28 d

Biodegradability

Percent degradation (Aerobic biodegradation)

HEXYL SALICYLATE	91 % OECD 301 F Result: Readily Biodegradable Test Duration: 28 d
SODIUM COCOYL ISETHIONATE	78 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d
SODIUM LAUROYL SARCOSINATE	82 % ISO 14593 Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

CETRIMONIUM CHLORIDE	3,23
HEXYL SALICYLATE	5,5 OECD 117
SODIUM COCOYL ISETHIONATE	-0,41

Bioconcentration factor (BCF)

HEXYL SALICYLATE	8913

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H301 Toxic if swallowed. H302 Harmful if swallowed. H311 Toxic in contact with skin. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H330 Fatal if inhaled. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.

Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT BANGKOK COLOR SAFE SHAMPOO**

Otros medios de identificación

Número de FDS 00-11-0000632

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos No clasificado.

Peligros para la salud Lesiones oculares graves/irritación ocular Categoría 2

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Atención

Declaración de peligro Provoca irritación ocular grave.

Consejos de prudencia

Prevención Lavarse concienzudamente tras la manipulación. Llevar protección ocular/facial.

Respuesta En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. Si persiste la irritación ocular: Consultar a un médico.

Almacenamiento Consérvese alejado de materiales incompatibles.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
SODIUM COCOYL ISETHIONATE		61789-32-0	8.4
Lauroil sarcosinato de sodio		137-16-6	6
COCONUT ACID		61788-47-4	1.3

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación	Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.
Contacto con la piel	Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.
Contacto con los ojos	Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Si persiste la irritación ocular: Consultar a un médico.
Ingestión	Enjuagarse la boca. Obtenga atención médica en caso de síntomas.
Principales síntomas y efectos, agudos y retardados	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa.
Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Provea las medidas de apoyo generales y de tratamiento sintomático. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.
Información general	Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Ningún riesgo excepcional de incendio o explosión señalado.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Use equipo y ropa de protección apropiados durante la limpieza. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Asegúrese una ventilación apropiada. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	Evítese el contacto con los ojos. Asegúre una ventilación adecuada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.
Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Almacenar en un recipiente herméticamente cerrado. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Valores límite biológicos No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.

Controles técnicos apropiados Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación para lavado de ojos.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).

Protección de la piel

Protección de las manos De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros De aplicación solamente en entornos industriales. Úsese indumentaria protectora adecuada.

Protección respiratoria De aplicación solamente en entornos industriales. En caso de ventilación insuficiente, úsese equipo respiratorio adecuado.

Peligros térmicos Use ropa protectora térmica adecuada si resulta necesario.

Consideraciones generales de higiene Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto

Estado físico Líquido.

Forma Líquido viscoso.

Color No disponible.

Olor Característico.

Umbral olfativo No disponible.

pH No disponible.

Punto de fusión/punto de congelación No disponible.

Punto inicial de ebullición e intervalo de ebullición > 100 °C (> 212 °F)

Punto de inflamación > 100.0 °C (> 212.0 °F) Copa Cerrada

Tasa de evaporación No disponible.

Inflamabilidad (sólido, gas) No aplicable.

Límites superior/inferior de inflamabilidad o de explosividad

Límite de inflamabilidad - inferior (%) No disponible.

Límite de inflamabilidad - superior (%) No disponible.

Límite de explosividad inferior (%) No disponible.

Límite de explosividad superior (%) No disponible.

Presión de vapor No disponible.

Densidad de vapor No disponible.

Densidad relativa No disponible.

Solubilidad(es)

Solubilidad (agua) No disponible.

Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	No es de esperar que se produzcan efectos adversos por inhalación.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	Provoca irritación ocular grave.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Producto	Especies	Resultados de la prueba
PULP RIOT BANGKOK COLOR SAFE SHAMPOO		
Agudo		
Dérmico		
ATEmix		1.895e+006 mg/kg
Oral		
ATEmix		187300 mg/kg

Componentes	Especies	Resultados de la prueba
Lauroil sarcosinato de sodio (CAS 137-16-6)		
Agudo		
Inhalación		
Aerosol		
LC50	Rata	0.05 - 0.5 mg/l, 4 h OECD 403
Oral		
LD50	Rata	> 5000 mg/kg OECD 401
SODIUM COCOYL ISETHIONATE (CAS 61789-32-0)		
Agudo		
Oral		
LD50	Rata	> 2000 mg/kg OECD 201

Corrosión/irritación cutánea Debido a la falta total o parcial de datos, la clasificación no es posible. No se esperan efectos adversos por contacto con la piel.

Irritación/Corrosión- Piel

SODIUM COCOYL ISETHIONATE	OECD 404 Resultado: Ligeramente Irritante Especies: Conejo
Lauroil sarcosinato de sodio	OECD 404, 30% Sol. Resultado: Ligeramente Irritante Especies: Conejo
COCONUT ACID	Resultado: No Irritante Especies: Conejo

Lesiones oculares graves/irritación ocular Provoca irritación ocular grave.

Irritación/Corrosión- Ojos

SODIUM COCOYL ISETHIONATE	OECD 405 Resultado: Irritante Especies: Conejo
Lauroil sarcosinato de sodio	OECD 405, 30% Sol. Resultado: Irritante Especies: Conejo
COCONUT ACID	Resultado: Irritante Especies: Conejo

Sensibilización respiratoria o cutánea

Sensibilización respiratoria Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea

Lauroil sarcosinato de sodio	EU B.6 Resultado: Not Sensibilizante Especies: Conejillo de indias
SODIUM COCOYL ISETHIONATE	OECD 406 Resultado: Not Sensibilizante Especies: Conejillo de indias

Mutagenicidad en células germinales Debido a la falta total o parcial de datos, la clasificación no es posible.

Mutagenicidad

SODIUM COCOYL ISETHIONATE	Resultado: In vitro tests did not show mutagenic effect
Lauroil sarcosinato de sodio	Resultado: Las pruebas in vitro no demostraron efectos mutágenos

Carcinogenicidad No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción Debido a la falta total o parcial de datos, la clasificación no es posible.

Efectos sobre el desarrollo

Lauroil sarcosinato de sodio	>= 250 mg/kg bw/d OECD 414 Resultado: NOAEL Especies: Rata
SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 414, Basado en datos de pruebas para materiales estructuralmente similares Resultado: NOEL Especies: Rata

Reproductividad

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OCDE 421, Basado en datos de pruebas para materiales estructuralmente similares Resultado: NOAEL Especies: Rata

Toxicidad específica en determinados órganos – exposición única

Debido a la falta total o parcial de datos, la clasificación no es posible.

Toxicidad específica en determinados órganos – exposición repetida

Debido a la falta total o parcial de datos, la clasificación no es posible.

SODIUM COCOYL ISETHIONATE	>= 1000 mg/kg bw/d OECD 407, Oral Resultado: NOAEL Especies: Rata Duración de la prueba: 28 d >= 2070 mg/kg bw/d OECD 410, Dérmico Resultado: NOAEL Especies: Rata Duración de la prueba: 28 d
Lauroil sarcosinato de sodio	250 mg/kg bw/d OECD 408, Oral Resultado: NOAEL Especies: Rata Duración de la prueba: 90 d

Peligro por aspiración

Debido a la falta total o parcial de datos, la clasificación no es posible.

Información adicional

En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad

El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Componentes		Especies	Resultados de la prueba
Lauroil sarcosinato de sodio (CAS 137-16-6)			
Acuático (a)			
Agudo			
Algas	EC50	Desmodesmus subspicatus	23.7 mg/l, 72 h OECD 201
Crustáceos	EC50	Dafnia magna	8.91 mg/l, 48 h OECD 202
Otros	EC50	Lodo activado de una depuradora predominantemente doméstica	> 1000 mg/l, 3 h OECD 209
Pez	LC50	Danio rerio	32.1 mg/l, 96 h OECD 203
SODIUM COCOYL ISETHIONATE (CAS 61789-32-0)			
Acuático (a)			
Agudo			
Algas	EC50	Pseudokirchneriella subcapitata	1 - 10 mg/l, 72 h OECD 201
Crustáceos	EC50	Dafnia magna	10 - 100 mg/l, 48 h OECD 202
Otros	EC50	Lodo activado de una depuradora predominantemente doméstica	> 1000 mg/l, 3 h OECD 209
Pez	LC50	Oncorhynchus mykiss	10 - 100 mg/l, 96 h OECD 203
Crónico			
Algas	EC10	Pseudokirchneriella subcapitata	0.1 - 1 mg/l, 72 h OECD 201

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

Lauroil sarcosinato de sodio	82 % ISO 14593 Resultado: Fácilmente Biodegradable Duración de la prueba: 28 d
SODIUM COCOYL ISETHIONATE	78 % OECD 301 D Resultado: Fácilmente Biodegradable Duración de la prueba: 28 d

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

SODIUM COCOYL ISETHIONATE	-0.41

Movilidad en el suelo

No hay datos disponibles.

Otros efectos adversos	No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación	Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.
Normativas de eliminación locales	Elimine de acuerdo con todas las reglamentaciones aplicables.
Desechos de residuos / producto no utilizado	Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).
Envases contaminados	Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

IATA

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

IMDG

FINISHED GOODS

No se regula como artículo peligroso.

BULK

No se regula como artículo peligroso.

15. Información reglamentaria

reglamentación Federal de EE.UU.	El producto es un "Producto químico peligroso" tal como lo define la Norma de comunicación de peligro OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

No listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso	No (Exempt)

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

No reglamentado.

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

No reglamentado.

Ley Safe Drinking Water Act (SDWA) No reglamentado.

16. Otra información, como fecha de preparación o última revisión

Fecha de publicación	13-Noviembre-2020
Nº de versión	01
Clasificaciones NFPA	Salud: 2 Inflamabilidad: 1 Inestabilidad: 0
Cláusula de exención de responsabilidad	La información facilitada en esta Ficha de Datos de Seguridad es correcta, a nuestro leal saber y entender, en la fecha de su publicación. Dicha información está concebida únicamente como guía para la seguridad en la manipulación, el uso, el procesamiento, el almacenamiento, el transporte, la eliminación y la liberación, no debiendo tomarse como garantía o especificación de calidades. La información se refiere únicamente al material específico mencionado y puede no ser válida para tal material usado en combinación con cualesquiera otros materiales o en cualquier proceso salvo que se especifique expresamente en el texto.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT BANGKOK COLOR SAFE SHAMPOO**

Autres moyens d'identification

Numéro de la FDS 00-11-0000632

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Lésions oculaires graves/irritation oculaire Catégorie 2

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Attention

Mention de danger Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
SODIUM COCOYL ISETHIONATE		61789-32-0	8.4
Laurylsarcosinate de sodium		137-16-6	6
COCONUT ACID		61788-47-4	1.3

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation	Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.
Contact avec la peau	Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.
Contact avec les yeux	Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.
Ingestion	Rincer la bouche. Consulter un médecin si des symptômes apparaissent.
Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.
Informations générales	S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence	Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Éviter tout contact avec les yeux. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Valeurs biologiques limites Aucune limite d’exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter un vêtement de protection approprié.

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Liquide visqueux.

Couleur Non disponible.

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH Non disponible.

Point de fusion et point de congélation Non disponible.

Point initial d’ébullition et domaine d’ébullition > 100 °C (> 212 °F)

Point d’éclair > 100.0 °C (> 212.0 °F) Coupelle fermée

Taux d’évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d’inflammabilité ou d’explosibilité

Limites d’inflammabilité - inférieure (%) Non disponible.

Limites d’inflammabilité - supérieure (%) Non disponible.

Limite d'explosibilité - inférieure (%) Non disponible.

Limite d'explosibilité - supérieure (%) Non disponible.

Tension de vapeur Non disponible.

Densité de vapeur Non disponible.

Densité relative Non disponible.

Solubilité

Solubilité (eau) Non disponible.

Coefficient de partage n-octanol/eau Non disponible.

Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	On ne s'attend à aucun effet néfaste en cas d'inhalation.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Mutagénicité

SODIUM COCOYL ISETHIONATE	Résultat: In vitro tests did not show mutagenic effect
Laurylsarcosinate de sodium	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n’est pas possible en raison d’un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l’OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n’est pas possible en raison d’un manque partiel ou total de données.

Effets sur le développement

Laurylsarcosinate de sodium	>= 250 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OCDE 414, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: DSEO Espèces: Rat

Reproductivité

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OCDE 421, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n’est pas possible en raison d’un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

SODIUM COCOYL ISETHIONATE	>= 1000 mg/kg bw/d OCDE 407, Orale Résultat: DSENO Espèces: Rat Durée du test: 28 d >= 2070 mg/kg bw/d OECD 410, Cutané Résultat: DSENO Espèces: Rat Durée du test: 28 d
Laurylsarcosinate de sodium	250 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Composants		Espèces	Résultats d'épreuves
Laurylsarcosinate de sodium (CAS 137-16-6)			
Aquatique			
Aiguë			
Algues	CE50	Desmodesmus subspicatus	23.7 mg/l, 72 h OCDE 201
Autre	CE50	Boues activées d'eaux usées d'origine principalement domestique	> 1000 mg/l, 3 h OCDE 209
Crustacés	CE50	Daphnia magna	8.91 mg/l, 48 h OCDE 202
Poisson	CL50	Danio rerio	32.1 mg/l, 96 h OCDE 203
SODIUM COCOYL ISETHIONATE (CAS 61789-32-0)			
Aquatique			
Aiguë			
Algues	CE50	Pseudokirchneriella subcapitata	1 - 10 mg/l, 72 h OCDE 201
Autre	CE50	Boues activées d'eaux usées d'origine principalement domestique	> 1000 mg/l, 3 h OCDE 209
Crustacés	CE50	Daphnia magna	10 - 100 mg/l, 48 h OCDE 202
Poisson	CL50	Oncorhynchus mykiss	10 - 100 mg/l, 96 h OCDE 203
Chronique			
Algues	CE10	Pseudokirchneriella subcapitata	0.1 - 1 mg/l, 72 h OCDE 201

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

Laurylsarcosinate de sodium	82 % ISO 14593 Résultat: Facilement Biodegradable Durée du test: 28 d
SODIUM COCOYL ISETHIONATE	78 % OECD 301 D Résultat: Facilement Biodegradable Durée du test: 28 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

SODIUM COCOYL ISETHIONATE	-0.41

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l’élimination

Instructions pour l'élimination	Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d’élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.
Règlements locaux d’élimination	Détruire conformément àtoutes les réglementations applicables.
Déchets des résidus / produits non utilisés	Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).
Emballages contaminés	Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l’étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l’égard des matières dangereuses d’OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

Non inscrit.

SARA 304 - Notification d’urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l’OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l’air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre)	Non réglementé.

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	13-Novembre-2020
Version n°	01
Classements NFPA	Santé: 2 Inflammabilité: 1 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT BANGKOK COLOR SAFE SHAMPOO

鉴别的其他方法

SDS编号 00-11-0000632

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害 严重眼睛损伤/眼睛刺激性 类别 2

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 警告

危险性说明 造成严重眼刺激。

防范说明

预防措施 作业后彻底清洗。 戴防护眼罩/防护面具。

事故响应 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如仍觉眼刺激：求医/就诊。

安全储存 远离禁忌物保存。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
SODIUM COCOYL ISETHIONATE		61789-32-0	8.4
月桂酰肌氨酸钠		137-16-6	6
COCONUT ACID		61788-47-4	1.3

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触	用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。
眼睛接触	立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如仍觉眼刺激：求医/就诊。
经口	漱口。 如症状出现，就医。
最重要的症状/影响，急性和延迟性	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。
指明任何需要立即就医或特殊治疗的情况	提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。
一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	发生火灾时，使用自给式呼吸设备并穿全身防护服。
消防设备/使用说明	在不会发生危险的情况下将容器撤离火灾现场。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。
一般火灾危险	无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	避免接触到眼睛。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

生物限值	没有该成分的生物接触限值。
适当的技术控制	应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。
个人防护措施，如个人防护设备	
眼/面保护	仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。
皮肤防护	
手防护	仅用於工业环境。 佩戴适当的抗化学手套。
其它的，其它	仅用於工业环境。 需穿上合适的防护衣服。
呼吸系统防护	仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。
热危害	必要时，穿戴适当的热防护服。
一般的卫生考虑	始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观	
性状	液体。
形状	粘性液体.
颜色	无资料。
气味	特征的。

气味阈值	无资料。
pH 值	无资料。
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	预期吸入无有害影响。
皮肤接触	预计没有因皮肤接触导致的任何有害影响。
眼睛接触	造成严重眼刺激。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。

毒理学效应信息

急性毒性 未知。

产品	**物种**	**试验结果**
PULP RIOT BANGKOK COLOR SAFE SHAMPOO		
急性的		
经口		
ATEmix		187300 mg/kg
经皮肤		
ATEmix		1.895e+006 mg/kg

组分	物种	试验结果
SODIUM COCOYL ISETHIONATE (CAS 61789-32-0)		
急性的		
经口		
LD50	大鼠	> 2000 mg/kg OECD 201
月桂酰肌氨酸钠 (CAS 137-16-6)		
急性的		
吸入		
气溶胶		
LC50	大鼠	0.05 - 0.5 mg/l, 4 h OECD 403
经口		
LD50	大鼠	> 5000 mg/kg OECD 401

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

刺激性腐蚀性 - 皮肤

SODIUM COCOYL ISETHIONATE	OECD 404 结果: 轻微刺激性 物种: 兔子
月桂酰肌氨酸钠	OECD 404, 30% Sol. 结果: 轻微刺激性 物种: 兔子
COCONUT ACID	结果: 非刺激性 物种: 兔子

严重眼睛损伤/眼睛刺激性 造成严重眼刺激。

刺激性腐蚀性 - 眼睛

SODIUM COCOYL ISETHIONATE	OECD 405 结果: 刺激性的 物种: 兔子
月桂酰肌氨酸钠	OECD 405, 30% Sol. 结果: 刺激性的 物种: 兔子
COCONUT ACID	结果: 刺激性的 物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物

月桂酰肌氨酸钠	EU B.6 结果: Not Sensitizing 物种: 豚鼠
SODIUM COCOYL ISETHIONATE	OECD 406 结果: Not Sensitizing 物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

SODIUM COCOYL ISETHIONATE	结果: In vitro tests did not show mutagenic effect
月桂酰肌氨酸钠	结果: 离体试验未见诱变效应

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

月桂酰肌氨酸钠	>= 250 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

发育效应

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 414, 根据结构相似材料的试验数据。 结果: 无可观察到的效应剂量（NOEL） 物种: 大鼠

生殖能力

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 421, 根据结构相似材料的试验数据。 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

SODIUM COCOYL ISETHIONATE	>= 1000 mg/kg bw/d OECD 407, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 28 D >= 2070 mg/kg bw/d OECD 410, 经皮肤 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 28 D
月桂酰肌氨酸钠	250 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果
SODIUM COCOYL ISETHIONATE (CAS 61789-32-0)			
水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	> 1000 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	10 - 100 mg/l, 48 h OECD 202
藻类	EC50	近头状伪蹄形藻	1 - 10 mg/l, 72 h OECD 201
鱼	LC50	虹鳟鱼	10 - 100 mg/l, 96 h OECD 203
慢性的			
藻类	EC10	近头状伪蹄形藻	0.1 - 1 mg/l, 72 h OECD 201

水生的			
急性的			
其它的, 其它	EC50	以国内污水为主的活性污泥	> 1000 mg/l, 3 h OECD 209
甲壳纲动物	EC50	水蚤	8.91 mg/l, 48 h OECD 202
藻类	EC50	Desmodesmus subspicatus	23.7 mg/l, 72 h OECD 201
鱼	LC50	斑马鱼 (Danio rerio)	32.1 mg/l, 96 h OECD 203

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

SODIUM COCOYL ISETHIONATE	78 % OECD 301 D 结果: 易生物降解 测试时间: 28 D
月桂酰肌氨酸钠	82 % ISO 14593 结果: 易生物降解 测试时间: 28 D

潜在的生物累积性

辛醇/水分配系数 log Kow

SODIUM COCOYL ISETHIONATE	-0.41

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

不适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

16. 其他信息，包括编制日期或最新修订日期

最初编制日期	13-十一月-2020
版本号	01
NFPA分级	健康 2 可燃性 1 不稳定性：0
免责声明	这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT TOKYO COLOR PROTECTING CONDITIONER**

Other means of identification

SDS number 00-12-0000829

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards

Skin corrosion/irritation	Category 2
Serious eye damage/eye irritation	Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Warning

Hazard statement Causes skin irritation. Causes serious eye irritation.

Precautionary statement

Prevention Wash thoroughly after handling. Wear eye protection/face protection. Wear protective gloves.

Response If on skin: Wash with plenty of water. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If skin irritation occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
DICETYLDIMONIUM CHLORIDE		68391-05-9	2.45

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Remove contaminated clothing. Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Skin irritation. May cause redness and pain.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Avoid contact with eyes, skin, and clothing. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Face shield is recommended. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only. Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Viscous Liquid
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.

Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	Causes skin irritation.
Eye contact	Causes serious eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Skin irritation. May cause redness and pain.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT TOKYO COLOR PROTECTING CONDITIONER		
Acute		
Dermal		
ATEmix		97660 mg/kg
Oral		
ATEmix		27780 mg/kg

Components	Species	Test Results

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

DICETYLDIMONIUM CHLORIDE	12 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

DICETYLDIMONIUM CHLORIDE	56.3 mg/kg bw/d OECD 416 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

DICETYLDIMONIUM CHLORIDE	42 - 49 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 93 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
DICETYLDIMONIUM CHLORIDE (CAS 68391-05-9)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0.386 mg/l, 72 h OECD 201
Crustacea	EC50	Acartia tonsa	0.295 mg/l, 48 h ISO 14669
Fish	LC50	Danio rerio	0.26 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	68 mg/l, 3 h OECD 209
Chronic			
Algae	NOEC	Pseudokirchneriella subcapitata	0.06 mg/l, 72 h OECD 201
Crustacea	NOEC	Daphnia magna	0.5 mg/l, 21 d OECD 202

Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

DICETYLDIMONIUM CHLORIDE	61 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

DICETYLDIMONIUM CHLORIDE	4.7 - 4.9 OECD 123

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

16. Other information, including date of preparation or last revision

Issue date	11-13-2020
Version #	01
NFPA ratings	Health: 2 Flammability: 1 Instability: 0
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT TOKYO COLOR PROTECTING CONDITIONER
Synonyms	None.
SDS number	00-12-0000829
Product code	1241002
Issue date	11-13-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards

Skin corrosion/irritation	Category 2	H315 - Causes skin irritation.
Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.

Environmental hazards

Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye irritation. Causes skin irritation. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: DICETYLDIMONIUM CHLORIDE

Hazard pictograms

Signal word Warning

Hazard statements

H315	Causes skin irritation.
H319	Causes serious eye irritation.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P264	Wash thoroughly after handling.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.
P280	Wear protective gloves.

Response

P101	If medical advice is needed, have product container or label at hand.
P302 + P352	IF ON SKIN: Wash with plenty of water.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P332 + P313	If skin irritation occurs: Get medical advice/attention.
P337 + P313	If eye irritation persists: Get medical advice/attention.
P362 + P364	Take off contaminated clothing and wash it before reuse.

Storage Store away from incompatible materials.

Disposal

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 2,5% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 2,5% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains HEXYL SALICYLATE. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
DICETYLDIMONIUM CHLORIDE	2,45	68391-05-9 269-924-1	01-2119486994-16	-	
Classification:	Acute Tox. 4;H302, Skin Corr. 1B;H314, Eye Dam. 1;H318, Aquatic Acute 1;H400, Aquatic Chronic 2;H411				
CETRIMONIUM CHLORIDE	0,38	112-02-7 203-928-6	01-2119970558-23	-	
Classification:	Acute Tox. 4;H302, Acute Tox. 3;H311, Skin Corr. 1C;H314, Eye Dam. 1;H318, Aquatic Acute 1;H400(M=10), Aquatic Chronic 1;H410				
HEXYL SALICYLATE	0,01	6259-76-3 228-408-6	01-2119638275-36	-	
Classification:	Skin Irrit. 2;H315, Skin Sens. 1A;H317, Aquatic Acute 1;H400				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Remove contaminated clothing. Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Skin irritation. May cause redness and pain.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
CETYL ALCOHOL (CAS 36653-82-4)	AGW	200 mg/m3	Vapor and aerosol.
		20 ppm	Vapor and aerosol.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
STEARYL ALCOHOL (CAS 112-92-5)	AGW	224 mg/m3	
		20 ppm	

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Form Viscous Liquid

Color Not available.

Odor Characteristic.

Odor threshold Not available.

pH Not available.

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212,0 °F (> 100,0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation. May cause an allergic skin reaction.
Eye contact	Causes serious eye irritation.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Skin irritation. May cause redness and pain.

11.1. Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results

HEXYL SALICYLATE	8913

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.

National regulations Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.

15.2. Chemical safety assessment No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations Not available.

References Not available.

Information on evaluation method leading to the classification of mixture The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.

Full text of any H-statements not written out in full under Sections 2 to 15 H302 Harmful if swallowed.

H311 Toxic in contact with skin.
H314 Causes severe skin burns and eye damage.
H315 Causes skin irritation.
H317 May cause an allergic skin reaction.
H318 Causes serious eye damage.
H400 Very toxic to aquatic life.
H410 Very toxic to aquatic life with long lasting effects.
H411 Toxic to aquatic life with long lasting effects.

Revision information None.

Training information Follow training instructions when handling this material.

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT TOKYO COLOR PROTECTING CONDITIONER**

Otros medios de identificación

Número de FDS 00-12-0000829

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos No clasificado.

Peligros para la salud

Corrosión/irritación cutánea	Categoría 2
Lesiones oculares graves/irritación ocular	Categoría 2A

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Atención

Declaración de peligro Provoca irritación cutánea. Provoca irritación ocular grave.

Consejos de prudencia

Prevención Lavarse concienzudamente tras la manipulación. Llevar protección ocular/facial. Llevar guantes de protección.

Respuesta En caso de contacto con la piel: Lávese con abundante agua. En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. En caso de irritación cutánea: Consultar a un médico. Si persiste la irritación ocular: Consultar a un médico. Quitar las prendas contaminadas y lavarlas antes de volver a usarlas.

Almacenamiento Consérvese alejado de materiales incompatibles.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
DICETYLDIMONIUM CHLORIDE		68391-05-9	2.45

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación	Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.
Contacto con la piel	Quitar la ropa contaminada. Lavar con agua y jabón abundantes. En caso de irritación cutánea: Consultar a un médico. Lavar las prendas contaminadas antes de volver a usarlas.
Contacto con los ojos	Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Busque atención médica si la irritación se desarrolla y persiste.
Ingestión	Enjuagarse la boca. Obtenga atención médica en caso de síntomas.
Principales síntomas y efectos, agudos y retardados	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Irritación de la piel. Puede causar enrojecimiento y dolor.
Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Provea las medidas de apoyo generales y de tratamiento sintomático. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.
Información general	Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Ningún riesgo excepcional de incendio o explosión señalado.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Use equipo y ropa de protección apropiados durante la limpieza. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Asegúrese una ventilación apropiada. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	Evítese el contacto con los ojos, la piel y la ropa. Asegúre una ventilación adecuada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.

Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Almacenar en un recipiente herméticamente cerrado. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Valores límite biológicos	No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.
Controles técnicos apropiados	Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación de lavados de ojos y ducha de emergencia.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara	De aplicación solamente en entornos industriales. Se recomienda el uso de caretas protectoras. Use gafas de seguridad con protectores laterales (o goggles).
Protección de la piel	
Protección de las manos	De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.
Otros	De aplicación solamente en entornos industriales. Use ropa adecuada resistente a los productos químicos. Se recomienda el uso de delantal impermeable.
Protección respiratoria	De aplicación solamente en entornos industriales. En caso de ventilación insuficiente, úsese equipo respiratorio adecuado.
Peligros térmicos	Use ropa protectora térmica adecuada si resulta necesario.
Consideraciones generales de higiene	Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto	
Estado físico	Líquido.
Forma	Líquido viscoso
Color	No disponible.
Olor	Característico.
Umbral olfativo	No disponible.
pH	No disponible.
Punto de fusión/punto de congelación	No disponible.
Punto inicial de ebullición e intervalo de ebullición	> 100 °C (> 212 °F)
Punto de inflamación	> 100.0 °C (> 212.0 °F) Copa Cerrada
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No aplicable.
Límites superior/inferior de inflamabilidad o de explosividad	
Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.

Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	No es de esperar que se produzcan efectos adversos por inhalación.
Contacto con la piel	Provoca irritación cutánea.
Contacto con los ojos	Provoca irritación ocular grave.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Irritación de la piel. Puede causar enrojecimiento y dolor.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Producto	**Especies**	**Resultados de la prueba**
PULP RIOT TOKYO COLOR PROTECTING CONDITIONER		
Agudo		
Dérmico		
ATEmix		97660 mg/kg
Oral		
ATEmix		27780 mg/kg

Componentes	**Especies**	**Resultados de la prueba**

Lesiones oculares graves/irritación ocular Provoca irritación ocular grave.

Irritación/Corrosión- Ojos

DICETYLDIMONIUM CHLORIDE	OECD 405 Resultado: Corrosivo Especies: Conejo

Sensibilización respiratoria o cutánea

Sensibilización respiratoria Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea

DICETYLDIMONIUM CHLORIDE	OECD 406 Resultado: Not Sensibilizante Especies: Conejillo de indias

Mutagenicidad en células germinales Debido a la falta total o parcial de datos, la clasificación no es posible.

Mutagenicidad

DICETYLDIMONIUM CHLORIDE	Resultado: Las pruebas in vitro no demostraron efectos mutágenos

Carcinogenicidad No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción Debido a la falta total o parcial de datos, la clasificación no es posible.

Efectos sobre el desarrollo

DICETYLDIMONIUM CHLORIDE	12 mg/kg bw/d OECD 414 Resultado: NOAEL Especies: Rata

Reproductividad

DICETYLDIMONIUM CHLORIDE	56.3 mg/kg bw/d OECD 416 Resultado: NOAEL Especies: Rata

Toxicidad específica en determinados órganos – exposición única Debido a la falta total o parcial de datos, la clasificación no es posible.

Toxicidad específica en determinados órganos – exposición repetida Debido a la falta total o parcial de datos, la clasificación no es posible.

DICETYLDIMONIUM CHLORIDE	42 - 49 mg/kg bw/d OECD 408, Oral Resultado: NOAEL Especies: Rata Duración de la prueba: 93 d

Peligro por aspiración Debido a la falta total o parcial de datos, la clasificación no es posible.

Información adicional En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Componentes	Especies	Resultados de la prueba
DICETYLDIMONIUM CHLORIDE (CAS 68391-05-9)		
Acuático (a)		
Agudo		
Algas EC50	Pseudokirchneriella subcapitata	0.386 mg/l, 72 h OECD 201

Componentes		Especies	Resultados de la prueba
Crustáceos	EC50	Acartia tonsa	0.295 mg/l, 48 h ISO 14669
Otros	EC50	Lodo activado de una depuradora predominantemente doméstica	68 mg/l, 3 h OECD 209
Pez	LC50	Danio rerio	0.26 mg/l, 96 h OECD 203
Crónico			
Algas	NOEC	Pseudokirchneriella subcapitata	0.06 mg/l, 72 h OECD 201
Crustáceos	NOEC	Dafnia magna	0.5 mg/l, 21 d OECD 202
Pez	NOEC	Pimephales promelas	0.23 mg/l, 35 d Agencia de Protección Ambiental de los Estados Unidos de América (EPA) -66013-75-00

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

DICETYLDIMONIUM CHLORIDE — 61 % OECD 301 B
Resultado: Fácilmente Biodegradable
Duración de la prueba: 28 d

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

DICETYLDIMONIUM CHLORIDE — 4.7 - 4.9 OECD 123

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

FINISHED GOODS

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé

Corrosion cutanée/irritation cutanée	Catégorie 2
Lésions oculaires graves/irritation oculaire	Catégorie 2A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Attention

Mention de danger Provoque une irritation cutanée. Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage. Porter des gants de protection.

Intervention En contact avec la peau : Laver avec beaucoup d'eau. En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. En cas d'irritation cutanée : Demander un avis médical/Consulter un médecin. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin. Enlever les vêtements contaminés et les laver avant réutilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
DICETYLDIMONIUM CHLORIDE		68391-05-9	2.45

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Enlever les vêtements contaminés. Laver abondamment au savon et à l'eau. En cas d'irritation cutanée : Demander un avis médical/Consulter un médecin. Laver les vêtements contaminés avant réutilisation.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter un médecin si une irritation se développe et persiste.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Irritation de la peau. Peut provoquer des rougeurs et des douleurs.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention Éviter tout contact avec les yeux, la peau et les vêtements. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Valeurs biologiques limites	Aucune limite d'exposition biologique observée pour les ingrédients.
Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire et à une douche de sécurité.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Pour usage industriel seulement. Un écran facial est recommandé. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).
Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques Il est recommandé d'utiliser un tablier imperméable.
Protection respiratoire	Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Forme	Liquide visqueux
Couleur	Non disponible.
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	Non disponible.
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.

Solubilité

Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.

Autres informations

Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	On ne s'attend à aucun effet néfaste en cas d'inhalation.
Contact avec la peau	Provoque une irritation cutanée.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Irritation de la peau. Peut provoquer des rougeurs et des douleurs.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

1. 鉴别

产品标识 PULP RIOT TOKYO COLOR PROTECTING CONDITIONER

鉴别的其他方法

SDS编号 00-12-0000829

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害

皮肤腐蚀/刺激	类别 2
严重眼睛损伤/眼睛刺激性	类别 2A

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 警告

危险性说明 造成皮肤刺激。 造成严重眼刺激。

防范说明

预防措施 作业后彻底清洗。 戴防护眼罩/防护面具。 戴防护手套。

事故响应 如皮肤沾染：用大量水清洗。 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如发生皮肤刺激：求医/就诊。 如仍觉眼刺激：求医/就诊。 脱去被污染的衣物，清洗后方可重新使用。

安全储存 远离禁忌物保存。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
DICETYLDIMONIUM CHLORIDE		68391-05-9	2.45

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触	脱掉受污染的衣服。 用大量肥皂和水清洗。 如发生皮肤刺激：求医/就诊。 沾染的衣服清洗后方可重新使用。
眼睛接触	立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如果刺激症状持续或加重，应就医。
经口	漱口。 如症状出现，就医。
最重要的症状/影响，急性和延迟性	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 皮肤刺激。 可能导致红肿和疼痛。
指明任何需要立即就医或特殊治疗的情况	提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。
一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	发生火灾时，使用自给式呼吸设备并穿全身防护服。
消防设备/使用说明	在不会发生危险的情况下将容器撤离火灾现场。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。
一般火灾危险	无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	避免接触眼睛、皮肤和衣物。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

生物限值	没有该成分的生物接触限值。
适当的技术控制	应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼和安全淋浴设施。
个人防护措施，如个人防护设备	
眼/面保护	仅用於工业环境。 建议穿戴面罩。 戴有侧护罩的安全眼镜（或护目镜）。
皮肤防护	
手防护	仅用於工业环境。 佩戴适当的抗化学手套。
其它的，其它	仅用於工业环境。 穿上合适的化学防护衣。 建议使用不渗透的围裙。
呼吸系统防护	仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。
热危害	必要时，穿戴适当的热防护服。
一般的卫生考虑	始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观	
性状	液体。
形状	粘性液体
颜色	无资料。

气味	特征的。
气味阈值	无资料。
pH 值	无资料。
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	预期吸入无有害影响。
皮肤接触	造成皮肤刺激。
眼睛接触	造成严重眼刺激。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 皮肤刺激。 可能导致红肿和疼痛。

毒理学效应信息

急性毒性 未知。

产品	**物种**	**试验结果**
PULP RIOT TOKYO COLOR PROTECTING CONDITIONER		
急性的		
经口		
ATEmix		27780 mg/kg
经皮肤

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

DICETYLDIMONIUM CHLORIDE	61 % OECD 301 B 结果: 易生物降解 测试时间: 28 D

潜在的生物累积性

辛醇/水分配系数 log Kow

DICETYLDIMONIUM CHLORIDE	4.7 - 4.9 OECD 123

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT BUDAPEST CLARIFYING SHAMPOO**

Other means of identification

SDS number 00-11-0000633

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes serious eye damage.

Precautionary statement

Prevention Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
SODIUM COCOYL ISETHIONATE		61789-32-0	10.08
SODIUM LAUROYL SARCOSINATE		137-16-6	6
COCAMIDOPROPYL HYDROXYSULTAINE		70851-08-0	4.25
COCONUT ACID		61788-47-4	1.56

Chemical name	Common name and synonyms	CAS number	%
GLYCERIN		56-81-5	1

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

Indication of immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

Environmental precautions Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling Do not get this material in contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	PEL	5 mg/m3	Respirable fraction.
		15 mg/m3	Total dust.

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state Liquid.

Form Viscous Liquid.

Color Not available.

Odor Characteristic.

Odor threshold Not available.

pH Not available.

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point > 212.0 °F (> 100.0 °C) Closed Cup

Evaporation rate Not available.

Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not available.

Flammability limit - upper (%) Not available.

Explosive limit - lower (%) Not available.

Explosive limit - upper (%) Not available.

Vapor pressure Not available.

Vapor density Not available.

Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Partition coefficient (n-octanol/water) Not available.

Auto-ignition temperature Not available.

Decomposition temperature Not available.

Viscosity Not available.

Other information

Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye damage.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

Information on toxicological effects

Acute toxicity Not known.

Reproductivity

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 421, Based on test data for structurally similar materials. Result: NOAEL Species: Rat
GLYCERIN	2000 mg/kg bw/d, No effects on fertility Result: NOAEL Species: Rat
COCAMIDOPROPYL HYDROXYSULTAINE	300 mg/kg bw/d OECD 422 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

SODIUM COCOYL ISETHIONATE	>= 1000 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat Test Duration: 28 d >= 2070 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat Test Duration: 28 d
SODIUM LAUROYL SARCOSINATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
COCAMIDOPROPYL HYDROXYSULTAINE	600 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d

Specific target organ toxicity - repeated exposure

GLYCERIN	8000 mg/kg bw/d, Oral Result: NOAEL Species: Rat Test Duration: 2 yr

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

GLYCERIN	-1.76
SODIUM COCOYL ISETHIONATE	-0.41

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

NFPA ratings	Health: 3 Flammability: 1 Instability: 0
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT BUDAPEST CLARIFYING SHAMPOO
Synonyms	None.
SDS number	00-11-0000633
Product code	1241003
Issue date	11-11-2021
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Health hazards		
Serious eye damage/eye irritation	Category 1	H318 - Causes serious eye damage.
Environmental hazards		
Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Causes serious eye damage. Dangerous for the environment if discharged into watercourses. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: COCAMIDOPROPYL HYDROXYSULTAINE, SODIUM LAUROYL SARCOSINATE

Hazard pictograms

Signal word Danger

Hazard statements

H318	Causes serious eye damage.
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P260	Do not breathe vapor.
P273	Avoid release to the environment.
P280	Wear eye protection/face protection.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.

Storage Store away from incompatible materials.

Disposal

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 3,06% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 9,06% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains <?ghs_eu_sensitizer_ge0.1>. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
SODIUM COCOYL ISETHIONATE	10,08	61789-32-0 263-052-5	01-2119974104-40	-	
Classification:	Eye Irrit. 2;H319, Aquatic Chronic 3;H412				
SODIUM LAUROYL SARCOSINATE	6	137-16-6 205-281-5	01-2119527780-39	-	
Classification:	Skin Irrit. 2;H315, Eye Dam. 1;H318, Acute Tox. 2;H330				
COCAMIDOPROPYL HYDROXYSULTAINE	4,25	70851-08-0 274-925-5	-	-	
Classification:	Eye Dam. 1;H318, Aquatic Chronic 2;H411				
COCONUT ACID	1,56	61788-47-4 262-978-7	-	-	
Classification:	Eye Irrit. 2;H319				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Do not breathe vapor. Do not get this material in contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	TWA	10 mg/m3	Mist.

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	VME	10 mg/m3	Aerosol.

Regulatory status: Indicative limit (VL)

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	TWA	200 mg/m3	Inhalable fraction.

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	AGW	200 mg/m3	Inhalable fraction.

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	TWA	10 mg/m3	Inhalable fraction.

Spain. Occupational Exposure Limits

Components	Type	Value	Form
GLYCERIN (CAS 56-81-5)	TWA	10 mg/m3	Mist.

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Environmental exposure controls Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state Liquid.

Form Viscous Liquid.

Color Not available.

Odor Characteristic.

Odor threshold Not available.

pH Not available.

Melting point/freezing point Not available.

Initial boiling point and boiling range > 212 °F (> 100 °C)

Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	Prolonged inhalation may be harmful.
Skin contact	May cause an allergic skin reaction.
Eye contact	Causes serious eye damage.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
COCAMIDOPROPYL HYDROXYSULTAINE (CAS 70851-08-0)		
Acute		
Dermal		
LD50	Rabbit	> 2000 mg/kg OECD 402

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

COCAMIDOPROPYL HYDROXYSULTAINE	OECD 404 Result: Not Irritating Species: Rabbit
SODIUM COCOYL ISETHIONATE	OECD 404 Result: Slightly Irritating Species: Rabbit
SODIUM LAUROYL SARCOSINATE	OECD 404, 30% Sol. Result: Slightly Irritating Species: Rabbit
COCONUT ACID	Result: Not Irritating Species: Rabbit

Serious eye damage/eye irritation Causes serious eye damage.

Irritation Corrosion - Eye

COCAMIDOPROPYL HYDROXYSULTAINE	OECD 405 Result: Corrosive Species: Rabbit
SODIUM COCOYL ISETHIONATE	OECD 405 Result: Irritating Species: Rabbit
SODIUM LAUROYL SARCOSINATE	OECD 405, 30% Sol. Result: Irritating Species: Rabbit
COCONUT ACID	Result: Irritating Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

SODIUM LAUROYL SARCOSINATE	EU B,6 Result: Not Sensitizing Species: Guinea pig
COCAMIDOPROPYL HYDROXYSULTAINE	OECD 406 Result: Not Sensitizing Species: Guinea pig
SODIUM COCOYL ISETHIONATE	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

COCAMIDOPROPYL HYDROXYSULTAINE	Result: In vitro and in vivo tests did not show mutagenic effects.
SODIUM COCOYL ISETHIONATE	Result: In vitro tests did not show mutagenic effect
SODIUM LAUROYL SARCOSINATE	Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

SODIUM LAUROYL SARCOSINATE	>= 250 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Developmental effects

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 414, Based on test data for structurally similar materials. Result: NOEL Species: Rat
COCAMIDOPROPYL HYDROXYSULTAINE	600 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat

Reproductivity

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 421, Based on test data for structurally similar materials. Result: NOAEL Species: Rat
COCAMIDOPROPYL HYDROXYSULTAINE	300 mg/kg bw/d OECD 422 Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

SODIUM COCOYL ISETHIONATE	>= 1000 mg/kg bw/d OECD 407, Oral Result: NOAEL Species: Rat Test Duration: 28 d >= 2070 mg/kg bw/d OECD 410, Dermal Result: NOAEL Species: Rat Test Duration: 28 d
SODIUM LAUROYL SARCOSINATE	250 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d
COCAMIDOPROPYL HYDROXYSULTAINE	600 mg/kg bw/d OECD 408 Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
COCAMIDOPROPYL HYDROXYSULTAINE (CAS 70851-08-0)			
Aquatic			
Acute			
Algae	EC50	Skeletonema costatum	2,69 mg/l, 72 h ISO 10253
Crustacea	EC50	Daphnia magna	4,6 mg/l, 48 h EU C.2
Fish	LC50	Pimephales promelas	2,12 mg/l, 96 h OECD 203
Other	NOEC	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h OECD 209
Chronic			
Algae	NOEC	Skeletonema costatum	0,9 mg/l, 72 h ISO 10253
Crustacea	NOEC	Daphnia magna	1,39 mg/l, 21 d OECD 211
Fish	NOEC	Pimephales promelas	0,075 mg/l, 32 d OECD 210
SODIUM COCOYL ISETHIONATE (CAS 61789-32-0)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	1 - 10 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	10 - 100 mg/l, 48 h OECD 202

Components		Species	Test Results
Fish	LC50	Oncorhynchus mykiss	10 - 100 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h OECD 209
Chronic			
Algae	EC10	Pseudokirchneriella subcapitata	0,1 - 1 mg/l, 72 h OECD 201

SODIUM LAUROYL SARCOSINATE (CAS 137-16-6)

Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	23,7 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	8,91 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	32,1 mg/l, 96 h OECD 203
Other	EC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h OECD 209

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

COCAMIDOPROPYL HYDROXYSULTAINE	63,2 % OECD 310 Result: Readily Biodegradable Test Duration: 28 d
SODIUM COCOYL ISETHIONATE	78 % OECD 301 D Result: Readily Biodegradable Test Duration: 28 d
SODIUM LAUROYL SARCOSINATE	82 % ISO 14593 Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

SODIUM COCOYL ISETHIONATE	-0,41

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.

National regulations Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.

15.2. Chemical safety assessment No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations Not available.

References Not available.

Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H315 Causes skin irritation. H318 Causes serious eye damage. H319 Causes serious eye irritation. H330 Fatal if inhaled. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT BUDAPEST CLARIFYING SHAMPOO**

Otros medios de identificación

Número de FDS 00-11-0000633

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos No clasificado.

Peligros para la salud Lesiones oculares graves/irritación ocular Categoría 1

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Peligro

Declaración de peligro Provoca lesiones oculares graves.

Consejos de prudencia

Prevención Llevar protección ocular/facial.

Respuesta En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. Llámese inmediatamente a un centro toxicológico o a un médico.

Almacenamiento Consérvese alejado de materiales incompatibles.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
SODIUM COCOYL ISETHIONATE		61789-32-0	10.08
Lauroil sarcosinato de sodio		137-16-6	6
COCAMIDOPROPYL HYDROXYSULTAINE		70851-08-0	4.25

Denominación química	Nombre común y sinónimos	Número CAS	%
COCONUT ACID		61788-47-4	1.56
GLYCERIN MIST		56-81-5	1

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Conseguir atención médica inmediatamente.

Ingestión Enjuagarse la boca. Obtenga atención médica en caso de síntomas.

Principales síntomas y efectos, agudos y retardados Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Podrían producirse daños oculares permanentes, incluso ceguera.

Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente Provea las medidas de apoyo generales y de tratamiento sintomático. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.

Información general Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).

Medios de extinción no apropiados No utilice chorro de agua, pues extendería el fuego.

Peligros específicos que presenta el producto químico En caso de incendio se pueden formar gases nocivos.

Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.

Equipo/Instrucciones para la extinción de incendios Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.

Métodos específicos Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.

Riesgos generales de incendio Ningún riesgo excepcional de incendio o explosión señalado.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Use equipo y ropa de protección apropiados durante la limpieza. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Asegúrese una ventilación apropiada. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.

Métodos y material de contención y de limpieza Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua.

Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación.

Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.

Precauciones relativas al medio ambiente No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura
No poner este material en contacto con los ojos. Evite la exposición prolongada. Asegúre una ventilación adecuada. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.

Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades
Almacenar en un recipiente herméticamente cerrado. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Límites de exposición profesional

Los constituyentes siguientes son los únicos constituyentes del producto que tienen un PEL, TLV u otro límite de exposición recomendado. En este momento, los demás constituyentes no tienen límites de exposición conocidos.

EEUU. Administración de Seguridad y Salud Ocupacional (OSHA) Tabla Z-1 Límites para los contaminantes del aire (29 CFR 1910.1000)

Componentes	Tipo	Valor	Forma
GLYCERIN MIST (CAS 56-81-5)	Limite de Exposición Permisible (LEP)	5 mg/m³	Fracción respirable.
		15 mg/m³	Total polvo.

Valores límite biológicos
No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.

Controles técnicos apropiados
Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación para lavado de ojos.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara
De aplicación solamente en entornos industriales. Use gafas de seguridad con cubiertas laterales y pantalla facial.

Protección de la piel

Protección de las manos
De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros
De aplicación solamente en entornos industriales. Use ropa adecuada resistente a los productos químicos.

Protección respiratoria
De aplicación solamente en entornos industriales. En caso de ventilación insuficiente, úsese equipo respiratorio adecuado.

Peligros térmicos
Use ropa protectora térmica adecuada si resulta necesario.

Consideraciones generales de higiene
Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto

Estado físico
Líquido.

Forma
Líquido viscoso.

Color
No disponible.

Olor
Característico.

Umbral olfativo
No disponible.

pH
No disponible.

Punto de fusión/punto de congelación
No disponible.

Punto inicial de ebullición e intervalo de ebullición
> 100 °C (> 212 °F)

Punto de inflamación
> 100.0 °C (> 212.0 °F) Copa Cerrada

Tasa de evaporación
No disponible.

Inflamabilidad (sólido, gas)
No aplicable.

Límites superior/inferior de inflamabilidad o de explosividad

Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	La inhalación prolongada puede resultar nociva.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	Provoca lesiones oculares graves.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Podrían producirse daños oculares permanentes, incluso ceguera.

Información sobre los efectos toxicológicos

Toxicidad aguda	Desconocido.

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

COCAMIDOPROPYL HYDROXYSULTAINE	63.2 % OECD 310 Resultado: Fácilmente Biodegradable Duración de la prueba: 28 d
GLYCERIN MIST	OECD 301 Resultado: Fácilmente Biodegradable
Lauroil sarcosinato de sodio	82 % ISO 14593 Resultado: Fácilmente Biodegradable Duración de la prueba: 28 d
SODIUM COCOYL ISETHIONATE	78 % OECD 301 D Resultado: Fácilmente Biodegradable Duración de la prueba: 28 d

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

GLYCERIN MIST	-1.76
SODIUM COCOYL ISETHIONATE	-0.41

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado	Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).
Envases contaminados	Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Lésions oculaires graves/irritation oculaire Catégorie 1

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Provoque de graves lésions des yeux.

Conseil de prudence

Prévention Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Appeler immédiatement un centre antipoison/médecin.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
SODIUM COCOYL ISETHIONATE		61789-32-0	10.08
Laurylsarcosinate de sodium		137-16-6	6

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
Aminopropyl hydroxy-diméthyl-sulfopropanaminium, dérivés acyles de coco, hydroxydes, sels internes		70851-08-0	4.25
COCONUT ACID		61788-47-4	1.56
GLYCÉRINE		56-81-5	1

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Consulter immédiatement un médecin.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.

Équipement/directives de lutte contre les incendies Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause.

Risques d'incendie généraux Aucun risque inhabituel d'incendie ou d'explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. S'assurer une ventilation adéquate. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle.

Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention Éviter tout contact de ce produit avec les yeux. Éviter une exposition prolongée. Assurer une ventilation efficace. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur	Forme
GLYCÉRINE (CAS 56-81-5)	PEL (limite d'exposition admissible)	5 mg/m3	Fraction respirable.
		15 mg/m3	Poussières totales.

Valeurs biologiques limites Aucune limite d'exposition biologique observée pour les ingrédients.

Contrôles d'ingénierie appropriés Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques) et un écran facial.

Protection de la peau

Protection des mains Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques

Autre Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques

Protection respiratoire Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

Dangers thermiques Porter des vêtements de protection thermique appropriés, au besoin.

Considérations d'hygiène générale Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence

État physique Liquide.

Forme Liquide visqueux.

Couleur Non disponible.

Odeur Caractéristique.

Seuil olfactif Non disponible.

pH Non disponible.

Point de fusion et point de congélation Non disponible.

Point initial d'ébullition et domaine d'ébullition > 100 °C (> 212 °F)

Point d'éclair > 100.0 °C (> 212.0 °F) Coupelle fermée

Taux d'évaporation Non disponible.

Inflammabilité (solides et gaz) Sans objet.

Limites supérieures et inférieures d'inflammabilité ou d'explosibilité

Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque de graves lésions des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Peut causer une lésion permanente aux yeux, y compris la cécité.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Corrosion cutanée/irritation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.

Irritation- corrosion - Cutanée

SODIUM COCOYL ISETHIONATE	OCDE 404 Résultat: Légèrement Irritant Espèces: Lapin
Aminopropyl hydroxy-diméthyl-sulfopropanaminium, dérivés acyles de coco, hydroxydes, sels internes	OCDE 404 Résultat: Non Irritant Espèces: Lapin
Laurylsarcosinate de sodium	OCDE 404, 30% Sol. Résultat: Légèrement Irritant Espèces: Lapin
COCONUT ACID	Résultat: Non Irritant Espèces: Lapin
GLYCÉRINE	Résultat: Non Irritant Espèces: Lapin

Lésions oculaires graves/irritation oculaire Provoque de graves lésions des yeux.

Irritation- corrosion - Œil

Aminopropyl hydroxy-diméthyl-sulfopropanaminium, dérivés acyles de coco, hydroxydes, sels internes	OCDE 405 Résultat: Corrosif Espèces: Lapin
SODIUM COCOYL ISETHIONATE	OCDE 405 Résultat: Irritant Espèces: Lapin

Irritation- corrosion - Œil

Laurylsarcosinate de sodium	OCDE 405, 30% Sol. Résultat: Irritant Espèces: Lapin
COCONUT ACID	Résultat: Irritant Espèces: Lapin
GLYCÉRINE	Résultat: Non Irritant Espèces: Lapin

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée La classification n'est pas possible en raison d'un manque partiel ou total de données.

Sensibilisation cutanée

GLYCÉRINE	167 mg/m3 air OECD 413, Inhalation Résultat: DSENO Espèces: Rat Durée du test: 90 d
Laurylsarcosinate de sodium	EU B.6 Résultat: Non Sensibilisant Espèces: Cobaye
Aminopropyl hydroxy-diméthyl-sulfopropanaminium, dérivés acyles de coco, hydroxydes, sels internes	OCDE 406 Résultat: Non Sensibilisant Espèces: Cobaye
SODIUM COCOYL ISETHIONATE	OCDE 406 Résultat: Non Sensibilisant Espèces: Cobaye
GLYCÉRINE	Résultat: Non Sensibilisant Espèces: Cobaye

Mutagénicité sur les cellules germinales La classification n'est pas possible en raison d'un manque partiel ou total de données.

Mutagénicité

Aminopropyl hydroxy-diméthyl-sulfopropanaminium, dérivés acyles de coco, hydroxydes, sels internes	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.
GLYCÉRINE	Résultat: Des essais in vitro et in vivo n'ont pas montré d'effets mutagènes.
SODIUM COCOYL ISETHIONATE	Résultat: In vitro tests did not show mutagenic effect
Laurylsarcosinate de sodium	Résultat: Les tests in vitro n'ont pas montré d'effets mutagènes

Cancérogénicité Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction La classification n'est pas possible en raison d'un manque partiel ou total de données.

Effets sur le développement

Laurylsarcosinate de sodium	>= 250 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat
SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OCDE 414, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: DSEO Espèces: Rat
GLYCÉRINE	1310 mg/kg bw/d, Pas d'effets sur le développement Résultat: DSENO Espèces: Rat
Aminopropyl hydroxy-diméthyl-sulfopropanaminium, dérivés acyles de coco, hydroxydes, sels internes	600 mg/kg bw/d OCDE 414 Résultat: DSENO Espèces: Rat

Reproductivité

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OCDE 421, Basé sur des données expérimentales relatives à des produits de structure semblable. Résultat: DSENO Espèces: Rat
GLYCÉRINE	2000 mg/kg bw/d, Pas d'effets sur la fertilité Résultat: DSENO Espèces: Rat
Aminopropyl hydroxy-diméthyl-sulfopropanaminium, dérivés acyles de coco, hydroxydes, sels internes	300 mg/kg bw/d OECD 422 Résultat: DSENO Espèces: Rat

Toxicité pour certains organes cibles - exposition unique La classification n'est pas possible en raison d'un manque partiel ou total de données.

Toxicité pour certains organes cibles - expositions répétées La classification n'est pas possible en raison d'un manque partiel ou total de données.

SODIUM COCOYL ISETHIONATE	>= 1000 mg/kg bw/d OCDE 407, Orale Résultat: DSENO Espèces: Rat Durée du test: 28 d >= 2070 mg/kg bw/d OECD 410, Cutané Résultat: DSENO Espèces: Rat Durée du test: 28 d
Laurylsarcosinate de sodium	250 mg/kg bw/d OCDE 408, Orale Résultat: DSENO Espèces: Rat Durée du test: 90 d
Aminopropyl hydroxy-diméthyl-sulfopropanaminium, dérivés acyles de coco, hydroxydes, sels internes	600 mg/kg bw/d OCDE 408 Résultat: DSENO Espèces: Rat Durée du test: 90 d
GLYCÉRINE	8000 mg/kg bw/d, Orale Résultat: DSENO Espèces: Rat Durée du test: 2 yr

Danger par aspiration La classification n'est pas possible en raison d'un manque partiel ou total de données.

Autres informations La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

SODIUM COCOYL ISETHIONATE	-0.41

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

Non inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

GLYCÉRINE (CAS 56-81-5)	Autres substances aromatisantes avec OSHA PEL

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	11-Novembre-2021
Version n°	01
Classements NFPA	Santé: 3 Inflammabilité: 1 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT BUDAPEST CLARIFYING SHAMPOO

鉴别的其他方法

SDS编号 00-11-0000633

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害 严重眼睛损伤/眼睛刺激性 类别 1

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 造成严重眼损伤。

防范说明

预防措施 戴防护眼罩/防护面具。

事故响应 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如接触到或有疑虑：呼叫解毒中心/医生。

安全储存 远离禁忌物保存。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
SODIUM COCOYL ISETHIONATE		61789-32-0	10.08
月桂酰肌氨酸钠		137-16-6	6
椰子酰氨基丙基羟基磺内盐		70851-08-0	4.25
COCONUT ACID		61788-47-4	1.56
甘油		56-81-5	1

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 立即就医。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。

指明任何需要立即就医或特殊治疗的情况 提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂 水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质 禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施 发生火灾时，使用自给式呼吸设备并穿全身防护服。

消防设备/使用说明 在不会发生危险的情况下将容器撤离火灾现场。

特定的方法 采用标准灭火程序并考虑其他涉及材料有关的危险。

一般火灾危险 无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序 让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 清洁时，戴合适防护设备和衣物。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 确保充分的通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料 大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。

千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。

环境保护措施 防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项 不得让本材料接触眼睛。 避免长期暴露。 提供足够通风。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物 储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值	形状
甘油 (CAS 56-81-5)	PEL-常期暴露极限	5 mg/m3	可呼吸部分。
		15 mg/m3	总尘。

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 佩戴带侧边的安全眼镜（护目镜）和面罩。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。

呼吸系统防护 仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑	始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状	液体。
形状	粘性液体.
颜色	无资料。
气味	特征的。
气味阈值	无资料。
pH 值	无资料。
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%）	无资料。
燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。

溶解性

溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。

其他信息

爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	持续的吸入可能是有害的。
皮肤接触	预计没有因皮肤接触导致的任何有害影响。
眼睛接触	造成严重眼损伤。
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 会导致包括失明等永久性眼睛损伤。

毒理学效应信息

急性毒性	未知。

产品	物种	试验结果

甘油	结果: 非刺激性 物种: 兔子

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物

甘油	167 mg/m3 空气 OECD 413, 吸入 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
月桂酰肌氨酸钠	EU B.6 结果: Not Sensitizing 物种: 豚鼠
SODIUM COCOYL ISETHIONATE	OECD 406 结果: Not Sensitizing 物种: 豚鼠
椰子酰氨基丙基羟基磺内盐	OECD 406 结果: Not Sensitizing 物种: 豚鼠
甘油	结果: Not Sensitizing 物种: 豚鼠

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

突变性

SODIUM COCOYL ISETHIONATE	结果: In vitro tests did not show mutagenic effect
椰子酰氨基丙基羟基磺内盐	结果: 体外和体内试验均未见致突变作用。
甘油	结果: 体外和体内试验均未见致突变作用。
月桂酰肌氨酸钠	结果: 离体试验未见诱变效应

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

发育效应

月桂酰肌氨酸钠	>= 250 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 414, 根据结构相似材料的试验数据。 结果: 无可观察到的效应剂量（NOEL） 物种: 大鼠
甘油	1310 mg/kg bw/d, 对发展没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
椰子酰氨基丙基羟基磺内盐	600 mg/kg bw/d OECD 414 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

SODIUM COCOYL ISETHIONATE	1000 mg/kg bw/d OECD 421, 根据结构相似材料的试验数据。 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠
甘油	2000 mg/kg bw/d, 对生育力没有影响 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

生殖能力

椰子酰氨基丙基羟基磺内盐	300 mg/kg bw/d OECD 422 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

SODIUM COCOYL ISETHIONATE	>= 1000 mg/kg bw/d OECD 407, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 28 D >= 2070 mg/kg bw/d OECD 410, 经皮肤 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 28 D
月桂酰肌氨酸钠	250 mg/kg bw/d OECD 408, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
椰子酰氨基丙基羟基磺内盐	600 mg/kg bw/d OECD 408 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 90 D
甘油	8000 mg/kg bw/d, 经口 结果: NOAEL (未观察到有害效果的水平) 物种: 大鼠 测试时间: 2 yr

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

组分		物种	试验结果

潜在的生物累积性

辛醇/水分配系数 log Kow

SODIUM COCOYL ISETHIONATE	-0.41
甘油	-1.76

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT GLASGOW SEA SALT SPRAY**

Other means of identification

SDS number 00-31-0000062

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word None.

Hazard statement The mixture does not meet the criteria for classification.

Precautionary statement

Prevention Observe good industrial hygiene practices.

Response Wash hands after handling.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Not available.

Indication of immediate medical attention and special treatment needed	Treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	5.1 - 6.9
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results
PULP RIOT GLASGOW SEA SALT SPRAY		
Acute		
Dermal		
ATEmix		20000 mg/kg
Oral		
ATEmix		16130 mg/kg

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Persistence and degradability

Bioaccumulative potential

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

FINISHED GOODS

15. Regulatory information

US federal regulations This product is not known to be a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

Not listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Not regulated.

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

16. Other information, including date of preparation or last revision

Issue date 11-16-2020

Version # 01

NFPA ratings Health: 0
Flammability: 1
Instability: 0

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT GLASGOW SEA SALT SPRAY
Synonyms	None.
SDS number	00-31-0000062
Product code	1241013
Issue date	11-16-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

This mixture does not meet the criteria for classification according to Regulation (EC) 1272/2008 as amended.

Hazard summary This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	The mixture does not meet the criteria for classification.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.

Response

P101	If medical advice is needed, have product container or label at hand.

Storage	Store away from incompatible materials.
Disposal	Dispose of waste and residues in accordance with local authority requirements.
Supplemental label information	13% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 13% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.
2.3. Other hazards	Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

The components are not hazardous or are below required disclosure limits.

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits	No exposure limits noted for ingredient(s).
Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Applicable for industrial settings only. Wear appropriate chemical resistant gloves.
- Other	Applicable for industrial settings only.
Respiratory protection	Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	5,1 - 6,9
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.

Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity	Not known.
Skin corrosion/irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.
Serious eye damage/eye irritation	Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.
Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.
Germ cell mutagenicity	Due to partial or complete lack of data the classification is not possible.
Carcinogenicity	Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - single exposure	Due to partial or complete lack of data the classification is not possible.
Specific target organ toxicity - repeated exposure	Due to partial or complete lack of data the classification is not possible.
Aspiration hazard	Due to partial or complete lack of data the classification is not possible.
Mixture versus substance information	No information available.

Other information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity	Based on available data, the classification criteria are not met for hazardous to the aquatic environment.
12.2. Persistence and degradability	
12.3. Bioaccumulative potential	
Partition coefficient n-octanol/water (log Kow)	Not available.
Bioconcentration factor (BCF)	Not available.
12.4. Mobility in soil	No data available.
12.5. Results of PBT and vPvB assessment	Not a PBT or vPvB substance or mixture.
12.6. Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.
12.7. Additional information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IMDG

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code	Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	None.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

FICHA DE DATOS DE SEGURIDAD

1. Identificación

Identificador del producto **PULP RIOT GLASGOW SEA SALT SPRAY**

Otros medios de identificación

Número de FDS 00-31-0000062

Uso recomendado Producto de cuidado personal para uso cosmético.

Restricciones recomendadas Ninguno conocido.

Información sobre el fabricante/importador/proveedor/distribuidor

Dirección: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Teléfono de Emergencias 1-800-535-5053 (Internacional: 352-323-3500)

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos No clasificado.

Peligros para la salud No clasificado.

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Símbolo de riesgo Ninguno.

Palabra de advertencia Ninguno.

Declaración de peligro La mezcla no cumple los criterios para su clasificación.

Consejos de prudencia

Prevención Respete las normas para una manipulación correcta de productos químicos.

Respuesta Lávese las manos después del uso.

Almacenamiento Consérvese alejado de materiales incompatibles.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuagar con agua. Busque atención médica si la irritación se desarrolla y persiste.

Ingestión Enjuagarse la boca. Obtenga atención médica en caso de síntomas.

Principales síntomas y efectos, agudos y retardados No disponible.

Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Tratamiento sintomático.
Información general	Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Ningún riesgo excepcional de incendio o explosión señalado.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	Respete las normas para una manipulación correcta de productos químicos.
Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Almacenar en un recipiente herméticamente cerrado. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Valores límite biológicos	No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.
Controles técnicos apropiados	Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara	De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).
Protección de la piel	
Protección de las manos	De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.

Otros	De aplicación solamente en entornos industriales.
Protección respiratoria	De aplicación solamente en entornos industriales. En caso de ventilación insuficiente, úsese equipo respiratorio adecuado.
Peligros térmicos	Use ropa protectora térmica adecuada si resulta necesario.
Consideraciones generales de higiene	Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto	
Estado físico	Líquido.
Color	No disponible.
Olor	Característico.
Umbral olfativo	No disponible.
pH	5.1 - 6.9
Punto de fusión/punto de congelación	No disponible.
Punto inicial de ebullición e intervalo de ebullición	> 100 °C (> 212 °F)
Punto de inflamación	> 100.0 °C (> 212.0 °F) Copa Cerrada
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No aplicable.
Límites superior/inferior de inflamabilidad o de explosividad	
Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.

Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	No es de esperar que se produzcan efectos adversos por inhalación.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	No adverse effects due to eye contact are expected.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	No disponible.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Producto	Especies	Resultados de la prueba

Dérmico		
ATEmix		20000 mg/kg
Oral		
ATEmix		16130 mg/kg

Corrosión/irritación cutánea	Debido a la falta total o parcial de datos, la clasificación no es posible. No se esperan efectos adversos por contacto con la piel.
Lesiones oculares graves/irritación ocular	Debido a la falta total o parcial de datos, la clasificación no es posible. No adverse effects due to eye contact are expected.

Sensibilización respiratoria o cutánea

Sensibilización respiratoria	Debido a la falta total o parcial de datos, la clasificación no es posible.
Sensibilización cutánea	Debido a la falta total o parcial de datos, la clasificación no es posible.
Mutagenicidad en células germinales	Debido a la falta total o parcial de datos, la clasificación no es posible.
Carcinogenicidad	No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción	Debido a la falta total o parcial de datos, la clasificación no es posible.
Toxicidad específica en determinados órganos – exposición única	Debido a la falta total o parcial de datos, la clasificación no es posible.
Toxicidad específica en determinados órganos – exposición repetida	Debido a la falta total o parcial de datos, la clasificación no es posible.
Peligro por aspiración	Debido a la falta total o parcial de datos, la clasificación no es posible.
Información adicional	En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Persistencia y degradabilidad

Potencial de bioacumulación

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

No se regula como artículo peligroso.

15. Información reglamentaria

reglamentación Federal de EE.UU. No se tiene conocimiento de que este producto sea un "Producto químico peligroso" tal como está definido por la Norma de comunicación de riesgos OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

No listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso No (Exempt)

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

No reglamentado.

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

No reglamentado.

Ley Safe Drinking Water Act (SDWA) No reglamentado.

16. Otra información, como fecha de preparación o última revisión

Fecha de publicación	16-Noviembre-2020
Nº de versión	01
Clasificaciones NFPA	Salud: 0 Inflamabilidad: 1 Inestabilidad: 0
Cláusula de exención de responsabilidad	La información facilitada en esta Ficha de Datos de Seguridad es correcta, a nuestro leal saber y entender, en la fecha de su publicación. Dicha información está concebida únicamente como guía para la seguridad en la manipulación, el uso, el procesamiento, el almacenamiento, el transporte, la eliminación y la liberación, no debiendo tomarse como garantía o especificación de calidades. La información se refiere únicamente al material específico mencionado y puede no ser válida para tal material usado en combinación con cualesquiera otros materiales o en cualquier proceso salvo que se especifique expresamente en el texto.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT GLASGOW SEA SALT SPRAY**

Autres moyens d'identification

Numéro de la FDS 00-31-0000062

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Symbole de danger Aucune.

Mention d'avertissement Aucune.

Mention de danger Le mélange ne satisfait pas les critères de classification.

Conseil de prudence

Prévention Observer de bonnes pratiques d'hygiène industrielle.

Intervention Se laver les mains après utilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Le fabricant ne mentionne aucun ingrédient comme étant dangereux selon la norme 29 CFR 1910.1200 de l'OSHA.

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer avec de l'eau. Consulter un médecin si une irritation se développe et persiste.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Non disponible.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Traiter de manière symptomatique.
Informations générales	S’assurer que le personnel médical est averti du (des) produits(s) en cause et qu’il prend des mesures pour se protéger.

5. Mesures à prendre en cas d’incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l’incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d’incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d’incendie ou d’explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d’urgence	Tenir à l'écart le personnel non requis. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l’élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Tenir hors de la portée des enfants. Entreposer à l’écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Valeurs biologiques limites	Aucune limite d’exposition biologique observée pour les ingrédients.
Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement.
Protection respiratoire	Pour usage industriel seulement. En cas de ventilation insuffisante, porter un appareil respiratoire approprié.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Couleur	Non disponible.
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	5.1 - 6.9
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.

Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	On ne s'attend à aucun effet néfaste en cas d'inhalation.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Aucun effet indésirable dû au contact des yeux n'est prévu.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Produit	Espèces	Résultats d'épreuves
PULP RIOT GLASGOW SEA SALT SPRAY		
Aiguë		
Cutané		
ATEmix		20000 mg/kg
Orale		
ATEmix		16130 mg/kg

Corrosion cutanée/irritation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Lésions oculaires graves/irritation oculaire	La classification n'est pas possible en raison d'un manque partiel ou total de données. Aucun effet indésirable dû au contact des yeux n'est prévu.

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Sensibilisation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Mutagénicité sur les cellules germinales	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Cancérogénicité	Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Toxicité pour certains organes cibles - exposition unique	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Toxicité pour certains organes cibles - expositions répétées	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Danger par aspiration	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Autres informations	La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Persistance et dégradation

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

DOT

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit n'est pas connu comme un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

Non inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

Non réglementé.

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	16-Novembre-2020
Version n°	01
Classements NFPA	Santé: 0 Inflammabilité: 1 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

PULPRIOT

化学品安全技术说明书

1. 鉴别

产品标识 PULP RIOT GLASGOW SEA SALT SPRAY

鉴别的其他方法

SDS编号 00-31-0000062

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害 未被分类。

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

危险符号 无。

警示词 无。

危险性说明 混合物不符合分类的标准。

防范说明

预防措施 遵守良好工业卫生习惯。

事故响应 操作后洗手。

安全储存 远离禁忌物保存。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 用水冲洗。 如果刺激症状持续或加重，应就医。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 无资料。

指明任何需要立即就医或特殊治疗的情况 根据症状处理。

一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	发生火灾时，使用自给式呼吸设备并穿全身防护服。
消防设备/使用说明	在不会发生危险的情况下将容器撤离火灾现场。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。
一般火灾危险	无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	储存在密闭的容器中。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

生物限值	没有该成分的生物接触限值。
适当的技术控制	应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。
个人防护措施，如个人防护设备	
眼/面保护	仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。
皮肤防护	
手防护	仅用於工业环境。 佩戴适当的抗化学手套。
其它的，其它	仅用於工业环境。
呼吸系统防护	仅用於工业环境。 为了预防通风不足，需配备合适的助呼吸装置。
热危害	必要时，穿戴适当的热防护服。
一般的卫生考虑	始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观	
性状	液体。
颜色	无资料。
气味	特征的。
气味阈值	无资料。
pH 值	5.1 - 6.9
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

爆炸限值 - 上限（%） 无资料。

蒸气压 无资料。

蒸气密度 无资料。

相对密度 无资料。

溶解性

溶解性（水） 无资料。

分配系数（辛醇/水） 无资料。

自燃温度 无资料。

分解温度 无资料。

黏度 无资料。

其他信息

爆炸特性 不具有爆炸性。

氧化特性 没有氧化性。

10. 稳定性和反应性

反应性 产品在正常的使用、储存和运输条件下是稳定的和非活性的。

化学稳定性 正常条件下物料稳定。

可能的危险反应 正常使用的条件下未见有危险反应。

避免接触的条件 远离热，热表面，火花，明火和其他点火源。 接触禁配物。

禁配物 强氧化剂。

危险的分解产物 没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入 预期吸入无有害影响。

皮肤接触 预计没有因皮肤接触导致的任何有害影响。

眼睛接触 预计不会因眼神接触而产生不良影响.

经口 预计较低的食入危害。

与物理,化学和毒物学特性有关的症状 无资料。

毒理学效应信息

急性毒性 未知。

产品	物种	试验结果
PULP RIOT GLASGOW SEA SALT SPRAY		
急性的		
经口		
ATEmix		16130 mg/kg
经皮肤		
ATEmix		20000 mg/kg

皮肤腐蚀/刺激 由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。

严重眼睛损伤/眼睛刺激性 由于部分或完全缺乏数据，不可能进行分类。 预计不会因眼神接触而产生不良影响.

呼吸道或皮肤过敏

呼吸过敏性 由于部分或完全缺乏数据，不可能进行分类。

皮肤致敏物 由于部分或完全缺乏数据，不可能进行分类。

生殖细胞突变性 由于部分或完全缺乏数据，不可能进行分类。

致癌性 尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

持久性和降解性

潜在的生物累积性

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT COPENHAGEN LEAVE-IN CONDITIONER**

Other means of identification

SDS number 00-19-0000246

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.

Signal word None.

Hazard statement The mixture does not meet the criteria for classification.

Precautionary statement

Prevention Observe good industrial hygiene practices.

Response Wash hands after handling.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed Not available.

Indication of immediate medical attention and special treatment needed	Treat symptomatically.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling	Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Biological limit values	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection	Wear safety glasses with side shields (or goggles).
Skin protection	
Hand protection	Wear appropriate chemical resistant gloves.
Other	Wear suitable protective clothing.
Respiratory protection	In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance

Physical state	Liquid.

Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	4.5 - 6.1
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212.0 °F (> 100.0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Not available.

Information on toxicological effects

Acute toxicity

Product	Species	Test Results
PULP RIOT COPENHAGEN LEAVE-IN CONDITIONER		
Acute		
Dermal		
ATEmix		671100 mg/kg
Oral		
ATEmix		671100 mg/kg

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Respiratory or skin sensitization

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Persistence and degradability

Bioaccumulative potential

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Local disposal regulations Dispose in accordance with all applicable regulations.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information

DOT

FINISHED GOODS

Not regulated as dangerous goods.

BULK

Not regulated as dangerous goods.

15. Regulatory information

US federal regulations This product is not known to be a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

Not listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No

SARA 313 (TRI reporting)

Not regulated.

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

16. Other information, including date of preparation or last revision

Issue date 11-16-2020

Version # 01

NFPA ratings Health: 0
Flammability: 1
Instability: 0

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT COPENHAGEN LEAVE-IN CONDITIONER
Synonyms	None.
SDS number	00-19-0000246
Product code	1241012 C
Issue date	11-16-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Environmental hazards

Hazardous to the aquatic environment, long-term aquatic hazard	Category 3	H412 - Harmful to aquatic life with long lasting effects.

Hazard summary Dangerous for the environment if discharged into watercourses.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Hazard pictograms	None.
Signal word	None.
Hazard statements	
H412	Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention	
P273	Avoid release to the environment.
Response	Wash hands after handling.
Storage	Store away from incompatible materials.
Disposal	
P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental label information 1% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 1% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
CETRIMONIUM CHLORIDE	0,75	112-02-7 203-928-6	01-2119970558-23	-	

Classification: Acute Tox. 4;H302, Acute Tox. 3;H311, Skin Corr. 1C;H314, Eye Dam. 1;H318, Aquatic Acute 1;H400(M=10), Aquatic Chronic 1;H410

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Rinse with water. Get medical attention if irritation develops and persists.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

4.2. Most important symptoms and effects, both acute and delayed Exposure may cause temporary irritation, redness, or discomfort.

4.3. Indication of any immediate medical attention and special treatment needed Treat symptomatically.

SECTION 5: Firefighting measures

General fire hazards No unusual fire or explosion hazards noted.

5.1. Extinguishing media

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Special fire fighting procedures Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up	Prevent product from entering drains. Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use.
6.4. Reference to other sections	For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling	Provide adequate ventilation. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.
7.2. Conditions for safe storage, including any incompatibilities	Store in tightly closed container. Store away from incompatible materials (see Section 10 of the SDS).
7.3. Specific end use(s)	Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits	No exposure limits noted for ingredient(s).
Biological limit values	No biological exposure limits noted for the ingredient(s).
Recommended monitoring procedures	Follow standard monitoring procedures.
Derived no effect levels (DNELs)	Not available.
Predicted no effect concentrations (PNECs)	Not available.

8.2. Exposure controls

Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information	Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.
Eye/face protection	Wear safety glasses with side shields (or goggles).
Skin protection	
- Hand protection	Wear appropriate chemical resistant gloves.
- Other	Wear suitable protective clothing.
Respiratory protection	In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Inform appropriate managerial or supervisory personnel of all environmental releases.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	4,5 - 6,1
Melting point/freezing point	Not available.

Initial boiling point and boiling range	> 212 °F (> 100 °C)
Flash point	> 212,0 °F (> 100,0 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.
9.2. Other information	No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.
Information on likely routes of exposure	
Inhalation	No adverse effects due to inhalation are expected.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	No adverse effects due to eye contact are expected.
Ingestion	May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms	Exposure may cause temporary irritation, redness, or discomfort.

11.1. Information on toxicological effects

Acute toxicity

Product	Species	Test Results
PULP RIOT COPENHAGEN LEAVE-IN CONDITIONER		
Acute		
Dermal		
ATEmix		70420 mg/kg

Components	Species	Test Results
CETRIMONIUM CHLORIDE (CAS 112-02-7)		
Acute		
Dermal		
LD50	Rabbit	528 mg/kg OECD 402

Components	Species	Test Results
Oral		
LD50	Rat	699 mg/kg OECD 401

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

CETRIMONIUM CHLORIDE: OECD 404; Result: Corrosive; Species: Rabbit

Serious eye damage/eye irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to eye contact are expected.

Irritation Corrosion - Eye

CETRIMONIUM CHLORIDE: OECD 405; Result: Corrosive; Species: Rabbit

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

CETRIMONIUM CHLORIDE: OECD 406; Result: Not Sensitizing; Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

CETRIMONIUM CHLORIDE: Result: In vitro tests did not show mutagenic effects

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

CETRIMONIUM CHLORIDE: 100 mg/kg bw/d OECD 407; Result: NOEAL; Species: Rat; Test Duration: 28 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Harmful to aquatic life with long lasting effects. Based on available data, the classification criteria are not met for hazardous to the aquatic environment, acute hazard.

Components		Species	Test Results
CETRIMONIUM CHLORIDE (CAS 112-02-7)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	0,08 mg/l, 72 hours OECD 201
Crustacea	EC50	Daphnia magna	0,09 mg/l, 48 hours OECD 202
Fish	LC50	Danio rerio	0,19 - 0,29 mg/l, 96 hours OECD 203
Other	EC50	Pseudomonas putida	0,96 mg/l, 16 hours DIN 38412; Pt. 8
Chronic			
Algae	NOEC	Pseudokirchneriella subcapitata	0,04 mg/l, 72 hours OECD 201
Crustacea	NOEC	Daphnia magna	0,0068 mg/l, 21 day OECD 211
Fish	NOEC	Pimephales promelas	0,032 mg/l, 28 day US FIFRA 72-4(a)

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

CETRIMONIUM CHLORIDE	93,5 % OECD 301 B Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

CETRIMONIUM CHLORIDE	3,23

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

ADR

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

BULK

14.1. - 14.6.: Not regulated as dangerous goods.

IATA

FINISHED GOODS

14.1. - 14.6.: Not regulated as dangerous goods.

14.1. - 14.6.: Not regulated as dangerous goods.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not established.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

Not listed.

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

Not listed.

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H302 Harmful if swallowed. H311 Toxic in contact with skin. H314 Causes severe skin burns and eye damage. H318 Causes serious eye damage. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Para más información: 1-732-499-2741

2. Identificación de los peligros

Peligros físicos No clasificado.

Peligros para la salud No clasificado.

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Símbolo de riesgo Ninguno.

Palabra de advertencia Ninguno.

Declaración de peligro La mezcla no cumple los criterios para su clasificación.

Consejos de prudencia

Prevención Respete las normas para una manipulación correcta de productos químicos.

Respuesta Lávese las manos después del uso.

Almacenamiento Consérvese alejado de materiales incompatibles.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuagar con agua. Busque atención médica si la irritación se desarrolla y persiste.

Ingestión Enjuagarse la boca. Obtenga atención médica en caso de síntomas.

Principales síntomas y efectos, agudos y retardados No disponible.

Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente	Tratamiento sintomático.
Información general	Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados	Neblina de agua. Espuma. Polvo químico seco. Dióxido de carbono (CO_2).
Medios de extinción no apropiados	No utilice chorro de agua, pues extendería el fuego.
Peligros específicos que presenta el producto químico	En caso de incendio se pueden formar gases nocivos.
Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios	Use aparato respiratorio autónomo y traje de protección completo en caso de incendio.
Equipo/Instrucciones para la extinción de incendios	Mueva los recipientes del área del incendio si puede hacerlo sin riesgo.
Métodos específicos	Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados.
Riesgos generales de incendio	Ningún riesgo excepcional de incendio o explosión señalado.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia	Mantenga el personal no necesario lejos. Consultar las medidas de protección personal en la sección 8 de la FDS.
Métodos y material de contención y de limpieza	Derrames grandes: Detenga el flujo del material, si esto no representa un riesgo. Forme un dique para el material derramado, donde esto sea posible. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua. Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Nunca devuelva el producto derramado al envase original para reutilizarlo. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.
Precauciones relativas al medio ambiente	No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura	Respete las normas para una manipulación correcta de productos químicos.
Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades	Almacenar en un recipiente herméticamente cerrado. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Valores límite biológicos	No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.
Controles técnicos apropiados	Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara	Use gafas de seguridad con protectores laterales (o goggles).
Protección de la piel	
Protección de las manos	Use guantes adecuados resistentes a los productos químicos.

Otros	Úsese indumentaria protectora adecuada.
Protección respiratoria	En caso de ventilación insuficiente, úsese equipo respiratorio adecuado.
Peligros térmicos	Use ropa protectora térmica adecuada si resulta necesario.
Consideraciones generales de higiene	Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto	
Estado físico	Líquido.
Color	No disponible.
Olor	Característico.
Umbral olfativo	No disponible.
pH	4.5 - 6.1
Punto de fusión/punto de congelación	No disponible.
Punto inicial de ebullición e intervalo de ebullición	> 100 °C (> 212 °F)
Punto de inflamación	> 100.0 °C (> 212.0 °F) Copa Cerrada
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No aplicable.
Límites superior/inferior de inflamabilidad o de explosividad	
Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.
Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.

Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	No es de esperar que se produzcan efectos adversos por inhalación.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	No adverse effects due to eye contact are expected.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	No disponible.

Información sobre los efectos toxicológicos

Toxicidad aguda

Producto	Especies	Resultados de la prueba
PULP RIOT COPENHAGEN LEAVE-IN CONDITIONER		
Agudo		
Dérmico		
ATEmix		671100 mg/kg
Oral		
ATEmix		671100 mg/kg

Corrosión/irritación cutánea	Debido a la falta total o parcial de datos, la clasificación no es posible. No se esperan efectos adversos por contacto con la piel.
Lesiones oculares graves/irritación ocular	Debido a la falta total o parcial de datos, la clasificación no es posible. No adverse effects due to eye contact are expected.

Sensibilización respiratoria o cutánea

Sensibilización respiratoria	Debido a la falta total o parcial de datos, la clasificación no es posible.
Sensibilización cutánea	Debido a la falta total o parcial de datos, la clasificación no es posible.
Mutagenicidad en células germinales	Debido a la falta total o parcial de datos, la clasificación no es posible.
Carcinogenicidad	No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción	Debido a la falta total o parcial de datos, la clasificación no es posible.
Toxicidad específica en determinados órganos – exposición única	Debido a la falta total o parcial de datos, la clasificación no es posible.
Toxicidad específica en determinados órganos – exposición repetida	Debido a la falta total o parcial de datos, la clasificación no es posible.
Peligro por aspiración	Debido a la falta total o parcial de datos, la clasificación no es posible.
Información adicional	En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Persistencia y degradabilidad

Potencial de bioacumulación

Movilidad en el suelo No hay datos disponibles.

Otros efectos adversos No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial.

Normativas de eliminación locales Elimine de acuerdo con todas las reglamentaciones aplicables.

Desechos de residuos / producto no utilizado Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).

Envases contaminados Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación.

14. Información relativa al transporte

DOT

15. Información reglamentaria

reglamentación Federal de EE.UU. No se tiene conocimiento de que este producto sea un "Producto químico peligroso" tal como está definido por la Norma de comunicación de riesgos OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

No listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso no

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

No reglamentado.

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

No reglamentado.

Ley Safe Drinking Water Act (SDWA) No reglamentado.

16. Otra información, como fecha de preparación o última revisión

Fecha de publicación	16-Noviembre-2020
Nº de versión	01
Clasificaciones NFPA	Salud: 0 Inflamabilidad: 1 Inestabilidad: 0
Cláusula de exención de responsabilidad	La información facilitada en esta Ficha de Datos de Seguridad es correcta, a nuestro leal saber y entender, en la fecha de su publicación. Dicha información está concebida únicamente como guía para la seguridad en la manipulación, el uso, el procesamiento, el almacenamiento, el transporte, la eliminación y la liberación, no debiendo tomarse como garantía o especificación de calidades. La información se refiere únicamente al material específico mencionado y puede no ser válida para tal material usado en combinación con cualesquiera otros materiales o en cualquier proceso salvo que se especifique expresamente en el texto.

PULPRIOT

FICHES DE DONNÉES DE SÉCURITÉ

1. Identification

Identificateur de produit **PULP RIOT COPENHAGEN LEAVE-IN CONDITIONER**

Autres moyens d'identification

Numéro de la FDS 00-19-0000246

Usage recommandé Produits de soins personnels destinés à un usage cosmétique.

Restrictions d'utilisation Aucun(e) connu(e).

Renseignements sur le fabricant/importateur/fournisseur/distributeur

Adresse: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
États-Unis

 # de telephone d'urgence 1-800-535-5053 (International: 352-323-3500)

Pour de l'information supplémentaire: 1-732-499-2741

2. Identification des dangers

Dangers physiques Non classé.

Dangers pour la santé Non classé.

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Symbole de danger Aucune.

Mention d'avertissement Aucune.

Mention de danger Le mélange ne satisfait pas les critères de classification.

Conseil de prudence

Prévention Observer de bonnes pratiques d'hygiène industrielle.

Intervention Se laver les mains après utilisation.

Stockage Conserver à l'écart de matières incompatibles.

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Le fabricant ne mentionne aucun ingrédient comme étant dangereux selon la norme 29 CFR 1910.1200 de l'OSHA.

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer avec de l'eau. Consulter un médecin si une irritation se développe et persiste.

Ingestion Rincer la bouche. Consulter un médecin si des symptômes apparaissent.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés	Non disponible.
Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire	Traiter de manière symptomatique.
Informations générales	S’assurer que le personnel médical est averti du (des) produits(s) en cause et qu’il prend des mesures pour se protéger.

5. Mesures à prendre en cas d’incendie

Agents extincteurs appropriés	Brouillard d'eau. Mousse. Poudre chimique. Dioxyde de carbone (CO2).
Agents extincteurs inappropriés	Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.
Dangers spécifiques du produit dangereux	Des gaz dangereux pour la santé peuvent se former pendant un incendie.
Équipements de protection spéciaux et précautions spéciales pour les pompiers	Porter un appareil respiratoire autonome et un vêtement de protection complet en cas d'incendie.
Équipement/directives de lutte contre les incendies	Éloigner les récipients du lieu de l’incendie si cela peut se faire sans risque.
Méthodes particulières d'intervention	Utiliser des procédures standard en cas d’incendie et tenir compte des dangers des autres substances en cause.
Risques d'incendie généraux	Aucun risque inhabituel d’incendie ou d’explosion observé.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d’urgence	Tenir à l'écart le personnel non requis. Pour la protection individuelle, voir la section 8 de la FDS.
Méthodes et matériaux pour le confinement et le nettoyage	Déversements importants : Arrêter l'écoulement de la substance, si cela peut se faire sans risque. Endiguer le matériau déversé, lorsque cela est possible. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau. Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Ne jamais réintroduire le produit répandu dans son récipient d'origine en vue d'une réutilisation. Pour l’élimination des déchets, voir la section 13 de la FDS.
Précautions relatives à l'environnement	Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention	Observer de bonnes pratiques d'hygiène industrielle.
Conditions de sûreté en matière de stockage, y compris les incompatibilités	Stocker dans des récipients bien fermés. Entreposer à l’écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l’exposition/protection individuelle

Valeurs biologiques limites	Aucune limite d’exposition biologique observée pour les ingrédients.
Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).

Protection de la peau	
Protection des mains	Porte des vêtements appropriés résistants aux produits chimiques
Autre	Porter un vêtement de protection approprié.
Protection respiratoire	En cas de ventilation insuffisante, porter un appareil respiratoire approprié.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Couleur	Non disponible.
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	4.5 - 6.1
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 100 °C (> 212 °F)
Point d'éclair	> 100.0 °C (> 212.0 °F) Coupelle fermée
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.
Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.

Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	On ne s'attend à aucun effet néfaste en cas d'inhalation.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Aucun effet indésirable dû au contact des yeux n'est prévu.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Non disponible.

Renseignements sur les effets toxicologiques

Toxicité aiguë

Produit	Espèces	Résultats d'épreuves
PULP RIOT COPENHAGEN LEAVE-IN CONDITIONER		
Aiguë		
Cutané		
ATEmix		671100 mg/kg
Orale		
ATEmix		671100 mg/kg

Corrosion cutanée/irritation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données. On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Lésions oculaires graves/irritation oculaire	La classification n'est pas possible en raison d'un manque partiel ou total de données. Aucun effet indésirable dû au contact des yeux n'est prévu.

Sensibilisation respiratoire ou cutanée

Sensibilisation respiratoire	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Sensibilisation cutanée	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Mutagénicité sur les cellules germinales	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Cancérogénicité	Inclassable quant à sa cancérogénicité pour l'homme. La classification n'est pas possible en raison d'un manque partiel ou total de données.

Monographies du CIRC. Évaluation globale de la cancérogénicité

Non inscrit.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

États-Unis. Rapport du NTP (National Toxicilogy Program) sur les cancérogènes

Non inscrit.

Toxicité pour la reproduction	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Toxicité pour certains organes cibles - exposition unique	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Toxicité pour certains organes cibles - expositions répétées	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Danger par aspiration	La classification n'est pas possible en raison d'un manque partiel ou total de données.
Autres informations	La référence aux tests sur animaux mentionnée dans ce document pour des constituants individuels est basée sur des données publiques ou provenant de tierce partie.

12. Données écologiques

Écotoxicité Le produit n'est pas classé comme dangereux pour l'environnement. Toutefois, ceci n'exclut pas la possibilité que des déversements importants ou fréquents puissent avoir un effet nocif ou nuisible sur l'environnement.

Persistance et dégradation

Potentiel de bioaccumulation

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l'élimination

Instructions pour l'élimination Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d'élimination des déchets autorisé.

Règlements locaux d'élimination Détruire conformément àtoutes les réglementations applicables.

Déchets des résidus / produits non utilisés Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).

Emballages contaminés Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l'étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage.

14. Informations relatives au transport

16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险 未被分类。

健康危害 未被分类。

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

危险符号 无。

警示词 无。

危险性说明 混合物不符合分类的标准。

防范说明

预防措施 遵守良好工业卫生习惯。

事故响应 操作后洗手。

安全储存 远离禁忌物保存。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

The manufacturer lists no ingredients as hazardous to health according to OSHA 29 CFR 1910.1200.

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 用水冲洗。 如果刺激症状持续或加重，应就医。

经口 漱口。 如症状出现，就医。

最重要的症状/影响，急性和延迟性 无资料。

指明任何需要立即就医或特殊治疗的情况 根据症状处理。

一般信息	务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂	水雾。 泡沫。 化学干粉。 二氧化碳 (CO2)。
不当的灭火介质	禁止使用直流水灭火，否则会引起火势蔓延。
由此化学品引发的特殊的危害	燃烧时，会产生对人体健康有害的气体。
特殊保护性装备以及消防员的预防措施	发生火灾时，使用自给式呼吸设备并穿全身防护服。
消防设备/使用说明	在不会发生危险的情况下将容器撤离火灾现场。
特定的方法	采用标准灭火程序并考虑其他涉及材料有关的危险。
一般火灾危险	无异常的火灾或爆炸危险。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序	让无关人员离开。 有关个人防护，参见SDS第8部分。
抑制和清除溢出物的方法和材料	大量泄漏： 如果没有风险，阻止物质流动。 如果有可能，控制住泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。 小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 千万不要将溢出物回收到原来的容器中去再使用. 参见SDS第13部分废弃处理的说明。
环境保护措施	防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项	遵守良好工业卫生习惯。
安全储存条件，包括任何禁配物	储存在密闭的容器中。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

生物限值	没有该成分的生物接触限值。
适当的技术控制	应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。
个人防护措施，如个人防护设备	
眼/面保护	戴有侧护罩的安全眼镜（或护目镜）。
皮肤防护	
手防护	佩戴适当的抗化学手套。
其它的，其它	需穿上合适的防护衣服。
呼吸系统防护	为了预防通风不足，需配备合适的助呼吸装置。
热危害	必要时，穿戴适当的热防护服。
一般的卫生考虑	始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观	
性状	液体。
颜色	无资料。
气味	特征的。
气味阈值	无资料。
pH 值	4.5 - 6.1
熔点/凝固点	无资料。
初始沸点和沸程	> 100 ° C (> 212 ° F)
闪点	> 100.0 ° C (> 212.0 ° F) 闭杯闪点测定法
蒸发速率	无资料。
易燃性（固体，气体）	不适用。
燃烧上/下限或爆炸极限	
燃烧限值 - 下限（%）	无资料。

燃烧限值 - 上限 (%)	无资料。
爆炸限值 - 下限（%）	无资料。
爆炸限值 - 上限（%）	无资料。
蒸气压	无资料。
蒸气密度	无资料。
相对密度	无资料。
溶解性	
溶解性（水）	无资料。
分配系数（辛醇/水）	无资料。
自燃温度	无资料。
分解温度	无资料。
黏度	无资料。
其他信息	
爆炸特性	不具有爆炸性。
氧化特性	没有氧化性。

10. 稳定性和反应性

反应性	产品在正常的使用、储存和运输条件下是稳定的和非活性的。
化学稳定性	正常条件下物料稳定。
可能的危险反应	正常使用的条件下未见有危险反应。
避免接触的条件	远离热，热表面，火花，明火和其他点火源。 接触禁配物。
禁配物	强氧化剂。
危险的分解产物	没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入	预期吸入无有害影响。
皮肤接触	预计没有因皮肤接触导致的任何有害影响。
眼睛接触	预计不会因眼神接触而产生不良影响.
经口	预计较低的食入危害。
与物理,化学和毒物学特性有关的症状	无资料。

毒理学效应信息

急性毒性

产品	**物种**	**试验结果**
PULP RIOT COPENHAGEN LEAVE-IN CONDITIONER		
急性的		
经口		
ATEmix		671100 mg/kg
经皮肤		
ATEmix		671100 mg/kg

皮肤腐蚀/刺激	由于部分或完全缺乏数据，不可能进行分类。 预计没有因皮肤接触导致的任何有害影响。
严重眼睛损伤/眼睛刺激性	由于部分或完全缺乏数据，不可能进行分类。 预计不会因眼神接触而产生不良影响.
呼吸道或皮肤过敏	
呼吸过敏性	由于部分或完全缺乏数据，不可能进行分类。
皮肤致敏物	由于部分或完全缺乏数据，不可能进行分类。
生殖细胞突变性	由于部分或完全缺乏数据，不可能进行分类。
致癌性	尚不能确定对人有致癌作用。 由于部分或完全缺乏数据，不可能进行分类。

国际癌症研究机构（IARC）专题论文。 致癌性的综合评价

不适用。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

美国国家毒理学计划（NTP）致癌物报告

不适用。

生殖毒性 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－单次接触 由于部分或完全缺乏数据，不可能进行分类。

特定目标器官系统毒性－重复接触 由于部分或完全缺乏数据，不可能进行分类。

吸入危害 由于部分或完全缺乏数据，不可能进行分类。

更多信息 本文中关于个体成分的任何动物测试均基于公开的第三方数据.

12. 生态学信息

生态毒性 产品不被分类为环境有害物质。然而，这不排除大量的和经常的泄漏物可能对环境产生有害影响或损害。

持久性和降解性

潜在的生物累积性

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。

地方处置法规 按照所有适用的法规进行处置。

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。

14. 运输信息

美国运输部（DOT）

FINISHED GOODS

不作为危险货物运输

15. 法规信息

美国联邦法规 依OSHA 危害通识规则，该产品不是“化学危险物品”。

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

不适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 否

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

未受管制。

饮用水安全法（SDWA） 未受管制。

16. 其他信息，包括编制日期或最新修订日期

最初编制日期 16-十一月-2020

版本号 01

NFPA分级 健康 0
可燃性 1
不稳定性: 0

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT TORONTO FIRM HOLD HAIRSPRAY**

Other means of identification

SDS number 21-91-0000151

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards	Flammable aerosols	Category 1
	Gases under pressure	Liquefied gas
Health hazards	Serious eye damage/eye irritation	Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Extremely flammable aerosol. Contains gas under pressure; may explode if heated. Causes serious eye irritation.

Precautionary statement

Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use. Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage Protect from sunlight. Store in a well-ventilated place. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
ETHANOL		64-17-5	51.74
HYDROFLUOROCARBON 152A		75-37-6	42

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Not likely, due to the form of the product. In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.
Most important symptoms/effects, acute and delayed	Headache. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Coughing.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Alcohol resistant foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
Fire fighting equipment/instructions	In case of fire: Stop leak if safe to do so. Do not move cargo or vehicle if cargo has been exposed to heat. Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.
General fire hazards	Extremely flammable aerosol. Contents under pressure. Pressurized container may explode when exposed to heat or flame.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Wear appropriate protective equipment and clothing during clean-up. Emergency personnel need self-contained breathing equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Isolate area until gas has dispersed. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Close valve after each use and when empty. Protect containers from physical damage; do not drag, roll, slide, or drop. When moving containers, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport containers. Suck back of water into the container must be prevented. Do not allow backfeed into the container. Purge air from system before introducing gas. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Do not re-use empty containers. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Level 1 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Store in a well-ventilated place. Stored containers should be periodically checked for general condition and leakage. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
ETHANOL (CAS 64-17-5)	PEL	1900 mg/m3
		1000 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1000 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection

Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection

Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other

Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection

Applicable for industrial settings only. If permissible levels are exceeded use NIOSH mechanical filter / organic vapor cartridge or an air-supplied respirator.

Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 95 °F (> 35 °C) (Liquid)
Flash point	55.4 °F (13.0 °C) Closed Cup (Liquid)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Heat of combustion (NFPA 30B)	16.07 kJ/g
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation Prolonged inhalation may be harmful.

Skin contact No adverse effects due to skin contact are expected.

Eye contact Causes serious eye irritation.

Ingestion Expected to be a low ingestion hazard.

Symptoms related to the physical, chemical and toxicological characteristics Headache. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Coughing.

Information on toxicological effects

Acute toxicity Not known.

Product	Species	Test Results

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

ETHANOL	-0.31
HYDROFLUOROCARBON 152A	0.75

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

General information Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers: Ensure that containers are firmly secured. Ensure cylinder valve is closed and not leaking. Ensure valve outlet cap nut or plug (where provided) is correctly fitted. Ensure valve protection device (where provided) is correctly fitted. Ensure adequate ventilation. Ensure compliance with applicable regulations.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

ETHANOL (CAS 64-17-5) Listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Not regulated.

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT TORONTO FIRM HOLD HAIRSPRAY
Synonyms	None.
SDS number	21-91-0000151
Product code	1241004
Issue date	11-16-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards		
Aerosols	Category 1	H222 - Extremely flammable aerosol. H229 - Pressurized container: May burst if heated.
Health hazards		
Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.

Hazard summary

Aerosol. CONTENTS UNDER PRESSURE.
Pressurized container may explode when exposed to heat or flame. Causes serious eye irritation.
Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: ETHANOL, HYDROFLUOROCARBON 152A

Hazard pictograms

Signal word Danger

Hazard statements

H222	Extremely flammable aerosol.
H229	Pressurized container: May burst if heated.
H319	Causes serious eye irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P211	Do not spray on an open flame or other ignition source.
P251	Do not pierce or burn, even after use.
P264	Wash thoroughly after handling.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage

P410 + P412	Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 4,38% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 4,38% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment. EUH208 - Contains HEXYL SALICYLATE. May produce an allergic reaction.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
ETHANOL	51,74	64-17-5 200-578-6	01-2119457610-43	603-002-00-5	
Classification:	Flam. Liq. 2;H225, Eye Irrit. 2;H319				
HYDROFLUOROCARBON 152A	42	75-37-6 200-866-1	01-2119474440-43	-	
Classification:	Flam. Gas 1;H220, Press. Gas;H280				
HEXYL SALICYLATE	0,01	6259-76-3 228-408-6	01-2119638275-36	-	
Classification:	Skin Irrit. 2;H315, Skin Sens. 1A;H317, Aquatic Acute 1;H400				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.

4.2. Most important symptoms and effects, both acute and delayed Headache. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Coughing.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards Extremely flammable aerosol.

5.1. Extinguishing media

Suitable extinguishing media Alcohol resistant foam. Powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

Special fire fighting procedures Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Level 1 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1907 mg/m3
		1000 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
ETHANOL (CAS 64-17-5)	VLE	9500 mg/m3
Regulatory status: Indicative limit (VL)		
		5000 ppm
Regulatory status: Indicative limit (VL)		
	VME	1900 mg/m3
Regulatory status: Indicative limit (VL)		
		1000 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	380 mg/m3
		200 ppm

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value
ETHANOL (CAS 64-17-5)	AGW	380 mg/m3
		200 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1000 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1910 mg/m3
		1000 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 95 °F (> 35 °C) (Liquid)
Flash point	55,4 °F (13,0 °C) Closed Cup (Liquid)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Heat of combustion (NFPA 30B)	16,07 kJ/g

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	May cause an allergic skin reaction.

Eye contact Causes serious eye irritation.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Headache. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Coughing.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
ETHANOL (CAS 64-17-5)		
Acute		
Dermal		
LD50	Rabbit	> 20000 mg/kg
Inhalation		
Vapor		
LC50	Rat	124,7 mg/l, 4 h OECD 403
Oral		
LD50	Rat	10470 mg/kg OECD 401
HEXYL SALICYLATE (CAS 6259-76-3)		
Acute		
Dermal		
LD50	Rabbit	> 5000 mg/kg
Oral		
LD50	Rat	> 5000 mg/kg OECD 401
HYDROFLUOROCARBON 152A (CAS 75-37-6)		
Acute		
Inhalation		
Gas		
ALC	Rat	> 437500 ppm, 4 h

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

HEXYL SALICYLATE	OECD 404 Result: Irritating Species: Rabbit
ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

ETHANOL	OECD 405 Result: Irritating Species: Rabbit
HEXYL SALICYLATE	OECD 405 Result: Not Irritating Species: Rabbit
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig
HEXYL SALICYLATE	OECD 429 Result: Sensitizing Species: Mouse

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.

Mutagenicity

HEXYL SALICYLATE	Result: In vitro and in vivo tests did not show mutagenic effects.
HYDROFLUOROCARBON 152A	Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat
HEXYL SALICYLATE	360 mg/kg bw/d OECD 414 Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 Result: NOAEC Species: Rat

Reproductivity

ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm Result: NOAEL Species: Rat
HEXYL SALICYLATE	714 mg/kg bw/d OECD 416 Result: NOAEL Species: Mouse

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat
HEXYL SALICYLATE	249 mg/m3 air OECD 412, Inhalation Result: NOAEC Species: Rat Test Duration: 28 d
HYDROFLUOROCARBON 152A	25000 ppm OECD 453, Inhalation Result: NOAEC Species: Rat Test Duration: 104 wk
HEXYL SALICYLATE	46,9 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat Test Duration: 90 d

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
ETHANOL (CAS 64-17-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustacea	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h
Fish	LC50	Pimephales promelas	15300 mg/l, 96 h

Components		Species	Test Results
Other	IC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h
Chronic			
Crustacea	NOEC	Daphnia magna	9,6 mg/l, 9 d
Fish	NOEC	Danio rerio	250 mg/l, 120 h OECD 212
HEXYL SALICYLATE (CAS 6259-76-3)			
Aquatic			
Acute			
Algae	EC50	Desmodesmus subspicatus	0,61 mg/l, 72 h OECD 201
Crustacea	EC50	Daphnia magna	0,357 mg/l, 48 h OECD 202
Fish	LC50	Danio rerio	1,34 mg/l, 96 h EU C.1
HYDROFLUOROCARBON 152A (CAS 75-37-6)			
Aquatic			
Acute			
Algae	EC50	Algae	47,755 mg/l QSAR
Crustacea	EC50	Daphnia	146,695 mg/l QSAR
Fish	LC50	Fish	295,783 mg/l QSAR

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

ETHANOL	84 % Result: Readily Biodegradable Test Duration: 20 d
HEXYL SALICYLATE	91 % OECD 301 F Result: Readily Biodegradable Test Duration: 28 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

ETHANOL	-0,31
HEXYL SALICYLATE	5,5 OECD 117
HYDROFLUOROCARBON 152A	0,75

Bioconcentration factor (BCF)

HEXYL SALICYLATE	8913

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

12.7. Additional information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

EU waste code The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Disposal methods/information Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.

Special precautions Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

ETHANOL (CAS 64-17-5)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H220 Extremely flammable gas. H225 Highly flammable liquid and vapor. H280 Contains gas under pressure; may explode if heated. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H319 Causes serious eye irritation. H400 Very toxic to aquatic life.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

2. Identificación de los peligros

Peligros físicos	Aerosoles inflamables	Categoría 1
	Gases a presión	Gas licuado
Peligros para la salud	Lesiones oculares graves/irritación ocular	Categoría 2A

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Peligro

Declaración de peligro Aerosol extremadamente inflamable. Contiene gas a presión; peligro de explosión en caso de calentamiento. Provoca irritación ocular grave.

Consejos de prudencia

Prevención Mantener alejado de fuentes de calor, chispas, llama abierta o superficies calientes. - No fumar. No pulverizar sobre una llama abierta u otra fuente de ignición. Recipiente a presión: no perforar ni quemar, aun después del uso. Lavarse concienzudamente tras la manipulación. Llevar protección ocular/facial.

Respuesta En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. Si persiste la irritación ocular: Consultar a un médico.

Almacenamiento Proteger de la luz del sol. Almacenar en un lugar bien ventilado. No exponer a temperaturas superiores a 50 °C/122°F.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
ETANOL		64-17-5	51.74
HYDROFLUOROCARBON 152A		75-37-6	42

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Si persiste la irritación ocular: Consultar a un médico.

Ingestión Poco probable debido a la forma del producto. En el improbable caso de que hubiera tragado producto, llame a un centro toxicológico o a un médico. Enjuagarse la boca.

Principales síntomas y efectos, agudos y retardados Dolor de cabeza. Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Tos.

Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente Provea las medidas de apoyo generales y de tratamiento sintomático. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.

Información general Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados Neblina de agua. Espuma resistente al alcohol. Polvo químico seco. Dióxido de carbono (CO2).

Medios de extinción no apropiados No utilice chorro de agua, pues extendería el fuego.

Peligros específicos que presenta el producto químico Contenido bajo presión. El envase a presión puede explotar cuando se expone al calor o a la llama. En caso de incendio se pueden formar gases nocivos.

Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios Los bomberos deben utilizar un equipo de protección estándar incluyendo chaqueta ignífuga, casco con careta, guantes, botas de goma, y, en espacios cerrados, equipo de respiración autónomo (SCBA, según sus siglas en inglés).

Equipo/Instrucciones para la extinción de incendios En caso de incendio: Detener la fuga, si no hay peligro en hacerlo. No mueva la carga o el vehículo si la carga ha estado expuesta al calor. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo. Los contenedores deberían refrigerarse con agua para evitar que suba la presión del vapor. Al combatir incendios masivos en el área de carga, utilizar manguera no-tripulada o monitor de boquillas, si es posible. Si no, retirarse y dejar que prosiga el incendio hasta que se apague.

Métodos específicos Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo. En caso de incendio o de explosión, no respire los humos.

Riesgos generales de incendio Aerosol extremadamente inflamable. Contenido bajo presión. El envase a presión puede explotar cuando se expone al calor o a la llama.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Manténgase alejado de las áreas bajas. Muchos gases son más pesados que el aire y se extenderán por el piso y se acumularán en áreas bajas o cerradas (alcantarillas, sótanos, depósitos). Use equipo y ropa de protección apropiados durante la limpieza. El personal de emergencia debe portar equipos autónomos de respiración. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Ventilar los espacios cerrados antes de entrar. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.

Métodos y material de contención y de limpieza

Consultar con las fichas de datos de seguridad adjuntas y/o instrucciones para su uso. Detenga la fuga si puede hacerlo sin riesgo. Lleve el tanque a un área segura y abierta si la fuga es irreparable. Confine el área hasta que se disperse el gas. Mantenga los materiales combustibles (madera, papel, petróleo, etc.) lejos del material derramado. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua .

Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.

Precauciones relativas al medio ambiente

No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura

Recipiente a presión: no perforar ni quemar, aun después del uso. No utilizar si falta el botón pulverizador o está defectuoso. No pulverizar sobre llamas o cualquier otro material incandescente. No fume mientras utilice el producto o hasta que la superficie pulverizada se haya secado bien. No corte, suelde, taladre, esmerile ni exponga los recipientes al calor, llama, chispas ni otras fuentes de ignición. Todo el equipo que se utiliza al manejar el producto debe estar conectado a tierra. Cerrar la válvula tras cada uso y cuando se haya vaciado. Proteger los contenedores de posibles daños físicos; no arrastrarlos, hacerlos rodar, dejarlos resbalar o dejarlos caer. Para trasladar contenedores, aun en distancias cortas, utilizar un carro (carretilla, carrito manual, etc.) diseñado para su transporte. Debe prevenirse la retroaspiración de agua al interior del recipiente. No permitir la retroalimentación al interior del recipiente. Purgar el aire del sistema antes de introducir el gas. Utilizar únicamente equipos con las especificaciones apropiadas, que sean adecuados para este producto así como su temperatura y presión de suministro. En caso de duda, póngase en contacto con su proveedor de gas. No reutilizar los recipientes vacíos. Evítese el contacto con los ojos. Evite la exposición prolongada. Úsese únicamente en lugares bien ventilados. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.

Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades

Aerosol de Nivel 1.

Recipiente a presión. Protéjase de los rayos solares y evítese exponerlo a temperaturas superiores a 50 °C. No punzar, incinerar ni aplastar. No manipule ni guarde cerca del fuego, calor u otras fuentes de ignición. Este material puede acumular cargas estáticas que pueden causar chispas y volverse una fuente de ignición. Almacenar en un recipiente herméticamente cerrado. Almacenar en un lugar bien ventilado. Debe comprobarse periódicamente el estado general y la posible presencia de fugas en los recipientes almacenados. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Límites de exposición profesional

Los constituyentes siguientes son los únicos constituyentes del producto que tienen un PEL, TLV u otro límite de exposición recomendado. En este momento, los demás constituyentes no tienen límites de exposición conocidos.

EEUU. Administración de Seguridad y Salud Ocupacional (OSHA) Tabla Z-1 Límites para los contaminantes del aire (29 CFR 1910.1000)

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	Limite de Exposición Permisible (LEP)	1900 mg/m³
		1000 ppm

EE.UU. ACGIH Valores umbrales límite

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	STEL	1000 ppm

EEUU. Instituto Nacional para la Seguridad y Salud Ocupacional (NIOSH): Guía de bolsillo sobre riesgos químicos

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	TWA	1900 mg/m³
		1000 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Componentes	Tipo	Valor
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m³
		1000 ppm

Valores límite biológicos	No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.
Controles técnicos apropiados	Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación para lavado de ojos.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara	De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).
Protección de la piel	
Protección de las manos	De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.
Otros	De aplicación solamente en entornos industriales. Use ropa adecuada resistente a los productos químicos.
Protección respiratoria	De aplicación solamente en entornos industriales. Si se exceden los niveles permisibles, use un filtro mecánico / cartucho para vapores orgánicos de NIOSH o un respirador con suministro de aire.
Peligros térmicos	Use ropa protectora térmica adecuada si resulta necesario.
Consideraciones generales de higiene	No fumar durante su utilización. Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto	
Estado físico	Líquido.
Forma	Aerosol.
Color	No disponible.
Olor	Característico.
Umbral olfativo	No disponible.
pH	No disponible.
Punto de fusión/punto de congelación	No disponible.
Punto inicial de ebullición e intervalo de ebullición	> 35 °C (> 95 °F) (líquido)
Punto de inflamación	13.0 °C (55.4 °F) Copa Cerrada (líquido)
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No aplicable.
Límites superior/inferior de inflamabilidad o de explosividad	
Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.

Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.
Información adicional	
Propiedades explosivas	No es explosivo.
Calor de combustión (NFPA 30B)	16.07 kJ/g
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Evitar temperaturas por encima del punto de flash. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	La inhalación prolongada puede resultar nociva.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	Provoca irritación ocular grave.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Dolor de cabeza. Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Tos.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Peligro por aspiración

Debido a la falta total o parcial de datos, la clasificación no es posible.

Información adicional

En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad

El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Componentes		Especies	Resultados de la prueba
ETANOL (CAS 64-17-5)			
Acuático (a)			
Agudo			
Algas	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustáceos	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h

Acuático (a)			
Agudo			
Algas	EC50	Algas	47.755 mg/l QSAR
Crustáceos	EC50	Dafnia	146.695 mg/l QSAR
Pez	LC50	Pez	295.783 mg/l QSAR

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

ETANOL	84 % Resultado: Fácilmente Biodegradable Duración de la prueba: 20 d

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

ETANOL	-0.31
HYDROFLUOROCARBON 152A	0.75

Movilidad en el suelo

No hay datos disponibles.

Otros efectos adversos

No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación	Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Contenido bajo presión. No punzar, incinerar ni aplastar. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.
Normativas de eliminación locales	Elimine de acuerdo con todas las reglamentaciones aplicables.
Código de residuo peligroso	Este producto es un residuo peligroso inflamable (D001) de acuerdo a RCRA cuando se intenta botar o destruir.
Desechos de residuos / producto no utilizado	Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).
Envases contaminados	Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación. No reutilizar los recipientes vacíos.

14. Información relativa al transporte

Información general Evitar el transporte en vehículos en los que el espacio de carga no esté separado del compartimento del conductor. Asegurarse de que el conductor del vehículo sea consciente de los peligros potenciales de la carga y sepa qué hacer en caso de accidente o emergencia. Antes de transportar recipientes de producto: Asegurarse de que los recipientes estén firmemente asegurados. Asegurarse de que la válvula de la botella esté cerrada y no presente fugas. Asegurarse de que el tapón o la tuerca ciega de la salida de la válvula (cuando lleve) esté correctamente colocado/a. Asegurarse de que el dispositivo de protección de la válvula (cuando lleve) esté correctamente instalado. Asegúrese una ventilación apropiada. Asegurar el cumplimiento de las normativas aplicables.

15. Información reglamentaria

reglamentación Federal de EE.UU. El producto es un "Producto químico peligroso" tal como lo define la Norma de comunicación de peligro OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

ETANOL (CAS 64-17-5) Listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso No (Exempt)

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

No reglamentado.

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Ley Safe Drinking Water Act (SDWA) No reglamentado.

ETANOL (CAS 64-17-5) Low priority

2. Identification des dangers

Dangers physiques	Aérosols inflammables	Catégorie 1
	Gaz sous pression	Gaz liquéfié
Dangers pour la santé	Lésions oculaires graves/irritation oculaire	Catégorie 2A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Aérosol extrêmement inflammable. Contient un gaz sous pression; peut exploser sous l'effet de la chaleur. Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Tenir à lécart de la chaleur/des étincelles/des flammes nues/des surfaces chaudes. - Ne pas fumer. Ne pas vaporiser sur une flamme nue ou sur toute autre source d'ignition Récipient sous pression : ne pas perforer ni brûler, même après usage. Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Stockage Protéger du rayonnement solaire. Stocker dans un endroit bien ventilé. Ne pas exposer à une température supérieure à 50 °C/122 °F

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
ÉTHANOL		64-17-5	51.74
HYDROFLUOROCARBON 152A		75-37-6	42

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Ingestion Peu probable en raison de la forme du produit. Dans le cas peu probable d'une ingestion, communiquez avec un médecin ou un centre anti-poison. Rincer la bouche.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Maux de tête. Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Toux.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse antialcool. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme. Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Les pompiers doivent porter un équipement de protection standard, notamment des vêtements ignifuges, un casque à écran facial, des gants, des bottes en caoutchouc et, dans les espaces clos, un appareil respiratoire autonome.

Équipement/directives de lutte contre les incendies En cas d'incendie : Obturer la fuite si cela peut se faire sans danger. Ne pas déplacer la cargaison ou le véhicule si la cargaison a été exposée à la chaleur. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. Les récipients doivent être refroidis à l'eau pour prévenir la création de pression de vapeur. Pour un important incendie dans la zone de cargaison, utiliser un support à tuyau automatique ou des lances à eau autonomes, si possible. Sinon, se retirer et laisser brûler.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. En cas d'incendie et/ou d'explosion, ne pas respirer les fumées.

Risques d'incendie généraux Aérosol extrêmement inflammable. Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Tenir à l'écart des zones basses. De nombreux gaz sont plus que l'air. Ils se répandent au niveau du sol et s'accumulent dans des zones basses ou confinées (égouts, sous-sols, citernes). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Le personnel d'urgence doit posséder un matériel respiratoire autonome. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. Ventiler les espaces clos avant d'y entrer. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Se reporter aux fiches de données de sécurité et/ou aux instructions. Arrêter la fuite si cela peut se faire sans risque. Déplacer la bouteille vers un endroit sûr et ouvert si la fuite est irréparable. Isoler la zone jusqu'à dispersion du gaz. Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Récipient sous pression : ne pas perforer ni brûler, même après usage. Ne pas utiliser si le bouton de vaporisation est manquant ou défectueux. Ne pas pulvériser sur une flamme nue ou toute autre matière incandescente. Ne pas fumer pendant l'utilisation ou jusqu'à ce que la surface vaporisée soit complètement sèche. Ne pas couper, souder, braser, percer, broyer ou exposer les récipients à de la chaleur, à une flamme, à des étincelles ou à d'autres sources d'ignition. Tout matériel utilisé pour la manutention de ce produit doit être mis à la terre. Fermer le détendeur après chaque utilisation et lorsque la bouteille est vide. Protéger les contenants des dommages physiques; ne pas traîner, rouler, glisser ou laisser tomber. Lors du déplacement des réservoirs, même sur de courtes distances, utiliser un chariot (chariot de transport, chariot à main, etc.) conçu pour le transport de réservoirs. L'aspiration inverse de l'eau du récipient doit être évitée. Ne pas permettre le refoulement dans le récipient. Purger l'air du système avant d'introduire un gaz. Utiliser uniquement de l'équipement correctement spécifié qui est approprié pour ce produit, sa pression d'alimentation et sa température. En cas de doute, communiquez avec votre fournisseur de gaz. Ne pas réutiliser les récipients vides. Éviter tout contact avec les yeux. Éviter une exposition prolongée. Utiliser seulement dans les zones bien ventilées. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Aérosol niveau 1.
Récipient sous pression. Protéger du rayonnement solaire et ne pas exposer à une température supérieure à 50 °C/122 °F. Ne pas perforer, incinérer ou écraser. Ne pas manipuler ou stocker à proximité d'une flamme nue, d'une source de chaleur ou d'autres sources d'ignition. Ce produit peut accumuler des charges statiques qui peuvent causer des étincelles et devenir une source d'ignition. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Les contenants stockés doivent être inspectés régulièrement pour leur condition générale et des fuites. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	PEL (limite d'exposition admissible)	1900 mg/m3
		1000 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	STEL	1000 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

États-Unis. Guides WEEL (niveau d'exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

Valeurs biologiques limites	Aucune limite d'exposition biologique observée pour les ingrédients.
Contrôles d'ingénierie appropriés	Il faut utiliser une bonne ventilation générale. Les débits de ventilation doivent être adaptés aux conditions. S'il y a lieu, utiliser des enceintes d'isolement, une ventilation locale ou d'autres mesures d'ingénierie pour maintenir les concentrations atmosphériques sous les limites d'exposition recommandées. Si des limites d'exposition n'ont pas été établies, maintenir les concentrations atmosphériques à un niveau acceptable. Assurer l'accès à une douche oculaire.

Mesures de protection individuelle, telles que les équipements de protection individuelle

Protection du visage/des yeux	Pour usage industriel seulement. Porter des lunettes de sécurité à écrans latéraux (ou des lunettes à coques).
Protection de la peau	
Protection des mains	Pour usage industriel seulement. Porte des vêtements appropriés résistants aux produits chimiques
Autre	Pour usage industriel seulement. Porter des gants appropriés résistants aux produits chimiques
Protection respiratoire	Pour usage industriel seulement. Si les niveaux admissibles sont dépassés, utiliser un filtre mécanique / une cartouche contre les vapeurs organiques NIOSH ou un respirateur à adduction d'air.
Dangers thermiques	Porter des vêtements de protection thermique appropriés, au besoin.
Considérations d'hygiène générale	Ne pas fumer pendant l'utilisation. Toujours adopter de bonnes pratiques d'hygiène personnelle, comme se laver après avoir manipulé la substance et avant de manger, de boire ou de fumer. Laver régulièrement les vêtements de travail et l'équipement de protection pour éliminer les contaminants

9. Propriétés physiques et chimiques

Apparence	
État physique	Liquide.
Forme	Aérosol
Couleur	Non disponible.
Odeur	Caractéristique.
Seuil olfactif	Non disponible.
pH	Non disponible.
Point de fusion et point de congélation	Non disponible.
Point initial d'ébullition et domaine d'ébullition	> 35 °C (> 95 °F) (liquide)
Point d'éclair	13.0 °C (55.4 °F) Coupelle fermée (liquide)
Taux d'évaporation	Non disponible.
Inflammabilité (solides et gaz)	Sans objet.
Limites supérieures et inférieures d'inflammabilité ou d'explosibilité	
Limites d'inflammabilité - inférieure (%)	Non disponible.
Limites d'inflammabilité - supérieure (%)	Non disponible.
Limite d'explosibilité - inférieure (%)	Non disponible.
Limite d'explosibilité - supérieure (%)	Non disponible.
Tension de vapeur	Non disponible.
Densité de vapeur	Non disponible.
Densité relative	Non disponible.
Solubilité	
Solubilité (eau)	Non disponible.
Coefficient de partage n-octanol/eau	Non disponible.

Température d'auto-inflammation	Non disponible.
Température de décomposition	Non disponible.
Viscosité	Non disponible.
Autres informations	
Propriétés explosives	Non explosif.
Chaleur de combustion (NFPA 30B)	16.07 kJ/g
Propriétés comburantes	Non oxydant.

10. Stabilité et réactivité

Réactivité	Le produit est stable et non réactif dans des conditions normales d'utilisation, d'entreposage et de transport.
Stabilité chimique	La substance est stable dans des conditions normales.
Risque de réactions dangereuses	Aucune réaction dangereuse connue dans des conditions normales d'utilisation.
Conditions à éviter	Tenir à l'écart de la chaleur, des surfaces chaudes, des étincelles, des flammes nues et de toute autre source d'ignition. Éviter les températures supérieures au point d'éclair. Contact avec des matériaux incompatibles.
Matériaux incompatibles	Agents comburants forts.
Produits de décomposition dangereux	Aucun produit dangereux de décomposition n'est connu.

11. Données toxicologiques

Renseignements sur les voies d'exposition probables

Inhalation	Toute inhalation prolongée peut être nocive.
Contact avec la peau	On ne s'attend à aucun effet néfaste en cas de contact avec la peau.
Contact avec les yeux	Provoque une sévère irritation des yeux.
Ingestion	Faible danger présumé en cas d'ingestion.
Les symptômes correspondant aux caractéristiques physiques, chimiques et toxicologiques	Maux de tête. Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Toux.

Renseignements sur les effets toxicologiques

Toxicité aiguë Inconnu(e).

Persistance et dégradation

Biodégradabilité

Pourcentage de dégradation (biodégradation aérobie)

ÉTHANOL	84 % Résultat: Facilement Biodegradable Durée du test: 20 d

Potentiel de bioaccumulation

Log Koe du coefficient de répartition octanol/eau

ÉTHANOL	-0.31
HYDROFLUOROCARBON 152A	0.75

Mobilité dans le sol Aucune donnée disponible.

Autres effets nocifs On ne s'attend pas à ce que ce composant ait des effets néfastes sur l'environnement (par ex., appauvrissement de la couche d'ozone, potentiel de formation photochimique d'ozone, perturbation endocrinienne, potentiel de réchauffement de la planète).

13. Données sur l’élimination

Instructions pour l'élimination	Recueillir et réutiliser ou éliminer dans des récipients scellés dans un site d’élimination des déchets autorisé. Contenu sous pression. Ne pas perforer, incinérer ou écraser. Éliminer le contenu/récipient conformément à la réglementation locale/régionale/nationale/internationale.
Règlements locaux d’élimination	Détruire conformément àtoutes les réglementations applicables.
Code des déchets dangereux	Ce produit est inflammable (D001), utilisez le RCRA matières dangereuses lors de l’élimination.
Déchets des résidus / produits non utilisés	Éliminer conformément à la réglementation locale. Les récipients ou pochettes vides peuvent conserver certains résidus de produit. Éliminer ce produit et son récipient d'une manière sûre (voir : instructions d'élimination).
Emballages contaminés	Comme les récipients vides peuvent contenir un résidu du produit, suivre les avertissements de l’étiquette, même une fois le récipient vide. Les contenants vides doivent être acheminés vers une installation certifiée de traitement des déchets en vue de leur élimination ou recyclage. Ne pas réutiliser les récipients vides.

Informations générales Éviter le transport avec des véhicules où l'espace de chargement n'est pas séparé du poste de conduite. S'assurer que le chauffeur du véhicule connaît les risques potentiels liés à la cargaison et sait ce qu'il doit faire en cas d'accident ou d'urgence. Avant de transporter des contenants du produit : S'assurer que les contenants sont solidement fixés. S'assurer que le robinet de la bouteille est fermé et ne fuit pas. S'assurer que l'écrou du bouchon de vidange du robinet ou le capuchon protecteur (s'il y a lieu) est correctement installé. S'assurer que le dispositif de protection du robinet (s'il y a lieu) est correctement installé. S'assurer une ventilation adéquate. S'assurer la conformité avec la réglementation applicable.

15. Informations sur la réglementation

Réglementations Fédérales des Etats-Unis Ce produit est un « produit chimique dangereux » tel que défini dans la norme sur la communication des renseignements à l'égard des matières dangereuses d'OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA) (Loi réglementant les substances toxiques)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) (Préavis d'exportation)

Non réglementé.

CERCLA Hazardous Substance List (40 CFR 302.4) (Liste des substances dangereuses):

ÉTHANOL (CAS 64-17-5) Inscrit.

SARA 304 - Notification d'urgence en cas de rejet

Non réglementé.

Substances spécialement réglementées par l'OSHA (29 CFR 1910.1001-1052)

Non réglementé.

Superfund Amendments and Reauthorization Act de 1986 (SARA)

SARA 302 Substance très dangereuse

Non inscrit.

SARA 311/312 Produit chimique dangereux No (Exempt)

SARA 313 (déclaration au TRI)

Non réglementé.

Autres règlements fédéraux

Loi sur la qualité de l'air (CAA), section 112, Liste des polluants atmosphériques dangereux (HAP)

Non réglementé.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) (Loi sur l'assainissement de l'air, Prévention des rejets accidentels)

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Safe Drinking Water Act (SDWA - loi sur l'eau potable sûre) Non réglementé.

Substances respiratoires prioritaires FEMA - santé et sécurité respiratoire dans le lieu de travail de fabrication d'arômes

ÉTHANOL (CAS 64-17-5) Faible priorité

16. Autres renseignements, y compris la date de la préparation ou de la dernière révision

Date de publication	16-Novembre-2020
Version n°	01
Classements NFPA	Santé: 2 Inflammabilité: 4 Instabilité: 0
Avis de non-responsabilité	À notre connaissance, les renseignements et recommandations de cette fiche de données de sécurité étaient précis à la date de publication. Les renseignements donnés sont conçus uniquement comme un guide pour la manipulation, l'utilisation, le traitement, l'entreposage, le transport, l'élimination et le rejet sécuritaires du produit et ne doivent pas être considérés comme une garantie ou une norme de qualité. Les renseignements sont liés uniquement au produit particulier indiqué et peuvent ne pas être valides pour un tel produit utilisé en association avec toute autre substance ou dans tout autre procédé, sauf si indiqué dans le texte.

鉴别的其他方法

SDS编号 21-91-0000151

推荐用途 个人美容护理产品.

建议限制 未知。

制造商/进口商/供应商/分销商信息

地址: Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
美国

紧急联系电话号码: 1-800-535-5053 (International: 352-323-3500)

需要了解更多信息: 1-732-499-2741

2. 危险标识

物理危险	易燃气溶胶	类别 1
	加压气体	液化气体
健康危害	严重眼睛损伤/眼睛刺激性	类别 2A

职业安全与健康管理局 (OSHA)定义的危险 未被分类。

标签要素

警示词 危险

危险性说明 极易燃气溶胶。 内装高压气体；遇热可能爆炸。 造成严重眼刺激。

防范说明

预防措施 远离热源/火花/明火/热表面。- 禁止吸烟。 切勿喷洒在明火或其他点火源上。 压力容器：切勿穿孔或焚烧，即使不再使用。 作业后彻底清洗。 戴防护眼罩/防护面具。

事故响应 如进入眼睛：用水小心冲洗几分钟。如戴隐形眼镜并可方便地取出，取出隐形眼镜。继续冲洗。 如仍觉眼刺激：求医/就诊。

安全储存 防日晒。存放在通风良好的地方。 不可暴露在超过50° C/122° F的温度下。

废弃处置 根据当地管理部门的要求对废弃物和残余物进行处理。

未经其他分类的有害物（HNOC） 未知。

补充信息 无。

3. 成分/组成信息

混合物

化学名称	通用名称和别名	登记号(CAS号)	%
乙醇		64-17-5	51.74
HYDROFLUOROCARBON 152A		75-37-6	42

*表示一个特定的化学特性和/或组成百分数已被当作商业秘密而不予披露。

4. 急救措施

吸入 移至空气新鲜处。 如果症状持续或恶化，联络医生。

皮肤接触 用肥皂和水冲洗。 如果刺激症状持续或加重，应就医。

眼睛接触 立刻用大量的水冲洗眼睛至少15分钟。 如果可能性的话，移除隐形眼镜。 继续冲洗。 如仍觉眼刺激：求医/就诊。

经口 由于产品形状的缘故，不大可能。 若吞噬困难，联络医生或是毒物控制中心。 漱口。

最重要的症状/影响，急性和延迟性 头痛。 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 咳嗽。

指明任何需要立即就医或特殊治疗的情况 提供一般支持措施，并根据症状进行治疗。 观察患者。 症状可能会延后发生。

一般信息 务必让医务人员知道所涉及的物质，并采取防护措施以保护他们自己。

5. 消防措施

合适的灭火剂 水雾。 抗醇型泡沫。 化学干粉。 二氧化碳 (CO2)。

不当的灭火介质 禁止使用直流水灭火，否则会引起火势蔓延。

由此化学品引发的特殊的危害 内容物受压。 压力罐若接触热量或火焰，可能会爆炸。 燃烧时，会产生对人体健康有害的气体。

特殊保护性装备以及消防员的预防措施 消防员必须使用标准的防护设备，包括防火外套、带面罩的头盔、手套、橡胶靴及在密闭的空间中、SCBA。

消防设备/使用说明 火灾时：如能保证安全，设法堵塞泄漏。 若货物已受热，禁止移动货物或车辆。 在不会发生危险的情况下将容器撤离火灾现场。 应使用冷水冷却容器，以防止蒸汽压力增强。 如果货物区发生大火，应尽可能使用无人操作的固定喷水管或监控喷嘴来灭火。如果没有这些灭火设备，应撤离现场，使火烧尽。

特定的方法 采用标准灭火程序并考虑其他涉及材料有关的危险。 在不会发生危险的情况下将容器撤离火灾现场。 一旦发生火灾和/或爆炸，不得吸入烟气。

一般火灾危险 极易燃气溶胶。 内容物受压。 压力罐若接触热量或火焰，可能会爆炸。

6. 泄漏应急处理

作业人员防护措施、防护装备和应急处置程序 让无关人员离开。 使人员远离泄漏/释放区域并且位于上风方向。 远离低洼区域。 许多气体比空气重，可能在低洼或狭小空间中（下水道、地下室、储罐）在地面蔓延。 清洁时，戴合适防护设备和衣物。 应急人员需要自给式呼吸设备。 严禁接触损坏的容器或泄漏物，除非穿戴适当的防护服。 进入封闭空间前先通风。 如果显著量的溢出物不能被控制住，应通报地方当局。 有关个人防护，参见SDS第8部分。

抑制和清除溢出物的方法和材料 参考所附的安全技术说明和/或使用说明。 在不会发生危险的情况下阻止泄漏。 如果泄漏不能回收，将容器移至安全和开放区域。 隔离区域，直至气体散尽。 使可燃物（木材、纸张、油等）远离泄漏物。 用蛭石、干沙或干土吸收后装在容器中。 产品回收后，用水冲洗泄漏区。

小量泄漏： 用吸附性材料（如布、毛绒）擦去。 彻底清理表面以去除残留污染物。 参见SDS第13部分废弃处理的说明。

环境保护措施 防止排入到排水系统、河道或排放到地面上。

7. 操作处置与储存

安全操作的注意事项 压力容器：切勿穿孔或焚烧，即使不再使用。 若缺少喷雾按钮或是损坏则不可使用。 不要喷洒在明火或任何其它炽热的材料上。 在使用时或是在被喷表面完全干燥之前不可吸烟。 禁止切割、焊接、焊缝、钻、磨容器，或将其与热、火焰、火花或其他燃烧源接触。 在操作处置产品时，使用的所有设备必须接地。 每次使用后和放空时关闭阀门。 保护容器免受物理损坏；不要拖，拉，滚，或降落。 当移动容器时，即使是短距离，也要使用专门运输容器的拖车（推车，手推车等）。 水会吸进入容器必须被阻止。 不允许反向进入容器。 系统引入气体前净化空气。 只能使用适合该产品供压和温度的正确指定的设备。如有疑问请联系您的气体供应商。 禁止重复使用倒空的容器。 避免接触到眼睛。 避免长期暴露。 只能在通风良好的场所使用。 穿戴合适的个人防护设备。 遵守良好工业卫生习惯。

安全储存条件，包括任何禁配物 类别1 悬浮颗粒。

高压储气罐。防止阳光并且不要暴露在高于50摄氏度 / 122华氏度的温度中。 不可刺，焚化或挤压。 禁止在明火、热源或其他燃烧源边操作或储存。 本材料会积聚静电，从而导致火花并且演变为点火源。 储存在密闭的容器中。 存放在通风良好的地方。 储存容器应定期检查一般情况和泄漏。 避免儿童触及。 储存远离不相容材料（参见SDS第10部分）。

8. 接触控制/个体防护

控制参数

下列成分是该产品中唯一一个具有PEL，TLV或其他推荐的接触限值的成分。并且，其他成分没有已知的接触限值。

美国职业安全和健康署表Z-1空气污染物极限值（29 CFR 1910.1000）

组分	类型	标准值
乙醇 (CAS 64-17-5)	PEL-常期暴露极限	1900 mg/m3
		1000 ppm

美国ACGIH阈限值

组分	类型	标准值
乙醇 (CAS 64-17-5)	短期暴露极限（STEL）	1000 ppm

美国国立职业安全与健康研究所：化学危害物袖珍指南

组分	类型	标准值
乙醇 (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

美国工作场所环境暴露水平（WEEL）指南

组分	类型	标准值
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

生物限值 没有该成分的生物接触限值。

适当的技术控制 应采用良好的全面通风。通风速率应与具体条件匹配。如可行，采用过程封闭、局部通风，或其他工程控制措施以保持空气中浓度水平低于推荐的接触限值。如未建立接触限值，维持空气中浓度水平到可接受的水平。 提供洗眼设施。

个人防护措施，如个人防护设备

眼/面保护 仅用於工业环境。 戴有侧护罩的安全眼镜（或护目镜）。

皮肤防护

手防护 仅用於工业环境。 佩戴适当的抗化学手套。

其它的，其它 仅用於工业环境。 穿上合适的化学防护衣。

呼吸系统防护 仅用於工业环境。 如果程度超过允许值，用NIOSH 机械过滤/有机蒸气筒或可提供空气的呼吸器。

热危害 必要时，穿戴适当的热防护服。

一般的卫生考虑 使用时严禁吸烟。 始终保持良好的卫生习惯，例如处理过该物质之后，在饮食、喝水和/或吸烟之前洗手。定期洗涤工作服和防护设备，以除去污染物。

9. 理化特性

外观

性状 液体。

形状 气溶胶

颜色 无资料。

气味 特征的。

气味阈值 无资料。

pH 值 无资料。

熔点/凝固点 无资料。

初始沸点和沸程 > 35 ° C (> 95 ° F) (液体)

闪点 13.0 ° C (55.4 ° F) 闭杯闪点测定法 (液体)

蒸发速率 无资料。

易燃性（固体，气体） 不适用。

燃烧上/下限或爆炸极限

燃烧限值 - 下限（%） 无资料。

燃烧限值 - 上限 (%) 无资料。

爆炸限值 - 下限（%） 无资料。

其他信息

爆炸特性 不具有爆炸性。

燃烧热（NFPA 30B） 16.07 kJ/g

氧化特性 没有氧化性。

10. 稳定性和反应性

反应性 产品在正常的使用、储存和运输条件下是稳定的和非活性的。

化学稳定性 正常条件下物料稳定。

可能的危险反应 正常使用的条件下未见有危险反应。

避免接触的条件 远离热，热表面，火花，明火和其他点火源。 避免温度超過閃火點温度。 接触禁配物。

禁配物 强氧化剂。

危险的分解产物 没有已知的危险分解产物。

11. 毒理学信息

可能的接触途径信息

吸入 持续的吸入可能是有害的。

皮肤接触 预计没有因皮肤接触导致的任何有害影响。

眼睛接触 造成严重眼刺激。

经口 预计较低的食入危害。

与物理,化学和毒物学特性有关的症状 头痛。 严重的眼睛刺激. 症状可能包括刺痛、流泪、充血、肿胀和视力模糊。 咳嗽。

毒理学效应信息

急性毒性 未知。

持久性和降解性

生物降解性

降解百分率（好氧生物降解）

乙醇	84 % 结果: 易生物降解 测试时间: 20 D

潜在的生物累积性

辛醇/水分配系数 log Kow

HYDROFLUOROCARBON 152A	0.75
乙醇	-0.31

土壤中的迁移性 无数据

其它不良影响 本成分对环境无任何其它不利影响（如消耗臭氧层、光化学臭氧形成潜势、内分泌干扰物、全球变暖潜势）。

13. 废弃处置

废弃处置指导 回收再生或装在密封的容器中送至专门的废弃物处理场处理。 内容物受压。 不可刺，焚化或挤压。 按照地方/区域/国家/国际规章处置内装物/容器。

地方处置法规 按照所有适用的法规进行处置。

有害废物代码 本产品在处置时是可燃的（D001）RCRA危险废物.

残渣废料/未用掉的产品 按当地规定处理。 空的容器或衬垫可能保留有一些产品的残留物。这些材料及其容器必须以安全的方式废弃处置（参见：废弃指导）。

污染包装物 容器内可能残留产品，所以即使空容器也要注意标签警示。 空容器应送到批准的废物处理场所去再生或处理。 禁止重复使用倒空的容器。

14. 运输信息

一般信息 避免使用装载室与驾驶室未分离的车辆进行运输。 确保车辆司机了解装载货物的潜在危险并知道发生事故或紧急情况时怎么做。 运输前产品容器: 确保容器摆放平稳。 确保气瓶阀紧闭不泄漏。 确保阀门出口螺帽或活塞（如有）已正确安装。 确保阀门保护装置（若有）已正确安装。 确保充分的通风。 确保符合适用的法规。

15. 法规信息

美国联邦法规 本产品在OSHA危险通信标准,29 CFR 1910.1200中被定义为“危险化学品”

Toxic Substances Control Act (TSCA)

TSCA第12（b）部分有关出口申报（40 CFR 707，D子项）

未受管制。

CERCLA危险物质清单（40 CFR 302.4）

乙醇 (CAS 64-17-5) 适用。

SARA 304 不测事件释放通知

未受管制。

OSHA特别管制的物质（29 CFR 1910.1001-1052）

未受管制。

1986年基金修正再授权法案(SARA)

SARA 302 极危险物质

不适用。

SARA 311/312 有害化学品 No (Exempt)

SARA 313 (TRI 报告)

未受管制。

其他联邦法规

清洁空气法案（CAA）第112条有害空气污染物（HAPs）清单

未受管制。

清洁空气法（CAA）第112(r)条款关于意外泄漏

HYDROFLUOROCARBON 152A (CAS 75-37-6)

饮用水安全法（SDWA） 未受管制。

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

乙醇 (CAS 64-17-5)	Low priority

免责声明 这份安全数据表中提供的信息被认为是其发布日期时我们所知道的知识、信息和确信是准确的。所给出的信息仅作为安全操作处置、使用、加工、储存、运输、废弃处置和释放的指导，而不是作为担保和质量指标。这些信息只涉及到具体指定的物质，而对这些材料与任何其他材料或任何工艺的结合可能是无效的，除非在文本中有说明。

PULPRIOT

SAFETY DATA SHEET

1. Identification

Product identifier **PULP RIOT ZURICH FLEXIBLE HOLD HAIRSPRAY**

Other means of identification

SDS number 21-91-0000152

Recommended use Personal care product used for cosmetic effect.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Address:
Pulp Riot
16501 Ventura Blvd #500
Encino, CA 91436
USA

Emergency Phone # : 1-800-535-5053 (International: 352-323-3500)

For further Information: 1-732-499-2741

2. Hazard(s) identification

Physical hazards	Flammable aerosols	Category 1
	Gases under pressure	Liquefied gas
Health hazards	Serious eye damage/eye irritation	Category 2A

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Extremely flammable aerosol. Contains gas under pressure; may explode if heated. Causes serious eye irritation.

Precautionary statement

Prevention Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use. Wash thoroughly after handling. Wear eye protection/face protection.

Response If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage Protect from sunlight. Store in a well-ventilated place. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise classified (HNOC) None known.

Supplemental information None.

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
ETHANOL		64-17-5	51.92
HYDROFLUOROCARBON 152A		75-37-6	35

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	Not likely, due to the form of the product. In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.
Most important symptoms/effects, acute and delayed	Headache. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Coughing.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Water fog. Alcohol resistant foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
Fire fighting equipment/instructions	In case of fire: Stop leak if safe to do so. Do not move cargo or vehicle if cargo has been exposed to heat. Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.
General fire hazards	Extremely flammable aerosol. Contents under pressure. Pressurized container may explode when exposed to heat or flame.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Wear appropriate protective equipment and clothing during clean-up. Emergency personnel need self-contained breathing equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Isolate area until gas has dispersed. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Close valve after each use and when empty. Protect containers from physical damage; do not drag, roll, slide, or drop. When moving containers, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport containers. Suck back of water into the container must be prevented. Do not allow backfeed into the container. Purge air from system before introducing gas. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Do not re-use empty containers. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Level 1 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Store in a well-ventilated place. Stored containers should be periodically checked for general condition and leakage. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
ETHANOL (CAS 64-17-5)	PEL	1900 mg/m3
		1000 ppm

US. ACGIH Threshold Limit Values

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1000 ppm

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Type	Value
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection

Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection

Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

Other

Applicable for industrial settings only. Wear appropriate chemical resistant clothing.

Respiratory protection

Applicable for industrial settings only. If permissible levels are exceeded use NIOSH mechanical filter / organic vapor cartridge or an air-supplied respirator.

Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 95 °F (> 35 °C) (Liquid)
Flash point	55.4 °F (13.0 °C) Closed Cup (Liquid)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Heat of combustion (NFPA 30B)	16.12 kJ/g
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	No hazardous decomposition products are known.

11. Toxicological information

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.
Eye contact	Causes serious eye irritation.
Ingestion	Expected to be a low ingestion hazard.
Symptoms related to the physical, chemical and toxicological characteristics	Headache. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Coughing.

Information on toxicological effects

Acute toxicity Not known.

ALC	Rat	> 437500 ppm, 4 h

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

ETHANOL	OECD 405 Result: Irritating Species: Rabbit
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Respiratory or skin sensitization

Respiratory sensitization	Due to partial or complete lack of data the classification is not possible.
Skin sensitization	Due to partial or complete lack of data the classification is not possible.

Skin sensitization

ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.
HYDROFLUOROCARBON 152A	Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

IARC Monographs. Overall Evaluation of Carcinogenicity

Not listed.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

Reproductive toxicity Possible reproductive hazard.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 Result: NOAEC Species: Rat

Reproductivity

ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm OECD 453, Inhalation Result: NOAEC Species: Rat Test Duration: 104 wk

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Further information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Components		Species	Test Results
ETHANOL (CAS 64-17-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h

HYDROFLUOROCARBON 152A	0.75

Mobility in soil No data available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Dispose in accordance with all applicable regulations.

Hazardous waste code This product is ignitable (D001) RCRA hazardous wastes when intended for disposal.

Waste from residues / unused products Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.

UN number	UN1170
UN proper shipping name	ETHANOL SOLUTION
Class	3
Packing group	II
Environmental hazards	
Marine pollutant	No.
EmS	F-E, S-D

General information Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers: Ensure that containers are firmly secured. Ensure cylinder valve is closed and not leaking. Ensure valve outlet cap nut or plug (where provided) is correctly fitted. Ensure valve protection device (where provided) is correctly fitted. Ensure adequate ventilation. Ensure compliance with applicable regulations.

15. Regulatory information

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

ETHANOL (CAS 64-17-5) Listed.

SARA 304 Emergency release notification

Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1052)

Not regulated.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

SARA 302 Extremely hazardous substance

Not listed.

SARA 311/312 Hazardous chemical No (Exempt)

SARA 313 (TRI reporting)

Not regulated.

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List

Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Safe Drinking Water Act (SDWA) Not regulated.

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

ETHANOL (CAS 64-17-5) Low priority

16. Other information, including date of preparation or last revision

Issue date 11-17-2020

Version # 01

NFPA ratings Health: 2
Flammability: 4
Instability: 0

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

PULPRIOT

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation of the mixture	PULP RIOT ZURICH FLEXIBLE HOLD HAIRSPRAY
Synonyms	None.
SDS number	21-91-0000152
Product code	1241005
Issue date	11-17-2020
Version number	01

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses	Personal care product used for cosmetic effect.
Uses advised against	None known.

1.3. Details of the supplier of the safety data sheet

Contact person

Company name	L'ORÉAL SA
Address	14, rue royale 75008 - Paris France
Telephone	+1 732 499 2745
e-mail	nacorpeuropesdsrequest@loreal.com

1.4. Emergency telephone number

France National Poisons Control Center	ORFILA number (INRS): + 33 (0) 1 45 42 59 59 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)
INFOTRAC	+1 352-323-3500 (Available 24 hours a day. SDS/Product information may not be available for the Emergency Service.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Regulation (EC) No 1272/2008 as amended

Physical hazards		
Aerosols	Category 1	H222 - Extremely flammable aerosol. H229 - Pressurized container: May burst if heated.
Health hazards		
Serious eye damage/eye irritation	Category 2	H319 - Causes serious eye irritation.

Hazard summary

Aerosol. CONTENTS UNDER PRESSURE.
Pressurized container may explode when exposed to heat or flame. Causes serious eye irritation. Occupational exposure to the substance or mixture may cause adverse health effects. This is a consumer care product that is safe for consumers when used according to the label directions. Like many consumer products, a small number of individuals may experience reactions such as redness, rash and / or swelling upon prolonged or repeated skin contact or eye contact.

2.2. Label elements

Label according to Regulation (EC) No. 1272/2008 as amended

Contains: ETHANOL, HYDROFLUOROCARBON 152A

Hazard pictograms

Signal word Danger

Hazard statements

H222	Extremely flammable aerosol.
H229	Pressurized container: May burst if heated.
H319	Causes serious eye irritation.

Precautionary statements

Prevention

P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P211	Do not spray on an open flame or other ignition source.
P251	Do not pierce or burn, even after use.
P264	Wash thoroughly after handling.

Response

P101	If medical advice is needed, have product container or label at hand.
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313	If eye irritation persists: Get medical advice/attention.

Storage

P410 + P412	Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Supplemental label information 4,1% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 4,1% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

General information

Chemical name	%	CAS-No. / EC No.	REACH Registration No.	Index No.	Notes
ETHANOL	51,92	64-17-5 200-578-6	01-2119457610-43	603-002-00-5	
Classification:	Flam. Liq. 2;H225, Eye Irrit. 2;H319				
HYDROFLUOROCARBON 152A	35	75-37-6 200-866-1	01-2119474440-43	-	
Classification:	Flam. Gas 1;H220, Press. Gas;H280				

List of abbreviations and symbols that may be used above

#: This substance has been assigned Union workplace exposure limit(s).
M: M-factor
PBT: persistent, bioaccumulative and toxic substance.
vPvB: very persistent and very bioaccumulative substance.
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments The full text for all H-statements is displayed in section 16.

SECTION 4: First aid measures

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

4.1. Description of first aid measures

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Eye contact Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.

4.2. Most important symptoms and effects, both acute and delayed Headache. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Coughing.

4.3. Indication of any immediate medical attention and special treatment needed Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

SECTION 5: Firefighting measures

General fire hazards Extremely flammable aerosol.

5.1. Extinguishing media

Suitable extinguishing media Alcohol resistant foam. Powder. Carbon dioxide (CO2).

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

Special fire fighting procedures Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

For emergency responders Keep unnecessary personnel away. Use personal protection recommended in Section 8 of the SDS.

6.2. Environmental precautions Avoid discharge into drains, water courses or onto the ground.

6.3. Methods and material for containment and cleaning up Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

6.4. Reference to other sections For personal protection, see section 8 of the SDS. For waste disposal, see section 13 of the SDS.

SECTION 7: Handling and storage

7.1. Precautions for safe handling Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities Level 1 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store in tightly closed container. Keep out of the reach of children. Store away from incompatible materials (see Section 10 of the SDS).

7.3. Specific end use(s) Not available.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limits

Belgium. Exposure Limit Values.

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1907 mg/m3
		1000 ppm

France. Threshold Limit Values (VLEP) for Occupational Exposure to Chemicals in France, INRS ED 984

Components	Type	Value
ETHANOL (CAS 64-17-5)	VLE	9500 mg/m3
Regulatory status: Indicative limit (VL)		
		5000 ppm
Regulatory status: Indicative limit (VL)		
	VME	1900 mg/m3
Regulatory status: Indicative limit (VL)		
		1000 ppm
Regulatory status: Indicative limit (VL)		

Germany. DFG MAK List (advisory OELs). Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area (DFG)

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	380 mg/m3
		200 ppm

Germany. TRGS 900, Limit Values in the Ambient Air at the Workplace

Components	Type	Value
ETHANOL (CAS 64-17-5)	AGW	380 mg/m3
		200 ppm

Italy. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1000 ppm

Ordinance of the Minister of Labour and Social Policy on 6 June 2014 on the maximum permissible concentrations and intensities of harmful health factors in the work environment, Journal of Laws 2014, item 817

Components	Type	Value
ETHANOL (CAS 64-17-5)	TWA	1900 mg/m3

Spain. Occupational Exposure Limits

Components	Type	Value
ETHANOL (CAS 64-17-5)	STEL	1910 mg/m3
		1000 ppm

Biological limit values No biological exposure limits noted for the ingredient(s).

Recommended monitoring procedures Follow standard monitoring procedures.

Derived no effect levels (DNELs) Not available.

Predicted no effect concentrations (PNECs) Not available.

8.2. Exposure controls

Appropriate engineering controls Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

General information Use personal protective equipment as required. Personal protection equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

Eye/face protection Applicable for industrial settings only. Wear safety glasses with side shields (or goggles).

Skin protection

- Hand protection Applicable for industrial settings only. Wear appropriate chemical resistant gloves.

- Other Applicable for industrial settings only. Wear suitable protective clothing.

Respiratory protection Applicable for industrial settings only. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

Hygiene measures	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
Environmental exposure controls	Not available.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Aerosol.
Color	Not available.
Odor	Characteristic.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	> 95 °F (> 35 °C) (Liquid)
Flash point	55,4 °F (13,0 °C) Closed Cup (Liquid)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

9.2. Other information

Heat of combustion (NFPA 30B)	16,12 kJ/g

SECTION 10: Stability and reactivity

10.1. Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
10.2. Chemical stability	Material is stable under normal conditions.
10.3. Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
10.4. Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
10.5. Incompatible materials	Strong oxidizing agents.
10.6. Hazardous decomposition products	No hazardous decomposition products are known.

SECTION 11: Toxicological information

General information	Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Inhalation	Prolonged inhalation may be harmful.
Skin contact	No adverse effects due to skin contact are expected.

Eye contact Causes serious eye irritation.

Ingestion May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

Symptoms Headache. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Coughing.

11.1. Information on toxicological effects

Acute toxicity Not known.

Components	Species	Test Results
ETHANOL (CAS 64-17-5)		
Acute		
Dermal		
LD50	Rabbit	> 20000 mg/kg
Inhalation		
Vapor		
LC50	Rat	124,7 mg/l, 4 h OECD 403
Oral		
LD50	Rat	10470 mg/kg OECD 401
HYDROFLUOROCARBON 152A (CAS 75-37-6)		
Acute		
Inhalation		
Gas		
ALC	Rat	> 437500 ppm, 4 h

Skin corrosion/irritation Due to partial or complete lack of data the classification is not possible. No adverse effects due to skin contact are expected.

Irritation Corrosion - Skin

ETHANOL	OECD 404 Result: Not Irritating Species: Rabbit
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Serious eye damage/eye irritation Causes serious eye irritation.

Irritation Corrosion - Eye

ETHANOL	OECD 405 Result: Irritating Species: Rabbit
HYDROFLUOROCARBON 152A	Result: Contact with liquid form may cause frostbite.

Respiratory sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization Due to partial or complete lack of data the classification is not possible.

Skin sensitization

ETHANOL	OECD 406 Result: Not Sensitizing Species: Guinea pig

Germ cell mutagenicity Due to partial or complete lack of data the classification is not possible.

Mutagenicity

ETHANOL	Result: In vitro and in vivo tests did not show mutagenic effects.
HYDROFLUOROCARBON 152A	Result: In vitro and in vivo tests did not show mutagenic effects.

Carcinogenicity Not classifiable as to carcinogenicity to humans. Due to partial or complete lack of data the classification is not possible.

Hungary. 26/2000 EüM Ordinance on protection against and preventing risk relating to exposure to carcinogens at work (as amended)

Not listed.

Reproductive toxicity Due to partial or complete lack of data the classification is not possible.

Developmental effects

ETHANOL	> 20000 ppm OECD 414, No effects on development Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 Result: NOAEC Species: Rat

Reproductivity

ETHANOL	20700 mg/kg bw/d OECD 416, No effects on fertility Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm Result: NOAEL Species: Rat

Specific target organ toxicity - single exposure Due to partial or complete lack of data the classification is not possible.

Specific target organ toxicity - repeated exposure Due to partial or complete lack of data the classification is not possible.

ETHANOL	1730 mg/kg bw/d OECD 408, Oral Result: NOAEL Species: Rat
HYDROFLUOROCARBON 152A	25000 ppm OECD 453, Inhalation Result: NOAEC Species: Rat Test Duration: 104 wk

Aspiration hazard Due to partial or complete lack of data the classification is not possible.

Mixture versus substance information No information available.

Other information The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 12: Ecological information

12.1. Toxicity Based on available data, the classification criteria are not met for hazardous to the aquatic environment.

Components		Species	Test Results
ETHANOL (CAS 64-17-5)			
Aquatic			
Acute			
Algae	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustacea	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h
Fish	LC50	Pimephales promelas	15300 mg/l, 96 h
Other	IC50	Activated sludge of a predominantly domestic sewage	> 1000 mg/l, 3 h
Chronic			
Crustacea	NOEC	Daphnia magna	9,6 mg/l, 9 d
Fish	NOEC	Danio rerio	250 mg/l, 120 h OECD 212
HYDROFLUOROCARBON 152A (CAS 75-37-6)			
Aquatic			
Acute			
Algae	EC50	Algae	47,755 mg/l QSAR
Crustacea	EC50	Daphnia	146,695 mg/l QSAR
Fish	LC50	Fish	295,783 mg/l QSAR

12.2. Persistence and degradability

Biodegradability

Percent degradation (Aerobic biodegradation)

ETHANOL	84 % Result: Readily Biodegradable Test Duration: 20 d

12.3. Bioaccumulative potential

Partition coefficient n-octanol/water (log Kow)

ETHANOL	-0,31
HYDROFLUOROCARBON 152A	0,75

12.4. Mobility in soil No data available.

12.5. Results of PBT and vPvB assessment Not a PBT or vPvB substance or mixture.

12.6. Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.
12.7. Additional information	The reference to any animal testing for individual constituents mentioned in this document is based on public, third-party data.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.
EU waste code	The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Disposal methods/information	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations.
Special precautions	Dispose in accordance with all applicable regulations.

SECTION 14: Transport information

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I and II, as amended

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 1 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 2 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex I, Part 3 as amended

Not listed.

Regulation (EU) No. 649/2012 concerning the export and import of dangerous chemicals, Annex V as amended

Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry, as amended

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Regulation (EC) No. 1907/2006, REACH Article 59(10) Candidate List as currently published by ECHA

Not listed.

Authorizations

Regulation (EC) No. 1907/2006, REACH Annex XIV Substances subject to authorization, as amended

Not listed.

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended

Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work, as amended

Not listed.

Other EU regulations

Directive 2012/18/EU on major accident hazards involving dangerous substances, as amended

ETHANOL (CAS 64-17-5)

Other regulations	The product is classified and labelled in accordance with Regulation (EC) 1272/2008 (CLP Regulation) as amended. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006, as amended.
National regulations	Follow national regulation for work with chemical agents in accordance with Directive 98/24/EC, as amended.
15.2. Chemical safety assessment	No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviations	Not available.
References	Not available.
Information on evaluation method leading to the classification of mixture	The classification for health and environmental hazards is derived by a combination of calculation methods and test data, if available.
Full text of any H-statements not written out in full under Sections 2 to 15	H220 Extremely flammable gas. H225 Highly flammable liquid and vapor. H280 Contains gas under pressure; may explode if heated. H319 Causes serious eye irritation.
Revision information	None.
Training information	Follow training instructions when handling this material.
Disclaimer	The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Peligros físicos	Aerosoles inflamables	Categoría 1
	Gases a presión	Gas licuado
Peligros para la salud	Lesiones oculares graves/irritación ocular	Categoría 2A

Peligros definidos por la OSHA No clasificado.

Elementos de la etiqueta

Palabra de advertencia Peligro

Declaración de peligro Aerosol extremadamente inflamable. Contiene gas a presión; peligro de explosión en caso de calentamiento. Provoca irritación ocular grave.

Consejos de prudencia

Prevención Mantener alejado de fuentes de calor, chispas, llama abierta o superficies calientes. - No fumar. No pulverizar sobre una llama abierta u otra fuente de ignición. Recipiente a presión: no perforar ni quemar, aun después del uso. Lavarse concienzudamente tras la manipulación. Llevar protección ocular/facial.

Respuesta En caso de contacto con los ojos: Aclárese cuidadosamente con agua durante varios minutos. Quítense las lentes de contacto, si se llevan y resulta fácil hacerlo. Sígase aclarando. Si persiste la irritación ocular: Consultar a un médico.

Almacenamiento Proteger de la luz del sol. Almacenar en un lugar bien ventilado. No exponer a temperaturas superiores a 50 °C/122°F.

Eliminación Eliminar los desperdicios y residuos de conformidad con la normativa promulgada por las autoridades locales.

Peligro(s) no clasificados en otra parte [Hazard(s) not otherwise classified (HNOC)] Ninguno conocido.

Información complementaria Ninguno.

3. Composición/información sobre los componentes

Mezclas

Denominación química	Nombre común y sinónimos	Número CAS	%
ETANOL		64-17-5	51.92
HYDROFLUOROCARBON 152A		75-37-6	35

*Significa que una identidad química y/o porcentaje de composición específicos han sido reservados como secreto comercial.

4. Primeros auxilios

Inhalación Trasladar al aire libre. Llame al médico si los síntomas aparecen o persisten.

Contacto con la piel Lavar con agua y jabón. Busque atención médica si la irritación se desarrolla y persiste.

Contacto con los ojos Enjuáguese los ojos inmediatamente con abundante cantidad de agua por lo menos durante 15 minutos. Quítese los lentillas si las lleva puestas y puede hacerlo con facilidad. Continúe enjuagando. Si persiste la irritación ocular: Consultar a un médico.

Ingestión Poco probable debido a la forma del producto. En el improbable caso de que hubiera tragado producto, llame a un centro toxicológico o a un médico. Enjuagarse la boca.

Principales síntomas y efectos, agudos y retardados Dolor de cabeza. Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Tos.

Indicación de toda atención médica y de los tratamientos especiales que deban dispensarse inmediatamente Provea las medidas de apoyo generales y de tratamiento sintomático. Mantenga a la víctima bajo observación. Los síntomas pueden retrasarse.

Información general Asegúrese de que el personal médico sepa de los materiales involucrados y tomen precauciones para protegerse.

5. Medidas de lucha contra incendios

Medios de extinción apropiados Neblina de agua. Espuma resistente al alcohol. Polvo químico seco. Dióxido de carbono (CO2).

Medios de extinción no apropiados No utilice chorro de agua, pues extendería el fuego.

Peligros específicos que presenta el producto químico Contenido bajo presión. El envase a presión puede explotar cuando se expone al calor o a la llama. En caso de incendio se pueden formar gases nocivos.

Equipo de protección especial y medidas de precaución para el personal de lucha contra incendios Los bomberos deben utilizar un equipo de protección estándar incluyendo chaqueta ignífuga, casco con careta, guantes, botas de goma, y, en espacios cerrados, equipo de respiración autónomo (SCBA, según sus siglas en inglés).

Equipo/Instrucciones para la extinción de incendios En caso de incendio: Detener la fuga, si no hay peligro en hacerlo. No mueva la carga o el vehículo si la carga ha estado expuesta al calor. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo. Los contenedores deberían refrigerarse con agua para evitar que suba la presión del vapor. Al combatir incendios masivos en el área de carga, utilizar manguera no-tripulada o monitor de boquillas, si es posible. Si no, retirarse y dejar que prosiga el incendio hasta que se apague.

Métodos específicos Utilice procedimientos contra incendios estándar y considere los peligros de otros materiales involucrados. Mueva los recipientes del área del incendio si puede hacerlo sin riesgo. En caso de incendio o de explosión, no respire los humos.

Riesgos generales de incendio Aerosol extremadamente inflamable. Contenido bajo presión. El envase a presión puede explotar cuando se expone al calor o a la llama.

6. Medidas en caso de vertido accidental

Precauciones personales, equipo de protección y procedimientos de emergencia Mantenga el personal no necesario lejos. Mantener alejadas a las personas de la zona de fuga y en sentido opuesto al viento. Manténgase alejado de las áreas bajas. Muchos gases son más pesados que el aire y se extenderán por el piso y se acumularán en áreas bajas o cerradas (alcantarillas, sótanos, depósitos). Use equipo y ropa de protección apropiados durante la limpieza. El personal de emergencia debe portar equipos autónomos de respiración. No toque los recipientes dañados o el material derramado a menos que esté usando ropa protectora adecuada. Ventilar los espacios cerrados antes de entrar. Las autoridades locales deben de ser informadas si los derrames importantes no pueden ser contenidos. Consultar las medidas de protección personal en la sección 8 de la FDS.

Métodos y material de contención y de limpieza

Consultar con las fichas de datos de seguridad adjuntas y/o instrucciones para su uso. Detenga la fuga si puede hacerlo sin riesgo. Lleve el tanque a un área segura y abierta si la fuga es irreparable. Confine el área hasta que se disperse el gas. Mantenga los materiales combustibles (madera, papel, petróleo, etc.) lejos del material derramado. Absorber en vermiculita, arena o tierra seca y colocar en recipientes. Después de recuperar el producto, enjuague el área con agua .

Derrames pequeños: Limpiar con material absorbente (por ejemplo tela, vellón). Limpie cuidadosamente la superficie para eliminar los restos de contaminación. Consultar la información relativa a eliminación de los residuos en la sección 13 de la FDS.

Precauciones relativas al medio ambiente

No verter los residuos al desagüe, al suelo o las corrientes de agua.

7. Manipulación y almacenamiento

Precauciones para una manipulación segura

Recipiente a presión: no perforar ni quemar, aun después del uso. No utilizar si falta el botón pulverizador o está defectuoso. No pulverizar sobre llamas o cualquier otro material incandescente. No fume mientras utilice el producto o hasta que la superficie pulverizada se haya secado bien. No corte, suelde, taladre, esmerile ni exponga los recipientes al calor, llama, chispas ni otras fuentes de ignición. Todo el equipo que se utiliza al manejar el producto debe estar conectado a tierra. Cerrar la válvula tras cada uso y cuando se haya vaciado. Proteger los contenedores de posibles daños físicos; no arrastrarlos, hacerlos rodar, dejarlos resbalar o dejarlos caer. Para trasladar contenedores, aun en distancias cortas, utilizar un carro (carretilla, carrito manual, etc.) diseñado para su transporte. Debe prevenirse la retroaspiración de agua al interior del recipiente. No permitir la retroalimentación al interior del recipiente. Purgar el aire del sistema antes de introducir el gas. Utilizar únicamente equipos con las especificaciones apropiadas, que sean adecuados para este producto así como su temperatura y presión de suministro. En caso de duda, póngase en contacto con su proveedor de gas. No reutilizar los recipientes vacíos. Evítese el contacto con los ojos. Evite la exposición prolongada. Úsese únicamente en lugares bien ventilados. Use equipo protector personal adecuado. Respete las normas para una manipulación correcta de productos químicos.

Condiciones de almacenamiento seguro, incluidas posibles incompatibilidades

Aerosol de Nivel 1.

Recipiente a presión. Protéjase de los rayos solares y evítese exponerlo a temperaturas superiores a 50 °C. No punzar, incinerar ni aplastar. No manipule ni guarde cerca del fuego, calor u otras fuentes de ignición. Este material puede acumular cargas estáticas que pueden causar chispas y volverse una fuente de ignición. Almacenar en un recipiente herméticamente cerrado. Almacenar en un lugar bien ventilado. Debe comprobarse periódicamente el estado general y la posible presencia de fugas en los recipientes almacenados. Manténgase fuera del alcance de los niños. Almacenar alejado de materiales incompatibles (consultar la sección 10 de la FDS).

8. Control de la exposición/protección personal

Límites de exposición profesional

Los constituyentes siguientes son los únicos constituyentes del producto que tienen un PEL, TLV u otro límite de exposición recomendado. En este momento, los demás constituyentes no tienen límites de exposición conocidos.

EEUU. Administración de Seguridad y Salud Ocupacional (OSHA) Tabla Z-1 Límites para los contaminantes del aire (29 CFR 1910.1000)

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	Limite de Exposición Permisible (LEP)	1900 mg/m³
		1000 ppm

EE.UU. ACGIH Valores umbrales límite

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	STEL	1000 ppm

EEUU. Instituto Nacional para la Seguridad y Salud Ocupacional (NIOSH): Guía de bolsillo sobre riesgos químicos

Componentes	Tipo	Valor
ETANOL (CAS 64-17-5)	TWA	1900 mg/m³
		1000 ppm

US. Workplace Environmental Exposure Level (WEEL) Guides

Componentes	Tipo	Valor
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m³
		1000 ppm

Valores límite biológicos	No existen ningunos límites biológicos de exposición para el ingrediente/los ingredientes.
Controles técnicos apropiados	Debe haber una ventilación general adecuada. La frecuencia de la renovación del aire debe corresponder a las condiciones. De ser posible, use campanas extractoras, ventilación aspirada local u otras medidas técnicas para mantener los niveles de exposición por debajo de los límites de exposición recomendados. Si no se han establecido ningunos límites de exposición, el nivel de contaminantes suspendidos en el aire ha de mantenerse a un nivel aceptable. Proveer estación para lavado de ojos.

Medidas de protección individual, tales como equipos de protección personal

Protección de los ojos/la cara	De aplicación solamente en entornos industriales. Use gafas de seguridad con protectores laterales (o goggles).
Protección de la piel	
Protección de las manos	De aplicación solamente en entornos industriales. Use guantes adecuados resistentes a los productos químicos.
Otros	De aplicación solamente en entornos industriales. Use ropa adecuada resistente a los productos químicos.
Protección respiratoria	De aplicación solamente en entornos industriales. Si se exceden los niveles permisibles, use un filtro mecánico / cartucho para vapores orgánicos de NIOSH o un respirador con suministro de aire.
Peligros térmicos	Use ropa protectora térmica adecuada si resulta necesario.
Consideraciones generales de higiene	No fumar durante su utilización. Seguir siempre buenas medidas buenas de higiene personal, tales como lavarse después de la manipulación y antes de comer, beber, y/o fumar. Rutinariamente, lavar la ropa y el equipo de protección para eliminar los contaminantes.

9. Propiedades físicas y químicas

Aspecto	
Estado físico	Líquido.
Forma	Aerosol.
Color	No disponible.
Olor	Característico.
Umbral olfativo	No disponible.
pH	No disponible.
Punto de fusión/punto de congelación	No disponible.
Punto inicial de ebullición e intervalo de ebullición	> 35 °C (> 95 °F) (líquido)
Punto de inflamación	13.0 °C (55.4 °F) Copa Cerrada (líquido)
Tasa de evaporación	No disponible.
Inflamabilidad (sólido, gas)	No aplicable.
Límites superior/inferior de inflamabilidad o de explosividad	
Límite de inflamabilidad - inferior (%)	No disponible.
Límite de inflamabilidad - superior (%)	No disponible.
Límite de explosividad inferior (%)	No disponible.
Límite de explosividad superior (%)	No disponible.
Presión de vapor	No disponible.
Densidad de vapor	No disponible.
Densidad relativa	No disponible.
Solubilidad(es)	
Solubilidad (agua)	No disponible.

Coeficiente de reparto n-octanol/agua	No disponible.
Temperatura de auto-inflamación	No disponible.
Temperatura de descomposición	No disponible.
Viscosidad	No disponible.

Información adicional

Propiedades explosivas	No es explosivo.
Calor de combustión (NFPA 30B)	16.12 kJ/g
Propiedades comburentes	No es oxidante.

10. Estabilidad y reactividad

Reactividad	El producto es estable y no reactivo bajo condiciones normales de uso, almacenamiento y transporte.
Estabilidad química	El material es estable bajo condiciones normales.
Posibilidad de reacciones peligrosas	No se conoce reacciones peligrosas bajo condiciones de uso normales.
Condiciones que deben evitarse	Mantener alejado del calor, superficies calientes, chispas, llamas abiertas y otras fuentes de ignición. Evitar temperaturas por encima del punto de flash. Contacto con materiales incompatibles.
Materiales incompatibles	Agentes oxidantes fuertes.
Productos de descomposición peligrosos	No se conoce ningún producto peligroso de la descomposición.

11. Información toxicológica

Información sobre posibles vías de exposición

Inhalación	La inhalación prolongada puede resultar nociva.
Contacto con la piel	No se esperan efectos adversos por contacto con la piel.
Contacto con los ojos	Provoca irritación ocular grave.
Ingestión	Se espera que representa un riesgo reducido de ingestión.
Síntomas relacionados a las características físicas, químicas y toxicológicas	Dolor de cabeza. Grave irritación de los ojos. Los síntomas pueden incluir escozor, lagrimeo, enrojecimiento, hinchazón y visión borrosa. Tos.

Información sobre los efectos toxicológicos

Toxicidad aguda Desconocido.

Corrosión/irritación cutánea Debido a la falta total o parcial de datos, la clasificación no es posible. No se esperan efectos adversos por contacto con la piel.

Irritación/Corrosión- Piel

ETANOL	OECD 404 Resultado: No Irritante Especies: Conejo
HYDROFLUOROCARBON 152A	Resultado: El contacto con el producto químico en estado líquido puede causar congelación.

Lesiones oculares graves/irritación ocular Provoca irritación ocular grave.

Irritación/Corrosión- Ojos

ETANOL	OECD 405 Resultado: Irritante Especies: Conejo
HYDROFLUOROCARBON 152A	Resultado: El contacto con el producto químico en estado líquido puede causar congelación.

Sensibilización respiratoria o cutánea

Sensibilización respiratoria Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea Debido a la falta total o parcial de datos, la clasificación no es posible.

Sensibilización cutánea

ETANOL	OECD 406 Resultado: Not Sensibilizante Especies: Conejillo de indias

Mutagenicidad en células germinales Debido a la falta total o parcial de datos, la clasificación no es posible.

Mutagenicidad

ETANOL	Resultado: Pruebas in vitro e in vivo no mostraron efectos mutagénicos.
HYDROFLUOROCARBON 152A	Resultado: Pruebas in vitro e in vivo no mostraron efectos mutagénicos.

Carcinogenicidad No clasificable en cuanto a su carcinogenicidad para los seres humanos. Debido a la falta total o parcial de datos, la clasificación no es posible.

Monografías IARC. Evaluación general de carcinogenicidad

No listado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

US. National Toxicology Program (NTP) Report on Carcinogens

No listado.

Toxicidad para la reproducción Posible riesgo para la función reproductora.

Efectos sobre el desarrollo

ETANOL	> 20000 ppm OECD 414, No afecta el desarrollo Resultado: NOAEL Especies: Rata
HYDROFLUOROCARBON 152A	50000 ppm OECD 414 Resultado: NOAEC Especies: Rata

Reproductividad

ETANOL	20700 mg/kg bw/d OECD 416, No afecta la fertilidad Resultado: NOAEL Especies: Rata
HYDROFLUOROCARBON 152A	25000 ppm Resultado: NOAEL Especies: Rata

Toxicidad específica en determinados órganos – exposición única

Debido a la falta total o parcial de datos, la clasificación no es posible.

Toxicidad específica en determinados órganos – exposición repetida

Debido a la falta total o parcial de datos, la clasificación no es posible.

ETANOL	1730 mg/kg bw/d OECD 408, Oral Resultado: NOAEL Especies: Rata
HYDROFLUOROCARBON 152A	25000 ppm OECD 453, Inhalación Resultado: NOAEC Especies: Rata Duración de la prueba: 104 wk

Peligro por aspiración

Debido a la falta total o parcial de datos, la clasificación no es posible.

Información adicional

En este documento, cualquier referencia acerca de pruebas con animales en componentes individuales se basa en datos disponibles al público de terceros.

12. Información ecológica

Ecotoxicidad

El producto no está clasificado como peligroso para el medio ambiente. No obstante, eso no excluye la posibilidad de que vertidos grandes o frecuentes puedan tener efectos nocivos o dañinos para el medio ambiente.

Componentes		Especies	Resultados de la prueba
ETANOL (CAS 64-17-5)			
Acuático (a)			
Agudo			
Algas	EC50	Pseudokirchneriella subcapitata	22200 mg/l, 96 h
Crustáceos	EC50	Ceriodaphnia dubia	5012 mg/l, 48 h
Otros	IC50	Lodo activado de una depuradora predominantemente doméstica	> 1000 mg/l, 3 h
Pez	LC50	Pimephales promelas	15300 mg/l, 96 h
Crónico			
Crustáceos	NOEC	Dafnia magna	9.6 mg/l, 9 d

Acuático (a)			
Agudo			
Algas	EC50	Algas	47.755 mg/l QSAR
Crustáceos	EC50	Dafnia	146.695 mg/l QSAR
Pez	LC50	Pez	295.783 mg/l QSAR

Persistencia y degradabilidad

Biodegradabilidad

Porcentaje de degradación (biodegradación aeróbica)

ETANOL	84 % Resultado: Fácilmente Biodegradable Duración de la prueba: 20 d

Potencial de bioacumulación

Octanol/agua, coeficiente de partición log Kow

ETANOL	-0.31
HYDROFLUOROCARBON 152A	0.75

Movilidad en el suelo

No hay datos disponibles.

Otros efectos adversos

No se prevén otros efectos medioambientales adversos (p.e. agotamiento del ozono, potencial de creación fotoquímica de ozono, disrupción endocrina, potencial de calentamiento global) por parte de este componente.

13. Consideraciones relativas a la eliminación

Instrucciones para la eliminación	Recoger y recuperar o botar en recipientes sellados usando un colector de desperdicios oficial. Contenido bajo presión. No punzar, incinerar ni aplastar. Eliminar el contenido/el recipiente de conformidad con la normativa local, regional, nacional o internacional.
Normativas de eliminación locales	Elimine de acuerdo con todas las reglamentaciones aplicables.
Código de residuo peligroso	Este producto es un residuo peligroso inflamable (D001) de acuerdo a RCRA cuando se intenta botar o destruir.
Desechos de residuos / producto no utilizado	Eliminar, observando las normas locales en vigor. Los recipientes vacíos o los revestimientos pueden retener residuos de producto. Este material y su recipiente deben desecharse de manera segura (ver: Instrucciones de eliminación).
Envases contaminados	Ya que los recipientes vacíos pueden contener restos de producto, obsérvense las advertencias indicadas en la etiqueta después de vaciarse el recipiente. Los contenedores vacíos deben ser llevados a un sitio de manejo aprobado para desechos, para el reciclado o eliminación. No reutilizar los recipientes vacíos.

14. Información relativa al transporte

Información general Evitar el transporte en vehículos en los que el espacio de carga no esté separado del compartimento del conductor. Asegurarse de que el conductor del vehículo sea consciente de los peligros potenciales de la carga y sepa qué hacer en caso de accidente o emergencia. Antes de transportar recipientes de producto: Asegurarse de que los recipientes estén firmemente asegurados. Asegurarse de que la válvula de la botella esté cerrada y no presente fugas. Asegurarse de que el tapón o la tuerca ciega de la salida de la válvula (cuando lleve) esté correctamente colocado/a. Asegurarse de que el dispositivo de protección de la válvula (cuando lleve) esté correctamente instalado. Asegúrese una ventilación apropiada. Asegurar el cumplimiento de las normativas aplicables.

15. Información reglamentaria

reglamentación Federal de EE.UU. El producto es un "Producto químico peligroso" tal como lo define la Norma de comunicación de peligro OSHA, 29 CFR 1910.1200.

Toxic Substances Control Act (TSCA)

TSCA artículo 12(b) Notificación de exportaciones (40 CFR 707, subapart. D)

No reglamentado.

CERCLA Hazardous Substance List (40 CFR 302.4) (Lista de sustancias peligrosas):

ETANOL (CAS 64-17-5) Listado.

SARA 304 Emergency release notification

No reglamentado.

Sustancias específicamente reguladas por la OSHA (29 CFR 1910.1001-1052)

No reglamentado.

Ley de Enmiendas y Reautorizaciones Superiores (Superfund) de 1986 (SARA)

SARA 302 Sustancia extremadamente peligrosa

No listado.

SARA 311/312 Producto químico peligroso No (Exempt)

SARA 313 (TRI, Notificación de emisiones de productos tóxicos)

No reglamentado.

Otras normativas federales

Ley de aire limpio [Clean Air Act (CAA)], artículo 112, lista de Contaminantes del aire peligrosos [Hazardous Air Pollutants (HAP)]

No reglamentado.

Ley de aire limpio (CAA) Sección 112(r) Prevención de liberación accidental (40 CFR 68.130)

HYDROFLUOROCARBON 152A (CAS 75-37-6)

Ley Safe Drinking Water Act (SDWA) No reglamentado.

FEMA Priority Substances Respiratory Health and Safety in the Flavor Manufacturing Workplace

ETANOL (CAS 64-17-5) Low priority

16. Otra información, como fecha de preparación o última revisión

Fecha de publicación	17-Noviembre-2020

2. Identification des dangers

Dangers physiques	Aérosols inflammables	Catégorie 1
	Gaz sous pression	Gaz liquéfié
Dangers pour la santé	Lésions oculaires graves/irritation oculaire	Catégorie 2A

Définition des dangers selon l'OSHA Non classé.

Éléments d'étiquetage

Mention d'avertissement Danger

Mention de danger Aérosol extrêmement inflammable. Contient un gaz sous pression; peut exploser sous l'effet de la chaleur. Provoque une sévère irritation des yeux.

Conseil de prudence

Prévention Tenir à lécart de la chaleur/des étincelles/des flammes nues/des surfaces chaudes. - Ne pas fumer. Ne pas vaporiser sur une flamme nue ou sur toute autre source d'ignition Récipient sous pression : ne pas perforer ni brûler, même après usage. Se laver soigneusement après manipulation. Porter un équipement de protection des yeux/du visage.

Intervention En contact avec les yeux : Rincer prudemment avec de l'eau pendant plusieurs minutes. Retirer les verres de contact si la victime en porte et qu'il est possible de les retirer facilement. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Stockage Protéger du rayonnement solaire. Stocker dans un endroit bien ventilé. Ne pas exposer à une température supérieure à 50 °C/122 °F

Élimination Éliminer les rejets et les déchets conformément aux règlements municipaux.

Danger(s) non classé(s) ailleurs (DNCA) Aucun(e) connu(e).

Information supplémentaire Aucune.

3. Composition/information sur les ingrédients

Mélanges

Dénomination chimique	Nom commun et synonymes	Numéro d'enregistrement CAS	%
ÉTHANOL		64-17-5	51.92
HYDROFLUOROCARBON 152A		75-37-6	35

* Indique qu'une dénomination chimique précise ou un pourcentage de composition est retenu comme secret commercial.

4. Premiers soins

Inhalation Transporter à l'extérieur. Appeler un médecin si des symptômes se développent ou persistent.

Contact avec la peau Laver avec de l'eau et du savon. Consulter un médecin si une irritation se développe et persiste.

Contact avec les yeux Rincer immédiatement les yeux abondamment à l'eau pendant au moins 15 minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Si l'irritation des yeux persiste : Demander un avis médical/Consulter un médecin.

Ingestion Peu probable en raison de la forme du produit. Dans le cas peu probable d'une ingestion, communiquez avec un médecin ou un centre anti-poison. Rincer la bouche.

Symptômes et effets les plus importants, qu'ils soient aigus ou retardés Maux de tête. Irritation oculaire grave. Les symptômes peuvent inclure un picotement, un larmoiement, une rougeur, un gonflement et une vision trouble. Toux.

Mention de la nécessité d'une prise en charge médicale immédiate ou d'un traitement spécial, si nécessaire Donner des soins généraux et traiter en fonction des symptômes. Garder la victime en observation. Les symptômes peuvent être retardés.

Informations générales S'assurer que le personnel médical est averti du (des) produits(s) en cause et qu'il prend des mesures pour se protéger.

5. Mesures à prendre en cas d'incendie

Agents extincteurs appropriés Brouillard d'eau. Mousse antialcool. Poudre chimique. Dioxyde de carbone (CO2).

Agents extincteurs inappropriés Ne pas utiliser un jet d'eau comme agent extincteur, car cela propagera l'incendie.

Dangers spécifiques du produit dangereux Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme. Des gaz dangereux pour la santé peuvent se former pendant un incendie.

Équipements de protection spéciaux et précautions spéciales pour les pompiers Les pompiers doivent porter un équipement de protection standard, notamment des vêtements ignifuges, un casque à écran facial, des gants, des bottes en caoutchouc et, dans les espaces clos, un appareil respiratoire autonome.

Équipement/directives de lutte contre les incendies En cas d'incendie : Obturer la fuite si cela peut se faire sans danger. Ne pas déplacer la cargaison ou le véhicule si la cargaison a été exposée à la chaleur. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. Les récipients doivent être refroidis à l'eau pour prévenir la création de pression de vapeur. Pour un important incendie dans la zone de cargaison, utiliser un support à tuyau automatique ou des lances à eau autonomes, si possible. Sinon, se retirer et laisser brûler.

Méthodes particulières d'intervention Utiliser des procédures standard en cas d'incendie et tenir compte des dangers des autres substances en cause. Éloigner les récipients du lieu de l'incendie si cela peut se faire sans risque. En cas d'incendie et/ou d'explosion, ne pas respirer les fumées.

Risques d'incendie généraux Aérosol extrêmement inflammable. Contenu sous pression. Un récipient sous pression peut exploser lorsqu'il est exposé à la chaleur ou à une flamme.

6. Mesures à prendre en cas de déversement accidentel

Précautions individuelles, équipements de protection et mesures d'urgence Tenir à l'écart le personnel non requis. Ternir les gens à l'écart de l'endroit du déversement/de la fuite et en amont du vent. Tenir à l'écart des zones basses. De nombreux gaz sont plus que l'air. Ils se répandent au niveau du sol et s'accumulent dans des zones basses ou confinées (égouts, sous-sols, citernes). Porter un équipement et des vêtements de protection appropriés durant le nettoyage. Le personnel d'urgence doit posséder un matériel respiratoire autonome. Ne pas toucher les récipients endommagés ou le produit déversé à moins de porter des vêtements de protection appropriés. Ventiler les espaces clos avant d'y entrer. Prévenir les autorités locales si des fuites significatives ne peuvent pas être contenues. Pour la protection individuelle, voir la section 8 de la FDS.

Méthodes et matériaux pour le confinement et le nettoyage

Se reporter aux fiches de données de sécurité et/ou aux instructions. Arrêter la fuite si cela peut se faire sans risque. Déplacer la bouteille vers un endroit sûr et ouvert si la fuite est irréparable. Isoler la zone jusqu'à dispersion du gaz. Tenir les matières combustibles (bois, papier, huile, etc.) à l'écart du produit déversé. Absorber avec de la vermiculite, du sable sec ou de la terre, puis placer en récipient. Après avoir récupéré le produit, rincer la zone à l'eau.

Déversements peu importants : Essuyer avec une matière absorbante (par ex., tissu, lainage). Nettoyer la surface à fond pour éliminer la contamination résiduelle. Pour l'élimination des déchets, voir la section 13 de la FDS.

Précautions relatives à l'environnement

Éviter le rejet dans les égouts, les cours d'eau ou sur le sol.

7. Manutention et stockage

Précautions relatives à la sûreté en matière de manutention

Récipient sous pression : ne pas perforer ni brûler, même après usage. Ne pas utiliser si le bouton de vaporisation est manquant ou défectueux. Ne pas pulvériser sur une flamme nue ou toute autre matière incandescente. Ne pas fumer pendant l'utilisation ou jusqu'à ce que la surface vaporisée soit complètement sèche. Ne pas couper, souder, braser, percer, broyer ou exposer les récipients à de la chaleur, à une flamme, à des étincelles ou à d'autres sources d'ignition. Tout matériel utilisé pour la manutention de ce produit doit être mis à la terre. Fermer le détendeur après chaque utilisation et lorsque la bouteille est vide. Protéger les contenants des dommages physiques; ne pas traîner, rouler, glisser ou laisser tomber. Lors du déplacement des réservoirs, même sur de courtes distances, utiliser un chariot (chariot de transport, chariot à main, etc.) conçu pour le transport de réservoirs. L'aspiration inverse de l'eau du récipient doit être évitée. Ne pas permettre le refoulement dans le récipient. Purger l'air du système avant d'introduire un gaz. Utiliser uniquement de l'équipement correctement spécifié qui est approprié pour ce produit, sa pression d'alimentation et sa température. En cas de doute, communiquez avec votre fournisseur de gaz. Ne pas réutiliser les récipients vides. Éviter tout contact avec les yeux. Éviter une exposition prolongée. Utiliser seulement dans les zones bien ventilées. Porter un équipement de protection individuelle approprié. Observer de bonnes pratiques d'hygiène industrielle.

Conditions de sûreté en matière de stockage, y compris les incompatibilités

Aérosol niveau 1.
Récipient sous pression. Protéger du rayonnement solaire et ne pas exposer à une température supérieure à 50 °C/122 °F. Ne pas perforer, incinérer ou écraser. Ne pas manipuler ou stocker à proximité d'une flamme nue, d'une source de chaleur ou d'autres sources d'ignition. Ce produit peut accumuler des charges statiques qui peuvent causer des étincelles et devenir une source d'ignition. Stocker dans des récipients bien fermés. Stocker dans un endroit bien ventilé. Les contenants stockés doivent être inspectés régulièrement pour leur condition générale et des fuites. Tenir hors de la portée des enfants. Entreposer à l'écart des substances incompatibles (consulter la section 10 de la FDS).

8. Contrôle de l'exposition/protection individuelle

Limites d'exposition professionnelle

Les constituants suivants sont les seuls constituants du produit qui possèdent une valeur PEL ou TLV ou autre limite d'exposition recommandée. À ce moment-ci, les autres constituants ne possèdent pas de limites d'exposition connues.

ÉTATS-UNIS. OSHA Tableau Z-1 Limites de contaminants aériens (29 CFR 1910.1000)

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	PEL (limite d'exposition admissible)	1900 mg/m3
		1000 ppm

ÉTATS-UNIS. Valeurs limites d'exposition de l'ACGIH

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	STEL	1000 ppm

États-Unis. NIOSH : Pocket Guide to Chemical Hazards (guide de poche des dangers des produits chimiques).

Composants	Type	Valeur
ÉTHANOL (CAS 64-17-5)	TWA	1900 mg/m3
		1000 ppm

États-Unis. Guides WEEL (niveau d'exposition environnemental sur le lieu de travail)

Composants	Type	Valeur
HYDROFLUOROCARBON 152A (CAS 75-37-6)	TWA	2700 mg/m3
		1000 ppm
